INTERNATIONAL JOURNAL OF SCIENCE

INDEX FOR 1978

VOLUMES 271 – 276

LONDON

MACMILLAN JOURNALS LTD

DATES AND PAGINATION OF WEEKLY ISSUES

Volume No.	Serial No.	Date of Issue		Pagination
271	5640	January	6	1–98
	5641		12	99–194
	5642		19	195–290
	5643		26	291–390
	5644	February	2	391–490
	5645		9	491–594
	5646		16	595–694
	5647		23	695–788
272	5648	March	2	1–110
	5649		9	111–194
	5650		16	195–296
	5651		23	297–388
	5652		30	389–480
	5653	April	6	481–568
	5654		13	569–656
	5655		20	657–742
	5656		27	743–840
273	5657	May	4	1–86
	5658		11	87–174
	5659		18	175–254
	5660		25	255–326
	5661	June	1	327–414
	5662		8	415–478
	5663		15	479–578
	5664		22	579–694
	5665		29	695–794
274	5666	July	6	1–102
	5667		13	103–198
	5668		20	199–300
	5669		27	301–408
	5670	August	3	409–520
	5671		10	521–628
	5672		17	629–730
	5673		24	731–830
	5674		31	831–930
275	5675	September	7	1–80
	5676		14	81–166
	5677		21	167–260
	5678		28	261–354
	5679	October	5	355–466
	5680		12	467–574
	5681		19	575–680
	5682		26	681–788
276	5683	November	2	1–102
	5684		9	103–198
	5685		16	199–306
	5686		23	307–428
	5687		30	429–546
	5688	December	7	547–654
	5689		14	655–742
	5690		21/28	743–852

AUTHOR INDEX

Aarkrog A. *see under* Solgaard P., **272,** 346
Aaronson S. A. *see under* Krakower J. M., **273,** 463
Abbotts J. *see under* Nader R., **274,** 95
Abdel-Aal O. Y. and Hall J. M. Opaque mineral alterations states correlated with temperature in an active geothermal system, **272,** 239
Abdel-Monem A. A. *see under* Ninkovich D., **276,** 574
Abdulkadir S. *see under* Akkermans A. D. L., **274,** 190
Abelson J. *see under* Otsuka A., **276,** 689
Ada G. L. *see under* Yap K. L., **273,** 238

SUBJECT INDEX

Aboriginal artefact. The source of chert for aboriginal artefacts in southwestern Australia (Quilty P. G.) **275,** 539

Abscisic acid. Abscisic acid and guard cells of *Commelina communis* L. (Itai C., Weyers J. D. B., Hillman J. R., Meidner H. and Willmer C.) **271,** 652

Effect of abscisic acid on solute transport in epidermal tissue (Itai C. and Meidner H.) **271,** 653

How plants respond to stress, *news and views,* (Jones H. G.) **271,** 610

Absorption. Absorption by water vapour at 7.1 cm^{-1} and its temperature dependence (Llewellyn Jones D. T., Knight R. J. and Gebbie H. A.) **274,** 876

Acanthamoeba. What is a myosin?: *Acanthamoeba* revisited, *news and views,* (Wagner P.) **274,** 846

Acanthaster. Is *Acanthaster planci* an *r*-strategist? (Moore R. J.) **271,** 56

Accelerator. Difficulties at PETRA worry designers of Europe's next accelerator, *news,* **276,** 658

Accelerator dating. Measurement of ^{10}Be in 1,000- and 5,000-year-old Antarctic ice (Raisbeck G. M., Yiou F., Fruneau M., Lieuvin M. and Loiseaux J. M.) **275,** 731

Acetycholine receptor. Antibody to acetycholine receptor increases degradation of junctional and extrajunctional receptors in adult muscle (Reiness C. G., Weinberg C. B. and Hall Z. W.) **274,** 68

Acetylcholine. Acetylcholine-induced channels and transmitter release at human endplates (Cull-Candy S. G., Miledi R. and Trautmann A.) **271,** 74

Acetylcholineinduced conductance fluctuations in cultured human myotubes (Bevan S., Kullberg R. W. and Rice J.) **273,** 469

α-Bungarotoxin enhances transmitter 'released' at the neuromuscular junction (Miledi R., Molenaar P. C. and Polak R. L.) **272,** 641

Coenzyme A is a purine nucleotide modulator of acetylcholine output (Cook M. A., Hamilton J. T. and Okwuasaba F. K.) **271,** 768

Experimental acceleration and slowing of REM sleep ultradian rhythm by cholinergic agonist and antagonist (Sitaram N., Moore A. M. and Gillin J. C.) **274,** 490

Quantal size is not altered by abrupt changes in nerve terminal volume (Van der Kloot W.) **271,** 561

Release of histamine from rat mast cells by acetylcholine (Fantozzi R., Masini E., Blandina P., Mannaioni P. F. and Bani-Sacchi T.) **273,** 473

Slow relaxations of acetylcholine-induced potassium currents in *Aplysia* neurones (Marty A. and Ascher P.) **274,** 494

Transient increase in muscarinic acetylcholine receptor and acetylcholinesterase in visual cortex on first exposure of dark-reared rats to light (Rose S. P. R. and Stewart M. G.) **271,** 169

Acetylcholine receptor. Change in synaptic channel gating during neuromuscular development (Sakmann B. and Brenner H. R.) **276,** 401

Composition of acetylcholine receptor protein from skeletal muscle (Shorr R. G., Dolly J. O. and Barnard E. A.) **274,** 283

Depolarising effect of curare on embryonic rat muscles (Ziskind L. and Dennis M. J.) **276,** 622

Electrophoretic movement and localisation of acetylcholine receptors in the embryonic muscle cell membrane (Orida N. and Poo M-m) **275,** 31

Gating properties of acetylcholine receptor in newly formed neuromuscular synapses (Brenner H. R. and Sakmann B.) **271,** 366

Induction of anti-idiotypic antibodies by immunisation with syngeneic spleen cells educated with acetylcholine receptor (Schwartz M., Novick D., Givol D. and Fuchs S.) **273,** 543

Insect acetylcholine receptors as a site of insecticide action (Gepner J. I., Hall L. M. and Sattelle D. B.) **276,** 188

Modulation of acetylcholine receptor in rat diaphragm by anti-receptor sera (Heinemann S., Merlie J. and Lindstrom J.) **274,** 65

Acetylcholine release. Coenzyme A or adenosine inhibiting acetylcholine release? *matters arising,* (Stone T. W.) **274,** 721

Acetylcholine synthesis. Evidence for extramitochondrial pyruvate dehydrogenase involved in acetylcholine synthesis in nerve endings (Lefresne P., Beaujouan J. C. and Glowinski J.) **274,** 497

Acetylcholinesterase. Neural induction of the 16S acetylcholinesterase in muscle cell cultures (Koenig J. and Vigny M.) **271,** 75

Rapid accumulation of high molecular weight acetylcholinesterase in transected sciatic nerve (Di Giamberardino L. and Couraud J. Y.) **271,** 170

Release of acetylcholinesterase from rat hemidiaphragm preparations stimulated through the phrenic nerve (Skau K. A. and Brimijoin S.) **275,** 224

Transient increase in muscarinic acetylcholine receptor and acetylcholinesterase in visual cortex on first exposure of dark-reared rats to light (Rose S. P. R. and Stewart M. G.) **271,** 169

Acetylcholine. Effect of osmolarity on quantal size, *matters arising,* (Marchbanks R. M.) **274,** 513

Acetylthiocholinesterase. A stereometric pattern of distribution of acetylthiocholinesterase in the deep layers of the superior colliculus (Graybiel A. M.) **272,** 539

Acid hydrolysis. Acid hydrolysis and α-hydroxy acids in meteorites, *matters arising,* Mizutani H. **276,** 738

Acinar cell. Are dopamine receptors accessible to intracellularly applied agonist? (House C. R., Ginsborg B. L. and Mitchell M. R.) **275,** 663

Acoustics. Theoretical Foundations of Non-Linear Acoustics (Rudenko O. V. and) *book review by* Crighton D. G. **271,** 592

ACTH. The ACTH 'family tree' of the rhesus monkey—changes with development (Silman R. E., Holland D., Chard T., Lowry P. J., Hope J., Robinson J. S. and Thorburn G. D.) **276,** 526

Actin-. Actin-related gelation of Ehrlich tumour cell extracts is reversibly inhibited by low concentrations of Ca^{2+} (Mimura N. and Asano A.) **272,** 273

Actin. Binding of monovalent and divalent myosin fragments onto sites on actin (Hill T. L.) **274,** 825

Cross-linked surface Ig attaches to actin (Flanagan J. and Koch G. L. E.) **273,** 278

Cytochalasin D induces the capping of both leukaemia viral proteins and actin in infected cells (Mousa G. Y., Trevithick J. R., Bechberger J. and Blair D. G.) **274,** 808

The amino acid sequence of *Physarum* actin (Vandekerckhove J. and Weber K.) **276,** 720

Actin. Actin filaments form the backbone of nemaline myopathy rods (Yamaguchi M., Robson R. M., Stromer M. H., Dahl D. S. and Oda T.) **271,** 265

An association between actin and the major histocompatibility antigen -N2 (Koch G. L. E. and Smith M. J.) **273,** 274

Assymetry in the primary structure of undegraded phytochrome (Remedios C. G. dos and Dickens M. J.) **276,** 733

Can a myosin molecule bind to two actin filaments? (Offer G. and Elliott A.) **271,** 325

Polarity of actin at the leading edge of cultured cells (Small J. V., Isenberg G. and Celis J. E.) **272,** 638

Actinia equina. Size-dependent dominance hierarchy in the anemone *Actinia equina* (Brace R. C. and Pavey J.) **273,** 752

Actinide. Actinide activities in water entering the northern North Sea (Murray C.N., Kautsky H., Hoppenheit M. and Domian M.) **276,** 225

Actinomycin D. Assessment of specificity of oestrogen receptor—DNA interaction by a competitive assay (Kallos J. and Hollander V. P.) **272,** 177

Possible transcriptional control of three polypeptides which accumulate in a temperature-sensitive mammalian cell line (Melero J. A. and Smith A. E.) **272,** 725

Action potential. Catecholamines of supposed inhibitory hypophysiotrophic function suppress action potentials in prolactin cells (Taraskevich P. S. and Douglas W. W.) **276,** 832

Neurotransmitters decrease the calcium component of sensory neurone action potentials (Dunlap K. and Fischbach G. D.) **276,** 837

Overcoming conduction failure in demyelinated nerve fibres by prolonging action potentials (Bostock H., Sherratt R. M. and Sears T. A.) **274,** 385

Pharmacological evidence for 'fast' sodium channels in nonspiking neurones (Lowe D. A., Bush B. M. H. and Ripley S. H.) **274,** 289

Activation. Mechanism of action of NH_4Cl and other weak bases in the activation of sea urchin eggs (Winkler M. M. and Grainger J. L.) **273,** 536

Active transport. Light in the middle of the tunnel, *news and views,* (Flanagan M. T.) **272,** 307

Acupuncture. CXBK mice deficient in opiate receptors show poor electroacupuncture analgesia (Peets J. M. and Pomeranz B.) **273,** 675

Acycloguanosine. 9-(2-Hydroxyethoxymethyl) guanine activity against viruses of the herpes group (Schaeffer H. J., Beauchamp L., Miranda P. de, Elion G. B., Bauer D. J. and Collins P.) **272,** 583

Adaptation. Long-term retention of single and multistate prismatic adaptation by humans (McGonigle B. O. and Flook J.) **272,** 364

Adaptive value. Adaptive value, entropy and survivorship curves (Demetrius L.) **275,** 213

Adenosine. Adenosine inhibits the accumulation of cyclic AMP in cultured brain cells (van Calker D., Müller M. and Hamprecht B.) **276,** 839

Coenzyme A or adenosine inhibiting acetylcholine release? *matters arising,* (Stone T. W.) **274,** 721

Adenylate cyclase. Complementation analysis of hormone-sensitive adenylate cyclase (Naya-Vigne J., Johnson G. L., Bourne H. R. and Coffino P.) **272,** 720

Synthetic α-adrenergic agonists are potent α-adrenergic blockers in human platelets (Jakobs K. H.) **274,** 819

Adenylate cyclase. Adenylate cyclase in a fibroblast mutant defective in glycolipid and glycoprotein synthesis (Anderson W. B., Jaworski C. J., Gallo M., Pastan I. and Pouysségur J.) **275,** 223

Mode of coupling between hormone receptors and adenylate cyclase elucidated by modulation of membrane fluidity (Rimon G., Hanski E., Braun S. and Levitzki A.) **276,** 394

Adipocyte. Insulin-dependent regulation of the insulin-sensitivity of adipocytes (Livingston J. N., Purvis B. J. and Lockwood D. H.) **273,** 394

Adjuvant. Adjuvant-induced thymus-derived suppressor cells of cell-mediated tumour immunity (Glaser M.) **275,** 654

Adrenal. Angiotensin II regulates its receptor sites in the adrenal glomerulosa zone (Hauger R. L., Aguilera G. and Catt K. J.) **271,** 176

Adrenal function. The ACTH 'family tree' of the rhesus monkey—changes with development (Silman R. E., Holland D., Chard T., Lowry P. J., Hope J., Robinson J. S. and Thorburn G. D.) **276,** 526

Adrenal gland. Calcium-dependent exocytosis in bovine adrenal medullary cells with leaky plasma membranes (Baker P. F. and Knight D. E.) **276,** 620

Adrenaline. Synthetic α-adrenergic agonists are potent α-adrenergic blockers in human platelets (Jakobs K. H.) **274,** 819

Bromocriptine-induced inhibition of plasma dopamine, noradrenaline and adrenaline responses to LH-RF (Van Loon G. R.) **275,** 331

Effect of L-triiodothyronine on (—)^{3}H-dihydroalprenolol binding and cyclic AMP response to (—)adrenaline in cultured heart cells (Tsai J. S. and Chen A.) **275,** 138

Adrenergic. Synthetic α-adrenergic agonists are potent α-adrenergic blockers in human platelets (Jakobs K. H.) **274,** 819

Adrenergic receptor. Agonist regulation of the human platelet α-adrenergic receptor (Cooper B., Handin R. I., Young L. H. and Alexander R. W.) **274,** 703

Alterations in β-adrenergic receptor binding during ethanol withdrawal (Banerjee S. P., Sharma V. K. and Khanna J. M.) **276,** 407

Amphetamine induces β-adrenergic receptor supersensitivity (Banerjee S. P., Sharma V. K., Kung L. S. and Chanda S. K.) **271,** 380

β-adrenergic receptors. Chronic guanethidine treatment increases cardiac β- adrenergic receptors (Glaubiger G., Tsai B. S., Lefkowitz R. J., Weiss B. and Johnson E. M. Jr) **273,** 240

Adrenoceptor. Possible role of cyclic nucleotides in regulation of noradrenaline release from rat pineal through presynaptic adrenoceptors (Pelayo F., Dubocovich M. L. and Langer S. Z.) **274,** 76

Adrenoreceptor. Colchicine potentiates β-adrenoreceptor-stimulated cyclic AMP in lymphoma cells by an action distal to the receptor (Insel P. A. and Kennedy M. S.) **273,** 471

Direct biochemical demonstration of two types of α-adrenoreceptor in rat brain (Miach P. J., Dausse J.-P. and Meyer P.) **274,** 492

Pharmacological classification of adrenergic α receptors in the guinea pig (Wikberg J.E.S.) **273,** 164

Tentative identification of β-adrenoreceptor subunits (Atlas D. and Levitski A.) **272,** 370

Direct evidence of two types of β adrenoreceptor binding site in lung tissue (Barnett D. B., Rugg E. L. and Nahorski S. R.) **273,** 166

Adrenoreceptor blocker. α- And β-adrenoreceptor blockers have opposite effects on energy metabolism of the central auditory system (Savaki H. E., Kadekaro M., Jehle J. and Sokoloff L.) **276,** 521

Adriamycin. Ethanol-induced tolerance to heat and to adriamycin (Li G. C. and Hahn G. M.) **274,** 699

Advisory Board for the Research Councils. Construction shares, *news,* **271,** 3

Aedes aegypti. Genetic structure of the East African domestic populations of *Aedes aegypti* (Tabachnick W. J. and Powell J. R.) **272,** 535

Aequorin. Calcium transients in aequorin-injected frog cardiac muscle (Allen D. G. and Blinks J. R.) **273,** 509

Aerosol. Do aerosol anomalies precede earthquakes? (Tributsch H.) **276,** 606

Aesthetic. Aesthetics and scientific progress—on the relationship between Art and Science Pollock M. **276,** 639

Afferent: Nociceptive. Primary afferent depolarisation of tooth pulp afferents is not affected by naloxone (Hu J. W., Dostrovsky J. O. and Sessle B. J.) **276,** 283

Affinity chromatography. Isolation of specific neurones by affinity methods (Dvorak, D. J., Gipps E. and Kidson C.) **271,** 564

Aflatoxin B_1. Cell specificity in metabolic activation of aflatoxin B_1 and benzo(*a*)pyrene to mutagens for mammalian cells (Langenback R., Freed H. J., Raveh D. and Huberman E.) **276,** 277

Africa. What next in the Sahel? *news,* (Collins P.) **273,** 484

Ageing. Thoughts on ageing Davies A. J. S. **276,** 851

Agglutination. Synthetic concanavalin A receptors and erythrocyte agglutination (Orr G. A. and Rando R. R.) **272,** 722

Enhanced agglutination of all the erythrocytes when only half are trypsinised (Gordon J. A. and Kuettner C. A.) **272,** 636

Agricultural research. Peer review clash in US agricultural research, *news,* **274,** 630

Agriculture. Agricultural efficiency, *news,* (Mellanby K.) **272,** 489

International research could ease world food problem, *news,* **274,** 7

Potato research (Harris P. M. *editor*) *book review by* Simmonds N. W. **275,** 77

The Inca's ancient answer to food shortage, *news,* (Weber E. J.) **272,** 486

Agriculture. Pioneer agriculture explosion and CO_2 levels in the atmosphere (Wilson A. T.) **273,** 40

Agriculture: prehistoric. C Content of human collagen as a measure of prehistoric diet in woodland North America (van der Merwe N. J. and Vogel J. C.) **276,** 815

Agrobacterium tumefaciens. Substrate induction of conjugative activity of *Agrobacterium tumefaciens* Ti plasmids (Petit A., Tempe J., Kerr A., Holsters M., Van Montagu M. and Schell J.) **271,** 570

Agropine. Agropine—a major new plasmid-determined metabolite

in crown gall tumours (Firmin J. L. and Fenwick G. R.) **276**, 842

Air current. Five-day oscillation in East African low-level jet (Asnani G. C.) **272**, 708

Air temperature. Sea level-air temperature correlations near a coastal zone (Tont S. A.) **276**, 171

Alaska. Glacier 'retreat' threatens Alaskan oil tanker route, *news*, **273**, 88

Albian. Evidence for an open seaway between northern and southern proto-Atlantic in Albian times (Förster R.) **272**, 158

Albumin. Calcium ion-dependent vesicle fusion in the conversion of proalbumin to albumin (Judah J. D. and Quinn P. S.) **271**, 384

Phospholipase A inhibition of opiate receptor binding can be reversed by albumin (Lin H-K. and Simon E. J.) **271**, 383

Alcohol. Alcohol in Britain *correspondence*, (Wilson C. A.) **271**, 606

Aldolase. Aldolase-catalysed inactivation of glyceraldehyde-3-phosphate dehydrogenase (Patthy L. and Vas M.) **276**, 94

Aldosterone. Phospholipase A and the mechanism of action of aldosterone (Yorio T. and Bentley P. J.) **271**, 79

Alfvén wave. Alfvén waves generated by an inverted plasma energy distribution (Hughes W. J., Southwood D. J., Mauk B., McPherron R. L. and Barfield J. N.) **275**, 43

Alga. Marine alga *Platymonas* sp. accumulates silicon without apparent requirement (Fuhrman J. A., Chisholm S. W. and Guillard R. R. L.) **272**, 244

Algal control. Cybernetic mechanism in lake plankton systems: how to control undesirable algae (Briand F. and McCauley E.) **273**, 228

Alkaline earth hexammine. Structures and molecular motions in alkaline earth hexammines (Glaunsinger W. S., White T. R., Von Dreele R. B., Gordon D. A., Marzke R. F., Bowman A. L. and Yarnell J. L.) **271**, 414

Alkaline Oxide. Defects in the Alkaline Earth Oxides (Henderson B. and) *book review by* Hall T. P. P. **271**, 590

Alkaline phosphatase. Stereochemistry of phosphoryl group transfer using a chiral [^{16}O, ^{17}O, ^{18}O] phosphate monoester: the stereochemical course of alkaline phosphatase (Jones S. R., Kindman L. A. and Knowles J. R.) **275**, 564

Alloantigen. Recognition and genetic control of helper determinants for cell surface antigen Thy-1 (Lake P. and Douglas T. C.) **275**, 220

Alloantigen: Thy-1. A new Thy-1 alloantigen as a temporal marker of T lymphocyte differentiation (Thomas D. B., Calderon R. A. and Blaxland L. J.) **275**, 711

Alloy. A new structural model for transition metal–metalloid glasses (Gaskell P. H.) **276**, 484

Electrical Properties of Metals and Alloys (Dugdale J. S., *editor*) *book review by* Rosenberg H. M. **272**, 106

Alloy. A new amorphous silicon-based alloy for electronic applications (Ovshinsky S. R. and Madan A.) **276**, 482

Allylisopropylacetamide. Allylisopropylacetamide restricts expression of minor globin gene in Friend cells (Rovera G., Aden D. and Surrey S.) **272**, 172

Alpha-helix. Assymetry in the primary structure of undegraded phytochrome (Remedios C. G. dos and Dickens M. J.) **276**, 733

Alternative technology. Leather science as alternative technology, *news*, (Calvert P.) **276**, 314

Altruism. The Limits of Altruism: An Ecologist's View of Survival (Hardin G.) *book review by* Jukes T. H. **276**, 130

Alumina. Blocking defects β''-alumina observed by high resolution electron microscopy (Bovin J.-O.) **273**, 136

Aluminium. Nucleation and growth of porous anodic films on aluminium (Thompson G. E., Furneaux R. C., Wood G. C., Richardson J. A. and Goode J. S.) **272**, 433

Sorption of phosphate by hydrolytic reaction products of aluminium (Ng Kee Kwong K. F. and Huang P. M.) **271**, 336

Alzheimer's disease. Paired helical filaments of the Alzheimer type in cultured neurones (De Boni U. and Crapper D. R.) **271**, 566

AM Herculis. Infrared light curves of AM Herculis (Jameson R. F., Akinci R., Adams D. J., Giles A. B. and McCall A.) **271**, 334

Amazon. Brazil learns its ecological lessons—the hard way, *news*, **275**, 684

Amensalism. Marine alga *Platymonas* sp. accumulates silicon without apparent requirement (Fuhrman J. A., Chisholm S. W. and Guillard R. R. L.) **272**, 244

American Association for the Advancement of Science. Race and IQ: Jensen retains fellowship, *news*, **271**, 699

The expert has no clothes, *news*, **271**, 698

Ames test. Cotton rat anomaly (McGregor D. B.) **274**, 21

Does carcinogenic potency correlate with mutagenic potency in the Ames assay? (Ashby J. and Styles J. A.) **271**, 452

Does carcinogenic potency correlate with mutagenic potency in the Ames assay? (Ames B. and Hooper K.) **274**, 19

Factors influencing mutagenic potency *in vitro* (Ashby J. and Styles J. A.) **274**, 20

International study of short-term carcinogenicity tests, *news and views*, **274**, 740

Metabolic deactivation of mutagens in the *Salmonella*–microsome test (De Flora S.) **271**, 455

US industry attacks Ames test *news*, **271**, 201

Amino acid. α-Hydroxycarobxylic acids in the Murchison meteorite (Peltzer E. T. and Bada J. L.) **272**, 443

Amino acid dating. γ-Carboxyglutamic acid in fossil bones and its significance for amino acid dating (King Jr K.) **273**, 41

Amino acid sequence. The amino acid sequence of *Physarum* actin (Vandekerckhove J. and Weber K.) **276**, 720

Aminoacylation. *In vivo* aminoacylation and 'processing' of turnip yellow mosaic virus RNA in *Xenopus laevis* oocytes (Joshi S., Haenni A. L., Hubert E., Huez G. and Marbaix G.) **275**, 339

Aminobutyric acid. An endogenous protein modulates the affinity of GABA and benzodiazepine receptors in rat brain (Guidotti A., Toffano G. and Costa E.) **275**, 553

GABA and benzodiazepine receptors, *news and views*, (Iversen L. L.) **275**, 477

GABA-induced conductance fluctuations in cultured spinal neurones (McBurney R. N. and Barker J. L.) **274**, 596

Is GABA release modulated by presynaptic receptors? *matters arising*, (Mitchell P. R. and Martin I. L.) **274**, 904

Aminopeptidase. Localisation and characterisation of aminopeptidases in the CNS and the hydrolysis of enkephalin (Shaw S. G. and Cook W. F.) **274**, 816

Ammonia. Change the nature of stratospheric aerosol collected at 34° S (Gras J. L.) **271**, 231

Amnesia. Dissociation between learning and remembering in organic amnesia (Huppert F. A. and Piercy M.) **275**, 317

Memory in monkeys severely impaired by combined but not by separate removal of amygdala and hippocampus (Mishkin M.) **273**, 297

AMP. Is there a circulating human thymic factor that induces cyclic AMP synthesis?—Reply (Astaldi A., Astaldi G. C. B., Schellekens P. Th. A. and Eijsvoogel V. P.) **271**, 666

5′ AMP is a direct precursor of cytokinin in *Dictyostelium discoideum* (Taya Y., Tanaka Y. and Nishimura S.) **271**, 545

Amphetamine. Amphetamine induces β-adrenergic receptor supersensitivity (Banerjee S. P., Sharma V. K., Kung L. S. and Chanda S. K.) **271**, 380

Amphibian. For herpetological novices—two field guides to amphibians and reptiles Cloudsley-Thompson J. L. **276**, 648

Amphiuma. Effect of calcium ionophore Br-X537A on renin synthesis and release in amphiuma means kidney culture (Worley, R. T. S., Rich G. T. and Pryor J. S.) **271**, 174

Anaemia. A common progenitor for human myeloid and lymphoid cells (Prchal J. T., Throckmorton D. W., Carroll A. J. III, Fuson E. W., Gams R. A. and Prchal J. F.) **274**, 590

Carcinogen-induced chromosome breakage in Fanconi's anaemia heterozygous cells (Auerbach D. and Wolman A. S. R.) **271**, 69

Anaerobic decomposition. Production of methane and carbon dioxide from methane thiol and dimethyl sulphide by anaerobic lake sediments (Zinder S. H. and Brock T. D.) **273**, 226

Anaesthetic. Where do general anaesthetics act? (Franks N. P. and Lieb W. R.) **274**, 339

Anaesthetic action. Degenerate perturbations of protein structure as the mechanism of anaesthetic action (Richards C. D., Martin K. Gregory S., Keightley C. A., Hesketh T. R., Smith G. A., Warren G. B. and Metcalfe J. C.) **276**, 775

Analgesia. CXBK mice deficient in opiate receptors show poor electroacupuncture analgesia (Peets J. M. and Pomeranz B.) **273**, 675

Opiate-like and abstinence-like effects of intracerebral histamine administration in rats (Glick S. D. and Crane L. A.) **273**, 547

Anatectic magmatism. Eastward migration of the Tuscan anatectic magmatism due to anticlockwise rotation of the Apennines (Civetta L., Orsi, G., Scandone P. and Pece R) **276**, 604

Anatomy. An anatomist's look at Leonardo, *news and views*, (Ford E. H. R.) **272**, 13

Andean Pact. Andean Pact propose research tax on 1st world, *news*, **275**, 474

Andesite. Andesitic volcanism and crustal evolution (Eichelberger J. C.) **275**, 21

Androgen. Artificial menstrual cycles, behaviour and the role of androgens in female rhesus monkeys (Michael R. P., Richter M. C., Cain J. A., Zumpe D. and Bonsall R. W.) **275**, 439

Angiotensin. Specific and irreversible block of the myotropic action of angiotensin II (Escher E. H. F., Nguyen T. M. D., Guillemette G. and Regoli D. C.) **275**, 145

Angiotensin II. Angiotensin II regulates its receptor sites in the adrenal glomerulosa zone (Hauger R. L., Aguilera G. and Catt K. J.) **271**, 176

Animal experiment. Government calls for cut-backs in animal experiments, *news*, **276**, 661

Animal feed. Antibiotics may stay in US animal feed, *news*, **274**, 632

Animal trace. World's oldest animal traces, *matters arising*, (Cloud P.) **275**, 344

World's oldest animal traces.—Reply, *matters arising*, (Clemmey H.) **275**, 344

Anorthosite. Rapakivi granite anorthosite and charnockitic plutonism (Hubbard F. H. and Whitley J. E.) **271**, 439

Anoxic basin. Consumption of dissolved nitrous oxide in an anoxic basin, Saanich Inlet British Columbia (Cohen Y.) **272**, 235

Anoxic basin. Fossil Holocene seaweed and attached calcareous polychaetes in an anoxic basin, Gulf of Mexico (Kennett J. P. and Penrose N. L.) **276**, 172

Anoxic water. Silicate in anoxic pore waters and oxidation effect during sampling (Loder T. C., Lyons W. B., Murray S. and McGuinness H. D.) **273**, 373

Ant. Production Ecology of Ants and Termites (Brian M. V. *editor*) *book review by* Cherrett J. M. **273**, 80

Antagonist: Narcotic. New structural concepts for narcotic antagonists defined in a 4-phenylpiperidine series (Zimmerman D. M., Nickander R., Horng J. S. and Wong D. T.) **275**, 332

Antarctic. Melting of Antarctic icebergs (Donaldson P. B.) **275**, 305

Antarctica. Factors controlling oxygen isotopic composition of fallen snow in Antarctica (Kato K.) **272**, 46

Non-biogenic fixed nitrogen in Antarctica and some ecological implications (Parker B. C., Heiskell L. E., Thompson W. J. and Zeller E. J.) **271**, 651

Antelope. Attraction of the tick *Ixodes neitzi* to twigs marked by the klipspringer antelope (Rechav Y., Norval R. A. I., Tannock J. and Colborne J.) **275**, 310

Ante-natal diagnosis. Antenatal diagnosis of genetic defects, *news and views*, (Williamson B.) **276**, 114

Denmark expands research on Ante-natal diagnosis (Godtfredsen S. E.) **276**, 111

Antheraea. A photoaffinity-labelled insect sex pheromone for the moth antheraea polyphemus (Ganjian I., Pettei M. J., Nakanishi K. and Kaissling K-E.) **271**, 157

Anthropology. Anthropology (Aiello L., Brett F., Coleman D. A., Olson T. R. and Weymes H. M.) **272**, 10

Antropology (Bilsborough A., Garlick J. P., Mascie-Taylor C. G. N. and Raspe P. D.) **272**, 10

Anthropology (Boyce A. J., Harrison G. A. and Reynolds V.) **272**, 10

Anthropology (Sunderland E.) **272**, 10

Botanical evidence linking the New Zealand Maoris with New Caledonia and the New Hebrides (Stevenson G.) **276**, 704

Palaeoanthropology: more than the sum of its parts, *correspondence*, (Campbell B. G.) **273**, 8

The Tasmanians: the longest isolation, the simplest technology, *news and views*, (Diamond J. M.) **273**, 185

Is British physical anthropology dying?, *news*, (Campbell B.) **271**, 196

The health of physical anthropology in Britain, *correspondence*, (Day M. H. and Wood B. A.) **272**, 10

Antibiotic. Antibiotics may stay in US animal feed, *news*, **274**, 632

Mechanism of resistance to thiostrepton in the producing-organism *Streptomyces azureus* (Cundliffe E.) **272**, 792

Phosphonopeptides, a new class of synthetic antibacterial agents (Allen J. G., Atherton F. R., Hall M. J., Hassall C. H., Holmes S. W., Lambert R. W., Nisbet L. J. and Ringrose P. S.) **272**, 56

Structure of vancomycin and its complex with acetyl-D-alanyl-D-alanine (Sheldrick G. M., Jones P. G., Kennard O., Williams D. H. and Smith G. A.) **271**, 223

Antibiotic resistance. Anaerobes and transferable drug resistance, *news and views*, (Saunders J. R.) **274**, 113

Identification of a conjugative R plasmid in *Bacteroides ochraceus* capable of transfer to *Escherichia coli* (Guiney D. G. Jr and Davis C. E.) **274**, 181

New transposons, *news and views*, (Saunders J. R.) **274**, 211

Antibiotic sensitivity. Mutations to increased antibiotic sensitivity in naturally-occuring gonococci (Eisenstein B. I. and Sparling P. F.) **271**, 242

Antibiotics. *Escherichia coli* resistance to β-lactam antibiotics through a decrease in the affinity of a target for lethality (Spratt B. G.) **274**, 713

Antibody. An antiserum against 9, 11 - azo - 15 - hydroxy - prosta 5, 13 - dienoic acid (Fitzpatrick F. A., Gorman R. R. and Bundy G. L.) **273**, 302

Anti anti-'x' antibodies, *correspondence*, (Gröschel-Stewart U.) **274**, 10

Multispecific antibodies, *matters arising*, (Cameron D. J. and Erlanger B. F.) **271**, 587

Multispecific antibodies — Reply, *matters arising*, (Secher D. S.) **271**, 588

Two distinct mechanisms of immune suppression by antibody (Hoffman M. K. and Kappler J. W.) **272**, 64

Antibody: Anti-idiotypic. Antigen antibody complexes elicit anti-idiotypic antibodies to self-idiotopes (Klaus G. G. B.) **272**, 265

Anti-idiotypic antibodies against anti- vitamin A transporting protein react with prealbumin (Sege K. and Peterson P. A.) **271**, 167

Induction of anti-idiotypic antibodies by immunisation with syngeneic spleen cells educated with acetylcholine receptor (Schwartz M., Novick D., Givol D. and Fuchs S.) **273**, 543

Antibody: Anti-RNP. Antibody to nuclear ribonucleoprotein penetrates live human mononuclear cells through Fc receptors (Alarcon-Segovia D., Ruiz-Arguelles A. and Fishbein E.) **271**, 67

Antibody: Carcinogen. Induction of antibodies against carcinogenic polycyclic aromatic hydrocarbons (Moolten F. L., Capparell N. J., Boger E. and Mahathalang P.) **272**, 614

Antibody formation. Influence of the major histocompatibility complex on lymphocyte interactions in antibody formation (Waldmann H., Pope H., Brent L. and Bighouse K.) **274**, 166

Antibody fragment. A specific glycoprotein as the target site of adhesion blocking Fab in aggregating *Dictyostelium* cells (Müller K. and Gerisch G.) **274**, 445

Antibody: HCG. Isolation of antibodies to HCG/LH from human sera (Wass M., McCann K. and Bagshawe K. D.) **274**, 368

Antibody: Histocompatibility. Hybrid cell lines secreting monoclonal antibody specific for major histocompatibility antigens of the mouse (Lemke H., Hämmerling G. J., Höhmann C. and Rajcwsky K.) **271**, 249

Monoclonal antibody to a human histocompatibility alloantigen, HLA-A2 (Parham P. and Bodmer W. F.) **276**, 397

Production *in vitro* of murine antibody to a human histocompatibility alloantigen (Lampson L. A., Levy R., Grumet F. C., Ness D. and Pious D.) **271**, 461

Antibody: HLA. Production of HLA antibody in mice immunised with syngeneic mouse-human hybrid cells containing human chromosome 6 (Aden D. P., Mausner R. and Knowles B. B.) **271**, 375

Antibody: Immunoglobulin M. Activation of latent Epstein–Barr virus by antibody to human IgM (Tovey M. G., Lenoir G. and Begon-Lours J.) **276**, 270

Antibody: Immunoglobulin E. Continuous production of monoclonal mouse IgE antibodies with known allergenic specificity by a hybrid cell line (Böttcher I., Hämmerling G. and Kapp J.-F.) **275**, 761

Antibody induction. Induction of specific antibodies to poly(ADP-ribose) in rabbits by double-stranded RNA, poly(A).poly(U) (Kanai Y., Sugimura T. and Matsushima T.) **274**, 809

Antibody: Monoclonal. Monoclonal antibodies against human lymphocyte antigens (Trucco M. M., Stocker J. W. and Ceppellini R.) **273**, 666

Antibody: Specific. A better cell line for making hybridomas secreting specific antibodies (Shulman M., Wilde C. D. and Köhler G.) **276**, 269

Antibody: Tumour. Toxicity of diphtheria toxin for lymphoblastoid cells is increased by conjugation to antilymphocytic globulin (Thorpe P. E., Ross W. C. J., Cumber A. J., Hinson C. A., Edwards D. C. and Davies A. J. S.) **271**, 752

Anti-coagulant. Is prostacyclin a circulating anti-coagulant? *news and views*, (Dollery C. T. and Hensby C. N.) **273**, 706

Antidepressant. Tricyclic antidepressants block histamine H_1 receptors of mouse neuroblastoma cells (Richelson E.) **274**, 176

Antidepressant drug. Brain histamine receptors as Targets for antidepressant drugs (Kanof P. D. and Greengard P.) **272**, 329

Antiferromagnetism. Nuclear antiferromagnetism, *news and views*, (Richards G.) **272**, 751

Antigen. Evolutionary substitutions and the antigenic structure of globular proteins (White T. J., Ibrahimi I. M. and Wilson A. C.) **274**, 92

Molecular variants of human Ia-like antigens (Ikeman R. L., Sullivan A. K., Kositsky R., Bartok K. and Jerry L. M.) **272**, 267

Transformation-specific antigen induced by oncogenic human adenovirus (Ledinko N.) **274**, 812

Transplantation antigens *per se* are poor immunogens within a species (Batchelor J. R., Welsh K. I. and Burgos H.) **273**, 54

Antigen chain. Heavy HLA-DR (Ia) antigen chain is controlled by the MHC region (Klareskog L., Rask L., Fohlman J. and Peterson P. A.) **275**, 762

Antigen: Histocompatibility. H-2 and HLA antigen structure, *news and views*, (Howard J.) **271**, 607

Incorporation of murine MHC antigens into liposome and their effect in the secondary mixed lymphocyte reaction (Curman B., Ostberg L. and Peterson P. A.) **272**, 545

Involvement of histocompatibility antigens in embryonic cell recognition events (McClay D. R. and Gooding L. R.) **274**,

367

Antigen: H-Y. Absence of H-Y antigen in XY females with dysgenetic gonads (Ghosh S. N., Shah P. N. and Gharpure H. M.) **276,** 180

Antigen: Ia. Guinea pig Ia antigens are not derivatised on trinitrophenyl-modified cells (Clement L. T., Thomas D. W., Kask A. M. and Shevach E. M.) **274,** 592

Occurrence of Ia antigens on tissues of non-lymphoid origin (Wiman K., Curman B., Forsum U., Klareskog L., Malmnäs-Tjernlund U., Rask L., Trägardh L. and Peterson P. A.) **276,** 711

Antigen: Leukaemia. Cell sorter analysis of leukaemia-associated antigens on human myeloid precursors (Janossy G., Francis G. E., Capellaro D., Goldstone A. H. and Greaves M. F.) **276,** 176

Antigen: Mitogenic. Evidence that the TSH receptor acts as a mitogenic antigen in Graves' disease (Mäkinen T., Wägar G., Apter L., Willebrand E. von and Pekonen F.) **275,** 314

Antigen receptor. Clones of alloreactive T cells (Fatham C. G. and Hengartner H.) **272,** 617

Antigen: *Trypanosoma.* Characterisation of the surface coat of *Trypanosoma congolense* , (Rovis L., Barbet A. F. and Williams R. O.) **271,** 654

Antigen: Tumour. Amino acid sequence homology between polyoma and SV40 tumour antigens deduced from nucleotide sequences (Friedmann T., Doolittle R. F. and Walter G.) **274,** 291

Antigen: Tumour-specific. 5- Bromodeoxyuridine induces expression of a tumour-specific surface antigen on normal avian cells (Biquard J. M. and Aupoix M.) **272,** 284

Characterisation of a tumour-specific antigen on the surface of feline lymphosarcoma cells (Snyder H. W. Jr., Hardy W. D. Jr., Zuckerman E. E. and Fleissner E.) **275,** 656

Influence of bromodeoxyuridine on viral and cellular gene expression, *news and views,* (Weiss R.) **272,** 206

Antigen: Viral. Expression of endogenous C-type viral antigen on normal mouse haemopoietic stem cells (Staber F. G., Schlafli E. and Moroni C.) **275,** 669

Antigenic variation. Antigenic heterogeneity of metacyclic forms of *Trypanosoma brucei* (Le Ray D., Barry J. D. and Vickerman K.) **273,** 300

Antigen-specific suppressor factor. T-cell lines producing antigen-specific suppressor factor (Kontiainen S., Simpson E., Bohrer E., Beverley P. C. L., Herzenberg L. A., Fitzpatrick W. C., Vogt P., Torano A., McKenzie I. F. C. and Feldmann M.) **274,** 477

Anti-intellectualism. "Anti-intellectualism" hits US basic research, *news,* **276,** 661

Antilymphocyte serum. Complete protection from low-dose streptozotocin-induced diabetes in mice (Rossini A. A., Williams R. M., Appel M. C. and Like A. A.) **276,** 182

Antimycotic. Mycolase a new kind of systemic antimycotic (Davies D. A. L. and Pope A. M. S.) **273,** 235

Antiparticle. Relative abundance of antiprotons and antihelium in the primary cosmic radiation (Badhwar G. D., Golden R. L., Lacy J. L., Zipse J. E., Daniel R. R. and Stephens S. A.) **274,** 137

Antiserum. Antibodies to probe development, *news and views,* (Heath J. K.) **275,** 10

Antisera to frog immunoglobulins cross-react with a periodate-sensitive cell surface determinant (Mattes M. J. and Steiner L. A.) **273,** 761

Antitrypsin. α1-Antitrypsin is an effector of immunological stasis (Arora P. K., Miller H. C. and Aronson L. D.) **274,** 589

Antiviral agent. Membrane leakiness after viral infection and a new approach to the development of antiviral agents (Carrasco L.) **272,** 694

Apennines. Eastward migration of the Tuscan anatectic magmatism due to anticlockwise rotation of the Apennines (Civetta L., Orsi, G., Scandone P. and Pece R) **276,** 604

Aplysia. Evidence for local hormonal communication between neurones in *Aplysia* (Branton W. D., Mayeri E., Brownell P. and Simon S. B.) **274,** 70

Soma potential of an interneurone controls transmitter release in a monosynaptic pathway in *Aplysia* (Shimahara T. and Peretz B.) **273,** 158

Apomixis. Apomixis may be widespread among the trees of the climax rain forest (Kaur A., Ha C. O., Jong K., Sands V. E., Chan H. T., Soepadmo E. and Ashton P. S.) **271,** 440

Appleton laboratory. Appleton and Rutherford to merge **276,** 109

Applied group theory. Induced Representations in Crystals and Molecules (Altmann S. L.) *book review by* Longuet-Higgins H. C. **274,** 403

Appropriate technology. Frelimo concentrates on the practical side of science, *news,* (Smith P. and Wield D.) **276,** 751

Aquila X-1. The nature of Aquila X-1 (Margon B., Katz J. I. and Petro L. D.) **271,** 633

ARAKS. ARAKS Controlled or puzzling experiment? (Cambou F., Lavergnat J., Migulin V. V., Morozov A. I., Paton B. E., Pellat R., Pyatsi A. Kh., Rème H., Sagdeev R. Z., Sheldon W. R. and Zhulin I. A.) **271,** 723

Arber W., From modest beginnings... *news,* (Roberts R.) **275,** 689

Archaean. A new microfossil assemblage from the Archaean of Western Australia (Dunlop J. S. R., Muir M. D., Milne V. A. and Groves D. I.) **274,** 676

Stable isotopic compositions of early Archaean sulphate deposits of probable evaporitic and volcanogenic origins (Lambert I. B., Donnelly T. H., Dunlop J. S. R. and Groves D. I.) **276,** 808

Were Archaean continental geothermal gradients much steeper than today? *matters arising,* (Drury S. A.) **274,** 720

Zonation of supracrustal relics in the Archaean of Sierra Leone, Liberia, Guinea and Ivory Coast (Rollinson H. R.) **272,** 440

Archaeology. Palaeolithic-Neolithic seed remains at Franchthi Cave Greece (Hansen J. and Renfrew J., M.) **271,** 349

Archaeology:. Rescue archaeology: new approaches needed, *news and views,* (Renfrew J.) **272,** 18

Archean. Were Archean continental geothermal gradients much steeper than those of today? (Burke K. and Kidd W. S. F.) **272,** 240

Argentina. Argentina: concern over continued disappearances **275,** 263

Argentina plans nuclear reprocessing plant, *news,* **275,** 580

Argentina: US National Academy of Sciences to send delegation, *news,* **271,** 397

Argentina – where thought is a crime, *news,* **275,** 470

International Union against Cancer, *correspondence,* (Tassart G.) **271,** 107

Statistician's plight *correspondence,* (Wynn H. P.) **273,** 96

Statistician's plight *correspondence,* (Noriega C.) **273,** 96

Argentina pressed to free jailed scientists, *news,* **273,** 418

Argentinia. Argentinian haematologist disappears, *correspondence,* (Lehmann H.) **272,** 396

Argentinian haematologist released, *correspondence,* **272,** 576

Arginase. Activated macrophages kill tumour cells by releasing arginase (Currie G. A.) **273,** 758

Arginine-specific reagent. Arginine-specific reagents remove sodium channel inactivation (Eaton D. C., Brodwick M. S., Oxford G. S. and Rudy B.) **271,** 473

Argon. Threshold effects in the excitation of autoionising states of argon atoms by electron impact (Wilden D. G., Comer J. and Hicks P. J.) **273,** 651

Ariane. Ariane heads south, *news,* (Schurring C.) **273,** 698

Armament. US refuses nuclear fuels to South Africa and Pakistan, *news,* **273,** 330

Armaments. Another year of armaments, *leading article,* **273,** 87

ARMS. Post-docs take up ARMS, *news,* **276,** 310

Arthropod. The Golgi complex and inter-relationships of arthropods, *matters arising,* (Manton S. M.) **276,** 849

Arthropoda. The Arthropoda (Manton S. M.) *book review by* Fryer G. **273,** 172

Arthropods. Water Balance in Land Arthropods (Edney E. B.) *book review by* Beament J. **272,** 473

Artificial intelligence. Artificial Intelligence and Natural Man (Boden M.) *book review by* Meltzer B. **272,** 651

Asbestos. Asbestos-mediated membrane uptake of benzo [α] pyrene observed by fluorescence spectroscopy (Lakowicz J. R. and Hylden J. L.) **275,** 446

Ascorbate. Ascorbate enhanced cytotoxicity of misonidazole (Josephy P. D., Palcic B. and Skarsgard L. D.) **271,** 370

Asia. Evidence of large Cainozoic crustal shortening of Asia (Molnar P. and Chen W.-P.) **273,** 218

Regional co-operative programmes, *news,* **274,** 634

Science and technology in Southeast Asia *news,* (Yuthavong Y.) **274,** 634

Aspartate aminotransferase. Comparison of the evolution rates of cytosolic and mitochondrial aspartate aminotransferase (Sonderegger P. and Christen P.) **275,** 157

Aspergillus nidulans. Mutations in *nir A* gene of *Aspergillus nidulans* and nitrogen metabolism (Rand K. N. and Arst H. N. Jr) **272,** 732

ASSESS II. ASSESS II a simulated mission of Spacelab, *review article,* (Wegmann H. M., Hermann R., Wingett C. M., Muizon M. de, Rouan D., Léna P., Wijnbergen J., Olthof H., Michel K. W., Werner Ch., Melchiorri F., Melchiorri B., Natale V., Falciani R., Smaldone L. R., Bussoletti E., Crawford J., Rothwell P., Taylor M., Beckman J. E., Dale D., Schmitt J. and Waard J. de) **275,** 15

Asteroid. Chiron's origin, *news and views,* (Hughes D. W.) **272,** 207

Expected shape distribution of asteroids obtained from laboratory impact experiments (Fujiwara A., Kamimoto G. and Tsukamoto A.) **272** 602

Origin of slow moving object Kowal (Connon Smith R.) **272,** 229

Asthenosphere. The asthenosphere as point defect zone, *news and views,* (Smith P. J.) **275,** 591

ASTMS. Plenty for GMAG to do, *leading article,* **276,** 1

ASTMS. ASTMS plans to radicalise university and health service research, *news,* (McKechnie S.) **276,** 7

Astroglial cell. Membrane specialisations between demyelinated axons and astroglia in chronic EAE lesions and multiple sclerosis plaques (Raine C. S.) **275,** 326

Astronaut. ESA names European candidates for first Spacelab mission, *news,* **271,** 4

Meaning not sentiment, *correspondence,* (Groot M. De) **272,** 750

NASA chooses its space lab candidates, *news,* **271,** 202

Soviets look after their cosmonauts, *news,* **271,** 105

Astronomer. Counting astronomers in Europe **274,** 731

Astronomical image. Faint images revealed, *news and views,* (Smith F. G.) **276,** 561

Photographic amplification of faint astronomical images (Malin D. F.) **276,** 591

Astronomical theory. An investigation of the astronomical theory of the ice ages, using a simple climatic ice sheet model (Pollard D.) **272,** 233

Astronomy. Big mirror for UK? *news,* **272,** 199

High energy neutrino astronomy (Eichler D. and Schramm D. N.) **275,** 704

International Ultraviolet Explorer to be launched this week, *news,* **271,** 299

Man and the Stars (Brown H.) *book review by* Meadows A. J. **276,** 148

On Stonehenge (Hoyle F.) *book review by* Meadows J. **271,** 189

Sociology of astronomical innovation, *news and views,* (Hughes D. W.) **271,** 210

Spain keeps bargaining for European observatories, *news,* **272,** 199

The New Challenge of the Stars (Moore P. and) *book review by* Hughes D. W. **273,** 326

The Wild Abyss: The Story of the Men who made Modern Astronomy (Christianson G. E.) *book review by* Rupert Hall A. **276,** 654

Astronomy for the amateur—pop astronomy books Hughes D. W. **276,** 653

Astronomy in the 1980s, *news,* **275,** 362

Astrotexts updated—recent textbooks on astronomy and astrophysics Hughes D. W. **272,** 110

Astronomy: Radio. Radioastronomical frequency for interstellar NH^+ (Wilson I. D. L. and Richards W. G.) **271,** 137

Astrophysics. Astrotexts updated – recent textbooks on astronomy and astrophysics Hughes D. W. **272,** 110

The significance of magnetospheric research for progress on astrophysics (Fälthammar C.-G., Akasofu S.-I. and Alfvén H.) **275,** 185

Ataxia telangiectasia. Deficient recovery from potentially lethal radiation damage in ataxia telangiectasia and xeroderma pigmentosum (Weichselbaum R. R., Nove J. and Little J. B.) **271,** 261

Identification of ataxia telangiectasia heterozygotes, a cancer prone population (Chen P. C., Lavin M. F., Kidson C. and Moss D.) **274,** 484

Athenosphere. Origin of olivine subgrain boundaries in mantle peridotites (Fleet M. E.) **275,** 48

Atlantic. Thermal alteration of Cretaceous black shale by basaltic intrusions in the Eastern Atlantic (Simoneit B. R. T., Brenner S., Peters K. E. and Kaplan I. R.) **273,** 501

Atlantic seaway. Evidence for an open seaway between northern and southern proto-Atlantic in Albian times (Förster R.) **272,** 158

Atlantis. Has Atlantis disappeared again? (Tarling D. H.) **275,** 271

Atlantis II Deep. Changing hydrothermal activity in the Atlantis II Deep geothermal system (Schoell M. and Hartmann M.) **274,** 784

Atmosphere. A simple calculation of ozone depletion by chlorofluoromethanes using a two-dimensional model (Pyle, J. A.) **271,** 42

Atmospheric gravity waves generated during a solar eclipse (Goodwin G. L. and Hobson G. J.) **275,** 109

Brightness oscillations of daytime sky (Clarke D.) **274,** 670

Climatological effects of atmospheric particulate pollution (Idso S. B. and Brazel A. J.) **274,** 781

Diffusion-coupled oxidation of atmospheric sulphur dioxide (Freiberg J.) **274,** 42

Earth's Aura (Young L. B.) *book review by* Houghton J. T. **271,** 691

Evidence of photochemical haze in the atmosphere of Greater London (Ball D. J. and Bernard R. E.) **271,** 733

Identification of lead compounds in urban air (Biggins P. D. E. and Harrison R. M.) **272,** 531

Increased atmospheric carbon dioxide and stratospheric ozone (Groves K. S., Mattingly S. R. and Tuck A. F.) **273,** 711

Isotopic composition of sulphur in atmospheric precipitation around Sudbury, Ontario (Nriagu J. O. and Coker R. D.) **274,** 883

Joule dissipation in F-region and equatorial spread-F events (Rajaraman T. N., Desai J. N., Degaonkar S. S. and Cole K. D.) **272,** 516

Natural enrichment of elements in snow (Weiss H. V., Herron M. M. and Langway C. C. Jr) **274,** 352

Numerical simulation of climate and climatic change (Gilchrist A.) **276,** 342

Ozone increase from Concorde operations? *news and views,* (Fabian P.) **272,** 306

Pioneer agriculture explosion and CO_2 levels in the atmosphere (Wilson A. T.) **273,** 40

Predicting concentrations in plumes subject to dry deposition (Prahm L. P. and Berkowicz R.) **271,** 232

Soil as a source or sink for atmospheric nitrous oxide (Freney J. R., Denmead O. T. and Simpson J. R.) **273,** 530

Solar modulation of atmospheric electrification and possible implications for the Sun-weatherrelationship (Markson R.) **273,** 103

Volcanic dust and changes in Northern Hemisphere temperature (Miles M. K. and Gildersleeves P. B.) **271,** 735

Volcanic dust influence on glacier mass balance at high latitudes (Bradley R. S. and England J.) **271,** 736

West Antarctic ice sheet and CO_2 greenhouse effect: a threat of disaster (Mercer J. H.) **271,** 321

Energy and the Atmosphere (Campbell I. M.) *book review by* Houghton J. T. **274,** 193

Extreme pollution sensitivity of grasses when SO_2 and NO_2 are present in the atmosphere together (Ashenden T. W. and Mansfield T. A.) **273,** 142

Atmosphere: Prehistoric. Past atmospheric composition and climate, gas parameters measured on ice cores (Berner W., Stauffer B. and Oeschger H.) **276,** 53

Atmosphere: Stellar. Stellar Atmospheres (Mihalas D.) *book review by* Pagel B. **276, 99**

Atmosphere: Vorticity. Solar plages and the vorticity of the Earth's atmosphere (Olson R. H., Roberts W. O., Prince H. D. and Hedeman E. R.) **274,** 140

Atmospheric chemistry. Recent developments in atmospheric chemistry (Thrush B. A.) **276,** 345

Atom: Split. The Self-Splitting Atom: A History of the Rutherford-Soddy Collaboration (Trenn T. J.) *book review by* Oliphant M. L. **274,** 723

Atomic Energy. The Menace of Atomic Energy (Nader R. and) *book review by* Flood M. **274,** 95

ATP. ATP levels modify the activation of the Na pump by external cations in squid axons (Beauge L. A. and DiPolo R.) **271,** 777

Vanadate inhibits the red cell (Na^+, K^+) ATPase from the cytoplasmic side (Cantley Jr L. C., Resh M. D. and Guidotti G.) **272,** 552

Commercial ATP containing traces of vanadate alters the response of (Na^++K^+) ATPase to external potassium (Beaugé L. A. and Glynn I. M.) **272,** 551

Influence of ATP and calcium on the cortical reaction in sea urchin eggs (Baker P. F. and Whitaker M. J.) **276,** 513

Stimulation of uridine uptake in 3T3 cells is associated with increased ATP affinity of uridine-phosphorylating system (Goldenberg G. J. and Stein W. D.) **274,** 475

ATPase. Ecto-ATPase deficiency in glia of seizure-prone mice (Trams E. G. and Lauter C. J.) **271,** 270

Commercial ATP containing traces of vanadate alters the response of (Na^++K^+) ATPase to external potassium (Beaugé L. A. and Glynn I. M.) **272,** 551

Transient kinetics of sarcoplasmic reticulum Ca^{2+}+Mg^{2+} ATPase studied by fluorescence (Dupont Y. and Leigh J. B.) **273,** 396

Vanadate inhibits the red cell (Na^+, K^+) ATPase from the cytoplasmic side (Cantley Jr L. C., Resh M. D. and Guidotti G.) **272,** 552

Auditory organisation. Difficulties in auditory organisation as a possible cause of reading backwardness (Bradley L. and Bryant P. E.) **271,** 746

Difficulties in auditory organisation as a possible cause of reading backwardness (Bradley L. and Bryant P. E.) **271,** 746

Auditory system. α- And β-adrenoreceptor blockers have opposite effects on energy metabolism of the central auditory system (Savaki H. E., Kadekaro M., Jehle J. and Sokoloff L.) **276,** 521

Echos of the bat's cry, *news and views,* (Altman J. and Chung S.-H.) **276,** 755

Phase-locking in goldfish saccular nerve fibres accounts for frequency discrimination capacities (Fay R. R.) **275,** 320

Audubon. Audubon: A Biography (Chancellor J.) *book review by* Perrins C. M. **276,** 138

Auerbach's plexus. Slow synaptic excitation mediated by serotonin in Auerbach's plexus (Wood J. D. and Mayer C. J.) **276,** 836

Aurora. Pulsating aurora, *review article,* (Johnstone A. D.) **274,** 119

Resonance region of a PC5 micropulsation examined by a dual auroral radar system (Walker A. D. M., Greenwald R. A., Stuart W. F. and Green C. A.) **273,** 646

Australia. Australian conservation, *correspondence*, (Costin A. B. and Coombs H. C.) **274,** 528

Contrasts between oceanic and continental 'unconformities' in the Oligocene of the Australian region (Carter A. N.) **274** 152

Austria. Austrian fraud trial adjourned, *news*, (Schoden H. and Darnhofer E.) **272,** 749

Austrian science journalists were warned, *correspondence*, (Grimburg W.) **271,** 7

Austria decides against nuclear energy: *news*, **276,** 112

Autoantibody. Most IgM-producing cells in the mouse secrete auto-antibodies (rheumatoid factor) (Dresser D. W.) **274,** 480

High proportion of Ig-producing cells making autoantibody in normal mice (Steele E. J. and Cunningham A. J.) **274,** 483

Autoimmune haemolytic anaemia. Suppressor T cells in experimental autoimmune haemolytic anaemia (Cooke A., Hutchings P. R. and Playfair J. H. L.) **273,** 154

Autoimmunity. Autoimmunity revisited, *news*, (Rose N. R.) **275,** 88

Auxin. Hormone binding in plants, *news and views*, (Lamb C. J.) **274,** 312

Avalanche. Angular localisation of proportional chamber avalanche (Mathieson E., Harris T. J. and Smith G. C.) **272,** 709

Rockslides and Avalanches (Voight B. *editor*) *book review by* Smalley I. J. **272,** 654

Axion. The context of the search for axions, *review article*, (Morgan D.) **274,** 22

Axolotl. Supernumerary limbs in the axolotl (Maden M. and Turner R. N.) **273,** 232

Axon. ATP levels modify the activation of the Na pump by external cations in squid axons (Beauge L. A. and DiPolo R.) **271,** 777

Ca pump driven by ATP in squid axons (DiPolo R.) **274,** 390

Influence of carbon dioxide on level of ionised calcium in squid axons (Bakre P. F. and Honerjäger) **273,** 160

Structural and functional restoration by collateral sprouting of hippocampal 5-HT axons (Azmitia E. C., Buchan A. M. and Williams J. H.) **274,** 374

Axon: Demyelinated. Membrane specialisations between demyelinated axons and astroglia in chronic EAE lesions and multiple sclerosis plaques (Raine C.S.) **275,** 326

Axon regeneration. Disorganised and 'excessive' reinnervation of frog cardiac ganglia (Ko C.-P. and Roper S.) **274,** 286

B Cell. A common progenitor for human myeloid and lymphoid cells (Prchal J. T., Throckmorton D. W., Carroll A. J. III, Fuson E. W., Gams R. A. and Prchal J. F.) **274,** 590

Different rules govern help for cytotoxic T cells and B cells (Bennink J. R. and Doherty P. C.) **276,** 829

Electrophoretic mobility as a sensitive probe of lectin-lymphocyte interaction (Blume P., Malley A., Knox R. J. and Seaman G. V. F.) **271,** 378

Evidence for a C-terminal tyrosine residue in human and mouse B-lymphocyte membrane β chains (McIlhinney R. A. J., Richardson N. E. and Feinstein A.) **272,** 555

Immune response (*Ir*) genes expressed at macrophage-B lymphocyte interactions (Howie S. and Feldmann M.) **273,** 664

Induction of IgG production in human B lymphoblastoid cell lines with normal human T cells (Kishimoto T., Hirano T., Kuritani T., Yamamura Y., Ralph P. and Good R. A.) **271,** 756

Molecular variants of human Ia-like antigens (Ikeman R. L., Sullivan A. K., Kositsky R., Bartok K. and Jerry L. M.) **272,** 267

Myeloid colony-forming cells express human B lymphocyte antigens (Kaplan J., Inoue S. and Ottenbreit M. J.) **271,** 458

Receptor interactions on the membrane of resting and activated B cell (Forni L. and Coutinho A.) **273,** 304

Spontaneous murine B-cell leukaemia (Slavin S. and Strober S.) **272,** 624

Autoimmune and polyclonal B cell response during murine malaria (Rosenberg Y. J.) **274,** 170

Cyclophosphamide inhibited B cell receptor regeneration as a basis for drug-induced tolerance (Shand F. L. and Howard J. G.) **271,** 255

Stable variants affectingB cell alloantigens in human lymphoid cells (Gladstone P. and Pious D.) **271,** 459

T and B cell hybridomas, *news and views*, (Simpson E.) **272,** 751

B cell marker. Specific insulin binding site on T and B lymphocytes as a marker of cell activation (Helderman J. H. and Strom T. B.) **274,** 62

B lymphocyte. Accessory cell requirement for anti-IgM-induced proliferation of B lymphocytes (Mongini P., Friedman S. and Wortis H.) **276,** 709

Babbage, C. Ancestral figure of computing (Dubbey J. M.) *book review by* Hyman A. **272,** 779

Bacillus megaterium. Identification of the binding protein which may be the target of penicillin action in *Bacillus megaterium* (Reynolds P. E., Shepherd S. T. and Chase H. A.) **271,** 568

Bacillus subtilis. β Subunit of bacterial RNA polymerase is responsible for streptolydigin resistance in *Bacillus subtilis* (Halling S. M., Burtis K. C. and Doi R. H.) **272,** 837

Localised insertion of new cell wall in *Bacillus subtilis* (Pooley H. M., Schlaeppi J.-M. and Karamata D.) **274,** 264

Bacillus subtilis. New cluster of ribosomal genes in *Bacillus subtilis* with regulatory role in sporulation (Trowsdale J., Shiflett M. and Hoch J. A.) **272,** 179

Background radiation. Interpretation of observed cosmic microwave background radiation (Pollaine S.) **271,** 426

Bacteria: Photosynthetic. Mass mortality of photosynthetic bacteria as a mechanism for dark lamina formation in sediments of the Black Sea (Dickman M. and Artuz I.) **275,** 191

Bacterium. The proton pump is a molecular engine of motile bacteria (Glagolev A. N. and Skulachev V. P.) **272,** 280

Bacteroides. Identification of a conjugative R plasmid in *Bacteroides ochraceus* capable of transfer to *Escherichia coli* (Guiney D. G. Jr and Davis C. E.) **274,** 181

Bacteroids. Anaerobes and transferable drug resistance, *news and views*, (Saunders J. R.) **274,** 113

Baffin Island. Holocene palaeo-wind evidence from palynology in Baffin Island (Nichols H., Kelly P. M. and Andrews J. T.) **273,**

β''-alumina. Blocking defects β''-alumina observed by high resolution electron microscopy (Bovin J.-O.) **273,** 136

Bangladesh. Bangladesh plans nuclear research centre . . . *news*, (Kabir M.) **271,** 701

Bangladesh plans to exploit its natural gas, *news*, (Kabir M.) **272,** 200

Bangladesh scientists strike for more pay, *news*, (Kabir M.) **273,** 483

Bangladesh sets up Institute of Nuclear Agriculture, *news*, (Kabir M.) **271,** 497

Barbiturate. Barbiturate-induced slow outward currents in *Aplysia* neurones (Cote I. L., Zbicz K. L. and Wilson W. A.) **274,** 594

Barents Sea. The key to sources of the Pliocene and Pleistocene glaciation is at the bottom of the Barents Sea (Kvasov D. D. and Blazchishin A. I.) **273,** 138

Barley. Barley handbook (Briggs D. E. *editor*) *book review by* Dale J. E. **275,** 676

Barnacle. Neuronal properties underlying processing of visual information in the barnacle (Stuart A. E. and Oertel D.) **275,** 287

Barrier reef. Submerged early Holocene barrier reef south-east Florida shelf (Lighty R. G., Macintyre I. G. and Stuckenrath R.) **276,** 59

Basalt. Behaviour of rare earth elements during submarine weathering of tholeiitic basalt (Ludden J. N. and Thompson G.) **274,** 147

A reduction in $^{87}Sr/^{86}Sr$ during basalt alteration (Hawkesworth C. J. and Morrison M. A.) **276,** 381

Vesicularity of basalt erupted at Reykjanes Ridge crest (Duffield W. A.) **274,** 217

Basalt: Deep-sea. Mantle $^{40}Ar/^{36}Ar$ trapped in Cretaceous deep-sea basalts (Takaoka N. and Nagao K.) **276,** 491

Basalt: Pillow. Seawaterbasalt ratio effects on the chemistry and mineralogy of spilites from the ocean floor (Seyfried W. E. Jr, Mottl M. J. and Bischoff J. L.) **275,** 211

Basaltic liquid. Olivine fractionation equations for basaltic and ultrabasic liquids (Pearce T. H.) **276,** 771

Base substitution. Molecular basis of base substitution hotspots in *Escherichia coli* (Coulondre C., Miller J. H., Garabaugh P. J. and Gilbert W.) **274,** 775

Basin. The Ocean Basins and Margins (Nairn A. E. M. *editor*) *book review by* Vine F. J. **274,** 518

Bass. Effects of thermal effluent on body condition of largemouth bass (Gibbons J. W., Bennett D. H., Esch G. W. and Hazen T. C.) **274,** 470

Bass trombone. Improving the timbre and responsiveness of a bass trombone (Pratt, R. L., Bowsher J. M. and Smith R. A.) **271,** 146

Battery. Advanced batteries, *review article*, (Tofield B. C., Dell R. M. and Jensen J.) **276,** 217

Bay of Biscay. Rifting crustal attenuation and subsidence in the Bay of Biscay (Charpal O. de Guennoc P., Montadert L. and Roberts D. G.) **275,** 706

Bay of Fundy. Bedforms and their hydraulic stability relationships in a tidal environment, Bay of Fundy, Canada (Dalrymple R. W., Knight R. J. and Lambiase J. J.) **275,** 100

Bedform. Bedforms and their hydraulic stability relationships in a tidal environment, Bay of Fundy, Canada (Dalrymple R. W., Knight R. J. and Lambiase J. J.) **275,** 100

Bee. Temporal decline in attractiveness of honeybee queen tracks (Juska A.) **276,** 261

Beetle. A horned beetle which fights (Palmer T. J.) **274,** 583

Behaviour. A horned beetle which fights (Palmer T. J.) **274,** 583

Animal behaviour, *news*, (Mellanby K.) **275,** 82

Animal sounds: coloratura and basso profundo, *news and views*, **271,** 207

Bats avoid moving objects more successfully than stationary ones (Jen P. H.-S. and McCarthy J. K.) **275,** 743

Biological Determinants of Sexual Behaviour (Hutchison J. B. *editor*) *book review by* Dixson A. **273,** 578

Chemical Control of Insect Behaviour (Shorey H. H. and *editor*) *book review by* Pickett J. A. **271,** 190

Cholinergic link in yawning, *matters arising*, (Cowan A.) **271,** 187

Climate and reproduction of grizzly bears in Yellowstone National Park (Picton H. D.) **274,** 888

Continuity and versatility in bird song: support for the monotony-threshold hypothesis (Kroodsma D. E.) **274,** 681

Determination of critical variables in a microbial predator-prey system by catastrophe theory (Bazin M. J. and Saunders P. T.) **275,** 52

Do aerosol anomalies precede earthquakes? (Tributsch H.) **276,** 606

Effect of reduced litter size on the suckling behaviour of developing rats (Teicher M. H. and Kenny J. T.) **275,** 644

Elements of the Behavioural Code (DeFeudis F. V. and) *book review by* Rosenzweig M. **275,** 256

Feeding, blood glucose and plasma insulin of mice at dusk (Petersen S.) **275,** 647

Functions of the septo-hippocampal system, *news and views*, (Black A. H.) **271,** 208

How Animals Communicate (Sebeok T. A. *editor*) *book review by* Slater P. J. B. **275,** 778

Inbreeding and dispersal in the great tit (Greenwood P. J., Harvey P. H. and Perrins C. M.) **271,** 52

Male mating experience and competitive courtship success in *Drosophila melanogaster* (Markow T. A., Quaid M. and Kerr S.) **276,** 821

Mammals, resources and reproductive strategies, *review article*, (Clutton-Brock T. H. and Harvey P. H.) **273,** 191

On Human Nature (Wilson E. O.) *book review by* Smith J. M. **276,** 120

Pheromonal chirality and integrity of aggregation response in southern species of the bark beetle *Ips* sp. (Vite J. P., Ohloff G. and Billings R. F.) **272,** 817

Pineal eye and behaviour in *Xenopus* tadpoles (Roberts A.) **273,** 774

Prevalence of male brood care in teleosts, *matters arising*, (Loiselle P. V.) **276,** 98

Prevalence of male brood care in teleosts—Reply, *matters arising*, (Dawkins R.) **276,** 98

Primatology studies and methodology (Clutton-Brock T. H. *editor*) *book review by* Deag J. M. **271,** 786

Ra.., male mating advantage, *matters arising*, (Spiess E. B. and Ehrman L.) **272,** 188

Resonant wing systems in the Australian whistling moth *Hecatesia* (Agarasidae, Lepidoptera) (Bailey W. J.) **272,** 444

Selfish genes, evolutionary games, and the adaptiveness of behaviour (Parker G. A.) **274,** 849

Song repertoires and territory defence in the great tit (Krebs J., Ashcroft R. and Webber M.) **271,** 539

Sunset and the orientation of a nocturnal migrant bird (Moore F. R.) **274,** 154

Test of optimal sampling by foraging great tits (Krebs J. R., Kacelnik A. and Taylor P.) **275,** 27

Phenomenology and the Science of Behaviour (Thines G.) *book review by* Barnes-Gutteridge W. **272,** 292

Resistance of morphine-seeking behaviour in rats to pharmacological and behavioural 'treatments' (Mumford L., Teixeira A. R. and Kumar R.) **272,** 167

Thermoregulation and the maternal behaviour of the rat (Croskerry P. G., Smith G. K. and Leon M.) **273,** 299

Ultrasonic vocalisations facilitate sexual behaviour of female rats (McIntosh T. K., Barfield R. J. and Geyer L. A.) **272,** 163

Behaviour: Paternal. Paternal behaviour in fishes: a question of investment, timing or rate? *matters arising*, Baylis J. R. **276,** 738

Behaviour: Sexual. Artificial menstrual cycles, behaviour and the role of androgens in female rhesus monkeys (Michael R. P., Richter M. C., Cain J. A., Zumpe D. and Bonsall R. W.) **275,** 439

Deep croaks and fighting assessment in toads *Bufo bufo* (Davies N. B. and Halliday T. R.) **274,** 683

Interest of mice in conspecific male odours is influenced by degree of kinship (Gilder P. M. and Slater P. J. B.) **274,** 364

Behaviour: Social. Interest of mice in conspecific male odours is influenced by degree of kinship (Gilder P. M. and Slater P. J. B.) **274,** 364

Suppression of oestrogen-induced LH surges by social subordination in talapoin monkeys (Bowman L. A., Dilley S. R. and Keverne E. B.) **275,** 56

Benioff Zone. Cordilleran Benioff Zones (Fucugauchi J. U.) **275,** 464

Benthic nutrient. Benthic nutrient regeneration and high rate of primary production in continental shelf waters, *matters arising*, (Carpenter E. J. and McCarthy J. J.) **274,** 188

Benzo[a]pyrene. Asbestos-mediated membrane uptake of benzo [*a*] pyrene observed by fluorescence spectroscopy (Lakowicz J. R. and Hylden J. L.) **275,** 446

Benzo(a)pyrene. Cell specificity in metabolic activation of aflatoxin B_1 and benzo(*a*)pyrene to mutagens for mammalian cells (Langenback R., Freed H. J., Ravch D. and Huberman E.) **276,** 277

Human pulmonary alveolar macrophages metabolise benzo(*a*-)pyrene to proximate and ultimate mutagens (Harris C. C., Hsu I. C., Stoner G. D., Trump B. F. and Selkirk J. K.) **272,** 632

Benzodiazepine. Benzodiazepines specifically modulate GABA-mediated postsynaptic inhibition in cultured mammalian neurones (Macdonald R. and Barker J. L.) **271,** 563

GABAergic modulation of benzodiazepine binding site sensitivity (Tallman J. F., Thomas J. W. and Gallager D. W.) **274,** 383

Benzodiazepine receptor. An endogenous protein modulates the affinity of GABA and benzodiazepine receptors in rat brain (Guidotti A., Toffano G. and Costa E.) **275,** 553

GABA and benzodiazepine receptors, *news and views*, (Iversen L. L.) **275,** 477

Labelling of benzodiazepine receptors *in vivo* (Williamson M. J., Paul S. M. and Skolnick P.) **275,** 551

Berenil. Trypanocides, *correspondence*, (Williamson J.) **276,** 10

Beryllium. Measurement of ^{10}Be in 1,000- and 5,000-year-old Antarctic ice (Raisbeck G. M., Yiou F., Fruneau M., Lieuvin M. and Loiseaux J. M.) **275,** 731

Beryllium. Uniform distribution of BeO particles in Be casting produced in rocket free fall (Wouch G., Frost R. T., Pinto N. P., Keith G. H. and Lord A. E. Jr) **274,** 235

Best C. H. *obituary* (Best C. H.) **274,** 99

Big Bang. A sensitive ear for the Big Bang, *news*, (Rowan-Robinson M.) **275,** 687

Baryon symmetric big bang cosmology, *review article*, (Stecker F. W.) **273,** 493

Bile salt. Bile salt sensitivity of *Escherichia coli* χ 1776 (Hunter J. R., Ellwood D. C., Atkinson A. and Greenaway P. J.) **275,** 70

Bilirubin. Structure of di-isopropylammonium bilirubinate (Mugnoli A., Manitto P. and Monti D.) **273,** 568

Biochemistry. Biochemistry: The Chemical Reactions of Living Cells (Metzler D. E., *editor*) *book review by* Saggerson E. D. **272,** 100

Biomolecular Information Theory (Fraga S.,) *book review by* Robson B. **276,** 540

The origins of modern biochemistry, *news and views*, (Olby R.) **274,** 310

Biochemistry: Molecular. Molecular biochemistry (Gabler R.) *book review by* Jennings B. **275,** 76

Biogeography. Biochemical evidence of a former link between Australia and the Mascarene Islands (Bell E. A. and Evans C. S.) **273,** 295

Bioinorganic Chemistry. Bioinorganic Chemistry (Ochiai E.-I.) *book review by* Thompson A. J. **274,** 406

Biological control. Characteristics of successful natural enemies in models of biological control of insect pests (Beddington J. R., Free C. A. and Lawton J. H.) **273,** 513

Biology: Mathematical. Mathematical biologist's potpourri—recent textbooks on the use of mathematical models, in biology Lawton J. **272,** 90

Biomathematics. Biomathematics and cell kinetics, *news and views*, (MacDonald N.) **272,** 310

Biomedical research. Kennedy plans hearings on biomedical research, *news*, **276,** 553

Medical education and biomedical research: uneasy equilibrium, *news*, (Silver G. A.) **271,** 392

Biophysics. Biophysik: Ein Lehrbuch (Hoppe W., *editor*) *book review by* Engel J. **271,** 287

Biophysics texts Cammack R. **272,** 96

Biopolar cell. Horizontal cells influence membrane potential of biopolar cells in the retina of the turtle (Marchiafava P. L.) **275,** 141

Biostratigraphy. Biostratigraphy of Seymour Island, Antarctica — Reply, *matters arising*, (Hall S. A.) **271,** 586

Biostratigraphy of Seymour Island, Antarctica, *matters arising*, (Elliot D. H. and Zinsmeister W. J.) **271,** 586

Planktonic foraminiferal biostratigraphy in the Equatorial Pacific (Thompson P. R. and Sciarrillo J. R.) **276,** 29

Biotite. Implications on unknown radioactivity of giant and dwarf

haloes in Scandinavian rocks (Gentry R. V., Christie W. H., Smith D. H., Boyle J. W., Cristy S. S. and McLaughlin J. F.) **274,** 457

Biowarfare. Biowarfare lab goes civil, *news,* **272,** 7

Birch-sap tapping. Soviets rap birch-sap tappers, *news,* **273,** 90

Bird. Avian Breeding Cycles (Murton R. K. and) *book review by* Krebs J. **273,** 692

Equalisation of prey numbers by migratory shore birds (Schneider D.) **271,** 353

Granivorous Birds in Ecosystems (Pinowski J. and *editor*) *book review by* Newton I. **273,** 81

Handbook of the Birds of Europe, the Middle East and North Africa: The Birds of the Western Palearctic (Cramp S., *et al., editor*) *book review by* Perrins C. M. **272,** 652

Sunset and the orientation of a nocturnal migrant bird (Moore F. R.) **274,** 154

Bird conservation. Contributions to conservation—stimulating bird conservation Andrews J. **276,** 644

Bird reserve. Minsmere Portrait of a Bird Reserve (Axell H. and) *book review by* Perrins C. M. **271,** 96

Bird song:. Continuity and versatility in bird song: support for the monotony-threshold hypothesis (Kroodsma D. E.) **274,** 681

Biskupin. Problems of preserving a 2,500-year-old township, *news,* **276,** 202

Bison. Bison trouble, *news,* **275,** 83

Bithorax. A gene complex controlling segmentation in *Drosophila, review article,* (Lewis E. B.) **276,** 565

Black hole. Classical instability of naked singularity (Felice F. de) **273,** 429

Definition of a black hole (Lee C. W.) **275,** 725

Popularising black holes (Asimov I.) *book review by* Znajek R. **272,** 784

Search for high energy γ-ray bursts from evaporation of primordial black holes (Fegan D. J., McBrien B., O'Brien D. and O'Sullivan C.) **271,** 731

Thermal continuum from accretion disks in quasars (Shields G. A.) **272,** 706

A black hole in the centre of M89? *news and views,* (Pringle J.) **274,** 419

On falling through a black hole into another universe (Birrell N. D. and Davies P. C. W.) **272,** 35

Black Sea. Mass mortality of photosynthetic bacteria as a mechanism for dark lamina formation in sediments of the Black Sea (Dickman M. and Artuz I.) **275,** 191

Blastocyst. Transfer of embryonic nuclei to fertilised mouse eggs and development of tetraploid blastocysts (Modlinski J. A.) **273,** 466

Bleomycin. Bleomycin causes release of nucleosomes from chromatin and chromosomes (Kuo M. T. and Hsu T. C.) **271,** 83

Blind fish. The blind fishes of Persia, *news and views,* (Smith A.) **271,** 711

Blood. Fibronectins—adhesive glycoproteins of cell surface and blood, *review article,* (Yamada K. M. and Olden K.) **275,** 179

Blood coagulation. A two-step fibrinogen-fibrin transition in blood coagulation (Blombäck B., Hessel B., Hogg D. and Therkildsen L.) **275,** 501

Bloom's syndrome. Effect of cocultivation on sister chromatid exchange frequencies in Bloom's syndrome and normal fibroblast cells (Tice R., Windler G. and Rary J. M.) **273,** 538

Blueschist. Coaxial pure shear in Jamaican blueschists and deformation associated with subduction (Draper G.) **275,** 735

Intense progressive shear in the He de Groix blueschists and compatibility with subduction or obduction (Quinquis H., Audren Cl., Brun J. F. and Cobbold P. R.) **273,** 43

Bode's law. Re-evaluating Bode's law of planetary magnetism (Russell C. T.) **272,** 147

Body. The Body in Question (Miller J.) *book review by* French R. K. **276,** 640

Bombesin. Bombesin-like immunoreactivity in the lung (Wharton J., Polak J. M., Bloom S. R., Ghatei M. A., Solcia E., Brown M. R. and Pearse A. G. E.) **273,** 769

Bond dynamics. Hydrogen bond dynamics in solution (Bournay J. and Robertson G. N.) **275,** 46

Bone formation. 24, 25-Dihydroxyvitamin D is a metabolite of vitamin D essential for bone formation (Ornoy A., Goodwin D., Noff D. and Edelstein S.) **276,** 517

Bone marrow. Loss of immunoreactivity in long-term bone marrow culture (Dexter T. M. and Spooncer E.) **275,** 135

Bone marrow cell. Myeloid colony-forming cells express human B lymphocyte antigens (Kaplan J., Inoue S. and Ottenbreit M. J.) **271,** 458

Bone: Resorbing. Resorbing bone is chemotactic for monocytes (Mundy G. R., Varani J., Orr W., Gondek M. D. and Ward P. A.) **275,** 132

Bone resorption. Direct resorption of bone by human breast cancer cells *in vitro* (Eilon G. and Mundy G. R.) **276,** 726

Boophilus microplus. Immunosuppression by *Babesia bovis* against its tick vector, *Boophilus microplus,* (Callow L. L. and Stewart N. P.) **272,** 818

Virus-like particles pathogenic to salivary glands of the tick *Boophilus microplus* (Megaw M. W. J.) **271,** 483

Boycott. Boycotts and repressive regimes, *correspondence,* (Richfield J. M.) **272,** 396

Compulsory boycott, *correspondence,* (Elens A.) **275,** 8

In support of boycotts, *correspondence,* (Hoffenberg R.) **271,** 401

Why you should boycott the Russians, *news,* (Turchin V.) **273,** 256

Bragg W. H. William Henry Bragg, 1862–1942: Man and Scientist (Caroe G. M.) *book review by* Perutz M. F. **276,** 537

Brain. A stereometric pattern of distribution of acetylthiocholinesterase in the deep layers of the superior colliculus (Grayhiel A. M.) **272,** 539

Asymmetrical Function of the Brain (Kinsbourne M. *editor*) *book review by* Coltheart M. **276,** 101

Binding of ^{3}H-neuroleptics and ^{3}H-apomorphine in schizophrenic brains (Lee T., Seeman P., Tourtellotte W. W., Farley I. J. and Hornykeiwicz O.) **274,** 897

Direct biochemical demonstration of two types of α-adrenoreceptor in rat brain (Miach P. J., Dausse J.-P. and Meyer P.) **274,** 492

Discussion on interactionism (Popper K. R. and) *book review by* Zangwill O. L. **272,** 770

Dopamine receptors localised on cerebral cortical afferents to rat corpus striatum (Schwarcz R., Creese I., Coyle J. T. and Snyder S. H.) **271,** 766

Ecto-ATPase deficiency in glia of seizure-prone mice (Trams E. G. and Lauter C. J.) **271,** 270

Evidence for a long Leu-enkephalin striopallidal pathway in rat brain (Cuello A. C. and Paxinos G.) **271,** 178

Functions of the septo-hippocampal system, *news and views,* (Black A. H.) **271,** 208

Glutamate neurotoxicity and Huntington's chorea (Olney J. W. Gubareff T. de and) **271,** 557

Gunning for reductionism (Granit R.) *book review by* Blakemore C. **272,** 772

In vitro release of Leu- and Met-enkephalin from the corpus striatum (Henderson G., Hughes J. and Kosterlitz H. W.) **271,** 677

Induction of extensive fimbrial branching in the adult rat brain (Goldowitz D. and Cotman C. W.) **275,** 64

Inhibition of prolactin secretion by histidyl-proline-diketopiperazine (Bauer K., Gräf K. J., Faivre-Bauman A., Beier S., Tixier-Vidal A. and Kleinkauf H.) **274,** 174

Is somatostatin an excitatory transmitter in the hippocampus? (Dodd J. and Kelly J. S.) **273,** 674

Isolation, structure and biological activity of two cholecystokinin octapeptides from sheep brain (Dockray G. J., Gregory R. A., Hutchison J. B., Harris J. I. and Runswick M. J.) **274,** 711

Localisation of gastrins to neuro- and adenohypophysis (Rehfeld J. F.) **271,** 771

Memory in monkeys severely impaired by combined but not by separate removal of amygdala and hippocampus (Mishkin M.) **273,** 297

No evidence for a central serotonergic mechanism in arrhythmogenic effects of deslanoside , *matters arising,* (Helke C. J., Souza J. D., Hamilton B. and Gillis R.) **274,** 925

Opiate-like and abstinence-like effects of intracerebral histamine administration in rats (Glick S. D. and Crane L. A.) **273,** 547

Organic lead in normal human brains (Neilsen T., Jensen K. A. and Grandjean P.) **274,** 602

Possible plasticity in the rat superior colliculus (Vidyasagar T. R.) **275,** 140

Programs of the Brain (Young J. Z.) *book review by* Morgan M. J. **276,** 125

Release of enkephalin from rat globus pallidus *in vitro* (Iversen L. L., Iversen S. D., Bloom F. E., Vargo T. and Guillemin R.) **271,** 679

Structural and functional restoration by collateral sprouting of hippocampal 5-HT axons (Azmitia E. C., Buchan A. M. and Williams J. H.) **274,** 374

The Integrated Mind (Gazzaniga M. I. S. and) *book review by* Ettlinger G. **275,** 347

The role of GABA in the substantia nigra (James T. A. and Starr M. S.) **275,** 229

Brain. Brain development influences the appearance of glial factor-like activity in rat brain primary cultures (Schurch-Rathgeb Y. and Monard D.) **273,** 308

Brain Energy Metabolism (Siesjou B. K.) *book review by* McIlwain H. **274,** 626

Brain histamine receptors as Targets for antidepressant drugs (Kanof P. D. and Greengard P.) **272,** 329

Calcium-dependent release of stomatostatin and neurotensin from rat brain *in vitro* (Iversen L. L., Iversen S. D., Bloom F., Douglas C., Brown M. and Vale W.) **273,** 161

Protein Metabolism of the Brain (Palladin A. V., Belik Ya. V. and) *book review by* Lim L. **271,** 487

Stimulation of brain membrane protein phosphorylation by calcium and an endogenous heat-stable protein (Schulman H. and Greengard P.) **271,** 478

The Mindful Brain (Edelman G. M. and) *book review by* Barlow Horace **274,** 628

Brain cell. Adenosine inhibits the accumulation of cyclic AMP in cultured brain cells (van Calker D., Müller M. and Hamprecht B.) **276,** 839

Brazil. . . . but let safeguards slip on Brazil deal, *news,* (Schuuring C.) **274,** 735

Brazil's scientists fan doubts over energy priorities, *news,* (Dickson D.) **275,** 578

Brazil learns its ecological lessons—the hard way, *news,* **275,** 684

Breeding Cycle. Avian Breeding Cycles (Murton R. K. and) *book review by* Krebs J. **273,** 692

Breeding system. Asynchronous sexual development determines the breeding system in field beans (Paul C., Gates P., Harris N. and Boulter D.) **275,** 54

Brine. New isotopic evidence for the origin of Red Sea brines (Schoell M. and Faber E.) **275,** 436

British Association for the Advancement of Science. Why go to the British Association? *leading article,* **275,** 81

Bromine. Cl and Br degassing by volcanism along the Reykjanes Ridge and Iceland (Unni C. K. and Schilling J-G.) **272,** 19

Origin of chlorine and bromine in the oceans (Schilling J.-G., Unni C. K. and Bender M. L.) **273,** 631

Bromocriptine-. Bromocriptine-induced inhibition of plasma dopamine, noradrenaline and adrenaline responses to LH-RF (Van Loon G. R.) **275,** 331

Bromodeoxyuridine. 5- Bromodeoxyuridine induces expression of a tumour-specific surface antigen on normal avian cells (Biquard J. M. and Aupoix M.) **272,** 284

Influence of bromodeoxyuridine on viral and cellular gene expression, *news and views,* (Weiss R.) **272,** 206

Bronze Age. Bronze Age honey, *news and views,* (Moore P. D.) **276,** 443

Bryophyte. British bryophytes (Smith A. J. E.) *book review by* Moore P. D. **275,** 76

Bubble lattice. Helium gas bubble lattices in face-centred-cubic metal (Johnson P.B. and Mazey D. J.) **276,** 595

Bucegi Conglomerate. The Bucegi Conglomerate: a Romanian Carpathian submarine slope deposit (Stanley D. J. and Hall B. A.) **276,** 60

Budget. The cost: where the money comes from, where it goes *news,* **275,** 359

Bulgaria. Bulgaria to shake up its scientific cooperation, *news,* **273,** 419

-Bungarotoxin. α-Bungarotoxin enhances transmitter 'released' at the neuromuscular junction (Miledi R., Molenaar P. C. and Polak R. L.) **272,** 641

Buoyancy. Lipid sacs as a buoyancy adaptation in an Antarctic fish (DeVries A. L. and Eastman J. T.) **271,** 352

Burkitt's. Epidemiological evidence for causal relationship between Epstein-Barr virus and Burkitt's lymphoma for Ugandan prospective study (de-Thé G., Geser A., Day N. E., Tukei P. M., Williams E. H., Beri D. P., Smith P. G., Dean A. G., Bornkamm G. W., Feorino P. and Henle W.) **274,** 756

Burkitt's lymphoma. Epstein-Barr virus as the cause of a human cancer, *news and views,* (Epstein M. A.) **274,** 740

Burst source. Average properties of X-ray burst sources (Paradijs J. van) **274,** 650

Butterfly. Cardioactive substances in the monarch butterfly and *Euploea core* reared on leaf-free artificial diet (Rothschild M., Marsh N. and Gardiner B.) **275,** 649

Portraits of the Lepidoptera—the world of butterflies and moths Clarke C. A. **276,** 649

The British Butterflies: Their Origin and Establishment (Dennis R. L. H.) *book review by* Vane-Wright R. I. **271,** 97

Butterfly: Monarch. Morphological variance and enzyme heterozygosity in the monarch butterfly (Eanes W. F.) **276,** 263

Butyric acid. Butyric acid suppression in the *in vitro* neoplastic state of Syrian hamster cells (Leavitt J., Barrett J. C., Crawford B. D. and Ts'o P. O. P.) **271,** 262

Cadium. Cadmium in seabirds, *matters arising,* (Bourne W. R. P.) **271,** 687

Cadium telluride. Photoelectrochemical cell with cadium telluride-film (Danaher W. J. and Lyons L. E.) **271,** 139

Cadmium. Mixed ligand chelate therapy for plutonium and cadmium poisoning (Schubert J. and Derr S. K.) **275,** 311

Caesium. Contribution of a caesium-sensitive conductance increase to the rod photoresponse (Fain G. L., Quandt F. N., Bastian B. L. and Gerschenfeld H. M.) **272,** 467

Inactivation without facilitation of calcium conductance in caesium-loaded neurones of *Aplysia* (Tillotson D. and Horn R.) **273,** 312

Caesium dating. Sedimentation rates determined by ^{137}Cs dating in a rapidly accreting salt marsh (Delaune R. D., Patrick W. H. Jr and Buresh R. J.) **275,** 532

Calcite. Ultrastructure of calcite decomposition *in vacuo* (Towe K. M.) **274,** 239

Calcium. Actin-related gelation of Ehrlich tumour cell extracts is reversibly inhibited by low concentrations of Ca^{2+} (Mimura N. and Asano A.) **272,** 273

Activation of mammalian oocytes by intracellular injection of calcium (Fulton B. P. and Whittingham D. G.) **273,** 149

Behaviour of myosin projections during the staircase phenomenon of heart muscle (Matsubara I., Yagi N. and Endoh M.) **273,** 67

Calcium and magnesium ions and the regulation of multiplication in normal and transformed cells (McKeehan W. L. and Ham R. G.) **275,** 756

Calcium effects on gap junction structure and cell coupling (Peracchia C.) **271,** 669

Calcium-. Calcium-dependent protein phosphorylation during secretion by exocytosis in the mast cell (Sieghart W., Theoharides T. C., Alper S. L., Douglas W. W. and Greengard P.) **275,** 329

Calcium. Calcium-dependent release of stomatostatin and neurotensin from rat brain *in vitro* (Iversen L. L., Iversen S. D., Bloom F., Douglas C., Brown M. and Vale W.) **273,** 161

Calcium-dependent sensory-motor response of a marine dinoflagellate to CO_2 (Hauser D. C. R., Petrylak D., Singer G. and Levandowsky M.) **273,** 230

Changes in crossbridge attachment in a myosin-regulated muscle (Vibert P., Szent-Gyorgyi A. G., Craig R., Wray J. and Cohen C.) **273,** 64

Cosmic ray source abundance of calcium (Perron C.) **271,** 425

Do viruses use calcium ions to shut off host cell functions?—Reply, *matters arising,* (Durham A. C. H.) **271,** 187

Effect of calcium ionophore Br-X537A on renin synthesis and release in amphiuma means kidney culture (Worley, R. T. S., Rich G. T. and Pryor J. S.) **271,** 174

Effects of $[Ca^{2+}]$ and $[Mg^{2+}]$ on the decay of miniature endplate currents (Cohen I. and Van der Kloot W.) **271,** 77

Hormone-induced release of intracellular Ca^{2+} triggers meiosis in starfish oocytes (Moreau M., Guerrier P., Doree M. and Ashley C. C.) **272,** 251

Increase in free Ca^{2+} in muscle after exposure to CO_2 (Lea T. J. and Ashley C. C.) **275,** 236

Calcium control of enzyme reactions, *news and views,* (Geisow M. J.) **276,** 211

Calcium ion-dependent vesicle fusion in the conversion of proalbumin to albumin (Judah J. D. and Quinn P. S.) **271,** 384

Calcium transients in aequorin-injected frog cardiac muscle (Allen D. G. and Blinks J. R.) **273,** 509

Do viruses use calcium ions to shut off host cell functions?, *matters arising,* (Rubin H.) **271,** 186

Functions of calcium in sweat secretion (Prompt C. A. and Quinton P. M.) **272,** 171

Inactivation without facilitation of calcium conductance in caesium-loaded neurones of *Aplysia* (Tillotson D. and Horn R.) **273,** 312

Influence of ATP and calcium on the cortical reaction in sea urchin eggs (Baker P. F. and Whitaker M. J.) **276,** 513

Influence of carbon dioxide on level of ionised calcium in squid axons (Bakre P. F. and Honerjäger) **273,** 160

Neurotransmitters decrease the calcium component of sensory neurone action potentials (Dunlap K. and Fischbach G. D.) **276,** 837

Reversible loss of calcium control of tension in scallop striated muscle associated with the removal of regulatory light chains (Simmons R. M. and Szent-Györgyi) **273,** 62

Stimulation of brain membrane protein phosphorylation by calcium and an endogenous heat-stable protein (Schulman H. and Greengard P.) **271,** 478

The units of calcium conduction in *Helix* neurones (Akaike N., Fishman H. M., Lee K. S., Moore L. E. and Brown A. M.) **274,** 379

Very low calcium content of cochlear endolymph, an extracellular fluid (Bosher S. K. and Warren R. L.) **273,** 377

Calcium pump. Ca pump driven by ATP in squid axons (DiPolo R.) **274,** 390

Renewing the search for calcium pumps (Lew V. L.) **274,** 421

Calcium regulation. Thick-filament-linked calcium regulation in vertebrate striated muscle (Lehman W.) **274,** 80

Calcium uptake. The importance of CO_2 for Ca^{2+} uptake by some mitochondria (Harris E. J.) **274,** 820

Caldera. The Cerro Galan Caldera, North-west Argentina and its tectonic setting (Francis P. W., Hammill M., Kretzschmar G. and Thorpe R. S.) **274,** 749

Caledonian. An ophiolite complex of probable early Caledonian

age discovered on Karmoy (Sturt B. A. and Thon A.) **275,** 538

Calling song. Photoperiodically determined, dimorphic calling songs in katydid (Whitesell J. J. and Walker T. J.) **274,** 887

CAMAC. A worked example of system design Drury D. M. **275,** 782

CAMAC applications in biological systems Peatfield A. C. and **275,** 784

CAMAC—system design made easy **275,** 781

Introduction to the interface standards Barnes R. C. M. **275,** 781

Cambrian. Cambrian trilobite diversity related to cratonic flooding (Burrett C. F. and Richardson R. G.) **272,** 717

Cambridge School. Michael Foster and the Cambridge School of Physiology (Geison G. L.) *book review by* French R. K. **276,** 132

Camp David. Israel wants scientific cooperation with the Arabs, *news,* **275,** 262

Canada. Canada announces major research boost, *news,* **273,** 581

Canadian. Canadian scientists confused by government moves on R & D funding, *news,* **276,** 551

Cancer. Epstein-Barr virus as the cause of a human cancer, *news and views,* (Epstein M. A.) **274,** 740

Sex and cancer, *correspondence,* (Chernoff R.) **275,** 8

Stages in carcinogenesis, *news and views,* (Langman R.) **272,** 126

High incidence area of cattle cancer with a possible interaction between an environmental carcinogen and a papilloma virus, *review article,* (Jarrett W. F. H., McNeil P. E., Grimshaw W. T. R., Selman I. E. and McIntyre W. I. M.) **274,** 215

Identification of ataxia telangiectasia heterozygotes, a cancer prone population (Chen P. C., Lavin M. F., Kidson C. and Moss D.) **274,** 484

Cancer. US agencies to study links between saccharin and cancer, *news,* **271,** 396

Cancer cell: Breast. Direct resorption of bone by human breast cancer cells *in vitro* (Eilon G. and Mundy G. R.) **276,** 726

Cancer chemotherapy. Cancer chemotherapy: *in vitro* test, *news and views,* (Fox B. W. and Dexter T. M.) **274,** 315

Cancer: Colon. Co-carcinogenic effects of dietary cholesterol in experimental colon cancer (Cruse J. P., Lewin M. R., Ferulano G. P. and Clark C. G.) **276,** 822

Cancer congress. Cancer congress, *correspondence,* (Mathe G.) **274,** 110

Cancer prevention. Chemoprevention of cancer, *news and views,* (Sporn M. B.) **272,** 402

Cancer research. Cancer Crusade (Rettig R. A.) *book review by* Marston R. Q. **273,** 321

The Story of Cancer (Braun A. C.) *book review by* Peto R. **274,** 404

Candida slooffii. Naturally occurring respiratory deficient *Candida slooffii* **strains resemble** *petite* **mutants.** (Arthur H., Watson K., McArthur C. R. and Clark-Walker G. D.) **271,** 750

Naturally occurring respiratory deficient *Candida slooffii* **strains resemble** *petite* **mutants.** (Arthur H., Watson K., McArthur C. R. and Clark-Walker G. D.) **271,** 750

Cap ratio. Different cap 1: cap 2 ratios in rabbit α and β globin mRNA (Lockard R. E.) **275,** 153

Capillary wave. Waves in narrow channels: faster capillary waves (Scott J. C. and Benjamin T. B.) **276,** 803

Carbinol. Unusual response of DDT-resistant houseflies to carbinol analogues of DDT (Sawicki R. M.) **275,** 443

Carbohydrate. Carbohydrates recognised, *news and views,* (Colin Hughes R. and Sharon N.) **274,** 637

Carbon. Interstellar carbon, *news and views,* (Edmunds M. G.) **276,** 439

The origin and relative abundances of C, N and the noble gases on the terrestrial planets and in meteorites (Bogard D. D. and Gibson Jr. E. K.) **271,** 150

The controversial carbon solid-liquid-vapour triple point (Greenville Whittaker A.) **276,** 695

Carbon dating. Absolute radiocarbon dating by low-altitude European tree-ring calibration (Suess H. E.) **272,** 649

Detection of ^{14}C using a small van de Graaff accelerator (Doucas G., Garman E. F., Hyder H. R. McK., Sinclair D., Hedges R. E. M. and White N. R.) **276,** 253

Enrichment of ^{14}C and radiocarbon dating (Hedges R. E. M. and Moore C. B.) **276,** 255

Fluvially transported charcoal gives erroneous ^{14}C ages for recent deposits (Blong R. J. and Gillespie R.) **271,** 739

Radiocarbon timescale tested against magnetic and other dating methods (Stuiver M.) **273,** 271

Carbon dioxide. Increased atmospheric carbon dioxide and stratospheric ozone (Groves K. S., Mattingly S. R. and Tuck A. F.) **273,** 711

Pioneer agriculture explosion and CO_2 levels in the atmosphere (Wilson A. T.) **273,** 40

West Antarctic ice sheet and CO_2 greenhouse effect: a threat of disaster (Mercer J. H.) **271,** 321

Influence of carbon dioxide on level of ionised calcium in squid axons (**Bakre P. F. and Honerjäger**) **273,** 160

Photoelectrochemical reduction of aqueous carbon dioxide on p-type gallium phosphide in liquid junction solar cells (Halmann M.) **275,** 115

Carbon fibre. Carbon fibre structure by electrolytic etching (Manders P. W.) **271,** 142

Carbon fixation. When C4 plants do best, *news and views,* (Moore P. D.) **272,** 400

Carbon isotope. Stable carbon isotopes in human tissues (Lyon T. D. B. and Baxter M. S.) **273,** 750

Carbon isotope fractionation in biological material, *matters arising,* (Tieszen L. L.) **276,** 97

Carbon monoxide. Light-dependent net production of carbon monoxide by plants (Fischer K. and Lüttge U.) **275,** 740

Carbon: Organic. Organic ^{14}C activity in an abyssal marine sediment (Williams P. M., Stenhouse M. C., Druffel E. M. and Koide M.) **276,** 698

Carbonium ion. Non-classical carbonium ion (Brown H. C.) *book review by* Whiting M. C. **271,** 787

γ-Carboxyglutamic acid. γ-Carboxyglutamic acid in fossil bones and its significance for amino acid dating (King Jr K.) **273,** 41

Carboxymethylation. Rapid stimulation of protein carboxymethylation in leukocytes by a chemotactic peptide (O'Dea R. F., Viveros O. H., Axelrod J., Aswanikumar S., Schiffmann E. and Corcoran B. A.) **272,** 462

Carcinogen. Carcinogen-induced chromosome breakage in Fanconi's anaemia heterozygous cells (Auerbach D. and Wolman A. S. R.) **271,** 69

Difficulties in assessing carcinogenic activity, *correspondence,* (Boyland E.) **274,** 308

DNA phosphotriesters as indicators of cumulative carcinogen-induced damage (Shooter K. V.) **274,** 612

Carcinogen-. Enhanced survival of ultraviolet-irradiated herpes simplex virus in carcinogen-pretreated cells (Lytle C. D., Coppey J. and Taylor W. D.) **272,** 60

Carcinogen. Human pulmonary alveolar macrophages metabolise benzo(*a*)pyrene to proximate and ultimate mutagens (Harris C. C., Hsu I. C., Stoner G. D., Trump B. F. and Selkirk J. K.) **272,** 632

Induction of antibodies against carcinogenic polycyclic aromatic hydrocarbons (Moolten F. L., Capparell N. J., Boger E. and Mahathalang P.) **272,** 614

International study of short-term carcinogenicity tests, *news and views,* **274,** 740

Making mincemeat of our common language, *correspondence,* (Mellanby K.) **275,** 8

Multiple regions of metabolic activation of carcinogenic hydrocarbons (Harvey R. G. and Dunne F. B.) **273,** 566

Nitrates and nitrites cannot be eliminated, *correspondence,* (Boyland E.) **275,** 8

Out of the frying pan, *news,* (Jukes T. H.) **274,** 307

Oxygens in DNA as main targets for ethylnitrosourea in normal and xeroderma pigmentosum fibroblasts and fetal rat brain cells (Singer B., Bodell W. J., Cleaver J. E., Thomas G. H., Rajewsky M. E. and Thon W.) **276,** 85

Petrol additive found to be potent carcinogen, *news,* **276,** 312

US industry attacks Ames test *news,* **271,** 201

Volatile nitrosamines in normal human faeces (Wang T., Kakizoe T., Dion P., Furrer R., Varghese A. J. and Bruce W. R.) **276,** 280

X-ray dose fractionation and oncogenic transformations in cultured mouse embryo cells, *matters arising,* (Peto R.) **274,** 926

High incidence area of cattle cancer with a possible interaction between an environmental carcinogen and a papilloma virus, *review article,* (Jarrett W. F. H., McNeil P. E., Grimshaw W. T. R., Selman I. E. and McIntyre W. I. M.) **274,** 215

OSHA defends leap in carcinogen regulation, *news,* **273,** 260

Carcinogen: Chemical. Neoplastic transformation of human diploid cells *in vitro* after chemical carcinogen treatment (Milo G. E. Jr and DiPaolo J. A.) **275,** 130

Carcinogen control. US carcinogen control threatened by costs, *news,* **276,** 204

Carcinogenesis. Asbestos-mediated membrane uptake of benzo [*a*] pyrene observed by fluorescence spectroscopy (Lakowicz J. R. and Hylden J. L.) **275,** 446

Biochemical characterisation of stages of hepatocarcinogenesis after a single dose of diethylnitrosamine (Pitot H. C., Barsness L. Goldsworthy T. and Kitagawa T.) **271,** 456

Cell specificity in metabolic activation of aflatoxin B_1 and benzo(*a*)pyrene to mutagens for mammalian cells (Langenback R., Freed H. J., Raveh D. and Huberman E.) **276,** 277

Does carcinogenic potency correlate with mutagenic potency in the Ames assay? (Ashby J. and Styles J. A.) **271,** 452

Somatic mutations, *news and views,* (Cramer F.) **273,** 423

Stages in carcinogenesis, *news and views,* (Langman R.) **272,** 126

Enhancement of carcinogenesis by prostaglandins (Lupulescu A.) **272,** 634

Carcinogenesis: Chemical. Initiation of chemical carcinogenesis requires cell proliferation (Cayama E., Tsuda H., Sarma D. S. R. and Farber E.) **275,** 60

Carcinogenic resistance. Dimethylnitrosamine inhibits enzymatic removal of O^6-methylguanine from DNA (Pegg A. E.) **274,** 182

Carcinogenicity. Carcinogen binding to DNA, *news and views,* (Neidle S.) **276,** 444

Carcinoma. Differences in secretion of the proteinase cathepsin B at the invading edges of human breast carcinomas and fibroadenomas (Poole A. R., Tiltman K. J., Recklies A. D. and Stoker T. A. M.) **273,** 545

Cardioactive substance. Cardioactive substances in the monarch butterfly and *Euploea core* reared on leaf-free artificial diet (Rothschild M., Marsh N. and Gardiner B.) **275,** 649

Cardiovascular disease. Discarding the diet-heart hypothesis, *correspondence,* (Mann G. V.) **271,** 500

Carey S. and. Volume and extent of the Minoan tephra from Santorini Volcano: new evidence from deep-sea sediment cores (Watkins N. D., Sigurdsson H., Huang T. C., Federman A., Ninkovich D.) **271,** 122

Carotenoid. Evidence for the functional involvement of carotenoids in the photoperiodic reaction of spider mites (Veerman A. and Helle W.) **275,** 234

CARS. Low frequency coherent anti-Stokes Raman spectroscopy of air (Beattie I. R., Gilson T.R. and Greenhalgh D. A.) **276,** 378

Cartilage: Articular. Electromechanical properties of articular cartilage during compression and stress relaxation (Grodzinsky A. J., Lipshitz H. and Glimcher M. H.) **275,** 448

Cassava. Cassava may lead to mental retardation, *news,* (Dorozynski A.) **272,** 121

Catalepsy. Opiate-like and abstinence-like effects of intracerebral histamine administration in rats (Glick S. D. and Crane L. A.) **273,** 547

Catalysis. Dynamic Heterogeneous Catalysis (Tamaru K.) *book review by* Everett D. H. **275,** 570

The α-helix dipole and the properties of proteins (Hol W. G. J., van Duijnen P. T. and Berendsen H. J. C.) **273,** 443

Transition States of Biochemical Processes (Gandour R. D. and *editor*) *book review by* Lowe G. **276,** 542

Catalyst. Structure of synthetic zeolite ZSM-5 (Kokotailo G. T., Lawton S. L., Olson D. H. and Meier W. H.) **272,** 437

Catalyst Zeolite: Synthetic. Synthesis and structure of synthetic zeolite ZSM-11 (Kokotailo G. T., Chu P., Lawton S. L. and Meier W. M.) **275,** 119

Cataract. Differential metabolism and leakage of protein in an inherited cataract and a normal lens cultured with ouabain (Piatigorsky J., Fukui H. N. and Kinoshita J. H.) **274,** 558

Catastrophe theory. Catastrophe theory, *correspondence,* (Dodson M.) **272,** 112

Catastrophe theory (Poston T. and) *book review by* Berry M. **275,** 75

Catastrophe theory reply, *correspondence,* (Zahler R. S.) **271,** 401

Catastrophe theory Selected Papers (Zeeman E. C.) *book review by* Berry M. **271,** 486

Catastrophe Theory: The Revolutionary New Way of Understanding How Things Change (Woodcock A. and) *book review by* Berry M. **274,** 930

Determination of critical variables in a microbial predator-prey system by catastrophe theory (Bazin M. J. and Saunders P. T.) **275,** 52

Catecholamine. Catecholamines of supposed inhibitory hypophysiotrophic function suppress action potentials in prolactin cells (Taraskevich P. S. and Douglas W. W.) **276,** 832

Cathepsin B. Differences in secretion of the proteinase cathepsin B at the invading edges of human breast carcinomas and fibroadenomas (Poole A. R., Tiltman K. J., Recklies A. D. and Stoker T. A. M.) **273,** 545

Cave painting. On cave paintings and nuclear security, *news,* (Weinburg A.) **276,** 663

Cell. Cell changes in alloantigen activated T lymphocytes (Dunlap B., Bach F. H. and Bach M. L.) **271,** 253

Cell adhesion. A chymotrypsin-sensitive step in the development of *Dictyostelium discoideum* (Schmidt J. A., Stirling J. L., Jones G. E. and Pacy J.) **274,** 400

A specific glycoprotein as the target site of adhesion blocking Fab in aggregating *Dictyostelium* cells (Müller K. and Gerisch G.) **274,** 445

Fibronectin-plasma membrane interactions in the adhesion and spreading of hamster fibroblasts (Pena S. D. J. and Hughes R. C.) **276,** 80

Fibronectins—adhesive glycoproteins of cell surface and blood, *review article,* (Yamada K. M. and Olden K.) **275,** 179

Cell adhesion mediated by glycolipids (Huang R. T. C.) **276,** 624

Differential cell adhesion may result from nonspecific interactions between cell surface glycoproteins (Edwards P. A. W.) **271,** 248

Cell attachment. Fibroblast-conditioned medium contains cell surface proteins required for cell attachment and spreading (Millis A. J. T. and Hoyle M.) **271,** 668

Cell biology. Analysis of cell organisation (Brinkley B. R. and *editor*) *book review by* Grimstone A. V. **271,** 788

Cell communication. Transmission of hormonal stimulation by cell-to-cell communication (Lawrence T. S., Beers W. H. and Gilula N. B.) **272,** 501

Cell coupling. Calcium effects on gap junction structure and cell coupling (Peracchia C.) **271,** 669

Cell culture. Hormones and cell culture, *news and views,* (Rudland P. S.) **276,** 113

Cell cycle. Further evidence for a random transition in the cell cycle (Shields R.) **273,** 755

How cells cycle, *news and views,* (Braun R.) **273,** 594

Interferon affects both G_1 and $S+G_2$ in cells stimulated from quiescence to growth (Balkwill F. and Taylor-Papadimitriou J.) **274,** 798

Saccharomyces cerevisiae cell cycle mutant *cdc*9 is defective in DNA ligase (Johnston L. H. and Nasmyth K. A.) **274,** 891

Zellkern und Zellzyklen (Nagl W.) *book review by* Tobler H. **272,** 383

Cell Cycle Regulation (Jeter J. R., *editor*) *book review by* Shall S. **276,** 100

Cell density. Cell saturation density is not determined by a diffusion-limited process (Whittenberger B. and Glaser L.) **272,** 821

Cell differentiation. α-Crystallin polypeptides as markers of lens cell differentiation (Vermorken A. J. M. and Bloemendal H.) **271,** 779

Requirement for cell differentiation in *Dictyostelium discoideum* (Kay R. R., Garrod D. and Tilly R.) **271,** 58

Cell division. Mechanisms and Control of Cell Division (Rost T. L. and *editor*) *book review by* Martin L. **271,** 98

The first division, *news and views,* (Lloyd C.) **276,** 562

The control of cell division by tension or diffusion (Curtis A. S. G. and Seehar G. M.) **274,** 52

Cell: Electrical property. Impedance Measurements in Biological Cells (Ceretti E.R.P.) *book review by* Noble D. **276,** 541

Cell growth. Control of microbial surface-growth by density (Rosenberger R. F., Grover N. B., Zaritsky A. and Woldringh C. L.) **271,** 244

Control of normal cell differentiation and the phenotypic reversion of malignancy in myeloid leukaemia, *review article,* (Sachs L.) **274,** 535

Diffusion-limitation of cell growth, *matters arising,* (Maroudas N. G.) **274,** 722

Hormones and cell culture, *news and views,* (Rudland P. S.) **276,** 113

Role of cell shape in growth control (Folkman J. and Moscona A.) **273,** 345

Cell hybrid. Chido and Rodgers blood groups are distinct antigenic components of human complement C4 (O'Neill G. J., Yang S. Y., Tegoli J., Berger R. and Dupont B.) **273,** 668

Cell inactivation. Non-rejoining DNA breaks and cell inactivation, *matters arising,* (Goodhead D. T., Thacker J. and Cox R.) **272** 379

Cell Junction. Quantum jumps of conductance during formation of membrane channels at cell-cell junction (Loewenstein W. R., Kanno Y. and Socolar S. J.) **274,** 133

Cell kinetics. Biomathematics and cell kinetics, *news and views,* (MacDonald N.) **272,** 310

Cell motility. Polarity of actin at the leading edge of cultured cells (Small J. V., Isenberg G. and Celis J. E.) **272,** 638

Cell multiplication. Calcium and magnesium ions and the regulation of multiplication in normal and transformed cells (McKeehan W. L. and Ham R. G.) **275,** 756

Cell nucleus. Rapid transfer of non-histone chromosomal proteins to the nucleus of living cells (Yamaizumi M., Uchida T., Okada Y., Furusawa M. and Mitsui H.) **273,** 782

Cell shape. Polymerisation of red cell membrane protein contributes to spherocechinocyte shape irreversibility (Palek J., Liu P. A. and Liu S. C.) **274,** 505

Role of cell shape in growth control (Folkman J. and Moscona A.) **273,** 345

Cell specificity. Cell specificity in metabolic activation of aflatoxin B_1 and benzo(*a*)pyrene to mutagens for mammalian cells (Langenback R., Freed H. J., Raveh D. and Huberman E.) **276,** 277

Cell surface. High viscosity vesicles of yeast separated at *p*H 4 have surface glycoprotein (Rank G. H., Gerlach J. H., Robertson A. J. and van Hoeven R. P.) **273,** 682

Search for collagen in substrate adhesion site of two murine cell lines (Culp L. A. and Bensusan H.) **273,** 680

Surface Carbohydrates of the Prokaryotic Cell (Sutherland I. W. *editor*) *book review by* Rogers H. J. **273,** 250
Cell surface characteristic. Postnatal cerebellar cells from staggerer mutant mice express embryonic cell surface characteristic (Hatten M. E. and Messer A.) **276,** 504
Cell surface market. Cell surface market for malignancy, *news and views,* (Yamada M.) **273,** 335
Cell surface protein. Fibroblast-conditioned medium contains cell surface proteins required for cell attachment and spreading (Millis A. J. T. and Hoyle M.) **271,** 668
Cell: Totipotent. Totipotent cells of parthenogenetic origin in a chimaeric mouse (Stevens L. C.) **276,** 266
Cell: Transformed. Interferon inhibits the release of plasminogen activator from SV3T3 cells (Schroder E. W., Chou I.-N., Jaken S. and Black P. H.) **276,** 828
Cell wall. Localised insertion of new cell wall in *Bacillus subtilis* (Pooley H. M., Schlaeppi J.-M. and Karamata D.) **274,** 264
Cell-mediated cytotoxicity. H-2 restriction and non-restriction of T-cell-mediated cytotoxicity against mouse mammary tumour targets (Stutman O. and Shen F.-W.) **276,** 181
Cell-surface marker. Galactocerebroside is a specific cell-surface antigenic marker for oligodendrocytes in culture (Raff M. C., Mirsky R., Fields K. L., Lisak R. P., Dorfman S. H., Silberberg D. H., Gregson N. A., Leibowitz S. and Kennedy M. C.) **274,** 813
Cellular recognition. Receptors and Recognition (Cuatrecasas P. and *editor*) *book review by* Michell B. **274,** 192
Cellulose xanthate. Soil stabilisation by cellulose xanthate (Menefee E. and Hautala E.) **275,** 530
Celtic Sea. Phytoplankton biology of a thermal front in the Celtic Sea (Savidge G. and Foster P.) **271,** 155
Censorship. Victims of censorship, *leading article,* **276,** 199
Central nervous system. Central nervous system effects of limb amputation in man (McComas A., Sica R. and Banerjee, S.) **271,** 73
Immunochemical identification of renin in rat brain and distinction from acid proteases (Hirose S., Yokosawa H. and Inagami T.) **274,** 392
Insulin receptors are widely distributed in the central nervous system of the rat (Havrankova J., Roth J. and Brownstein M.) **272,** 827
Localisation and characterisation of aminopeptidases in the CNS and the hydrolysis of enkephalin (Shaw S. G. and Cook W. F.) **274,** 816
Localisation of gastrins to neuro- and adenohypophysis (Rehfeld J. F.) **271,** 771
Reorganisation of spinal cord sensory map after peripheral nerve injury (Devor M. and Wall P. D.) **276,** 75
Sensory neurones recognise defined pathways in *Drosophila* central nervous system (Ghysen A.) **274,** 869
Thyrotropin-releasing hormone reversal of ethanol-induced decreases in cerebellar cGMP (Mailman R. B., Frye G. D., Mueller R. A. and Breese G. R.) **272,** 832
Use of ^{3}H-muscimol for GABA receptor studies (Snodgrass S. R.) **273,** 392
Centrifugation. Centrifugal Separations in Molecular and Cellular Biology (Charlwood P. A.) **276,** 541
Centromere. High frequency recombination in centromeric and histone regions of *Drosophila* genomes (Grell R. F.) **272,** 78
Ceramic. α3a-Sialon ceramics (Hampshire S., Park H. K., Thompson D. P. and Jack K. H.) **274,** 880
Cereal. Decrease in content of lead in Danish cereals (Solgaard P., Aarkrog A., Fenger J., Flyger H. and Graabaek A. M.) **272,** 346
Cerebellar growth. Graft-versus-host disease impairs cerebellar growth (Griffin W. S. T., Head J. R., Woodward D. J. and Carrol C.) **275,** 315
Supersensitivity to the cyclic GMP response to glutamate during cerebellar maturation (Garthwaite J. and Balázs R.) **275,** 328
Cerebellum. An endogenous substrate for cGMP-dependent protein kinase in mammalian cerebellum (Schlichter D. J., Casnellie J. E. and Greengard P.) **273,** 61
Cerebral cortex. Dopamine receptors localised on cerebral cortical afferents to rat corpus striatum (Schwarcz R., Creese I., Coyle J. T. and Snyder S. H.) **271,** 766
Removal of whiskers in young rats causes functional changes in cerebral cortex (Waite P. M. E. and Taylor P. K.) **274,** 600
Cerebral ventricle. Intact cerebral ventricle as a she for tissue transplantation (Rosenstein J. M. and Brightman M. W.) **276,** 83
Chalone. Damn the dogma, *news and views,* (Allen J. C.) **276,** 669
Chamber: Multiwire proportional. Two-stage multiwire proportional chambers for high flux operation? *news and views,* (Imrie D.) **274,** 638
Changing. Changing hydrothermal activity in the Atlantis II Deep geothermal system (Schoell M. and Hartmann M.) **274,** 784
Chaos. Coupled oscillators in chaotic modes, *news and views,* (MacDonald N.) **274,** 847
The prevalence of chaos, *news and views,* (MacDonald N.) **271,** 305
Charcoal. Fluvially transported charcoal gives erroneous ^{14}C ages for recent deposits (Blong R. J. and Gillespie R.) **271,** 739
Fluvially transported charcoal gives erroneous ^{14}C ages for recent deposits (Blong R. J. and Gillespie R.) **271,** 739
Charge separation. Charge separation as a component of the structural requirements for hormone activity (Farrimond J. A., Elliott M. C. and Clack D. W.) **274,** 401
Charge transport. New results from linearised charge transport theory (Manifacier J.-C. and Henisch H. K.) **272,** 521
Charnockite. Rapakivi granite anorthosite and charnockitic plutonism (Hubbard F. H. and Whitley J. E.) **271,** 439
Chemical bond. A new type of chemisorptive bond, *news and views,* **271,** 405
Chemical industry. What caused the Seveso explosion? *news,* (Hay A.) **273,** 582
Chemical reaction. Uncatalysed oscillatory chemical reactions (Körös K. and Orbán M.) **273,** 371
Chemical weapon. Pressure grows for US to resume chemical weapon production, *news,* **273,** 481
Chemi-osmosis. Chemi-osmosis and energised protons, *correspondence,* (Williams R. J. P.) **276,** 438
Chemistry: Organic. Organic chemistry—recent textbooks Warren S. **272,** 102
Chemistry: Physical. Chemistry: Physical Physical Chemistry with Applications to Biological Systems (Chang R., *editor*) *book review by* Kellett G. L. **272,** 100
Physical chemistry—recent textbooks Richards G. **272,** 101
Chemosterilisation. Failure of acids to eliminate aziridinyl residues in chemosterilised mosquitoes, *matters arising,* (Seawright J. A., Carlson D. A. and Konyha K. D.) **273,** 76
Chemotaxis. Fatty acids, aldehydes and alcohols as attractants for zoospores of *Phytophthora palmivora* (Cameron J. N. and Carlile M. J.) **271,** 448
Chemotherapy. Chemotherapy of parasitic infections, *review article,* (Van den Bossche H.) **273,** 626
Chert. The source of chert for aboriginal artefacts in southwestern Australia (Quilty P. G.) **275,** 539
Chess. Computer chess, *review article,* (Berliner H. J.) **274,** 745
The Machine Plays Chess (Bell A. G.) *book review by* Holloway N. J. **275,** 256
Chess Skill in Man and Machine (Frey P. W. *editor*) *book review by* Holloway N. **272,** 292
Chesterman W. D. *obituary* (Chesterman W. D.) **275,** 573
Chick D. R. *obituary* (Chick D. R.) **275,** 351
Chido. Localisation of Chido and Rodgers determinants to the C4d fragment of human C4 (Tilley C. A., Romans D. G. and Crookston M. C.) **276,** 713
Chimaera. Rescue of a lethal *T/t* locus genotype by chimaerism with normal embryos (Bennett D.) **272,** 539
The origin of lymphoid stem cells studied in chick yolk sac-embryo chimaeras (Lassila O., Eskola J., Toivanen P., Martin C. and Dieterlen-Lievre F.) **272,** 353
China. China's science has 20 years to catch up, *news,* (Tang T. B.) **272,** 482
Chinese exchanges easier, *news,* (Tang T. B.) **271,** 604
Delegation of top US science administrators visit China, *news,* **274,** 4
Human rights in China, *leading article,* **276,** 655
Nature: Chinese style, *news and views,* (Kiang T.) **275,** 697
Plant tissue culture in China—major change ahead? *news and views,* (Sunderland N. and Cocking E. C.) **274,** 643
Research: China's eight priorities, *news,* **272,** 483
Science in China: is 'The bumpy road' better? *news,* (Risch S., Hansen M., Weinstein J., Goldfarb and Cina C.) **276,** 749
Science reborn in China, *news and views,* (Needham J.) **274,** 832
Scientist to head Peking University, *news,* **273,** 483
Tangshan 1976: a case history in earthquake prediction, *news and views,* (Lomnitz C. and Lomnitz L.) **271,** 109
The Shorter Science and Civilization in China (Ronan C. A.) *book review by* Sivin N. **276,** 423
China. Britain joins in China exchange: *news,* **276,** 205
China encourages school science, *news,* **273,** 183
China looks West, *leading article,* **274,** 831
China studies education in foreign countries, *news,* (Tang T. B.) **274,** 525
China wants 800,000 scientists by 1985, *news,* **274,** 525
US and China agree to expand science ties, *news,* **274,** 203
US and China agree to exchange research workers: *news,* **276,** 112
Chirality. Molecular chirality of life and intrinsic chirality of matter—Reply, *matters arising,* (Bonner W. A., Van Dort M. A. and Yearian M. R.) **271,** 186
Molecular chirality of life and intrinsic chirality of matter, *matters arising,* (Garay A. S.) **271,** 186
Chiron. Chiron's origin, *news and views,* (Hughes D. W.) **272,** 207
Origin of slow moving object Kowal (Connon Smith R.) **272,** 229
Chlamydomonas. Uniparental inheritance is promoted by delayed division of the zygote in *Chlamydomonas* (Van Winkle-Swift K. P.) **275,** 749
Chlorine. Cl and Br degassing by volcanism along the Reykjanes Ridge and Iceland (Unni C. K. and Schilling J-G.) **272,** 19
Origin of chlorine and bromine in the oceans (Schilling J.-G., Unni C. K. and Bender M. L.) **273,** 631
Chlorophyll-liposome. Oxygen production from chlorophyll-liposomes, *matters arising,* (Stillwell W. L. and Ti Tien H.) **273,** 406
Chloroplast. Inorganic polyphosphate involved in the symbiosis between chloroplasts of alga *Codium fragile* and mollusc *Elysia viridis* (Cobb A. H.) **272,** 554
Chloroplast. Synthesis and transport of the small subunit of chloroplast ribulose bisphosphate carboxylase (Highfield P. E. and Ellis R. J.) **271,** 420
Chloroquine. Chloroquine enhances Epstein-Barr virus expression (Karmali R. A., Horrobin D. F., Menezes J., Patel P. and Musto J.) **275,** 444
Cholecystokinin. Localisation of gastrins to neuro- and adenohypophysis (Rehfeld J. F.) **271,** 771
Cholera. Plasmid-induced loss of virulence in *Vibrio cholerae* (Sinha V. B. and Srivastava B. S.) **276,** 708
Cholera and related diarrhoeas ('turista') *news and views,* (Finkelstein R. A. and Boesman-Finkelstein M.) **275,** 173
Cholera toxin. Adenylate cyclase in a fibroblast mutant defective in glycolipid and glycoprotein synthesis (Anderson W. B., Jaworski C. J., Gallo M., Pastan I. and Pouysségur J.) **275,** 223
Bilayers containing gangliosides develop channels when exposed to cholera toxin (Tosteson M. T. and Tosteson D. C.) **275,** 142
Cholesteric liquid crystal. Additive colour properties and colour gamut of cholesteric liquid crystals (Makow D. M. and Sanders C. L.) **276,** 48
Cholesterol. Co-carcinogenic effects of dietary cholesterol in experimental colon cancer (Cruse J. P., Lewin M. R., Ferulano G. P. and Clark C. G.) **276,** 822
Cholesterol oxidase. Cholesterol oxidase as a probe for studying membrane organisation (Patzer E. J., Wagner R. R. and Barenholz Y.) **274,** 394
Choline acetyltransferase. Immunochemical demonstration of reversible reduction in choline acetyltransferase concentration in rat hypoglossal nucleus after hypoglossal nerve transection (Wooten G. F., Park D. H., Joh T. H. and Reis D. J.) **275,** 324
Cholinergic receptor. Presynaptic muscarinic cholinergic receptors (Sharma V. K. and Banerjee S. P.) **272,** 276
Cholinesterase. Cholines terase is associated with the basal lamina at the neuromuscular junction (McMahan U. J., Sanes J. R. and Marshall L. M.) **271,** 172
Chopper. A fast interferometric chopper for neutrons and X rays (Hart M. and Siddons D. P.) **275,** 45
Chorionic gonadotrophin. Lymphocyte induced stimulation of human chorionic gonadotrophin production by trophoblastic cells *in vitro* (Dickman W. J. and Cauchi M. N.) **271,** 377
Chromatin. Chromatin, *review article,* (Felsenfeld G.) **271,** 115
Free ubiquitin is a non-histone protein of trout testis chromatin (Watson D. C., Levy B. W., and Dixon G. H.) **276,** 196
^{31}P magnetic resonance of DNA in nucleosome core particles of chromatin (Kallenbach N. R., Appleby D. W. and Bradley C. H.) **272,** 134
Structural options (Staynov D. Z.) **274,** 15
The length of nucleosome-associated DNA is the same in both transcribed and nontranscribed regions of chromatin (Gottesfeld J. M. and Melton D. A.) **273,** 317
Binding of additional histones to chromatin core particles (Voordouw G. and Eisenberg H.) **273,** 446
Bleomycin causes release of nucleosomes from chromatin and chromosomes (Kuo M. T. and Hsu T. C.) **271,** 83
Chromatin transcription probe, *news and views,* (Gilmour R. S.) **271,** 710
Chromatography. Chromatography of Synthetic and Biological Polymers (Epton R. *editor*) *book review by* Morris C. J. O. R. **273,** 790
Introduction to High Performance Liquid Chromatography (Hamilton R. J. and) *book review by* Morris C. J. O. R. **274,** 830
Laboratory Handbook of Paper and Thin-Layer Chromatography (Gasparic J. and) *book review by* Smith I. **274,** 828
Chromatography: Thin-layer. Practice of Thin-Layer Chromatography (Touchstone J. C. and) *book review by* Smith I. **275,** 777
Chromophore. More evidence that light isomerises the chromophore of *Halobacterium halobium* purple membrane protein (Hurley J. B., Becher B. and Ebrey T. G.) **272,** 87
The chromophore binding space of opsin (Daemen F. J. M.) **276,** 847
Chromosomal protein. Rapid transfer of non-histone chromosomal proteins to the nucleus of living cells (Yamaizumi M., Uchida T., Okada Y., Furusawa M. and Mitsui H.) **273,** 782
Chromosomal rearrangement. Chromosomal rearrangement involved in insecticide resistance of *Myzus persicae* (Blackman R. L., Takada H. and Kawakami K.) **271,** 450
Involvement of phage Mu-1 early functions in Mu-mediated chromosomal rearrangements (Faelen M., Huisman O. and Toussaint A.) **271,** 580
Chromosome. Conservation of autosomal gene synteny groups in mouse and man (Lalley P. A., Minna J. D. and Francke U.) **274,** 160
Cytogenetic mapping of the trisomic segment of chromosome 15 in murine T-cell leukaemia (Wiener F., Ohno S., Spira J., Haran-Ghera N. and Klein G.) **275,** 658
Cytological detection of crossing-over in BUdR substituted meiotic chromosomes using the fluorescent plus Giemsa technique (Tease C.) **272,** 823
Deletion mapping of the *t* complex of chromosome 17 of the mouse (Erickson R. P., Lewis S. E. and Slusser K. S.) **274,** 163
Direct analysis of the chromosome constitution of human spermatozoa (Rudak E., Jacobs P. A. and Yanagimachi R.) **274,** 911
Molecular Structure of Human Chromosomes: Chromosomes in Biology and Medicine (Yunis J. Y. *editor*) *book review by* Pontecorvo G. **271,** 389
Transfer of the marker for morphologically transformed phenotype by isolated metaphase chromosomes in hamster cells (Spandios D. A. and Siminovitch L.) **271,** 259
Chromosome 7. Assignment of a type I collagen structural gene to human chromosome 7 (Sykes B. and Solomon E.) **272,** 548
Chromosome. Carcinogen-induced chromosome breakage in Fanconi's anaemia heterozygous cells (Auerbach D. and Wolman A. S. R.) **271,** 69
Chromosome: c. Localisation of a male-specific DNA fragment to a sub-region of the human Y chromosome (Bostock C. J., Gosden J. R. and Mitchell A. R.) **272,** 324
Chromosome: Eukaryotic. The Eukaryotic Chromosome (Bostock C. J. and) *book review by* Ford E. H. R. **272,** 384
Chromosome: Mouse. Mouse chromosome 5 codes for ecotropic murine leukaemia virus cell-surface receptor (Oie H. K., Gazdar A. F., Lalley P. A., Russell E. K., Minna J. D., DeLarco J., Todaro G. J. and Francke U.) **274,** 60
Chromosome movement. Preferential binding of hog brain microtubule-associated proteins to mouse satellite versus bulk DNA preparations (Wiche G., Corces V. G. and Avila J.) **273,** 403
Chromosome structure. Beads and skeletons, *news and views,* (Cowling G.) **271,** 611
Chromosome transfer. Chromosome transfer in dikaryons of a smut fungus (Day A. W.) **273,** 753
Chromosome: X. Do radiation-induced thioguanine-resistant mutants of cultured mammalian cells arise by HGPRT gene mutation or X-chromosome rearrangement? (Cox R. and Masson W. K.) **276,** 629
New ways to look at X inactivation, *news and views,* (Bobrow M.) **271,** 505
X chromosome inactivation in diploid parthenogenetic mouse embryos (Kaufman M. H., Guc-Cubrilo M. and Lyon M. F.) **271,** 547
X-chromosome inactivation during differentiation of female teratocarcinoma stem cells *in vitro,* (Martin G. R., Epstein C. J., Travis B., Tucker G., Yatziv S., Martin D. W. Jr, Clift S. and Cohen S.) **271,** 329
Chromosomes. Production of HLA antibody in mice immunised with syngenic mouse-human hybrid cells containing human chromosome 6 (Aden D. P., Mausner R. and Knowles B. B.) **271,** 375
Chronometer. Is there a chronometer hidden deep in the Sun? (Dicke R. H.) **276,** 676
Ciliary control. Central neuronal control of cilia in *Tritonia diamedia* (Audesirk G.) **272,** 541
Ciliary response. Are receptor-activated ciliary motor responses mediated through voltage or current? (Peyer J. de and Machemer H.) **276,** 285
Circadian rhythm. Clocks, pineals and compasses, *news and views,* (Krebs J.) **274,** 115
Feeding, blood glucose and plasma insulin of mice at dusk (Petersen S.) **275,** 647
Internal desynchronisation of bilaterally organised circadian oscillators in the visual system of insects (Koehler W. K. and Fleissner G.) **274,** 708
Circadian variation. Circadian variation in immune response to oxazolone, *matters arising,* (Pownall R., Cove-Smith J. R., Kabler T. A., Kowanko I. and Knapp M. S.) **275,** 346
Circadian variation in immune response to oxazolone—Reply, *matters arising,* (Fachet J. and Andó I.) **275,** 346
Circulation. The Mechanics of the Circulation (Caro C. G.,) *book review by* Bergel D. H. **272,** 563

Cirrothauma. The blind octopus, *Cirrothauma* (Aldred R. G., Nixon M. and Young J. Z.) **275,** 547

Civil Service. Classified information, *leading article,* **272,** 569

Civilisation. Magic, Science, and Civilisation (Bronowski J.) *book review by* Medawar P. B. **276,** 124

Cleavage fracture toughness. Grain-size dependence of cleavage fracture toughness in mild steel (Curry D. A.) **276,** 50

Cleavage site. Methylation of single-stranded DNA *in vitro* introduces new restriction endonuclease cleavage sites (Gronenborn B. and Messing J.) **272,** 375

Cleft palate. Human foetal palatal corticoid receptors and teratogens for cleft palate (Goldman A. S., Shapiro B. H. and Katsumata M.) **272,** 464

Climate. An investigation of the astronomical theory of the ice ages, using a simple climatic ice sheet model (Pollard D.) **272,** 233

Climate and energy, *news and views,* (Henderson-Sellers A.) **273,** 592

Climate and Water Supply (US National Research Council) *book review by* Gribbin J. **272,** 740

Climatic change (Gribbin J.) *book review by* Wigley T. M. L. **272,** 788

Climatic Change (Gribbin J. *editor*) *book review by* Hughes T. J. **273,** 477

Climatic Change and Variability (Pittock A. B. *et al., editor*) *book review by* Lockwood J. G. **273,** 412

Climatic interpretation of $\delta^{18}O$ and δD in tree rings—Reply, *matters arising,* (Wilson A. T., Gray J., Thompson P., Libby L. M. and Pandolfi L. J.) **271,** 93

Climatic shifts (Bryson R. A. and) *book review by* Cribbin J. **271,** 785

Climatic signals in British Isles tree-ring chronologies (Hughes M. K., Gray B., Pilcher J., Baillie M. and Leggett P.) **272,** 605

Climatic trends in the North Atlantic, *matters arising,* (Pocklington R.) **273,** 407

Climatological effects of atmospheric particulate pollution (Idso S. B. and Brazel A. J.) **274,** 781

Factors controlling oxygen isotopic composition of fallen snow in Antarctica (Kato K.) **272,** 46

Low sea levels, droughts and mammalian extinctions (Mörner N. A.) **271,** 738

Possible climatic and biological impact of nearby supernovae (Hunt G. E.) **271,** 430

Record of last interglacial-glacial cycle from northeastern Queensland (Kershaw A. P.) **272,** 159

Sand deserts during glacial maximum and climatic optimum (Sarnthein M.) **272,** 43

Sun-weather effects, *news and views,* (Olson R. H.) **275,** 368

Volcanic dust and changes in Northern Hemisphere temperature (Miles M. K. and Gildersleeves P. B.) **271,** 735

Volcanic dust influence on glacier mass balance at high latitudes (Bradley R. S. and England J.) **271,** 736

West Antarctic ice sheet and CO_2 greenhouse effect: a threat of disaster (Mercer J. H.) **271,** 321

World climate conference thrown open to social scientists, *news,* (Collins P.) **275,** 577

Neolithic hyperarid period preceded the present climate of the Central Sahel (Dumont H. J.) **274,** 356

WMO planning world climate study, *news,* (Collins P.) **273,** 5

Climate: Prehistoric. Past atmospheric composition and climate, gas parameters measured on ice cores (Berner W., Stauffer B. and Oeschger H.) **276,** 53

Climate research. A bad year for weather, a good one for climate, *news,* **273,** 88

Climatic change. Injection events in ocean history (Thierstein H. R. and Berger W. H.) **276,** 461

Climatology. Climatic collaboration (Imbrie J.) **274,** 844

Historical climatology (Ingram M. J., Underhill D. J. and Wigley T. M. L.) **276,** 329

Mechanisms and models of climatic change (Shutts G. J. and Green J. S. A.) **276,** 339

Numerical simulation of climate and climatic change (Gilchrist A.) **276,** 342

Predictability of climate (Leith C. E.) **276,** 352

Predicting temperature trend in the Northern Hemisphere to the year 2000 (Miles M. K.) **276,** 356

Solar–terrestrial influences on weather and climate (Siscoe G. L.) **276,** 348

The World Climate Programme (Mason B. J.) **276,** 327

Tree-ring evidence of past climatic variability (La Marche V. C. Jr) **276,** 334

Tropical Climatology: An Introduction to the Climates of the Low Latitudes (Nieuwolt S., *editor*) *book review by* Lockwood J. G. **272,** 104

What is climatology? *news and views,* (Wigley T. M. L. and Brimblecombe P.) **276,** 213

Clinical trial. Clinical trial methodology, *news and views,* (Peto R.) **272,** 15

Cloaca. The living coelacanth *Latimeria chalumnae* does not have a cloaca (Dingerkus G., Mok H. K. and Lagios M. D.) **276,** 261

Clomiphene citrate. Sensitisation of pituitary cells to luteinising hormone releasing hormone by clomiphene citrate *in vitro* (Hsueh A. J. W., Erickson G. F. and Yen S. S. C.) **273,** 57

Clonal segregation. Clonal segregation and positional information in late ommatidial development in *Drosophila* (Campos-Ortega J. A., Jürgens G. and Hofbauer A.) **274,** 584

Clone. Clones of cytotoxic lymphocytes can recognise uninfected cells in a primary response against influenza virus (Komatsu Y., Nawa Y., Bellemy A. R. and Marbrook J.) **274,** 802

Qβ DNA-containing hybrid plasmids giving rise to Qβ phage formation in the bacterial host (Taniguchi T., Palmieri M. and Weissmann C.) **274,** 223

Clonidine. Tolerance of locus coeruleus neurones to morphine and suppression of withdrawal response by clonidine (Aghajanian G. K.) **276,** 186

Cloning. Synthesis of an ovalbumin-like protein by *Escherichia coli* K12 harbouring a recombinant plasmid (Mercereau-Puijalon O., Royal A., Cami B., Garapin A., Krust A., Gannon F. and Kourilsky P.) **275,** 505

Cloning of replication origins from the *E. coli* K12 chromosome (Diaz R. and Pritchard R. H.) **275,** 561

Isolation by molecular cloning of a fragment of the split ovalbumin gene (Garapin A. C., Lepennec J. P., Roskam W., Perrin F., Cami B., Krust A., Breathnach R., Chambon P. and Kourilsky P.) **273,** 349

Coal. Characterisation of organic acids trapped in coals (Hayatsu R., Winans R. E., Scott R. G., Moore L. P. and Studier M. H.) **275,** 116

Anisotropy of magnetic susceptibility measurements as a coal banding-plane indicator (Ellwood B. B. and Noltimier H. C.) **274,** 353

Cochlear endolymph. Very low calcium content of cochlear endolymph, an extracellular fluid (Bosher S. K. and Warren R. L.) **273,** 377

Codium fragile. Inorganic polyphosphate involved in the symbiosis between chloroplasts of alga *Codium fragile* and mollusc *Elysia viridis* (Cobb A. H.) **272,** 554

Codon. Tilting at wobble, *news and views,* (Richards E. G.) **273,** 488

Codon: Initiation. AUG is the only recognisable signal sequence in the 53a non-coding of eukaryotic in RNA (Baralle F. E. and Brownlee G. G.) **274,** 84

In vitro mutations in the initiation codon, *news and views,* (Hamlyn P.) **272,** 397

Codon: Termination. Leaky UAG termination codon in tobacco mosaic virus RNA (Pelham H. R. B.) **272,** 469

Coelacanth. The living coelacanth *Latimeria chalumnae* does not have a cloaca (Dingerkus G., Mok H. K. and Lagios M. D.) **276,** 261

Coenzyme A. Coenzyme A or adenosine inhibiting acetylcholine release? *matters arising,* (Stone T. W.) **274,** 721

Coesite. Coesite and stishovite in the Vredefort Dome, South Africa (Martini J. E. J.) **272,** 715

Coherence spectroscopy. Laser and Coherence Spectroscopy (Steinfeld J. I. *editor*) *book review by* Knight P. **274,** 192

Colchicine. Colchicine potentiates β-adrenoreceptor-stimulated cyclic AMP in lymphoma cells by an action distal to the receptor (Insel P. A. and Kennedy M. S.) **273,** 471

Colicin K. Channels in membranes, *news and views,* (Saunders V. A.) **276,** 116

Colicin K. Colicin K acts by forming voltage-dependent channels in phospholipid bilayer membranes (Schein S. J., Kagan B. L. and Finkelstein A.) **276,** 159

Collagen. Search for collagen in substrate adhesion site of two murine cell lines (Culp L. A. and Bensusan H.) **273,** 680

Assignment of a type I collagen structural gene to human chromosome 7 (Sykes B. and Solomon E.) **272,** 548

Collagen required for proliferation of cultured connective tissue cells but not their transformed counterparts (Liotta L. A., Vembu D., Kleinman H. K., Martin G. R. and Boone C.) **272,** 622

Fibroblasts degrade newly synthesised collagen within the cell before secretion (Bienkowski R. S., Baum B. J. and Crystal R. G.) **276,** 413

Collision spectroscopy. Collision spectroscopy (Cooks R. G. *editor*) *book review by* Price W. C. **273,** 790

Collisional energy. Laserswitched collisions, *news and views,* (Knight P.) **273,** 188

Colloid. Direct measurement of molecular forces (Derjaguin B. V., Rabinovich Y. I. and Churaev N. V.) **272,** 313

Colonisation. Pheromonal chirality and integrity of aggregation response in southern species of the bark beetle *Ips* sp. (Vite J. P., Ohloff G. and Billings R. F.) **272,** 817

Colony stimulating factor. Induction of macrophage production and proliferation by a purified colony stimulating factor (Stanley E. R., Chen D.-M., and Lin H.-S.) **274,** 168

Colour. Does colour provide an input to human motion perception? (Ramachandran V. S. and Gregory R. L.) **275,** 55

Colour gamut. Additive colour properties and colour gamut of cholesteric liquid crystals (Makow D. M. and Sanders C. L.) **276,** 48

Comecon. Bulgaria to shake up its scientific cooperation, *news,* **273,** 419

Soyuz is not a trolley-bus, but Comecon flights continue, *news,* **275,** 4

Comet. Are comets dirty snowballs or dust swarms? *news and views,* (Axford W. I. and Keller H. U.) **273,** 427

On companions and comets (Kirk J.) **274,** 667

Comet Donati. Rotation period of comet Donati (Whipple F. L.) **273,** 134

Comet: West 1975. Propagating inhomogeneities in the dust tail of comet West 1975 (Koutchmy S. and Lamy P.) **273,** 522

Comminution. The impossibility of comminuting small particles by compression (Kendall K.) **272,** 710

Commonwealth Science Council. Commonwealth Science Council coordinates approach to UNCSTD, *news,* (Hay A.) **273,** 697

Communal breeding. Communal breeding in green woodhoopoes as a case for reciprocity (Ligon J. D. and Ligon S. H.) **276,** 496

Communication. On Human Communication (Cherry C.) *book review by* Hill D. R. **275,** 779

Companion star. An ultraviolet subdwarf companion to HD 17576 (Darius J. and Whitelock P. A.) **275,** 428

Has the Sun a companion star? *matters arising,* (Wright E. L.) **272,** 649

Has the Sun really got a companion star? (Henrichs H. F. and Staller R. F. A.) **273,** 132

On companions and comets (Kirk J.) **274,** 667

Competition. Competition among desert perennials (Fonteyn P. J. and Mahall B. E.) **275,** 544

Competition: Interspecific. Interspecific competition in tits, *matters arising,* (Minot E. O.) **275,** 463

Interspecific competition in tits—Reply, *matters arising,* (Dhondt A. A.) **275,** 463

Red deer or takahe? *news and views,* (Moore P. D.) **271,** 507

Complement. A single chain precursor of C4 in human serum (Gigli I.) **272,** 836

Localisation of Chido and Rodgers determinants to the C4d fragment of human C4 (Tilley C. A., Romans D. G. and Crookston M. C.) **276,** 713

The biochemistry of complement, *review article,* (Porter R. R. and Reid K. B. M.) **275,** 699

Complete circle rule. Regeneration of reduplicated limbs in contravention of the complete circle rule (Slack J. M. W. and Savage S.) **271,** 760

Compression. The impossibility of comminuting small particles by compression (Kendall K.) **272,** 710

Compressional wave velocity. Transient effects in laboratory measurements of compressional wave velocity and electrical conductivity (Evans C. J., Lee C. and Chroston P. N.) **276,** 485

Computer. Computer chess, *review article,* (Berliner H. J.) **274,** 745

Problems, Programs, Processing, Results: Software Techniques for Sci-Tech Programs (Quittner P.) *book review by* Rosner R. A. **274,** 517

Computer simulation of the solvent structure around biological macromolecules (Hagler A. T. and Moult J.) **272,** 222

Protocols for computer networks, *news and views,* (Rosner R.) **272,** 128

Computer research. University fights secrecy ban on computer research, *news,* **273,** 417

Computer security. Computer secrecy ban lifted, *news,* **273,** 581

Concanavalin. Transformation by concanavalin A of the response of molluscan neurones to L-glutamate (Kehoe J.) **274,** 866

Concanavalin A. An inducible gene involved in commitment of lymphocytes to transform (Milner J.) **275,** 660

Electrophoretic mobility as a sensitive probe of lectin-lymphocyte interaction (Blume P., Malley A., Knox R. J. and Seaman G. V. F.) **271,** 378

Is protein synthesis necessary for the commitment of lymphocyte transformation? (Milner J.) **272,** 628

Synthetic concanavalin A receptors and erythrocyte agglutination (Orr G. A. and Rando R. R.) **272,** 722

Conditioned response. Compensatory and conditioned feeding responses to scheduled glucose infusions in the rat (Mather P., Nicolaidis S. and Booth D. A.) **273,** 461

Conducting fluid. Magnetic field generation in Electrically-Conducting fluids (Moffatt H. K.) *book review by* Hide R. **273,** 322

Conduction. 'Low-scatter' conduction of electric charges through lamellar solids (Ubbelohde A. R.) **271,** 139

Conductivity. Transient effects in laboratory measurements of compressional wave velocity and electrical conductivity (Evans C. J., Lee C. and Chroston P. N.) **276,** 485

Conformation. The age of Aquarius? *news and views,* (Robson B. and Jones N. M.) **272,** 206

Why do nucleic acids have 3′5′ phosphodiester bonds (Dhingra M. M. and Sarma R. H.) **272,** 798

Conjugation. ColE1 plasmid mobility and relaxation complex (Warren G. J., Twigg A. J. and Sherratt D. J.) **274,** 259

Demonstration of a cell-free factor involved in cell interactions during mating in *Tetrahymena* (Adair W. S., Barker R., Turner R. S. Jr and Wolfe J.) **274,** 54

Substrate induction of conjugative activity of *Agrobacterium tumefaciens* Ti plasmids (Petit A., Tempe J., Kerr A., Holsters M., Van Montagu M. and Schell J.) **271,** 570

Connective tissue. Collagen required for proliferation of cultured connective tissue cells but not their transformed counterparts (Liotta L. A., Vembu D., Kleinman H. K., Martin G. R. and Boone C.) **272,** 622

Consciousness. Consciousness and the physical world, *news and views,* (Vesey G.) **271,** 709

Conservation. Back to nature, *news,* (Mellamby K.) **273,** 7

Biologists urge US endowment for conservation, *news,* (Douglas J.) **275,** 82

Conservation in Madagascar, *news,* (Jolly A.) **275,** 586

Contributions to conservation—stimulating bird conservation Andrews J. **276,** 644

Protean nature of conservation—four ways of interpreting the term Southern H. N. **276,** 647

Radioactive whales? *correspondence,* (Thackray M.) **272,** 396

The fish that roared, *news,* **273,** 177

The Norfolk Broads under pressure, *news and views,* (Moore P. D.) **274,** 644

USSR moves to protect rare animals, *news,* **271,** 602

Whaling: past, present and future, *news and views,* (May R. M.) **276,** 319

Conservation addicts—effect of human activities on the fauna of the world Harrison Matthews L. **276,** 646

Continent. Did emerging continents trigger metazoan evolution? (Knoll A. H.) **276,** 701

Timetabling the emergence of continents, *news and views,* (Sutton J.) **273,** 186

Timing of continental growth and emergence, *matters arising,* (Moorbath S.) **273,** 75

Continental crust. Evidence of large Cainozoic crustal shortening of Asia (Molnar P. and Chen W.-P.) **273,** 218

Exploration of the continental basement by seismic reflection profiling, *review article,* (Oliver J.) **275,** 485

Rb-Sr mantle isochrons and variations in the chemistry of Gondwanalands lithosphere (Brooks C. and Hart S. R.) **271,** 220

Timetabling the emergence of continents, *news and views,* (Sutton J.) **273,** 186

Continental drift. Age of Midway revised, *news and views,* (Smith P. J.) **272,** 12

Slave—Churchill-collision tectonics (Gibb R. A.) **271,** 50

Continental rift. Early Cretaceous basalt volcanism and initial continental rifting in Benue Trough, Nigeria (Olade M. A.) **273,** 458

Continental shelf. Benthic nutrient regeneration and high rate of primary production in continental shelf waters, *matters arising,* (Carpenter E. J. and McCarthy J. J.) **274,** 188

Continuum Mechanics. Mathematics Applied to Continuum Mechanics (Segel L. A.) *book review by* Lighthill J. **271,** 286

Contraversive rotation. Striatal dopamine release and contraversive rotation elicited by intranigrally applied muscimol (Martin G. E. and Haubrich D. R.) **275,** 230

Conway granite. Reinvestigation of the α-activity of Conway granite (Gentry R. V., Halperin J. H., Ketelle B. H., O'Kelley G. D., Stoughton R. W. and Adams J. A. S.) **273,** 217

Cooling. Atomic oxygen emission at 63 μm as a cooling mechanism in the thermosphere and ionosphere (Grossman K. U. and Offermann D.) **276,** 594

Cooperativity. Cooperativity in the dislocation theory of melting (Cotterill R. M. J.) **273,** 371

Copernicus Astronomical. Copernicus Astronomical Centre opens in Warsaw, *news,* (Mitton S.) **273,** 92

Coral. Vital effect on stable-isotope composition seen in foraminifera and coral skeletons (Erez J.) **273,** 199

Coral Reef. Biology and Geology of Coral Reefs (Jones O. A. and *editor*) *book review by* Yonge C. M. **273,** 251

Coral-reef area and the contributions of reefs to processes and resources of the world's oceans (Smith S. V.) **273,** 225

Coricosteroid. Sensitivity of coricosteroid dependent insulin-resistant lipogenesis in marrow preadipocytes of obese-diabetic (db/db) mice **275,** 752

Corn. Corn and Peanuts, *news,* (Jukes T. H.) **271,** 499

Corona model. Constraints on the corona model for Sirius B (D'Antona F. and Mazzitelli I.) **275,** 726

Coronal hole. Coronal holes at 11.5 and 21 cm observed with the Arecibo radio telescope (Papagiannis M. D. and Wefer F.

L.) **273,** 520

Corpus striatum. *In vitro* release of Leu- and Met-enkephalin from the corpus striatum (Henderson G., Hughes J. and Kosterlitz H. W.) **271,** 677

Corrosion. Interfacial noble-metal corrosion in metal to ceramic reaction welding (de Bruin H. J.) **272,** 712

FeNi superlattice formation by corrosion of Santa Catharina meteorite (Bowles J. S., Hatherley M. and Malin A. S.) **276,** 168

Cortical reaction. Influence of ATP and calcium on the cortical reaction in sea urchin eggs (Baker P. F. and Whitaker M. J.) **276,** 513

Corticoid receptor. Human foetal palatal corticoid receptors and teratogens for cleft palate (Goldman A. S., Shapiro B. H. and Katsumata M.) **272,** 464

Corticosteroid. Inhibition of prostaglandin biosynthesis by corticosteroids requires RNA and protein synthesis (Danon A. and Assouline G.) **273,** 552

Corynebacterium. Action of *Corynebacterium ovis* exotoxin on endothelial cells of blood vessels (Carne H. R. and Onon E. O.) **271,** 246

Coryphaenoides armatus measured in situ. Metabolism of the abyssopelagic rattail *Coryphaenoides armatus* measured *in situ* (Smith K. L., Jr) **274,** 362

Cosmic ray. Excess ^{15}N in the martian atmosphere and cosmic rays in the early Solar System (Yanagita S. and Imamura M.) **274,** 234

Magnetic bottles for cosmic rays, *news and views,* **272,** 312

The cosmic-ray isotopes (Meyer P.) **272,** 675

Cosmic ray source abundance of calcium (Perron C.) **271,** 425

Cosmic spherule. Cosmic spherules, *news and views,* (Parkin D. W.) **276,** 323

Cosmochronology. Anomalous cosmochronology... *news and views,* (Moorbath S. and Schramm D. N.) **275,** 478

Cosmology. Concise cosmology (Robinson M.) *book review by* Silk J. **272,** 787

Cosmic heresy? *news and views,* (Davies C. W.) **273,** 336

Electric Universe, *news and views,* (Davies P. C. W.) **273,** 268

Smoothing primaeval chaos, *news and views,* (Davies P.) **271,** 506

Space, Time and Gravity: The Theory of the Big Bang and Black Holes (Wald R. M.) *book review by* Davies P. **272,** 739

Tensors, Relativity and Cosmology (Lord E. A., *editor*) *book review by* Davies P. **272,** 109

Cosmonaut. Poland tries the taste of space, *news,* **276,** 110

Cosmothermometer. The Allende meteorite: evidence for a new cosmothermometer based on Ti^{3+}/Ti^{4+} (Haggerty S. E.) **276,** 221

Cost-benefit. Enthusiasm for UK wave power survives high costs, *news,* **276,** 433

Cost/benefit analysis. Benefit-cost analysis and the linear hypothesis, *news,* (Weinberg A. M.) **271,** 596

Co-tolerance. Lead detoxification by a copper-tolerant isopod (Brown B. E.) **276,** 388

Cotton. Petrified cotton? *news and views,* (Vogel F. L. and Zemel J. N.) **275,** 11

Cow's milk. Circulating immune complexes in infants fed on cow's milk (Delire M., Cambiaso C. L. and Masson P. L.) **272,** 632

Crab. Revised estimate of gravitational radiation from Crab and Vela pulsars (Zimmermann M.) **271,** 524

Craigie J. *obituary* (Craigie J.) **276,** 427

Crater. Coherently overturned flaps surrounding craters (Jones G. H. S.) **273,** 211

Morphology of martian rampart craters (Mouginis-Mark P. J.) **272,** 691

Craton. Cambrian trilobite diversity related to cratonic flooding (Burrett C. F. and Richardson R. G.) **272,** 717

Granite-greenstone terrains of the Rhodesian Archaean craton (Wilson J. F., Bickle M. J., Hawkesworth C. J., Martin A., Nisbet E. G. and Orpen J. L.) **271,** 23

Creep rupture. Creep rupture at depth in a cold ice sheet (Colbeck S. C., St Lawrence W. and Gow A. J.) **275,** 733

Cretaceous. Evidence of large Cainozoic crustal shortening of Asia (Molnar P. and Chen W.-P.) **273,** 218

Cretaceous. Mantle $^{40}Ar/^{36}Ar$ trapped in Cretaceous deep-sea basalts (Takaoka N. and Nagao K.) **276,** 491

Tectonic controls of late Cretaceous sedimentation, western interior, USA (Cross T. A. and Pilger R. H. Jr.) **274,** 653

Thermal alteration of Cretaceous black shale by basaltic intrusions in the Eastern Atlantic (Simoneit B. R. T., Brenner S., Peters K. E. and Kaplan I. R.) **273,** 501

Crete. The Thera eruption and Late Minoan-IB destruction on Crete, *matters arising,* (Sparks R. S. J., Sigurdsson H. and Watkins N. D.) **271,** 91

Volume and extent of the Minoan tephra from Santorini Volcano: new evidence from deep-sea sediment cores (Watkins N. D., Sigurdsson H., Huang T. C., Federman A., Ninkovich D.) **271,** 122

Creutzfeldt-Jakob disease. Transmission of Creutzfeldt-Jakob disease with scrapie- like syndromes to mice (Manuelidis E. E., Gorgacz E. J. and Manuelidis L.) **271,** 778

Crop production. Plants, Food and People (Chrispeels M. J. and) *book review by* Hill T. A. **272,** 381

Crossing over. Unequal crossing over at the rRNA locus as a source of quantitative genetic variation (Frankham R., Briscoe D. A. and Nurthen R. K.) **272,** 80

Crown gall disease. Effect of agrocin 84 on attachment of *Agrobacterium tumefaciens* to cultured tobacco cells (Smith V. A. and Hindley J.) **276,** 498

Crown gall tumour. Agropine—a major new plasmid-determined metabolite in crown gall tumours (Firmin J. L. and Fenwick G. R.) **276,** 842

Crust. Sampling and observation of oceanic mantle and crust on Gorringe Bank (Auzende J-M., Olivet J-L., Charvet J., Le Lann A., Le Pichon X., Monteiro J. H., Nicolas A. and Ribeiro A.) **273,** 45

Crustal attenuation. Rifting crustal attenuation and subsidence in the Bay of Biscay (Charpal O. de Guennoc P., Montadert L. and Roberts D. G.) **275,** 706

Crystal. Dislocations at atomic scale (Bourret A. and Desseaux J.) **272,** 151

Homo or hetero?, *news and views,* (Cahn R. W.) **271,** 407

Quasi-crystals from irradiated photochromic dyes in an applied electric field (Krongauz V. A. and Goldburt E. S.) **271,** 43

Unusual room temperature afterglow in some crystalline organic compounds (Bilen C. S., Harrison N. and Morantz D. J.) **271,** 235

Computed crystal structure images for high resolution electron microscopy (O'Keefe M. A., Buseck P. R. and Iijima S.) **274,** 322

Crystal defects and melting, *news and views,* (Cahn R. W.) **273,** 491

Crystal defect. Premelting near crystal defects, *matters arising,* (Tallon J. L.) **276,** 849

Premelting near crystal defects—Reply, *matters arising,* (Bartis F. J.) **276,** 849

Crystal structure. Molecular Structures and Dimensions: Guide to the Literature, 1935-76 (Kennard O., *editor*) *book review by* Sim G. **274,** 928

CTP synthetase. Increased CTP synthetase activity in cancer cells (Williams J. C., Kizaki H., Weber G. and Morris H. P.) **271,** 71

Cuba. Special treatment for Cuba and Mongolia **271,** 700

Culture. The two cultures — 1970's style, *leading article,* **274,** 199

Culture. Research and culture, *correspondence,* (Zaccai G. and Zaccai N.) **271,** 500

Curare. Depolarising effect of curare on embryonic rat muscles (Ziskind L. and Dennis M. J.) **276,** 622

Curium. Global fallout of curium (Holm E. and Persson B. R. R.) **273,** 289

Current ring. Detachment and recombination of a current ring with the Kuroshio (Solomon H.) **274,** 580

Cutaneous stimulation. Reversal of recruitment order of single motor units produced by cutaneous stimulation during voluntary muscle contraction in man (Stephens J. A., Garnett R. and Buller N. P.) **272,** 362

Cuticle. Cuticle under attack, *news and views,* (Vincent J. F. V.) **273,** 339

Cyanine dye. Effects of cyanine dye membrane probes on cellular properties (Miller J. B. and Koshland Jr D. E.) **272,** 83

3′, 5′-cyclic AMP binds to and promotes polymerisation on platelet tubulin (Steiner M.) **272,** 834

Activity of an individual serotonergic neurone in *Aplysia* enhances synthesis of cyclic adenosine monophosphate (Weiss K. R., Schonberg M., Mandelbaum D. E. and Kupfermann I.) **272,** 727

Complementation analysis of hormone-sensitive adenylate cyclase (Naya-Vigne J., Johnson G. L., Bourne H. R. and Coffino P.) **272,** 720

Cyclic AMP as a mitogenic signal for cultured rat Schwann cells (Raff M. C., Hornby-Smith A. and Brockes J. P.) **273,** 672

Cyclic-AMP-induced differentiation in neuroblastoma is independent of cell division rate (Waymire J. C., Gilmer-Waymire K. and Haycock J. W.) **276,** 194

Indomethacin in submicromolar concentrations inhibits cyclic AMP-dependent protein kinase (Kantor H. S. and Hampton M.) **276,** 841

Is there a circulating human thymic factor that induces cyclic AMP synthesis? (Sunshine G. H., Coffey R. G. and Hadden J. W.) **271,** 665

Postsynaptic modulation of excitatory process in sympathetic ganglia by cyclic AMP (Kobayashi H., Hashiguchi T. and Ushiyama N. S.) **271,** 268

Requirement for cell differentiation in *Dictyostelium discoideum* (Kay R. R., Garrod D. and Tilly R.) **271,** 58

Transmission of hormonal stimulation by cell-to-cell communication (Lawrence T. S., Beers W. H. and Gilula N. B.) **272,** 501

Adenosine inhibits the accumulation of cyclic AMP in cultured brain cells (van Calker D., Müller M. and Hamprecht B.) **276,** 839

Colchicine potentiates β-adrenoreceptor-stimulated cyclic AMP in lymphoma cells by an action distal to the receptor (Insel P. A. and Kennedy M. S.) **273,** 471

Cyclic AMP and noradrenaline sensitivity fluctuations in regenerating newt tissue (Taban C., Cathieni M. and Schorderet M.) **271,** 470

Effect of dibutyryl cyclic AMP on intracellular levels of avian sarcoma virus-specific RNA (Guntaka R. V. and Weiner A. J.) **274,** 274

Effect of L-triiodothyronine on $(-)^3H$-dihydroalprenolol binding and cyclic AMP response to (−)adrenaline in cultured heart cells (Tsai J. S. and Chen A.) **275,** 138

Influence of cyclic AMP on intracellular *p*H regulation and chloride fluxes in barnacle muscle fibres (Boron W. F., Russell J. M., Brodwick M. S., Keifer D. W. and Roos A.) **276,** 511

Cyclic GMP. An endogenous substrate for cGMP-dependent protein kinase in mammalian cerebellum (Schlichter D. J., Casnellie J. E. and Greengard P.) **273,** 61

Role of cyclic GMP in the action of heat-stable enterotoxin of *Escherichia coli,* (Hughes J. M., Murad F., Chang B. and Guerrant R. L.) **271,** 755

Thyrotropin-releasing hormone reversal of ethanol-induced decreases in cerebellar cGMP (Mailman R. B., Frye G. D., Mueller R. A. and Breese G. R.) **272,** 832

Desensitisation of muscarinic receptor-mediated cyclic GMP formation by cultured nerve cells (Richelson E.) **272,** 366

Does cyclic GMP mediate the slow excitatory synaptic potential in sympathetic ganglia? (Hashiguchi T., Ushiyama N. S., Kobayashi H. and Libet B.) **271,** 267

Increases in cyclic GMP levels may not mediate relaxant effects of sodium nitroprusside, verapamil and hydralazine in rat vas deferens (Diamond J. and Janis R. A.) **271,** 472

Nicotinic cholinergic stimulation increases cyclic GMP levels in vertebrate skeletal muscle (Nestler E. J., Beam K. G. and Greengard P.) **275,** 451

Supersensitivity to the cyclic GMP response to glutamate during cerebellar maturation (Garthwaite J. and Balázs R.) **275,** 328

Cyclic nucleotide. Possible role of cyclic nucleotides in regulation of noradrenaline release from rat pineal through presynaptic adrenoceptors (Pelayo F., Dubocovich M. L. and Langer S. Z.) **274,** 76

Cycloamylose. Structure of the complex cycloheptaamylose-*p*-nitroacetanilide (Harding M. M., Maclennan J. M. and Paton R. M.) **274,** 621

Cyclodextrin. Dimeric β-cyclodextrin complexes may mimic membrane diffusion transport (Stezowski J. J., Jogun K. H., Eckle E. and Bartels K.) **274,** 617

Cyclone. Disaster relief needs more research, *news,* (Rivers J.) **271,** 100

Cyclophosphamide. Induction of autoreactive T lymphocytes and their suppressor cells by cyclophosphamide (L'age-Stehr J. and Diamantstein T.) **271,** 663

Cyclophosphamide delays 3-methylcholanthrene sarcoma induction in mice (Hellström I. and Hellström K. E.) **275,** 129

Cyclophosphamide inhibited B cell receptor regeneration as a basis for drug-induced tolerance (Shand F. L. and Howard J. G.) **271,** 255

Cyclotron emission. Consequences of narrow cyclotron emission from Hercules X-1 (Weaver R. P.) **274,** 571

Cyg X-1. Physical reality of shot noise model for the short-term variability of Cyg X-1 (Doi K.) **275,** 197

Cygnus X-1. A search for rapid optical periodicities from Cyg X-1 (Robinson E. L., Nather R. E., Africano J. and Smith B.) **271,** 40

Cystic fibrosis. Trypsin-binding IgG in cystic fibrosis (Romeo G., Parsons M., Bossen A., Blessing-Moore J. and Cavalli-Sforza L.) **274,** 909

Cytochalasin. Cytochalasin D induces the capping of both leukaemia viral proteins and actin in infected cells (Mousa G. Y., Trevithick J. R., Bechberger J. and Blair D. G.) **274,** 808

Cytochalasin B. Cytochalasin B inhibits lymphocyte transformation through its effects on glucose transport (Hume D. A., Hansen K., Weidemann M. J. and Ferber E.) **272,** 359

Cytochrome. More cytochromes, *news and views,* (Geisow M.) **274,** 842

Cytochrome *b*. Identification of the haem ligands of cytochrome b_{562} by X-ray and NMR methods (Xavier A. V., Czerwinski E. W., Bethge P. H. and Mathews F. S.) **275,** 245

Novel cytochrome *b* system in phagocytic vacuoles of human granulocytes (Segal A. W. and Jones O. T. G.) **276,** 515

Cytochrome *c* oxidase. A temperature-sensitive yeast mitochondrial mutant with altered cytochrome *c* oxidase subunit (Eccleshall T. R., Needleman R. B., Storm E. M., Buchferer B. and Marmur J.) **273,** 67

Cytokinin. Cell division factors (cytokinins) from irradiated plant tissue (Pandey K. N., Sabharwal P. S. and Kemp T.) **271,** 449

Hormone binding in plants, *news and views,* (Lamb C. J.) **274,** 312

5′ AMP is a direct precursor of cytokinin in *Dictyostelium discoideum* (Taya Y., Tanaka Y. and Nishimura S.) **271,** 545

Cytosol. Comparison of the evolution rates of cytosolic and mitochondrial aspartate aminotransferase (Sonderegger P. and Christen P.) **275,** 157

Cytotoxic response. Mapping of *H-2* genes associated with T cell-mediated cytotoxic responses to SV40-tumour-associated specific antigens (Pfizenmaier K., Trinchieri G., Solter D. and Knowles B. B.) **274,** 691

Cytotoxicity. 5,6-Dihydroxyindole is a melanin precursor showing potent cytotoxicity (Pawelek J. M. and Lerner A. B.) **276,** 627

Czechoslovakia. Czech chartists claim two died in nuclear accident, *news,* **276,** 551

Czechs and Soviets meet in record space flights, *news,* **272,** 119

Friends of the Czech earth go underground, *news,* **274,** 414

Shadow of '68 still hangs over Czech science, *news,* **274,** 632

Da Vinci, L. An anatomist's look at Leonardo, *news and views,* (Ford E. H. R.) **272,** 13

Darwin's finches. Heritability of external morphology in Darwin's finches (Boag P. T. and Grant P. R.) **274,** 793

Dating. ... and geochronological anomalies, *news and views,* **275,** 479

A problem in ^{210}Pb geochronologies of sediments (Megumi K.) **274,** 885

A reduction in $^{87}Sr/^{86}Sr$ during basalt alteration (Hawkesworth C. J. and Morrison M. A.) **276,** 381

Absolute age of the base of the hominid-bearing beds in Eastern Java (Ninkovich D. and Burckle L. H.) **275,** 306

Accelerator dating techniques, *news and views,* (Mast T. S.) **273,** 491

Age of the Olby Laschamp geomagnetic polarity event (Condomines M.) **276,** 257

Anomalous cosmochronology... *news and views,* (Moorbath S. and Schramm D. N.) **275,** 478

Carbon isotope fractionation in biological material, *matters arising,* (Tieszen L. L.) **276,** 97

γ-Carboxyglutamic acid in fossil bones and its significance for amino acid dating (King Jr K.) **273,** 41

Climatic signals in British Isles tree-ring chronologies (Hughes M. K., Gray B., Pilcher J., Baillie M. and Leggett P.) **272,** 605

Cordilleran Benioff Zones (Fucugauchi J. U.) **275,** 464

Detection of ^{14}C using a small van de Graaff accelerator (Doucas G., Garman E. F., Hyder H. R. McK., Sinclair D., Hedges R. E. M. and White N. R.) **276,** 253

Enrichment of ^{14}C and radiocarbon dating (Hedges R. E. M. and Moore C. B.) **276,** 255

K-Ar and $^{40}Ar/^{39}Ar$ age of the Laschamp geomagnetic polarity reversal (Hall C. M. and York D.) **274,** 462

Measurement of ^{10}Be in 1,000- and 5,000-year-old Antarctic ice (Raisbeck G. M., Yiou F., Fruneau M., Lieuvin M. and Loiseaux J. M.) **275,** 731

Radiocarbon timescale tested against magnetic and other dating methods (Stuiver M.) **273,** 271

Reset Rb/Sr whole-rock systems and chemical control (Bell K. and Blenkinsop J.) **273,** 532

Sedimentation rates determined by ^{137}Cs dating in a rapidly accreting salt marsh (Delaune R. D., Patrick W. H. Jr and Buresh R. J.) **275,** 532

Sm-Nd isotopic investigation of Isua supracrustals and implications for mantle evolution (Hamilton P. J., O'Nions R. K., Evensen N. M., Bridgwater D. and Allaart J. H.) **272,** 41

Tree-ring chronology, *news and views,* (Moore P. D.) **272,** 578

Uranium-series dating of insular phosphorite from Ebon atoll; Micronesia (Veeh H. H. and Burnett W. C.) **274,** 460

Absolute radiocarbon dating by low-altitude European tree-ring calibration (Suess H. E.) **272,** 649

Confirmation of ^{137}Cs dating by algal stratigraphy in Rostherne Mere (Livingstone D. and Cambray R. S.) **276,** 259

Dating sediments by a K-Ar method (Langley K. M.) **276,** 56

Io-U dating of the Ouljian stage from Torre Garcia (southern Spain) (Bernat M., Bousquet J.-C. and Dars R.) **275,** 302

Dating: Isotopic. Stable isotopic compositions of early Archaean sulphate deposits of probable evaporitic and volcanogenic origins (Lambert I. B., Donnelly T. H., Dunlop J. S. R. and Groves D. I.) **276,** 808

Dating: Thermoluminescence. Thermoluminescence dating of sediment baked by lava flows of the Chaine des Puys (Huxtable J., Aitken M. J. and Bonhommet N.) **275,** 207

Davies C. W. *obituary* (Davies C. W.) **273,** 414

Davy. Reflections on the occasion of my birthday, by Mr Davy. *news*, **276,** 557
DBA. Effects *in vitro* of the proposed antisickling agent DBA (Honig G. R., Vida L. N. and Ferenc C.) **272,** 833
DDT. Structural and biological link between pyrethroids and DDT in new insecticides (Holan G., O'Keefe D. F., Virgona C. and Walser R.) **272,** 734
DDT resistance. Unusual response of DDT-resistant houseflies to carbinol analogues of DDT (Sawicki R. M.) **275,** 443
Deacylation. Retinoids as well as tumour promoters enhance deacylation of cellular lipids and prostaglandin production in MDCK cells (Levine L. and Ohuchi K.) **276,** 274
Dead Sea. Better Med than Dead *news*, **276,** 746
Decarboxylase. Selective inhibitors of biosynthesis of aminergic neurotransmitters (Kollonitsch J., Patchett A. A., Marburg S., Maycock A. L., Perkins L. M., Doldouras G. A., Duggan D. E. and Aster S. D.) **274,** 906
Decompression sickness. Detection of bubbles in decompression sickness (Beck T. W., Daniels S., Paton W. D. M. and Smith E. B.) **276,** 173
Deep Underwater Muon and Neutrino Detector. Deep-sea neutrinos, *news and views*, (Eichler D.) **276,** 15
Defect. Non-stoichiometry and dielectric properties (Catlow C. R. A. and James R.) **272,** 603
Defence evasion. *Fasciola hepatica* (Goose J.) **275,** 216
Deglacierisation. Date of deglacierisation of Mount Elgon (Hamilton A. and Perrott A.) **273,** 49
Demyelination. Overcoming conduction failure in demyelinated nerve fibres by prolonging action potentials (Bostock H., Sherratt R. M. and Sears T. A.) **274,** 385
Transfer of demyelination by intraneural injection of experimental allergic neuritis serum (Saida T., Saida K., Silberberg D. H. and Brown M. J.) **272,** 639
Dendrite. Ectopic dendritic growth in mature pyramidal neurones in human ganglioside storage disease (Purpura D. P.) **276,** 520
Plasticity in dendrites shown by continuous GABA administration in superior cervical ganglion of adult rat (Wolff J. R., Joo F. and Dames W.) **274,** 72
Denitrification. (Eichler D. Roy C. R.) **275,** 734
Evidence for denitrification in aerobic pelagic sediments (Wilson T. R. S.) **274,** 354
Denmark. Denmark expands research on Ante-natal diagnosis (Godtfredsen S. E.) **276,** 111
Denmark follows UK on DNA guidelines, *news*, (Godtfredsen S.) **271,** 700
Deoxy CpG. Molecuar structure of a double helical DNA fragment intercalator complex between deoxy CpG and a terpyridine platinum compound (Wang A. H. J., Nathans J., van der Marel G., van Boom J. H. and Rich A.) **276,** 471
Deoxycytidine. Bromodeoxyuridine mutagenesis in mammalian cells is stimulated by thymidine and suppressed by deoxycytidine (Davidson R. L. and Kaufman E. R.) **276,** 722
Mutagenesis of Chinese hamster cells is facilitated by thymidine and deoxycytidine (Peterson A. R., Landolph J. R., Peterson H. and Heidelberger C.) **276,** 508
Deposition. Desert varnish: evidence for cyclic deposition of manganese (Perry R. S. and Adams J. B.) **276,** 489
Depression. Swimming rats and human depression, *matters arising*, (Hawkins J., Hicks R. A., Phillips N. and Moore J. D.) **274,** 512
Depression—Reply. Swimming rats and human depression—Reply, *matters arising*, (Porsolt R. and Jalfre M.) **274,** 512
Derepression. Direct measurement of intracellular *p*H during metabolic derepression of the sea urchin egg (Shen S. S. and Steinhardt R. A.) **272,** 253
Desert. Are deserts ecosystems? *news and views*, (Moore P. D.) **275,** 691
Desert rainfall, *correspondence*, (Glantz M. H. Katz R. W.) **271,** 7
Desert varnish. Desert varnish: evidence for cyclic deposition of manganese (Perry R. S. and Adams J. B.) **276,** 489
Deslanoside. No evidence for a central serotonergic mechanism in arrhythmogenic effects of deslanoside , *matters arising*, (Helke C. J., Souza J. D., Hamilton B. and Gillis R.) **274,** 925
Deutsch's octave illusion. Deutsch's octave illusion, *matters arising*, (Deutsch D. and Gregory A. H.) **274,** 721
Development. An explanation of ecological and developmental constants (Maiorana V. C.) **273,** 375
Anterior and posterior compartments in the head *Drosophila* (Morata G. and Lawrence P. A.) **274,** 473
Antibodies to probe development, *news and views*, (Heath J. K.) **275,** 10
Asynchronous sexual development determines the breeding system in field beans (Paul C., Gates P., Harris N. and Boulter D.) **275,** 54
Both X chromosomes function before visible X-chromosome inactivation in female mouse embryos (Epstein C. J., Smith S., Travis B. and Tucker G.) **274,** 500
'Cardiac' RNA, *news and views*, (Slack J.) **271,** 12
Change in synaptic channel gating during neuromuscular development (Sakmann B. and Brenner H. R.) **276,** 401
Chemical waves in *Drosophila*, *news and views*, (Slack J.) **271,** 403
Connectivity changes in a class of motoneurone during the development of a nematode (White J. G., Albertson D. G. and Anness M. A. R.) **271,** 764
Development and Differentiation in the Cellular Slime Moulds (Cappuccinelli P. and *editor*) *book review by* Bonner J. T. **271,** 192
Development of eye alignment in cats (Olson C. R. and Freeman R. D.) **271,** 446
Development, Reform, and Malnutrition in Chile (Hakim P. and) *book review by* Miller D. S. **276,** 542
DNA polymerases during postnatal myocardial development (Limas C. J. and Limas C.) **271,** 781
Few surprises in UNCSTD draft plan of action, *news*, **276,** 201
HGPRT activity changes in preimplantation mouse embryos (Kratzer P.G. and Gartler S. M.) **274,** 503
Impaired gene activity for 18S and 28S rRNA in early embryonic development of mouse parthenogenones (Hansmann I., Gebauer J. and Grimm T.) **272,** 377
Involvement of histocompatibility antigens in embryonic cell recognition events (McClay D. R. and Gooding L. R.) **274,** 367
Maternal effect in early development (Morriss G. M.) **276,** 17
Multinationals and development, *news*, (Branscomb L.) **275,** 168
Mystery of foetal growth, *news and views*, (Lindley M.) **272,** 404
NH_4 Cl and other weak bases in the activation of sea urchin eggs, *matters arising*, (Boron W. F., Roos A. and De Weer P.) **274,** 190
Oestrogen content of the embryonic rabbit ovary (George F. W., Milewich L. and Wilson J. D.) **274,** 172
Possible plasticity in the rat superior colliculus (Vidyasagar T. R.) **275,** 140
Postnatal cerebellar cells from staggerer mutant mice express embryonic cell surface characteristic (Hatten M. E. and Messer A.) **276,** 504
The ACTH 'family tree' of the rhesus monkey—changes with development (Silman R. E., Holland D., Chard T., Lowry P. J., Hope J., Robinson J. S. and Thorburn G. D.) **276,** 526
The origin of lymphoid stem cells studied in chick yolk sac-embryo chimaeras (Lassila O., Eskola J., Toivanen P., Martin C. and Dieterlen-Lievre F.) **272,** 353
The use of *Xenopus* egg cells to assay the mRNA of single cells (van der Donk J. A., van Dam R. H. and Bazin H.) **271,** 479
Two distinct developmentally regulated lectins in chick embryo muscle (Mir-Lechaire F. J. and Barondes S. H.) **272,** 256
Development. A chymotrypsin-sensitive step in the development of *Dictyostelium discoideum* (Schmidt J. A., Stirling J. L., Jones G. E. and Pacy J.) **274,** 400
Brain development influences the appearance of glial factor-like activity in rat brain primary cultures (Schurch-Rathgeb Y. and Monard D.) **273,** 308
Clonal segregation and positional information in late ommatidial development in *Drosophila* (Campos-Ortega J. A., Jurgens G. and Hofbauer A.) **274,** 584
Development in Mammals (Johnson M. H. *editor*) *book review by* Hogan B. **276,** 100
β-D-xylosides cause abnormalities of growth and development in chick embryos (Gibson K. D., Doller H. J. and Hoar R. M.) **273,** 151
Tissue Interactions and Development (Wessells N. K., *editor*) *book review by* Downie J. R. **272,** 97
Transfer of embryonic nurlei to fertilised mouse eggs and development of tetraploid blastocysts (Modlinski J. A.) **273,** 466
Development: Nerve. Axons from eyes grafted in *Xenopus* can grow into the spinal cord and reach the optic tectum (Giorgi P. P. and Van der Loos H.) **275,** 746
Diabetes. Infection of human pancreatic beta cell cultures with mumps virus (Prince G. A., Jenson A. B., Billups L. C. and Notkins A. L.) **271,** 158
Complete protection from low-dose streptozotocin-induced diabetes in mice (Rossini A. A., Williams R. M., Appel M. C. and Like A. A.) **276,** 182
Diabetes mellitus. Evidence for a single locus controlling susceptibility to virus-induced diabetes mellitus (Onodera T., Yoon J.-W., Brown K. S. and Notkins A. L.) **274,** 693
Diacylglycerol. Rapid transbilayer diffusion of 1,2-diacylglycerol and its relevance to control of membrane curvature (Allan D., Thomas P. and Michell R. H.) **276,** 289
Diamond. Clean surface reactions between diamond and steel (Thornton A. G. and Wilks J.) **274,** 792
Investigating artificially coloured diamonds (Collins A. T.) **273,** 654
Phase transitions and indentation hardness of Ge and diamond, *matters arising*, (Tabor D.) **273,** 406
Rare gas isotopic compositions in diamonds (Takaoka N. and Ozima M.) **271,** 45
Trace elements in diamonds of different types (Bibby D. M., Fesq H. W. and Sellschop J. P. F.) **276,** 379
Plastic deformation of diamond at room temperature (Humble P. and Hannink R. H. J.) **273,** 37
Diamond synthesis. Epitaxial synthesis of diamond by carbon-ion deposition at low energy (Freeman J. H., Temple W. and Gard G. A.) **275,** 634
Diarrhoea. Cholera and related diarrhoeas ('turista') *news and views*, (Finkelstein R. A. and Boesman-Finkelstein M.) **275,** 173
Diatom. Marine alga *Platymonas* sp. accumulates silicon without apparent requirement (Fuhrman J. A., Chisholm S. W. and Guillard R. R. L.) **272,** 244
Silica oxygen isotopes in diatoms: a 20,000 yr record in deep-sea sediments (Mikkelsen N., Labeyrie L., Jr and Berger W. H.) **271,** 536
Dicrostonyx groenlandicus. Infanticide and other reproductive strategies in the collared lemming, *Dicrostonyx groenlandicus* (Mallory F. F. and Brooks R. J.) **273,** 144
Dictyostelium discoideum. 5′ AMP is a direct precursor of cytokinin in *Dictyostelium discoideum* (Taya Y., Tanaka Y. and Nishimura S.) **271,** 545
Auxotrophic mutants of *Dictyostelium discoideum* (Franke J. and Kessin R.) **272,** 537
Dieldrin. Pesticides in the diet, *news*, **276,** 661
Dielectric loss. Characterisation of dielectric loss in solids and liquids (Hill R. M.) **275,** 96
Dielectric property. Stimulated resonance between electrical and shear fields by a colloid system (Block H., Goodwin K. M. W., Gregson E. M. and Walker S. M.) **275,** 632
Dielectric relaxation. Energy basis of dielectric relaxation loss (Salter D. C.) **271,** 645
Diet. Chinese Restaurant Syndrome, *news and views*, (Reif-Lehrer L.) **271,** 712
Co-carcinogenic effects of dietary cholesterol in experimental colon cancer (Cruse J. P., Lewin M. R., Ferulano G. P. and Clark C. G.) **276,** 822
Compensatory and conditioned feeding responses to scheduled glucose infusions in the rat (Mather P., Nicolaidis S. and Booth D. A.) **273,** 461
Dietary lipids and heart disease, *correspondence*, (Katan M. B.) **271,** 606
Discarding the diet-heart hypothesis, *correspondence*, (Mann G. V.) **271,** 500
Does dietary fat influence plasma lipoprotein structure? *news and views*, (Soutar A.) **273,** 11
Diet: Artificial. Cardioactive substances in the monarch butterfly and *Euploea core* reared on leaf-free artificial diet (Rothschild M., Marsh N. and Gardiner B.) **275,** 649
Dietary fibre. Dietary fibre in the British diet (Southgate D. A. T., Bingham S. and Robertson J.) **274,** 51
Diethylnitrosamine. Biochemical characterisation of stages of hepatocarcinogenesis after a single dose of diethylnitrosamine (Pitot H. C., Barsness L. Goldsworthy T. and Kitagawa T.) **271,** 456
Differentation. Genetic differentation during speciation (Nevo E. and Cleve H.) **275,** 125
Differentiation. Attenuation of positional signalling in the chick limb by high doses of *α*-radiation (Smith J. C., Tickle C. and Wolpert L.) **272,** 612
Development and Differentiation in the Cellular Slime Moulds (Cappuccinelli P. and *editor*) *book review by* Bonner J. T. **271,** 192
Genes, chromosomes and differentiation, *news and views*, **274,** 639
Lyt markers on thymus cell migrants (Scollay R., Kochen M., Butcher E. and Weissman I.) **276,** 79
Uncoupled synthesis of histones and DNA during Friend cell differentiation (Zlatanova J. and Swetly P.) **276,** 276
Appearance of fibronectin during differentiation of mouse teratocarcinoma *in vitro* (Wartiovaara J., Leivo I., Virtanen I., Vaheri A. and Graham C. F.) **272,** 355
Cyclic-AMP-induced differentiation in neuroblastoma is independent of cell division rate (Waymire J. C., Gilmer-Waymire K. and Haycock J. W.) **276,** 194
Differentiation dissected, *news and views*, (Newmark P.) **272,** 756
Endopolyploidy and Polyteny in Differentiation and Evolution (Nagl W.) *book review by* Jones K. W. **276,** 539
Differentiation: Erythroid. Opposing effects of tumour promoters on erythroid differentiation (Miao R. M., Fieldsteel A. H. and Fodge D. W.) **274,** 271
Diffraction. Diffraction from Materials (Schwartz L. H. and) *book review by* Sim G. **273,** 478
Diffusion. Lateral diffusion in plasma membrane of mouse egg is restricted after fertilisation (Johnson M. and Edidin M.) **272,** 448
Diflubenzuron. Larvicidal activity of diflubenzuron in tsetse fly (Trewern M. A.) **272,** 719
Digestion. Reabsorption of digestive enzymes: playing with poison, *news and views*, (Diamond J. M.) **271,** 111
Digital image processing. Digital image processing and Analysis (Pratt W. K. *editor*) *book review by* Hawkes P. W. **276,** 740
Digitalis. Is digitalis inotropy associated with enhanced slow inward calcium current? (Weingart R., Kass R. S. and Tsien R. W.) **273,** 389
Dihydroalprenolol binding. Effect of L-triiodothyronine on (−)^{3}H-dihydroalprenolol binding and cyclic AMP response to (−)adrenaline in cultured heart cells (Tsai J. S. and Chen A.) **275,** 138
Dihydrofolate reductase. Phenotypic expression in *E. coli* of a DNA sequence coding for mouse dihydrofolate reductase (Chang A. C. Y., Nunberg J. H., Kaufman R. J., Erlich H. A., Schimke R. T. and Cohen S. N.) **275,** 617
Dihydroxyindole. 5,6-Dihydroxyindole is a melanin precursor showing potent cytotoxicity (Pawelek J. M. and Lerner A. B.) **276,** 627
Dihydroxyvitamin D. 24, 25-Dihydroxyvitamin D is a metabolite of vitamin D essential for bone formation (Ornoy A., Goodwin D., Noff D. and Edelstein S.) **276,** 517
Dikaryon. Chromosome transfer in dikaryons of a smut fungus (Day A. W.) **273,** 753
Dimethyl sulphide. Reevaluation of the role of dimethyl sulphide in the sulphur budget (Nguyen B. C., Gaudry A., Bonsang B. and Lambert G.) **275,** 637
Dimethyl sulphide. Production of methane and carbon dioxide from methane thiol and dimethyl sulphide by anaerobic lake sediments (Zinder S. H. and Brock T. D.) **273,** 226
Dimethylnitrosamine. Dimethylnitrosamine inhibits enzymatic removal of O^6-methylguanine from DNA (Pegg A. E.) **274,** 182
Dimilin. Cuticle under attack, *news and views*, (Vincent J. F. V.) **273,** 339
Dinosaur. Discrepancies in claims for endothermy in therapsids and dinosaurs, *news and views*, (Reid R.E.H.) **276,** 757
Elaborate CNS cooling structures in large dinosaurs (Wheeler P. E.) **275,** 441
Dinosaur feeding behaviour and the origin of flowering plants (Bakker R. T.) **274,** 661
Dioxin. Chemical company claims dioxins a natural by-product of combustion, *news*, **276,** 312
Dioxin: Toxicological and Chemical Aspects (Cattabeni F., *editor*) *book review by* Hay A. **276,** 304
Vietnam's dioxin problem, *news*, (Hay A.) **271,** 597
Dioxin meeting recommends cancer study, *news*, (Hay A.) **271,** 202
Dioxin source is 'safe'. Dioxin source is 'safe', *news*, (Hay A.) **274,** 526
Diphenylhydantoin. The cellular mode of action of the anti-epileptic drug 5, 5-diphenylhydantoin (Perry J. G., McKinney L. and De Weer P.) **272,** 271
Diphtheria. Toxicity of diphtheria toxin for lymphoblastoid cells is increased by conjugation to antilymphocytic globulin (Thorpe P. E., Ross W. C. J., Cumber A. J., Hinson C. A., Edwards D. C. and Davies A. J. S.) **271,** 752
Toxicity of diphtheria toxin for lymphoblastoid cells is increased by conjugation to antilymphocytic globulin (Thorpe P. E., Ross W. C. J., Cumber A. J., Hinson C. A., Edwards D. C. and Davies A. J. S.) **271,** 752
Dipicrylamine. Lipid-dependent and phloretin-induced modifications of dipicrylamine adsorption by bilayer membranes (Wang C.-C. and Bruner L. J.) **272,** 268
Dipole. Apparent superluminal expansion velocities in the dipole magnetic field model (Milgrom M. and Bahcall J. N.) **274,** 349
Disarmament. A modest step forward in New York, *leading article*, **274,** 103
Arms talks: a new objective, *leading article*, **274,** 629
Disarmament's month in New York, *leading article*, **273,** 175
Disaster relief. Making disaster reliefmore effective, *leading article*, **274,** 1
Disaster relief needs more research, *news*, (Rivers J.) **271,** 100
Discontinuous gene. Do genes-in-pieces imply proteins-in-pieces? *news and views*, (Blake C. C. F.) **273,** 267
Disease. Complex patterns of inheritance in human disease, *news and views*, (Ford E. H. R.) **272,** 755
Dynamical diseases, *news and views*, (May R. M.) **272,** 673
Dislocation theory. Cooperativity in the dislocation theory of melting (Cotterill R. M. J.) **273,** 371
Dispersal. Inbreeding and dispersal in the great tit (Greenwood P. J., Harvey P. H. and Perrins C. M.) **271,** 52
Dissident. Aftermath of the Orlov trial, *leading article*, (Orlov Y.) **273,** 255
Conference time signals protests, *news*, **274,** 525

Dangers of 'dissident' correspondence. *correspondence*. (Harries J. E.) **273,** 486
Londoner may defend dissident **274,** 415
News from Orlov's trial. *news*. (Orlov Y.) **273,** 329
Scepticism over Soviet promise to let Levich go **275,** 264
Soviets climb down on mental hospital detentions. *news*, **274,** 205
Two reports from the USSR. *news*, **273,** 6
Yurii Orlov suffers two trials. *news*. (Orlov Y.) **273,** 178
Dissipative structure. Dissipative structures (Nicolis G. and) *book review by* Neumann E. **271,** 785
Diurnal rythm. Temperature-induced phase shift of daily rhythm of serum prolactin in gulf killifish (Spieler R. E., Meier A. H. and Noeske T. A.) **271,** 469
DNA. Carcinogen binding to DNA. *news and views*, (Neidle S.) **276,** 444
In vivo synthesis and properties of uracil-containing DNA (Warner H. R. and Duncan B. K.) **272,** 32
Incorporation of uracil into DNA. *news and views*, (O'Donovan G.) **272,** 582
Replication: twenty-five years after. *news and views*, **274,** 210
Tortuous story of DNA (Portugal F. H. and) *book review by* Olby R. **272,** 760
Why do nucleic acids have 3'5' phosphodiester bonds (Dhingra M. M. and Sarma R. H.) **272,** 798
DNA Insertion Elements, Plasmids and Episomes (Bukhari A. J., *editor*) *book review by* Hayes W. **273,** 171
The length of nucleosome-associated DNA is the same in both transcribed and nontranscribed regions of chromatin (Gottesfeld J. M. and Melton D. A.) **273,** 317
DNA adduct. Excisability and persistence of benzo(*a*)pyrene DNA adducts in epithelioid human lung cells (Feldman G., Remsen J., Shinohara K. and Cerutti P.) **274,** 796
DNA: Break. Non-rejoining DNA breaks and cell inactivation. *matters arising*. (Goodhead D. T., Thacker J. and Cox R.) **272** 379
DNA: Chloroplast. Chloroplast DNA codes for tRNA from cytoplasmic polyribosomes (McCrea J. M. and Hershberger C. L.) **274,** 717
DNA: Cloned. Selective expression of transduced or cloned DNA in minicells containing plasmid pKB280 (Reeve J. N.) **276,** 728
DNA: Complementary. *In vitro* synthesis and characterisation of full- and half-genome length complementary DNA from avian oncoviruses (Lai M. M. C. and Hu S. S. F.) **271,** 481
Isolation and partial sequence of recombinant plasmids containing human α-, β- and γ-globin cDNA fragments (Little P., Curtis P., Coutelle C., Van Den Berg J., Dalgleish R., Malcolm S., Courtney M., Westaway D. and Williamson R.) **273,** 640
DNA conformation. Two contiguous conformations in a nucleic acid duplex (Selsing E., Wells R. D., Early T. A. and Kearns D. R.) **275,** 249
DNA conservation. Highly conserved DNA of Ti plasmids overlaps T-DNA maintained in plant tumours (Chilton M.-D., Drummond M. H., Merlo D. J. and Sciaky D.) **275,** 147
Homologous DNA sequences in different Ti-plasmids are essential for oncogenicity (Depicker A., Van Montagu M. and Schell J.) **275,** 150
Homology between human and simian repeated DNA (Manuelidis L. and Wu J. C.) **276,** 92
DNA conservation and speciation: adaptive or accidental? *news and views*, (Dover G.) **272,** 123
DNA denaturation. Comparison of theory to experiment for DNA thermal denaturation (Vizard D. L., White R. A. and Ansevin A. T.) **275,** 250
DNA folding. Twists and turns of DNA. *news and views*, (Neidle S.) **272,** 756
DNA fragment. Molecular structure of a double helical DNA fragment intercalator complex between deoxy CpG and a terpyridine platinum compound (Wang A. H. J., Nathans J., van der Marel G., van Boom J. H. and Rich A.) **276,** 471
DNA: Fragmentation. DNA lesions occur with loss of viability in embryos of ageing rye seed (Cheah K. S. E. and Osborne D. J.) **272,** 593
DNA gyrase. Promoter specific inhibition of transcription by antibiotics which act on DNA gyrase (Smith C. L., Kubo M. and Imamoto F.) **275,** 420
DNA: Hybrid. Bacterial gene into monkey cells (Jenkins J.) **275,** 13
DNA: Invertible. Invertible DNA in phage Mu. *news and views*, (Howe M. M.) **271,** 608
DNA ligase. *Saccharomyces cerevisiae* cell cycle mutant *cdc*9 is defective in DNA ligase (Johnston L. H. and Nasmyth K. A.) **274,** 891
DNA: Mitochondrial. A temperature-sensitive yeast mitochondrial mutant with altered cytochrome *c* oxidase subunit (Eeckelshall T. R., Needleman R. B., Storm E. M., Buchferer B. and Marmur J.) **273,** 67
An insert in the single gene for the large ribosomal RNA in yeast mitochondrial DNA (Bos J. L., Heyting C., Borst P., Arnberg A. C. and Van Bruggen E. F. J.) **275,** 336
Asymmetric gene conversion at inserted segments on yeast mitochondrial DNA (Strausberg R. L., Vincent, R. D., Perlman P. S. and Butow R. A.) **276,** 577
Gene conversion in mitochondria. *news and views*, (Williamson D. H.) **276,** 562
Intervening sequences in the mitochondrial genome. *news and views*, (Bernardi G.) **276,** 558
DNA oxygen. Oxygens in DNA as main targets for ethylnitrosourea in normal and xeroderma pigmentiosum fibroblasts and fetal rat brain cells (Singer B., Bodell W. J., Cleaver J. E., Thomas G. H., Rajewsky M. E. and Thon W.) **276,** 85
DNA phosphotriester. DNA phosphotriesters as indicators of cumulative carcinogen-induced damage (Shooter K. V.) **274,** 612
DNA polymerase-. Aphidicolin prevents mitotic cell division by interfering with the activity of DNA polymerase-α (Ikegami S., Taguchi T., Ohashi M., Oguro M., Nagano H. and Mano Y.) **275,** 458
DNA polymerase. DNA polymerase and mutation. *news and views*, (Bridges B.) **275,** 591
DNA polymerases during postnatal myocardial development (Limas C. J. and Limas C.) **271,** 781
Inhibition of hepatitis B DNA polymerase by intercalating agents (Hirschman S. Z. and Garfinkel E.) **271,** 681
Role of DNA polymerase γ in adenovirus DNA replication (van der Vliet P. C. and Kwant M. M.) **276,** 532
DNA: Recombinant. Rearrangement of genetic information may produce immunoglobulin diversity (Weigert M., Gatmaitan L., Loh E., Schilling J. and Hood L.) **276,** 785
Synthesis of an ovalbumin-like protein by *Escherichia coli* K12 harbouring a recombinant plasmid (Mercereau-Puijalon O., Royal A., Cami B., Garapin A., Krust A., Gannon F. and Kourilsky P.) **275,** 505
Synthesis of growth hormone by bacteria (Seeburg P. H., Shine J., Martial J. A., Ivarie R. D., Morris J. A., Ullrich A., Baxter J. D. and Goodman H. M.) **276,** 795
DNA: Recombination. High frequency recombination in centromeric and histone regions of *Drosophila* genomes (Grell R. F.) **272,** 78
Induced intragenic recombination in yeast can occur during the G_1 mitotic phase (Fabre F.) **272,** 795
Recombination of C_H genes encoding the M1 (IgM) and G1 (IgG) chicken allotypes (Ivanyi J.) **272,** 166
DNA recombination. Why should the genome congeal? *matters arising*. (Schaap T.) **276,** 535
Why should the genome congeal—Reply. *matters arising*. (Maynard Smith J.) **276,** 536
DNA repair. Determination of plasmid molecular weights from ultraviolet sensitivities (Sancar A. and Rupert C. S.) **272,** 471
Does ultraviolet light enhance postreplication repair in mammalian cells? (Painter R. B.) **275,** 243
Parallel induction of sister chromatid exchanges and infectious virus from SV40-transformed cells by alkylating agents (Kaplan, J. C., Zamansky G. B., Black P. H. and Latt S. A.) **271,** 662
Repair deficient human disorders and cancer. *review article*. (Setlow R. B.) **271,** 713
Repair deficient human disorders and cancer. *review article*. (Setlow R. B.) **271,** 713
DNA repair mechanisms. *news and views*, (Painter R. B.) **273,** 708
DNA: Repeated. Homology between human and simian repeated DNA (Manuelidis L. and Wu J. C.) **276,** 92
DNA replication. Nucleotide sequence of the origin of replication in bacteriophage ΦX174 RF DNA (Langeveld S. A., van Mansfeld A. D. M., Baas P. D., Jansz H. S., van Arkel G. A. and Weisbeek P. J.) **271,** 417
Polyamine deficiency reduces the rate of DNA replication fork movement in *Escherichia coli* (Geiger L. E. and Morris D. R.) **272,** 730
Role of DNA polymerase γ in adenovirus DNA replication (van der Vliet P. C. and Kwant M. M.) **276,** 532
DNA: Satellite. Localisation of a male-specific DNA fragment to a sub-region of the human Y chromosome (Bostock C. J., Gosden J. R. and Mitchell A. R.) **272,** 324
Preferential binding of hog brain microtubule-associated proteins to mouse satellite versus bulk DNA preparations (Wiche G., Corces V. G. and Avila J.) **273,** 403
DNA: Self-replicating. Cloning of replication origins from the *E. coli* K12 chromosome (Diaz R. and Pritchard R. H.) **275,** 561
DNA sequence. DNA sequence for a low-level promoter of the *lac* repressor gene and an 'up' promoter mutation (Calos M. P.) **274,** 762
DNA Sequence of the mini-insertion IS2-6 and its relation to the sequence of IS2 (Ghosal D. and Saedler H.) **275,** 611
Revised sequence for the *lac* repressor (Beyreuther K.) **274,** 767
Sequence of the *lac* gene (Farabaugh P. J.) **274,** 765
Sequence of the *lac* gene (Farabaugh P. J.) **274,** 765
The decline and fall of protein chemistry? *news and views*, (Malcolm A. D. B.) **275,** 90
The natural ovalbumin gene contains seven intervening sequences (Dugaiczyk, A., Woo S. L. C., Lai E. C., Mace M. L. Jr, McReynolds L. and O'Malley B. W.) **274,** 328
DNA structure. DNA double helical fragment at atomic resolution (Viswamitra M. A., Kennard O., Jones P. G., Sheldrick G. M., Salisbury S., Falvello L. and Shakked Z.) **273,** 687
^{31}P magnetic resonance of DNA in nucleosome core particles of chromatin (Kallenbach N. R., Appleby D. W. and Bradley C. H.) **272,** 134
Structure of DNA predicted from stereochemistry of nucleoside derivatives (Sasisekharan V. and Pattabiraman N.) **275,** 159
DNA structure and transcription (Travers A.) **275,** 89
DNA: SV40. Complete nucleotide sequence of SV40 DNA (Fiers W., Contreras R., Haegeman G., Rogiers R., Voorde A. Van de, Heuverswyn H. Van., Heereweghe J. Van, Volckaertand G. and Ysebaer M.) **273,** 113
DNA synthesis. Graft-versus-host disease impairs cerebellar growth (Griffin W. S. T., Head J. R., Woodward D. J. and Carrol C.) **275,** 315
DNA: Synthesis. Primase initiates Okazaki pieces during polyoma DNA synthesis (Eliasson R. and Reichard P.) **272,** 184
DNA synthesis. Uncoupled synthesis of histones and DNA during Friend cell differentiation (Zlatanova J. and Swetly P.) **276,** 276
Stimulation of DNA synthesis by tumour promoter and pure mitogenic factors (Dicker P. and Rozengurt E.) **276,** 723
DNA: VX174. Direct comparison of theoretical and experimental melting profiles for RF II ΦX174 DNA (Lyubchenko Y. L., Vologodskii A. V. and Frank-Kamenetskii M. D.) **271,** 28
Nucleotide sequence of the origin of replication in bacteriophage ΦX174 RF DNA (Langeveld S. A., van Mansfeld A. D. M., Baas P. D., Jansz H. S., van Arkel G. A. and Weisbeek P. J.) **271,** 417
DNA/replication. Replication origins. *news and views*, (Sherratt D.) **271,** 404
Dog. Evidence for domestication of the dog 12,000 years ago in the Natufian of Israel (Davis S. J. M. and Valla F. R.) **276,** 608
Domestication. Evidence for domestication of the dog 12,000 years ago in the Natufian of Israel (Davis S. J. M. and Valla F. R.) **276,** 608
Dominance. Size-dependent dominance hierarchy in the anemone *Actinia equina* (Brace R. C. and Pavey J.) **273,** 752
Dopamine. A new dopaminergic prodrug (Horn A. S., de Kaste D., Dijkstra D., Rollema H., Feenstra M., Westerink B. H. C., Grol C. and Westerbrink A.) **276,** 405
Dopamine receptors localised on cerebral cortical afferents to rat corpus striatum (Schwarcz R., Creese I., Coyle J. T. and Snyder S. H.) **271,** 766
Haloperido-induced presynaptic dopamine supersensitivity is blocked by chronic lithium (Gallager, D. W., Pert A. and Bunney Jr W. E.) **273,** 309
Met-enkephalin inhibits *in vitro* dopamine-induced LHRH release from mediobasal hypothalamus of male rats (Rotsztejn W. H., Drouva S. V., Pattou E. and Kordon C.) **274,** 281
Receptor basis for dopaminergic supersensitivity in Parkinson's disease (Lee T., Seeman P., Rajput A., Farley I. J. and Hornykiewicz O.) **273,** 59
Dopamine. Bromocriptine-induced inhibition of plasma dopamine, noradrenaline and adrenaline responses to LH-RF (Van Loon G. R.) **275,** 331
Dopamine. Do presynaptic auto-receptors control dopamine release? (Raiteri M., Cervoni A. M., Carmine R. del and Levi G.) **274,** 706
Morphine and β-endorphin inhibit release of noradrenaline from cerebral cortex but not of dopamine from rat striatum (Arbilla S. and Langer S. Z.) **271,** 559
Striatal dopamine release and contraversive rotation elicited by intranigrally applied muscimol (Martin G. E. and Haubrich D. R.) **275,** 230
Dopamine fibre. Tetrahydropapaveroline induces small granular vesicles in brain dopamine fibres (Koda L. Y., Koob G. F., Shier W. T. and Bloom F. E.) **276,** 281
Dopamine receptor. Are dopamine receptors accessible to intracellularly applied agonist? (House C. R., Ginsborg B. L. and Mitchell M. R.) **275,** 663
Direct evidence for presynaptic and postsynaptic dopamine receptors in brain (Nagy J. I., Lee T., Seeman P. and Fibiger H. C.) **274,** 278
Effect of guanine nucleotides on striatal dopamine receptors (Zahniser N. R. and Molinoff P. B.) **275,** 453
Use of ADTN to define specific ^{3}H-spiperone binding to receptors in brain. *matters arising*. (Quik M., Iversen L. L., Larder A. and Mackay A. V. P.) **274,** 513
Dopamine receptor. LSD labels a novel dopamine receptor in molluscan nervous system (Drummond A. H., Bucher F. and Levitan I. B.) **272,** 368
Dopaminergic pathway. Increased spontaneous activity following substance P, infusion into A10 dopaminergic area (Stinus L., Kelley A. E. and Iversen S. D.) **276** 616
DRB. DRBinduced premature termination of late adenovirus transcription, Virus: Adenovirus (Fraser N. W., Sehgal P. B. and Darnell J. E.) **272,** 590
Drosophila. A gene complex controlling segmentation in *Drosophila*. *review article*. (Lewis E. B.) **276,** 565
Anterior and posterior compartments in the head *Drosophila* (Morata G. and Lawrence P. A.) **274,** 473
Chemical waves in *Drosophila*. *news and views*, (Slack J.) **271,** 403
Temperature induced seizure and frequency-dependent neuromuscular block in a *ts* mutant of *Drosophila* (Salkoff L. and Kelly L.) **273,** 156
Drosophila genetics at Szeged. *news and views*, (Ashburner M. and Lawrence P.) **275,** 481
High frequency recombination in centromeric and histone regions of *Drosophila* genomes (Grell R. F.) **272,** 78
Male mating experience and competitive courtship success in *Drosophila melanogaster* (Markow T. A., Quaid M. and Kerr S.) **276,** 821
Modification of heat resistance in *Drosophila* by selection (Morrison W. W. and Milkman R.) **273,** 49
Unintegrated ribosomal genes and their relation to position effect variegation in *Drosophila melanogaster* (Zuchowski-Berg C. I.) **271,** 60
Drosophila melanogaster. Ethanol tolerance and the *Adh* polymorphism in a natural population of *Drosophila melanogaster* (McKenzie J. A. and McKechnie S. W.) **272,** 75
Haploid cell cultures of *Drosophila melanogaster* (Debec A.) **274,** 255
Drosophila melanogaster. Male recombination is not induced in *Drosophila melanogaster* by extracts of strains with male recombination potential (Sved J. A., Murray D. C., Schaefer R. E. and Kidwell M. G.) **275,** 457
The number of genes in *Drosophila melanogaster* (Garcia-Bellido A. and Ripoll P.) **273,** 399
Drosophilid fly. Regularity versus irregularity in specific songs of closely-related drosophilid flies (Bennet-Clark H. C. and Leroy Y.) **271,** 442
Drought. How plants respond to stress. *news and views*, (Jones H. G.) **271,** 610
Drug research. Research with prisoners. *news*, (Yesley M. S., Mishkin B.) **271,** 197
US ban use of prisoners in drug research . *news*, **271,** 203
Drug resistance. An unusual interaction between the target of nalidixic acid and novobiocin (Chao L.) **271,** 385
Drug transport. Antileishmanial activity of antimonials entrapped in liposomes (New R. R. C., Chance M. L., Thomas S. G. and Peters W.) **272,** 55
Survival of sucrose-loaded erythrocytes in the circulation (Kinosita Jr K. and Tsong T. Y.) **272,** 258
Dryopithecine. Dryopithecines from the Miocene of Saudi Arabia (Andrews P., Hamilton W. R. and Whybrow P. J.) **274,** 249
Duncan K. HSE's scientific mediator. *news*, (Hay A.) **276,** 437
Dust tail. Propagating inhomogeneities in the dust tail of comet West 1975 (Koutchmy S. and Lamy P.) **273,** 522
β-**D-xyloside.** β-D-xylosides cause abnormalities of growth and development in chick embryos (Gibson K. D., Doller H. J. and Hoar R. M.) **273,** 151
Dye. Dyeing increases the friction of synthetic polymer yarns (Hepworth K., Hewa-Kapuge A., Munden D. L. and Speakman P. T.) **276,** 250
Dyke. A preferred orientation of intrusion of Precambrian dykes (Morris W. A. and Tanczyk E. I.) **275,** 120
Dynamic nuclear polarisation. Laser photo-CIDNP as a surface probe for proteins in solution (Kaptein R., Dijkstra K. and Nicolay K.) **274,** 293
Dynamics. The Dynamics of the Upper Ocean (Phillips O. M. *editor*) *book review by* Webb D.J. **272,** 194
The prevalence of chaos. *news and views*, (MacDonald N.) **271,** 305
The Dynamics of the Upper Ocean (Phillips O. M. *editor*) *book review by* Webb D.J. **272,** 194
Ear. Neurophysiological basis of directional hearing in amphibia (Pettigrew A., Chung S.-H. and Anson M.) **272,** 138
Very low calcium content of cochlear endolymph, an extracellular fluid (Bosher S. K. and Warren R. L.) **273,** 377
Early man. Early man reviewed. *news and views*, (Isaac G. L.) **273,** 588
Was war the origin of intelligence? *correspondence*. (Fremlin J. H.) **274,** 308
Earth. Large circles on the Earth's surface. *matters arising*.

(Isachsen Y. W.) **276,** 535
Large circles on the Earth's surface—Reply, *matters arising,* (Saul J. M.) **276,** 535
Limits to the expansion of Earth Moon Mars and Mercury and to changes in the gravitational constant (McElhinny M. W., Taylor S. R. and Stevenson D. J.) **271,** 316
Earth. Dynamic measurement of matter creation and Earth expansion (Wesson P.) **273,** 572
Earth: Expansion. Limits to the expansion of Earth Moon Mars and Mercury and to changes in the gravitational constant (McElhinny M. W., Taylor S. R. and Stevenson D. J.) **271,** 316
The end of the expanding Earth hypothesis?, *news and views,* (Smith P. J.) **271,** 301
Earth: Heat flow. Hydrothermal waters and heat flow, *news and views,* (Smith P. J.) **271,** 13
Earth quake. Earth quakes and fault Gouge *news and views,* (Smith P.J.) **276,** 760
Earth: radius. Limits to palaeogravity since the late Precambrian (Stewart A. D.) **271,** 153
Earth Science. Philosophy of ignorance (Duncan R. and *editor*) *book review by* Medawar P. B. **272,** 772
Earth: surface. Circular structures of large scale and great age on the Earth's surface (Saul J. M.) **271,** 345
Circular structures of large scale and great age on the Earth's surface *matters arising,* (Kellaway G. A. and Durrance E. M.) **273,** 75
Circular structures of large scale and great age on the Earth's surface—Reply, *matters arising,* (Saul J. M.) **273,** 75
Earth tilt. Earthquake precursors from Earth tilt observations corrected for rainfall (Gerard V. B.) **276,** 169
Earthquake. Deep seismic zone as an upper mantle reflector of body waves (Fukao Y., Kanjo K. and Nakamura I.) **272,** 606
Do aerosol anomalies precede earthquakes? (Tributsch H.) **276,** 606
Intraplate earthquakes, *news and views,* (Smith P. J.) **275,** 480
Quantification of earthquakes (Kanamori H.) **271,** 411
Tangshan 1976: a case history in earthquake prediction, *news and views,* (Lomnitz C. and Lomnitz L.) **271,** 109
Earthquake precursor. Changing He/Ar and N_2/Ar ratios of fault air may be earthquake precursors (Sugisaki R.) **275,** 209
Earthquake precursors from Earth tilt observations corrected for rainfall (Gerard V. B.) **276,** 169
Earthquake: Slow. Slow earthquakes and stress redistribution (Sacks I. S., Suyehiro S., Linde A. T. and Snoke J. A.) **275,** 599
Earthquakes. Mining triggers earthquakes, *news and views,* (Smith P. J.) **271,** 207
Ecdysone. Ecdysteroids:, *correspondence,* (Goodwin T. W., Horn D. H. S., Karlson P., Koolman J., Nakanishi K., Robbins W. E., Siddall J. B. and Takemoto T.) **272,** 122
Ecdysteroid. Ecdysteroids:, *correspondence,* (Goodwin T. W., Horn D. H. S., Karlson P., Koolman J., Nakanishi K., Robbins W. E., Siddall J. B. and Takemoto T.) **272,** 122
Ecdysterone. Ecdysterone switches off fluid secretion at pupation in insect Malpighian tubules (Ryerse J. S.) **271,** 745
Echinoderm. Echinoderm biology, *news and views,* (Nichols D.) **275,** 268
Echolocation. Bats avoid moving objects more successfully than stationary ones (Jen P. H.-S. and McCarthy J. K.) **275,** 743
Echos of the bat's cry, *news and views,* (Altman J. and Chung S.-H.) **276,** 755
Ecological community. Energy flow and the number of trophic levels in ecological communities, *matters arising,* (DeAngelis D. L., Gardner R. H., Mankin J. B., Post W. M. and Carney J. H.) **273,** 406
Stability and diversity of ecological communities (McNaughton S. J.) **274,** 251
Ecology. An explanation of ecological and developmental constants (Maiorana V. C.) **273,** 375
Biogeography and Ecology of Southern Africa (Werger M. J. A. *editor*) *book review by* Moore Peter D. **274,** 726
Browsers and their browse, *correspondence,* (Lewin R. A. and Enright J. T.) **276,** 10
Fenland ecology (Moore P. D.) *book review by* Godwin H. **275,** 675
Heritability of external morphology in Darwin's finches (Boag P. T. and Grant P. R.) **274,** 793
Nature's Economy (Worster D.) *book review by* Mellanby K. **272** 562
Origins of "ecology", *correspondence,* (Nebbia G.) **275,** 86
Primatology studies and methodology (Clutton-Brock T. H. *editor*) *book review by* Deag J. M. **271,** 786
Reconciling Man with the Environment (Ashby E.) *book review by* Mellanby K. **276,** 142
The Coastline (Barnes R. S. K. *editor*) *book review by* Mitchell R. **271,** 691
Evolutionary Ecology (Stonehouse B. and *editor*) *book review by* Diamond J. M. **271,** 485
Introducing Ecology (British Museum Natural History) Moore P. D. **276,** 303
Lichen Ecology (Seaward M. R. D. *editor*) *book review by* Ferry B. W. **274,** 297
Production Ecology of Ants and Termites (Brian M. V. *editor*) *book review by* Cherrett J. M. **273,** 80
Economic Botany. The Power of Plants (Lehane B.) *book review by* Stearn W. T. **274,** 297
Economics. Scientific Progress: A Philosophical Essay on the Economics of Research in Natural Science (Rescher N.) *book review by* Dainton F. S. **276,** 128
Economy. Alternatives to Growth (Meadows D. L. *editor*) *book review by* Ashby E. **273,** 475
High energy consumption or low economic growth? *correspondence,* (Brookes L. G.) **273,** 587
Ecosystem. Are deserts ecosystems? *news and views,* (Moore P. D.) **275,** 691
Complexity and stability, *news and views,* (MacDonald N.) **276,** 117
Granivorous Birds in Ecosystems (Pinowski J. and *editor*) *book review by* Newton I. **273,** 81
Rats, pigs and men in New Guinea, *news and views,* (May R. M.) **275,** 590
Ectopic fibre. Axons from eyes grafted in *Xenopus* can grow into the spinal cord and reach the optic tectum (Giorgi P. P. and Van der Loos H.) **275,** 746
Education. China encourages school science, *news,* **273,** 183
Soviet schools tied closer to technology, *news,* **271,** 702
China studies education in foreign countries, *news,* (Tang T. B.) **274,** 525
Higher education confronts the 1990s, *leading article,* **272,** 1
Eel. The Eel Biology and Management of Anguillid Eels (Tesch F. W.) *book review by* Pantelouris E. M. **271,** 487
Egg. Direct measurement of intracellular *p*H during metabolic derepression of the sea urchin egg (Shen S. S. and Steinhardt R. A.) **272,** 253
Mechanism of action of NH_4Cl and other weak bases in the activation of sea urchin eggs (Winkler M. M. and Grainger J. L.) **273,** 536
Einstein A. 1.5 million to erect statue of Einstein: *news,* **276,** 205
Electric field. Electric fields in the ionosphere produced by polar field-aligned currents (Maekawa K. and Maeda H.) **273,** 649
Transmission of polar electric fields to the Equator (Kikuchi T., Araki T., Maeda H. and Maekawa K.) **273,** 650
Electrical conduction. Electrical conduction in discontinuous metal films, *news and views,* (Hill R. M.) **271,** 612
Electrical spread. A surprising property of electrical spread in the network of rods in the turtle's retina (Detwiler P. B., Hodgkin A. L. and McNaughton P. A.) **274,** 562
Electrochemistry. Transient Techniques in Electrochemistry (Macdonald D. D.) *book review by* Hampson N. A. **273,** 691
Electrochemistry of Biological Molecules (Dryhurst G.) *book review by* Palecek E. **271,** 590
Electrokinesis. Electromechanical properties of articular cartilage during compression and stress relaxation (Grodzinsky A. J., Lipshitz H. and Glimcher M. H.) **275,** 448
Electrolyte. Tetrahedral hydration of ions in solution (Michaelian K. H. and Moskovits M.) **273,** 135
Electrolyte Battery. Blocking defects of β''-alumina observed by high resolution electron microscopy (Bovin J.-O.) **273,** 136
Electromagnetic radiation. Nuclear resonance & synchroton radiation, *news and views,* (Marr G. V.) **275,** 178
Electromagnetism. Electromagnetic Vibrations, Waves, and Radiation (Bckefi G. and *editor*) *book review by* Grant I. S. **272,** 107
New texts in electromagnetism Betts D. S. **272,** 106
Can electromagnetism account for extra-sensory phenomena? (Balanovski E. and Taylor J. G.) **276,** 64
Electron. Excess electrons in ice (Verberne J. B., Loman H., Warman J. M., de Haas M. P., Hummel A. and Prinsen L.) **272,** 343
Structures and Approximations for Electrons (Cook D. B.) *book review by* Richards G. **273,** 478
Electron cooling. Electron cooling and its applications in elementary particle physics, *review article,* (Dikansky N. S., Meshkov I. N. and Skrinsky A. N.) **276,** 763
Electron microscopy. Computed crystal structure images for high resolution electron microscopy (O'Keefe M. A., Buseck P. R. and Iijima S.) **274,** 322
Dislocations at atomic scale (Bourret A. and Desseaux J.) **272,** 151
Freeze-fracture view of membrane fusion, *news and views,* (Shotton D.) **272,** 16
Electron Spin Resonance. Theoretical Foundations of Electron Spin Resonance (Harriman J.) *book review by* Atkins P. W. **274,** 97
Electron transport. Photosensitised electron transport across phospholid vesicle walls (Ford W. E., Otvos J. W. and Calvin M.) **274,** 507
Electronics. A new amorphous silicon-based alloy for electronic applications (Ovshinsky S. R. and Madan A.) **276,** 482
Electrophonesis. Genetic variants in 2-D, *news and views,* (Edwards Y. and Swallow D.) **272,** 309
Electrophoresis. Methyl mercury and safety, *correspondence,* (Cummins J. E. and Nesbitt B. E.) **273,** 96
Electrostatic precipitation. Collection of atomic mercury by electrostatic precipitations (Newman O. M. G. and Palmer D. J.) **275,** 526
Element: Superheavy. Search for superheavies, *news,* (Jackson D. F.) **272,** 672
Elementary particle. A new generation of elementary particles, *news and views,* (Close F. E.) **271,** 406
Ellison W. *obituary* (Ellison W.) **274,** 729
Elysia viridis. Inorganic polyphosphate involved in the symbiosis between chloroplasts of alga *Codium fragile* and mollusc *Elysia viridis* (Cobb A. H.) **272,** 554
Light-regulated body ion balance in marine slug *Elysia viridis* (Montagu) (Deutch B.) **274,** 159
Embryo. Normal and experimental variations in proportions of skeleton of chick embryo wing (Summerbell D.) **274,** 472
Embryogenesis. Embryonic and regenerating patterns, *news and views,* (Cooke J.) **271,** 705
Induction of monozygotic twinning in the mouse (Kaufman M. H. and O'Shea K. S.) **276,** 707
Concepts in Mammalian Embryogenesis (Sherman M. I. *editor*) *book review by* Snow M. H. L. **273,** 79
Employment. Hiring and firing gets more complex, *leading article,* **273,** 695
No end in sight to jobs gloom, *leading article,* **276,** 743
UK researchers claim rights over short-term contracts, *news,* **276,** 745
Endocrinology. The Year in Endocrinology, 1977 (Ingbar S. H. *editor*) *book review by* Pearse A. G. E. **274,** 625
Endonuclease. Restriction endonucleases: a new role *in vivo*? *news and views,* (Roberts R. J.) **271,** 502
Endorphin. Morphine and β-endorphin inhibit release of noradrenaline from cerebral cortex but not of dopamine from rat striatum (Arbilla S. and Langer S. Z.) **271,** 559
Morphine and βendorphin influence the secretion of the endocrine pancreas (Ipp E., Dobbs R. and Unger R. H.) **276,** 190
Endorphin system. Evidence for two separate opiate peptide neuronal systems (Watson S. J., Akil H., Richard C. W. III and Barchas J. D.) **275,** 226
Endothelium. Mechanism of non-adhesiveness of endothelial and epithelial surfaces (Vasiliev J. M. and Gelfand I. M.) **274,** 710
Endothermy. Discrepancies in claims for endothermy in therapsids and dinosaurs, *news and views,* (Reid R. E. H.) **276,** 757
Endplate currents. Effects of $[Ca^{2+}]$ and $[Mg^{2+}]$ on the decay of miniature endplate currents (Cohen I. and Van der Kloot W.) **271,** 77
Energy. A third world energy view, *correspondence,* (Melamed M. D.) **271,** 7
Climate and energy, *news and views,* (Henderson-Sellers A.) **273,** 592
Fuel from magma, *news and views,* (Cahn, R. W.) **273,** 268
Geologists warn of uranium shortage, *news,* **274,** 524
Hazards of non-nuclear energy, *news,* **272,** 487
High energy consumption or low economic growth? *correspondence,* (Brookes L. G.) **273,** 587
Tory attacks energy gap forecasting—and the fast breeder, *news,* **271,** 105
UNEP scheme to bring power to Pakistan's villages, *news,* **272** 571
What substitutes for oil? *news,* (Spurgeon D.) **273,** 702
Energy and the Atmosphere (Campbell I. M.) *book review by* Houghton J. T. **274,** 193
European energy demand slows up, *news,* **272,** 571
Soft energy paths, *correspondence,* (Lovins A. B.) **271,** 107
The Concept of Energy (Hoffman E. J.) *book review by* Landsberg P. T. **275,** 258
Energy alternative. Earth, Water, Wind and Sun: Our Energy alternatives (Halacy D. S. Jr) *book review by* Patterson W. **275,** 465
Energy: Alternative. New parliamentary group for alternative energy, *news,* **276,** 434
Energy crisis. Nuclear power and the Energy crisis: Politics of the Atomic Industry (Burn D.) *book review by* Rotherham L. **276,** 143
Energy demand. West German model predicts low growth in energy demand, *news,* (Schuuring C.) **272,** 393
Energy forecast. UK energy forecast: Sussex study sheds doubt on official figures, *news,* **272,** 485
Energy intake. No paradox in the control of energy intake, *matters arising,* (Booth D. A. and Toates F. M.) **275,** 345
No paradox in the control of energy intake,—Reply, *matters arising,* (Rothwell N. J. and Stock M. J.) **275,** 345
A paradox in the control of energy intake in the rat (Rothwell N. J. and Stock M. J.) **273,** 146
Energy: Nuclear. Nuclear power jubilee (Pocock R. F.) *book review by* Burn D. **272,** 782
US embargoes nuclear fuel exports to Europe, *news,* **272,** 746
Energy policy. Carter juggles with fast breeder and natural gas, *news,* (Douglas J.) **275,** 2
Coping with energy's nasty surprises, *leading article,* **271,** 695
Energy how to decide (Pearce D., Edwards L. and Bueret G.) **272,** 115
Energy policy (Cook P. L. and) *book review by* Patterson W. **272,** 783
Sweden's sunny future, *news,* (Barnaby W.) **273,** 584
Working out a UK energy policy, *news,* (Hooley F.) **272,** 744
Energy: Renewable. Little renewable energy until next century, *news,* **272,** 661
Energy research. Lack of basic energy research criticised, *news,* **274,** 105
No soft options in Carter's energy research policy, *news,* **271,** 495
Energy: Solar. Solar energy: bonanza or bunfight? *news,* **273,** 2
Energy source. Nitric acid cycle process for extracting thermal energy from low-level heat sources (Wakao N. and Nojo K.) **273,** 25
Promoting renewable energy sources, *correspondence,* (Shaw T. L.) **272,** 396
Renewable energy sources and storage (Leicester R. J., Newman V. G. and Wright J. K.) **272,** 518
Renewable energy sources and storage, *matters arising,* (Diesendorf M. and Westcott M.) **275,** 254
Wave power boosted in UK energy hand out, *news,* **273,** 485
Energy sources. Renewable energy sources and storage, *matters arising,* (Leicester R. J., Newman V. G. and Wright J. K.) **275,** 254
Energy storage. A possible practical application of heavy quark physics (Freund P. G. O. and Hill C. T.) **276,** 250
Renewable energy sources and storage (Leicester R. J., Newman V. G. and Wright J. K.) **272,** 518
Renewable energy sources and storage, *matters arising,* (Diesendorf M. and Westcott M.) **275,** 254
Short-term storage and wind power availability (Anderson M. B., Newton K., Ryle M. and Scott P. F.) **275,** 432
Energy: Thermal. Nitric acid cycle process for extracting thermal energy from low-level heat sources (Wakao N. and Nojo K.) **273,** 25
Energy: Tidal. Tidal power schemes in Korea (Gray F. and Wilson E. M.) **271,** 704
Energy transfer. Vibrational and Rotational Relaxation in Gases (Lambert J. D.) *book review by* Smith I. W. M. **272** 474
Energy: Wave. Enthusiasm for UK wave power survives high costs, *news,* **276,** 433
Energy: Wind. Short-term storage and wind power availability (Anderson M. B., Newton K., Ryle M. and Scott P. F.) **275,** 432
Engineering. Call for engineers, *correspondence,* (Finniston M.) **272,** 490
Enkephalin. Effects of the synthetic enkephalin analogue FK 33-824 in man (Graffenried B. von Pozo E. del, Roubicek J., Krebs E., Pöldinger W., Burmeister P. and Kerp L.) **272,** 729
Evidence for a long Leu-enkephalin striopallidal pathway in rat brain (Cuello A. C. and Paxinos G.) **271,** 178
In vitro release of Leu- and Met-enkephalin from the corpus striatum (Henderson G., Hughes J. and Kosterlitz H. W.) **271,** 677
Localisation and characterisation of aminopeptidases in the CNS and the hydrolysis of enkephalin (Shaw S. G. and Cook W. F.) **274,** 816
Release of enkephalin from rat globus pallidus *in vitro* (Iversen L. L., Iversen S. D., Bloom F. E., Vargo T. and Guillemin R.) **271,** 679
Enkephalin degradation. High-affinity enkephalin-degrading peptidase in brain is increased after morphine (Malfroy B., Swerts J. P., Guyon A., Roques B. P. and Schwartz J. C.) **276,** 523
Enkephalin system. Evidence for two separate opiate peptide neuronal systems (Watson S. J., Akil H., Richard C. W. III and Barchas J. D.) **275,** 226
Entomology. Insect Molecular biology on Crete, *news and views,* (Gehring W. J.) **275,** 364
Insect/host plant relationships, *news and views,* **274,** 118
Entropy. Object reconstruction from intensity data, *matters arising,* (Fiddy M. A. and Greenaway A. H.) **276,** 421
Quiescent cosmology (Barrow J. D.) **272,** 211
Environment. Heaven and Hell (Mellanby K.) **272,** 9
Inflation forces new tactics on US environmentalists, *news,* **276,** 747
Postponing doomsday, *news,* (Mellanby K.) **271,** 106
Reconciling Man with the Environment (Ashby E.) *book re-*

view by Mellanby K. **276,** 142
Environment. A Dictionary of the Environment (Allaby M.) *book review by* Clarke R. **272,** 291
Environmental change. Low sea levels, droughts and mammalian extinctions (Mörner N. A.) **271,** 738
Environmental fluctuation. Diversity in constant and fluctuating environments (Eddison J. C. and Ollason J. G.) **275,** 309
Environmental hazard. The Environment as Hazard (Burton I.) *book review by* Smith P. J. **276,** 102
Environmental pollution. Pollutants and High Risk Groups (Calabrese E. J.) *book review by* Magos L. **276,** 99
Enzyme. Reabsorption of digestive enzymes: playing with poison, *news and views*, (Diamond J. M.) **271,** 111
What's special about enzymes?, *news and views*, (Roberts G. C. K.) **271,** 409
Enzyme Structure and Mechanism (Fersht A. R., *editor*) *book review by* Orsi B. A. **272,** 99
Enzyme activation. Interferon action may be mediated by activation of a nuclease by pppA2'p5'A2'p5'A (Baglioni C., Minks M. A. and Maroney P. A.) **273,** 684
Enzyme activity. Evidence for dominant mutations reducing HGPRT activity (Kadouri A., Kunce J. J. and Lark K. G.) **274,** 256
Enzyme carrier. Enzyme replacement using liposome carriers in feline G_{M1} gangliosidosis fibroblasts (Reynolds G. D., Baker H. J. and Reynolds R. H.) **275,** 754
Enzyme defect. Enzyme defects and immune dysfunction, *news and views*, (Rosen F. S.) **276,** 559
Enzyme inactivation. Aldolase-catalysed inactivation of glyceraldehyde-3-phosphate dehydrogenase (Patthy L. and Vas M.) **276,** 94
Enzyme Kinetics. Steady-State Enzyme Kinetics (Ainsworth S., *editor*) *book review by* Tipton K. F. **272,** 99
Enzyme locus. Relationship between heterozygosityfor enzyme loci and variation of morphological characters in natural populations (Mitton J. B.) **273,** 661
Enzyme: Lysosomal. Lysosomal and mitochrondrial heat labile enzymes in ageing human fibroblasts (Houben A. and Remacle J.) **275,** 59
Enzyme: Mitochondrial. Lysosomal and mitochrondrial heat labile enzymes in ageing human fibroblasts (Houben A. and Remacle J.) **275,** 59
Enzyme polymorphism. Study of the charge-state model for electrophoretic variation using isoelectric focusing of esterase-5 from *Drosophila pseudoobscura* (Ramshaw J. A. M. and Eanes W. F.) **275,** 68
Enzyme reaction. Calcium control of enzyme reactions, *news and views*, (Geisow M. J.) **276,** 211
Chemistry and Control of Enzyme Reactions (Scrimgeour K. G.) *book review by* Perham R. **273,** 252
Enzymic reaction. Transition States of Biochemical Processes (Gandour R. D. and *editor*) *book review by* Lowe G. **276,** 542
Eosinophil chemotactic factor. Eosinophil chemotactic factor release from neutrophils by *Nippostrongylus brasiliensis* larvae (Czarnetzki B. M.) **271,** 553
Epidermal growth factor. Cellular localisation of human urogastrone epidermal growth factor (Elder J. B., Williams G., Lacey E. and Gregory H.) **271,** 466
Epidermal growth factor. Decreased binding of epidermal growth factor to BALB/c 3T3 mutant cells defective in glycoprotein synthesis (Pratt R. M. and Pastan I.) **272,** 68
Epidermal growth factor, like phorbol esters, plasminogen activator in HeLa cells (Lee L.-S. and Weinstein I. B.) **274,** 696
Epidermal growth factor stimulates phosphorylation in membrane preparations *in vitro* (Carpenter G., King L. Jr and Cohen S.) **276,** 409
Epididymide. Microscopic epididymides in testicular feminisation (Blecher S. R.) **275,** 748
Epilepsy. Ecto-ATPase deficiency in glia of seizure-prone mice (Trams E. G. and Lauter C. J.) **271,** 270
The cellular mode of action of the anti-epileptic drug 5, 5-diphenylhydantoin (Perry J. G., McKinney L. and De Weer P.) **272,** 271
Episome. DNA Insertion Elements, Plasmids and Episomes (Bukhari A. I., *editor*) *book review by* Hayes W. **273,** 171
Epithelioid lung cell. Excisability and persistence of benzo(*a*)pyrene DNA adducts in epithelioid human lung cells (Feldman G., Remsen J., Shinohara K. and Cerutti P.) **274,** 796
Epithelium. Mechanism of non-adhesiveness of endothelial and epithelial surfaces (Vasiliev J. M. and Gelfand I. M.) **274,** 710
Epoxy resin. Mutagenic action of aromatic epoxy resins (Andersen M., Kiel P., Larsen H. and Maxild J.) **276,** 391
Epsilon Aur. IUE observations of the eclipsing binary Epsilon Aurigae (Hack M. and Selvelli P. L.) **276,** 376
Equatorial electrojet. Equivalent circuit analysis of neutral wind effects on equatorial electrojet (Reddy C. A. and Devasia C. V.) **273,** 195
Erbium. Dual action of erbium on transmitter release at the frog neuromuscular synapse (Metral S., Bonneton C., Hort-Legrand C. and Reynes J.) **271,** 773
Erosion: Cosmic ray. Low energy cosmic ray erosion of ice grains in interplanetary and interstellar media (Lanzerotti L. J., Brown W. L., Poate J. M. and Augustyniak W. M.) **272,** 431
Erratum **276,** 638. Model of the fine-grain component of martian soil based on Viking lander data (Toulmin P. III, Baird A. K., Clark B. C., Keil K., Rose H. J. Jr, Christian R. P., Evans P. H. and Kelliher W. C.) **271,** 335
Erratum **276,** 638. Model of the fine-grain component of martian soil based on Viking lander data (Nussinov M. D., Chernyak Y. B. and Ettinger J. L.) **274,** 859
Erythrocyte. Effects of fusogenic agent on membrane structure of erythrocyte ghosts and the mechanism of membrane fusion (Cullis P. R. and Hope M. J.) **271,** 672
Enhanced agglutination of all the erythrocytes when only half are trypsinised (Gordon J. A. and Kuettner C. A.) **272,** 636
Survival of sucrose-loaded erythrocytes in the circulation (Kinosita Jr K. and Tsong T. Y.) **272,** 258
Erythroid burst. Erythroid bursts produced by Friend leukaemia virus *in* (Hankins W. D., Kost T. A., Koury M. J. and Krantz S. B.) **276,** 506
Erythropoietin. Potentiation of human erythropoiesis *in vitro* by thyroid hormone (Dainiak N., Hoffman R., Maffei L. A. and Forget B. G.) **272,** 260
Escherichia coli. A ρ-dependent termination site in the gene coding for tyrosine tRNA su3 of *Escherichia coli* (Küpper H., Sekiya T., Rosenberg M., Egan J. and Landy A.) **272,** 423
Inability of debilitated *Escherichia coli* χ1776 to colonise germ-free rodents (Wells C. L., Johnson W. J., Kan C. M. and Balish E.) **274,** 397
Pathogenicity of conventional and debilitated *Escherichia coli* K12 (Levy S. B., Sullivan N. and Gorbach S. L.) **274,** 395
Polyamine deficiency reduces the rate of DNA replication fork movement in *Escherichia coli* (Geiger L. E. and Morris D. R.) **272,** 730
Role of cyclic GMP in the action of heat-stable enterotoxin of *Escherichia coli*, (Hughes J. M., Murad F., Chang B. and Guerrant R. L.) **271,** 755
Escherichia coli χ. Bile salt sensitivity of *Escherichia coli* χ 1776 (Hunter J. R., Ellwood D. C., Atkinson A. and Greenaway P. J.) **275,** 70
Escherichia coli. *Escherichia coli* resistance to β-lactam antibiotics through a decrease in the affinity of a target for lethality (Spratt B. G.) **274,** 713
Estuary. Behaviour and speciation of dissolved selenium in estuarine waters (Measures C. I. and Burton J. D.) **273,** 293
Very low salinity regions of estuaries: important sites for chemical and biological reactions (Morris A. W., Mantoura R. F. C., Bale A. J. and Howland R. J. M.) **274,** 678
Eternity. Eternity is unstable (Barrow J. D. and Tipler F. J.) **276,** 453
Ethanol. Ethanol-induced tolerance to heat and to adriamycin (Li G. C. and Hahn G. M.) **274,** 699
Thyrotropin-releasing hormone reversal of ethanol-induced decreases in cerebellar cGMP (Mailman R. B., Frye G. D., Mueller R. A. and Breese G. R.) **272,** 832
Ethanol tolerance and the *Adh* polymorphism in a natural population of *Drosophila melanogaster* (McKenzie J. A. and McKechnie S. W.) **272,** 75
Ethanol tolerance. Arginine vasopressin maintains ethanol tolerance (Hoffman P. L., Ritzmann R. F., Walter R. and Tabakoff B.) **276,** 614
Ethanol withdrawal. Alterations in β-adrenergic receptor binding during ethanol withdrawal (Banerjee S. P., Sharma V. K. and Khanna J. M.) **276,** 407
Ether: Crown. Crown ether intercalations with phyllosilicate (Ruiz-Hitzky E. and Casal B.) **276,** 596
Ethics. Can ethics be taught? *leading article*, **273,** 579
Rogers proposes commission on research ethics, *news*, **274,** 523
Conference ethics *correspondence*, (Lang S. B. and Havlin S.) **274,** 110
Ethidium. Mutagen-oligonucleotide complexes with a bulged base as models for frameshift mutation (Che-Lee C. H. and Tinoco I. Jr) **274,** 609
Ethiopia. Newly discovered fossil hominid skull from the Afar depression Ethiopia (Conroy G. C., Jolly C. J., Cramer D. and Kalb J. E.) **276,** 67
Europe. ESA names European candidates for first Spacelab mission, *news*, **271,** 4
European energy demand slows up, *news*, **272,** 571
Europe's nuclear circus, *news*, (Kelly P.) **271,** 398
Where should LEP be built? *news*, **275,** 469
European Economic Community. Science in the EEC still a problem, *leading article*, **271,** 291
European Molecular Biology Laboratory. European Molecular Biology Laboratory, *news*, **273,** 182
European Physical Society. Sicily's scientific evangelist, *news*, **275,** 171
European science foundation. ESF warns of dangers of shortfall in posts for young scientists, *news*, **276,** 201
European Space Agency. Ariane heads south, *news*, (Schurring C.) **273,** 698
Astronomy in the 1980s, *news*, **275,** 362
Can ESA members afford to fly on Spacelab? (Ridpath I.) **274,** 106
Europe should invest more in space science, *leading article*, **275,** 355
Four steps to get a project off the ground, *news*, **275,** 359
Science in the Solar System, *news*, **275,** 363
Scientists press ESA to restore budget to 1971 levels, *news*, **275,** 356
The cost: where the money comes from, where it goes *news*, **275,** 359
What the critics say, *news*, **275,** 356
Who makes the decisions? *news*, **275,** 359
Evolution. A diagram of evolution, *review article*, (Darlington C. D.) **276,** 447
A winged élite in a subcortical beetle as a model for a prototermite (Taylor V. A.) **276,** 73
Cosmochemistry and evolution, *news and views*, (Olavesen A. B. and Wickramasinghe N. C.) **275,** 694
Did emerging continents trigger metazoan evolution? (Knoll A. H.) **276,** 701
Endopolyploidy and Polyteny in Differentiation and Evolution (Nagl W.) *book review by* Jones K. W. **276,** 539
Ever Since Darwin: Reflections in Natural History (Gould S. J.) *book review by* Dawkins R. **276,** 121
Evolution of human intelligence (Sagan C.) *book review by* Mackintosh N. J. **272,** 768
Evolutionary conservation of gene linkage, *news and views*, (Ford E. H. R.) **274,** 112
Evolutionary Ecology (Stonehouse B. and *editor*) *book review by* Diamond J. M. **271,** 485
Immunity in Evolution (Marchalonis J. J.) *book review by* Cohen N. **271,** 689
Marsupial trophoblast and mammalian evolution, *matters arising*, (Taylor J. M. and Padykula H. A.) **271,** 588
Oxygen in the Palaeoaquatic environment (Henderson-Sellers B. and Henderson-Sellers A.) **272,** 439
Plasmid-determined tetracycline resistance involves new transport systems for tetracycline (Levy S. B. and McMurry L.) **276,** 90
Recovery, behaviour and evolutionary implications of live Monoplacophora (Lowenstam H. A.) **273,** 231
Structural evidence for gene duplication in the evolution of the acid proteases (Tang J. James M. N. G. Hse I. N. Jenkins J. A. and Blundell T. L.) **271,** 618
Structure of pyruvate kinase and similarities with other enzymes: possible implications for protein taxonomy and evolution (Levine M., Muirhead H., Stammers D. K. and Stuart D. I.) **271,** 626
Evolution and the Genetics of Populations (Wright S.) *book review by* Crow J. F. **272,** 561
Evolution and the Genetics of Populations (Wright S.) *book review by* Robertson A. **275,** 569
Evolution of homeothermy in mammals (Crompton A. W., Taylor C. R. and Jagger J. A.) **272,** 333
Evolution of Sex (Smith J. M.) *book review by* Robertson A. **276,** 123
Organismic Evolution (Grant V.) *book review by* Creed E. R. **272,** 289
Origin and Early Evolution of Animals (Hanson E. D.) *book review by* Barrington E. J. W. **272,** 473
Patterns of Evolution as Illustrated by the Fossil Record (Hallam A. *editor*) *book review by* Simpson G. G. **273;** 77
Evolution: Crustal. Andesitic volcanism and crustal evolution (Eichelberger J. C.) **275,** 21
Evolution Gene: Overlapping. Evolution of overlapping genes (Miyata T. and Yasunaga T.) **272,** 532
Excretory system. Ecdysterone switches off fluid secretion at pupation in insect Malpighian tubules (Ryerse J. S.) **271,** 745
Exocytosis. Calcium-dependent exocytosis in bovine adrenal medullary cells with leaky plasma membranes (Baker P. F. and Knight D. E.) **276,** 620
Calcium-dependent protein phosphorylation during secretion by exocytosis in the mast cell (Sieghart W., Theoharides T. C., Alper S. L., Douglas W. W. and Greengard P.) **275,** 329
Exotoxin. Action of *Corynebacterium ovis* exotoxin on endothelial cells of blood vessels (Carne H. R. and Onon E. O.) **271,** 246
Experimental allergic encephalomyelitis. Sex difference in Lewis rats in the incidence of recurrent experimental allergic encephalomyelitis (Keith A. B.) **272,** 824
Experimental allergic neuritis serum. Transfer of demyelination by intraneural injection of experimental allergic neuritis serum (Saida T., Saida K., Silberberg D. H. and Brown M. J.) **272,** 639
Experimental animal. Alternatives to Animal Experiments (Smyth D. H.) *book review by* Paine A. J. **274,** 298
Experimental psychology. Difficulties in auditory organisation as a possible cause of reading backwardness (Bradley L. and Bryant P. E.) **271,** 746
Exsolution. Exsolution in almandine-pyrope-grossular garnet (Cressey G.) **271,** 533
Extensional flow. The extensional flow capillary as a new method for extensional viscosity measurement (Everage A. E. Jr and Ballman R. L.) **273,** 213
Extensional viscosity. The extensional flow capillary as a new method for extensional viscosity measurement (Everage A. E. Jr and Ballman R. L.) **273,** 213
Extinction. Low sea levels, droughts and mammalian extinctions (Mörner N. A.) **271,** 738
Low sea levels, droughts and mammalian extinctions (Mörner N. A.) **271,** 738
Meaning not sentiment, *correspondence*, (Groot M. De) **272,** 750
The Shadow of Extinction (Mallinson J.) *book review by* Southern H. N. **273,** 690
Extragalactic object. The IUE observations of extragalactic objects (Boksenberg A., Snijders M. A. J., Wilson R., Benvenuti P., Clavell J., Macchetto F., Penston M., Boggess A., Gull T. R., Gondhalekar P., Lane A. L., Turnrose B., Wu C. C., Burton W. M., Smith A., Bertola F., Capaccioli M., Elvius A. M., Fosbury R., Tarenghi M., Ulrich M. H., Hackney R. L., Jordan C., Perola C. G., Roeder R. C. and Schmidt M.) **275,** 404
Extrasense. Information transmission in remote viewing experiments (Marks D. and Kamman R.) **274,** 680
Extra-sensory phenomena. Can electromagnetism account for extra-sensory phenomena? (Balanovski E. and Taylor J. G.) **276,** 64
'extreme-pressure' additive. Relative merits of 'extreme-pressure' additives, *matters arising*, (Schnurmann R. and Porter T. M. C.) **275,** 462
Relative merits of 'extreme-pressure' additives—Reply, *matters arising*, (Silver H. B. and Mould R. W.) **275,** 463
Eye. α-Crystallin polypeptides as markers of lens cell differentiation (Vermorken A. J. M. and Bloemendal H.) **271,** 779
Lid closure and refractive error in macaque monkeys (von Noorden G. K. and Crawford M. L. J.) **272,** 53
Movements of the Eyes (Carpenter R. H. S.) *book review by* Donaldson I. M. L. **274,** 516
The deep fovea as a focus indicator (Harkness L. and Bennet-Clark H. C.) **272,** 814
Development of eye alignment in cats (Olson C. R. and Freeman R. D.) **271,** 446
The Miracle of VisionThe Workings and Wonders of the Human Eye (Freese A. S.) *book review by* Ball G. **272,** 290
Eye: Falconiform. Telephoto lens system of falconiform eyes (Snyder A. W. and Miller W. H.) **275,** 127
Eye movement. Egocentric orientation is influenced by trained voluntary cyclorotary eye movements (Balliet R. and Nakayama K.) **275,** 214
The Brain and Regulation of Eye movement (Shakhnovich A. R.) *book review by* Whitteridge D. **276,** 741
Eye movement: Saccadic. Saccadic eye movements and visual stability (Lennie P. and Sidwell A.) **275,** 766
Eyles V. *obituary* (Eyles V.) **274,** 101
Fairall 9. Is Fairall 9 an X-ray Seyfert galaxy? (Ricker G. R.) **271,** 334
Fallout. Global fallout of curium (Holm E. and Persson B. R. R.) **273,** 289
Farming. Farming lobby, *news*, (Mellanby K.) **275,** 7
Fast breeder reactor. House stands firm on Clinch River fast breeder reactor, *news*, **274,** 201
Select Committee recommends itself for fast breeder inquiry, *news*, (Scott P.) **274,** 524
West Germany spends more on coal research than on fast breeder research, *news*, (Gries W.) **273,** 6
Fasting. Ventromedial hypothalamus modulates fat mobilisation during fasting (Bray G. A. and Nishizawa Y.) **274,** 900
Fat. Masai and heart disease, *correspondence*, (Robinson D.) **274,** 528
Fatigue. Muscular fatigue investigated by phosphorus nuclear magnetic resonance (Dawson M. J., Gadian D. G. and Wilkie D. R.) **274,** 861
Fault Gouge. Earth quakes and fault Gouge *news and views*, (Smith P. J.) **276,** 760
Faulting. Creep rupture at depth in a cold ice sheet (Colbeck S. C., St Lawrence W. and Gow A. J.) **275,** 733
Fc receptor. Antibody to nuclear ribonucleoprotein penetrates live human mononuclear cells through Fc receptors (Alarcon-Segovia D., Ruiz-Arguelles A. and Fishbein E.) **271,** 67
Loss of Fc receptors for IgG from human T lymphocytes exposed to IgG immune complexes (Moretta L., Mingari M. C. and Romanzi C. A.) **272,** 618
Feeding. Inhibition of oesophageal peristalsis in the lobster after chemical stimulation (Robertson R. M. and Laverack M. S.)

271 239
On feeding on more than one trophic level (Pimm S. L. and Lawton J. H.) 275, 542
Fenland. Fenland ecology (Moore P. D.) *book review by* Godwin H. 275, 675
Fermentation. Efficiency of protein production from yeast grown in liquor derived from anaerobically fermented tropical pasture (Henry D. P., Greenfield P. F., Ouano E. A., Thomson R. H., Fleming G. and Minson D. J.) 274, 619
Fermilab. Fermilab director resigns over funding, *news*, 271, 601
Fermilab's director threatens resignation, *news*, 271, 199
Fermilab looks to the future, *news*, 276, 659
New Fermilab director: *news*, 276, 9
Ferric chloride. Formation of films in hydrolysing ferric chloride solutions (Armitage T. M. and Posner A. M.) 272, 435
Ferroelectricity. Principles and Applications of Ferroelectrics and Related Materials (Lines M. E. and *editor*) *book review by* Cochran W. 272, 194
Ferromagnet: Liquid. A liquid permanent magnet confirmed, *news and views*, (McClintock P. V. E.) 272, 671
Ferromagnetism. Magnetic storm, *news and views*, (Pendry J.) 272, 125
Fertilisation. Asynchronous sexual development determines the breeding system in field beans (Paul C., Gates P., Harris N. and Boulter D.) 275, 54
Direct measurement of intracellular *p*H during metabolic derepression of the sea urchin egg (Shen S. S. and Steinhardt R. A.) 272, 253
Lateral diffusion in plasma membrane of mouse egg is restricted after fertilisation (Johnson M. and Edidin M.) 272, 448
Mechanism of action of NH_4Cl and other weak bases in the activation of sea urchin eggs (Winkler M. M. and Grainger J. L.) 273, 536
Membrane noise and conductance increase during single spermatozoon-egg interactions (Dale B., De Felice L. J. and Taglietti V.) 275, 217
Reproductive technology: whose baby? *leading article*, 274, 409
Fertility. Human reproduction reconsidered, *news and views*, (May R. M.) 272, 491
Fibre: Sensory. Spike frequency adaptation in amphibian sensory fibres is probably due to slow K channels (Krylov B. V. and Makovsky V. S.) 275, 549
Fibrinogen. A two-step fibrinogen-fibrin transition in blood coagulation (Blombäck B., Hessel B., Hogg D. and Therkildsen L.) 275, 501
Fibrinolysis. Molecular mechanisms of physiological fibrinolysis (Wiman B. and Collen D.) 272, 549
Fibroadenoma. Differences in secretion of the proteinase cathepsin B at the invading edges of human breast carcinomas and fibroadenomas (Poole A. R., Tiltman K. J., Recklies A. D. and Stoker T. A. M.) 273, 545
Fibroblast. Enzyme replacement using liposome carriers in feline G_{M1} gangliosidosis fibroblasts (Reynolds G. D., Baker H. J. and Reynolds R. H.) 275, 754
Enzyme replacement using liposome carriers in feline G_{M1} gangliosidosis fibroblasts (Reynolds G. D., Baker H. J. and Reynolds R. H.) 275, 754
Fibroblast-conditioned medium contains cell surface proteins required for cell attachment and spreading (Millis A. J. T. and Hoyle M.) 271, 668
Fibroblasts degrade newly synthesised collagen within the cell before secretion (Bienkowski R. S., Baum B. J. and Crystal R. G.) 276, 413
Lysosomal and mitochrondrial heat labile enzymes in ageing human fibroblasts (Houben A. and Remacle J.) 275, 59
Fibroblast surface protein. Fibroblast surface protein, *news and views*, (Hughes R. C.) 271, 708
Fibronectin. Fibronectin-plasma membrane interactions in the adhesion and spreading of hamster fibroblasts (Pena S. D. J. and Hughes R. C.) 276, 80
Fibronectins—adhesive glycoproteins of cell surface and blood, *review article*, (Yamada K. M. and Olden K.) 275, 179
Fibronectin. Appearance of fibronectin during differentiation of mouse teratocarcinoma *in vitro* (Wartiovaara J., Leivo I., Virtanen I., Vaheri A. and Graham C. F.) 272, 355
Fibronectin binds to *Staphylococcus aureus* (Kuusela P.) 276, 718
Fibrosarcoma. A human fibrosarcoma cell line producing multiplication stimulating activity (MSA)-related peptides (De Larco J. E. and Todaro G. J.) 272, 356
Field desorption. Principles of Field Ionization and Field Desorption Mass Spectroscopy (Beckey H. D.) *book review by* Maccoll A. 273, 410
Field ionisation. Principles of Field Ionization and Field Desorption Mass Spectroscopy (Beckey H. D.) *book review by* Maccoll A. 273, 410
Filariasis. Current problems in the control of mosquitoes, *review article*, (Buswine J. R.) 273, 604
Film. Formation of films in hydrolysing ferric chloride solutions (Armitage T. M. and Posner A. M.) 272, 435
Film: Anodic. Nucleation and growth of porous anodic films on aluminium (Thompson G. E., Furneaux R. C., Wood G. C., Richardson J. A. and Goode J. S.) 272, 433
Fimbria. Induction of extensive fimbrial branching in the adult rat brain (Goldowitz D. and Cotman C. W.) 275, 64
Finance. Indirect research costs, *correspondence*, (Yates R. J.) 273, 334
Fine structure constant. Calculating the fine structure constant, *correspondence*, (Burger T. J.) 271, 402
Fish. Lipid sacs as a buoyancy adaptation in an Antarctic fish (DeVries A. L. and Eastman J. T.) 271, 352
The blind fishes of Persia, *news and views*, (Thinès G.) 271, 305
Fish contamination. Mercury in fish and waters of the Irish Sea and other United Kingdom fishing grounds (Gardner D.) 272, 49
Fish Protein. Fish Protein Concentrate (Pariser E. R.,) *book review by* Rivers J. 276, 102
Flagellar length. The relationship between tonicity and flagellar length (Solter K. M. and Gibor A.) 275, 651
Flatband potential. Temperature dependence of flatband potentials at semiconductor-electrolyte interfaces (Butler M. A. and Ginley D. S.) 273, 524
Fletcher H. *obituary* (Fletcher H.) 276, 427
Flint. Identification of ancient heat treatment in flint artefacts by ESR spectroscopy (Rubins G. V., Seeley N. J., McNeil D. A. C. and Symons M. R. C.) 276, 703
Flora. Natural selection in wildflower books—a proliferation of books Moore P. D. 276, 650
Floral diversity. The *Q*-statistic and the diversity of floras, *matters arising*, (Lamont B. B., Downes S. and Fox J. E. D.) 275, 252
Florida current. Vertical particulate spires or walls within the Florida current and near the Antilles Current (Proni J. R., Newman F. C., Ostapoff F. and Walter D. J.) 276, 360
Florida shelf. Submerged early Holocene barrier reef south-east Florida shelf (Lighty R. G., Macintyre I. G. and Stuckenrath R.) 276, 59
Flow system. Mean residence times in steady-flow and some non-flow systems (Buffham B. A.) 274, 879
Flowering plant. Dinosaur feeding behaviour and the origin of flowering plants (Bakker R. T.) 274, 661
Fluid Dynamics. Physical Fluid Dynamics (Tritton D. J., *editor*) *book review by* Stewartson K. 272, 109
Fluorescence. Unusual room temperature afterglow in some crystalline organic compounds (Bilen C. S., Harrison N. and Morantz D. J.) 271, 235
Fluoridation. Fluoridation and mortality due to heart disease (Taves D. R.) 272, 361
Fluorocarbon. A threat from fluorocarbons? *news and views*, 276, 215
Fluvial System. The Fluvial System (Schumm S. A.) *book review by* Beckinsale R. P. 272, 384
Foetus. Mystery of foetal growth, *news and views*, (Lindley M.) 272, 404
Placental inhibition of foetal growth enhancement in the rat (Croskerry P. G. and Dobbing J.) 273, 147
Prostaglandins in urine of foetal lambs (Walker D. W. and Mitchell M. D.) 271, 161
Fogo seamount. Anomalous upper mantle structure beneath the Cretaceous Fogo seamounts indicated by P-wave reflection delays (Stewart I. C. F. and Keen C. E.) 274, 788
Food. Estimate of the volatile nitrosamine content of UK food (Gouch T. A., Webb K. S. and Coleman R. F.) 272, 161
Food chain. Population dynamics and the length of food chains, *matters arising*, (Saunders P. T.) 272, 189
Population dynamics and the length of food chains—Replies *matters arising*, (Lawton J. H. and Pimm S. L.) 272, 190
Food production. Producing more food, *news*, (Wilson W. S.) 275, 698
Food production has kept up, *correspondence*, (Gribbin J.) 276, 208
Has food production kept up? *correspondence*, (Ulbricht T.L.B.) 276, 754
Food resource. International research could ease world food problem, *news*, 274, 7
Food Web. Food Webs and Niche Space (Cohen J. E.) *book review by* Lawton J. H. 276, 425
Foraging. Test of optimal sampling by foraging great tits (Krebs J. R., Kacelnik A. and Taylor P.) 275, 27
Foraminifera. Planktonic foraminiferal biostratigraphy in the Equatorial Pacific (Thompson P. R. and Sciarrillo J. R.) 276, 29
Vertical zonations of marsh foraminifera as accurate indicators of former sea levels (Scott D. S. and Medioli F. S.) 272, 528
Vital effect on stable-isotope composition seen in foraminifera and coral skeletons (Erez J.) 273, 199
Forest. Forest fires, *news and views*, (Moore P. D.) 272, 754
Formic acid. Photofixation of carbon dioxide to formic acid *in vitro* using water as hydrogen source (Tazuke S. and Kitamura N.) 275, 301
Fossil. Geology, fauna and palaeoenvironments of Lower Sivalik deposits around Ramnagar, India (Vasishat R. N., Gaur R. and Chopra S. R. K.) 275, 736
Fauna of fossil mammals from the Miocene of Saudi Arabia (Hamilton W. R., Whybrow P. J. and McClure H. A.) 274, 248
Patterns of Evolution as Illustrated by the Fossil Record (Hallam A. *editor*) *book review by* Simpson G. G. 273, 77
Fossil bone. γ-Carboxyglutamic acid in fossil bones and its significance for amino acid dating (King Jr K.) 273, 41
Fossil ecology. The Ecology of Fossils (McKerrow W. S. *editor*) *book review by* Hancock J. M. 275, 778
Fossil Man. Guide to Fossil Man (Day M. H.) *book review by* Kennedy G. E. 272, 651
Fossil: Microfossil. Late Precambrian microfossils from Brioverian cherts and limestones of Brittany and Normandy, France (Chauvel J. J. and Schopf J. W.) 275, 640
Fossil seaweed. Fossil Holocene seaweed and attached calcareous polychaetes in an anoxic basin, Gulf of Mexico (Kennett J. P. and Penrose N. L.) 276, 172
Foster M. Michael Foster and the Cambridge School of Physiology (Geison G. L.) *book review by* French R. K. 276, 132
Four-ball test. Magnetic orientation of four-ball test specimens and the effect on total test time (Jones J. B. and Pocock G.) 274, 459
Fourier analysis. Texture discrimination and Fourier analysis in human vision (Mayhew J. E. W. and Frisby J. P.) 275, 438
Fourier Transform Infrared Spectroscopy. Fourier Transform Infrared Spectroscopy (Ferraro J. R. and *editor*) *book review by* Duxbury G. 274, 405
Fovea. The deep fovea as a focus indicator (Harkness L. and Bennet-Clark H. C.) 272, 814
Foxing. Foxing a fungal infection of paper (Meynell G. G. and Newsam R. J.) 274, 466
Foxing fungus, *correspondence*, (Pirie N. W.) 275, 8
Fragmentation. Fragmentation requirements for detonating thermal explosions (Patel P. D. and Theofanous T. G.) 274, 142
France. Allez les verts, *correspondence*, (Cooper G. H.) 273, 334
Ecologists lose in French elections, *news*, (Dorozynski A.) 272, 393
France leads in vitrification of radiowastes, *news and views*, (Cahn R. W.) 274, 743
Les écologistes and the French elections, *correspondence*, (Porchez J.-L.) 273, 8
New head of French research appointed, *news*, 273, 90
France falls out with Pakistan over reprocessing, *news*, (Kidwai A.) 271, 397
Franchthi Cave. Palaeolithic–Neolithic seed remains at Franchthi Cave Greece (Hansen J. and Renfrew J., M.) 271, 349
Free fall motion. Field energies and principles of equivalence (McGruder III C. H.) 272, 806
F-region. Joule dissipation in F-region and equatorial spread-F events (Rajaraman T. N., Desai J. N., Degaonkar S. S. and Cole K. D.) 272, 516
Freshwater plant. River Plants (Haslam S. M.) *book review by* Spence D. H. N. 275, 465
FRG. West German model predicts low growth in energy demand, *news*, (Schuuring C.) 272, 393
Friend cells. Allylisopropylacetamide restricts expression of minor globin gene in Friend cells (Rovera G., Aden D. and Surrey S.) 272, 172
Funding. Canadian scientists confused by government moves on R & D funding, *news*, 276, 551
Inflation and Congress kill growth in funds for basic science, *news*,
Rocky road to funding, *news*, (Jukes T. H.) 275, 584
Skylark rockets could be made from spare parts say UK geophysicists, *news*, 276, 311
Fungal club-head. Fungal club-heads in Papua New Guinea (Price T. V., Baldwin J. A. and Simpson J. A.) 273, 374
Fungi. Fungi Delight of Curiosity (Brodie H. J.) *book review by* Ingold C. T. 274, 726
Fungi Man and his Enviroment (Cook R. C. *editor*) *book review by* Carlile M. J. 272, 191
Fungi. The Filamentous Fungi (Smith J. E. and *editor*) *book review by* Rose A. H. 274,
Fungus. Foxing fungus, *correspondence*, (Pirie N. W.) 275, 8
Fungal club-heads in Papua New Guinea (Price T. V., Baldwin J. A. and Simpson J. A.) 273, 374
Future. World Futures: The Great Debate (Freeman C. and) *book review by* Ashby E. 276, 144
GABA. Use of ^{3}H-muscimol for GABA receptor studies (Snodgrass S. R.) 273, 392
Gadolinium ion. Assymetry in the primary structure of undegraded phytochrome (Remedios C. G. dos and Dickens M. J.) 276, 733
Galactic dust. Interpretation of observed cosmic microwave background radiation (Pollaine S.) 271, 426
Galactic nucleus. Astronomers licked by QSOs and active galactic nuclei, *news and views*, (Faulkner J. and Gaskell M.) 275, 91
Recurrent activity in galactic nuclei (Bailey M. E. and Clube S. V. M.) 275, 278
Galactocerebroside. Galactocerebroside is a specific cell-surface antigenic marker for oligodendrocytes in culture (Raff M. C., Mirsky R., Fields K. L., Lisak R. P., Dorfman S. H., Silberberg D. H., Gregson N. A., Leibowitz S. and Kennedy M. C.) 274, 813
Galaxy. Clumpy structure of the Universe and general field (Chincarini G.) 272, 515
Large-scale characteristics of the Galaxy, *news and views*, (Clube V.) 274, 112
Positrons at the centre of the Galaxy, *news and views*, (Quenby J. J.) 276, 115
The cosmic-ray isotopes (Meyer P.) 272, 675
What flattens elliptical galaxies? *news and views*, (Edmunds M. G.) 274, 841
Galaxy cluster. Correlation between supercluster membership and richness for Abell clusters (Perrenod S. C.) 274, 39
Galaxy clustering spectrum. Galaxy clustering spectrum and cosmic luminosity (Chincarini G.) 274, 452
Low mass portion of the galaxy clustering spectrum (Gregory S. A. and Thompson L. A.) 274, 450
Galaxy M89. A black hole in the centre of M89? *news and views*, (Pringle J.) 274, 419
Galaxy M82. M82: the exploding galaxy? (Axon D. J. and Taylor K.) 274, 37
New evidence for an explosion in galaxy M82, *news and views*, (Cottrell G. A.) 274, 13
Galena. Least radiogenic terrestrial lead from Isua, West Greenland (Appel P. W. U., Moorbath S. and Taylor P. N.) 272, 524
Gallbladder. Distribution of Na^+ pump sites in the frog gallbladder (Mills J. W. and DiBona D. R.) 271, 273
Gallium phosphide. Photoelectrochemical reduction of aqueous carbon dioxide on p-type gallium phosphide in liquid junction solar cells (Halmann M.) 275, 115
Game animal. Why Big Fierce Animals are Rare (Colinvaux P.) *book review by* Mellanby K. 273, 787
Gamma aminobutyric acid. Benzodiazepines specifically modulate GABA-mediated postsynaptic inhibition in cultured mammalian neurones (Macdonald R. and Barker J. L.) 271, 563
Plasticity in dendrites shown by continuous GABA administration in superior cervical ganglion of adult rat (Wolff J. R., Jóo F. and Dames W.) 274, 72
Gamma-aminobutyric acid. Denervation supersensitivity in the striatonigral GABA pathway (Waddington J. L. and Cross A. J.) 276, 618
GABAergic modulation of benzodiazepine binding site sensitivity (Tallman J. F., Thomas J. W. and Gallager D. W.) 274, 383
The role of GABA in the substantia nigra (James T. A. and Starr M. S.) 275, 229
Gamma-ray burst. γ-ray burst observed at balloon altitude (Nishmura J., Fujii M., Tawara Y., Oda M., Ogawara Y., Yamagami T., Miyamoto S., Kajiwara M., Murakami H., Yoshimori M., Nakagawa M. and Sakurai T.) 272, 337
Search for high energy γ-ray bursts from evaporation of primordial black holes (Fegan D. J., McBrien B., O'Brien D. and O'Sullivan C.) 271, 731
Gamma-ray burst source. Distance limit for a class of model γ-ray burst sources (Schmidt W. K. H.) 271, 525
Gamma-ray line. Search for the 1.2 MeV γ-ray line of Walraven and Haymes (Leventhal M., MacCullum C. J. and Stang P. D.) 275, 200
Gamma-ray source. Association of young supernova remnants with γ-ray sources, *matters arising*, (Lamb R. C.) 274, 720
Coincidence of compact supernovae remnants with three COS-B γ-ray sources (Lamb R. C.) 272, 429
COS B observation of high-energy γ radiation from 3C273 (Swanenburg B. N., Bennett K., Bignami G. F., Caraveo P., Hermsen W., Kanbach G., Masnou J. L., Mayer-Hasselwander H. A., Paul J. A., Sacco B. Scarsi L. and Wills R. D.) 275, 298
Diffuse γ-ray background from Seyfert galaxies (Grindlay J. E.) 273, 211
Evidence that cosmic γ-ray bursts are galactic (White R. S., Ryan J. M., Wilson R. B., Zych A. D. and Dayton W. B.) 271, 635
Faint X-ray sources detected near COS B γ-ray positions (Julien P. F. and Helmken) 272, 699
Hard X-ray observations of cosmic γ-ray sources (Coe M. J., Quenby J. J. and Engel A. R.) 274, 343
New highly variable radio source, possible counterpart of γ-ray source CG135+1 (Gregory P. C. and Taylor A. R.) 272, 704
Observability of γ-ray pulsars (Buccheri R., D'Amico N., Massaro E. and Scarsi L.) 274, 572

On the identification of celestial γ-ray sources (Massaro E. and Scarsi L.) **274,** 346
Origin of MeV-excess in the energy spectrum of diffuse cosmic γ rays (Schonfelder V.) **274,** 344
Origin of the diffuse cosmic gamma rays, *news and views,* (Wolfendale A. W.) **274,** 314
Possible X-ray counterparts of γ-ray sources (Maraschi L., Markert T., Apparao K. M. V., Bradt H., Helmken H., Wheaton W., Baity W. A. and Peterson L. E.) **272,** 679
γ-Rays from γ Geminorum? (Davies R. E., Fabian A. C. and Pringle J. E.) **271,** 633
Gamma-ray spectroscopy. Gamma-ray spectroscopy in astrophysics (Ramaty R., Kline T. L. and Weaver R.) **273,** 591
Ganglion. Plasticity in dendrites shown by continuous GABA administration in superior cervical ganglion of adult rat (Wolff J. R., Jóo F. and Dames W.) **274,** 72
Ganglioside storage disease. Ectopic dendritic growth in mature pyramidal neurones in human ganglioside storage disease (Purpura D. P.) **276,** 520
Gap junction. Calcium effects on gap junction structure and cell coupling (Peracchia C.) **271,** 669
Intercellular Junctions and Synapses (Feldman J. D., *editor*) *book review by* Warner A. **273,** 410
Transmission of hormonal stimulation by cell-to-cell communication (Lawrence T. S., Beers W. H. and Gilula N. B.) **272,** 501
Gardner A. D. *obituary* (Gardner A. D.) **273,** 413
Gargamelle. Another surprise from Gargamelle, *news and views,* (Miller D. J.) **273,** 99
Garnet. Multiple spinel-garnet peridotite transitions in upper mantle: evidence from a harzburgite xenolith (Dawson J. B., Smith J. V. and Delaney J. S.) **273,** 741
Garnet. Exsolution in almandine-pyrope-grossular garnet (Cressey G.) **271,** 533
Garnet lherzolite. Palaeogeotherms: implications of disequilibrium in garnet lherzolite xenoliths (Fraser D. G. and Lawless P. J.) **273,** 220
Garnet lherzolite xenolith. Palaeogeotherms: implications of disequilibrium in garnet lherzolite xenoliths, *matters arising,* Carswell D. A. **276,** 737
Palaeogeotherms: implications of disequilibrium in garnet lherzolite xenoliths—Reply, *matters arising,* Fraser D. G. and **276,** 737
Gas. Electrical Breakdown Phenomena in Gases (Meek J. M. and *editor*) *book review by* Gilbody H. B. **276,** 424
Vibrational and Rotational Relaxation in Gases (Lambert J. D.) *book review by* Smith I. W. M. **272** 474
Gas: Ionised. Incidence of ionised gas in E/SO radio galaxies (O'Connell R. W. and Dressel L. L.) **276,** 374
Gastrin. Biosynthetic relationships of big and little gastrins (Dockray G. J., Vaillant C. and Hopkins C. R.) **273,** 770
Localisation of gastrins to neuro- and adenohypophysis (Rehfeld J. F.) **271,** 771
Gating current. Immobilisation of gating charge by a substance that simulates inactivation (Yeh J. Z. and Armstrong C. M.) **273,** 387
Gauge theory. Naming the unifying gauge theories, *news,* **276,** 312
The context of the search for axions, *review article,* (Morgan D.) **274,** 22
SU(2) × U(1): A gauge theory of weak interactions? (Bailin D. and Dombey N.) **271,** 20
Gene activation. α-Crystallin polypeptides as markers of lens cell differentiation (Vermorken A. J. M. and Bloemendal H.) **271,** 779
Gene: Aminoterminus. Unusual genes at the aminoterminus of human immunoglobulin variants (Frangione B., Franklin E. C. and Smithies O.) **273,** 400
Gene amplification. Methotrexate resistance by gene amplification, *news and views,* (Shields R.) **273,** 269
Gene: Ancestral. The number of ancestral genes contributing to a sample of B8 alleles (Thompson E. A.) **272,** 288
Gene: Antibody. The arrangement and rearrangement of antibody genes (Seidman J. G. and Leder P.) **276,** 790
Gene: Bacteria. Bacterial gene into monkey cells (Jenkins J.) **275,** 13
Gene: collagen. Assignment of a type I collagen structural gene to human chromosome 7 (Sykes B. and Solomon E.) **272,** 548
Gene control. A gene complex controlling segmentation in *Drosophila, review article,* (Lewis E. B.) **276,** 565
Drosophila genetics at Szeged, *news and views,* (Ashburner M. and Lawrence P.) **275,** 481
Gene conversion. Asymmetric gene conversion at inserted segments on yeast mitochondrial DNA (Strausberg R. L., Vincent, R. D., Perlman P. S. and Butow R. A.) **276,** 577
Gene conversion in mitochondria, *news and views,* (Williamson D. H.) **276,** 562
Gene: Discontinuous. Genes in pieces: were they ever together? *news and views,* (Doolittle W. F.) **272,** 581
Why genes in pieces? *news and views,* (Gilbert W.) **271,** 501
Gene dosage. Effect of gene dosage on expression of mitochondrial malic enzyme activity in the mouse (Bernstine E. G., Russell L. B. and Cain C. S.) **271,** 748
Effect of gene dosage on expression of mitochondrial malic enzyme activity in the mouse (Bernstine E. G., Russell L. B. and Cain C. S.) **271,** 748
Gene: Evolution. Comparison of cloned rabbit and mouse β-globin genes showing strong evolutionary divergence of two homologous pairs of introns (Berg J. van den, Ooyen A. van, Mantei N., Schamböck A., Grosveld G., Flavell R. A. and Weissmann C.) **276** 37
Gene expression. 5- Bromodeoxyuridine induces expression of a tumour-specific surface antigen on normal avian cells (Biquard J. M. and Aupoix M.) **272,** 284
Allylisopropylacetamide restricts expression of minor globin gene in Friend cells (Rovera G., Aden D. and Surrey S.) **272,** 172
DNA sequence for a low-level promoter of the *lac* repressor gene and an 'up' promoter mutation (Calos M. P.) **274,** 762
Drosophila genetics at Szeged, *news and views,* (Ashburner M. and Lawrence P.) **275,** 481
Eukaryotic gene cloning and expression in yeast, *news and views,* (Nasmyth K.) **274,** 741
Expression of λ *red* genes restores *recB*-dependent protein X induction in *E. coli* (Crowl R. M., Ahmed S. U. and Boyce R. P.) **275,** 71
Halobacterium strain 5 contains a plasmid which is correlated with the presence of gas vacuoles (Simon R. D.) **273,** 314
Influence of bromodeoxyuridine on viral and cellular gene expression, *news and views,* (Weiss R.) **272,** 206
Mutations in *nir* A gene of *Aspergillus nidulans* and nitrogen metabolism (Rand K. N. and Arst H. N. Jr) **272,** 732
Phenotypic expression in *E. coli* of a DNA sequence coding for mouse dihydrofolate reductase (Chang A. C. Y., Nunberg J. H., Kaufman R. J., Erlich H. A., Schimke R. T. and Cohen S. N.) **275,** 617
Protein polymorphism and the rate of loss of duplicate gene expression (Allendorf F. W.) **272,** 76
Synthesis of growth hormone by bacteria (Seeburg P. H., Shine J., Martial J. A., Ivarie R. D., Morris J. A., Ullrich A., Baxter J. D. and Goodman H. M.) **276,** 795
Transposition of *Pseudomonas* toluene-degrading genes and expression in *Escherichia coli* (Jacoby G. A., Rogers J. E., Jacob A. E. and Hedges R. W.) **274,** 179
Tumorous head is a maternal-effect homoeotic mutant of *Drosophila melanogaster* (Bournias-Vardiabasis N. and Bownes M.) **276,** 611
Gene: Germline. Multiplicity of germline genes specifying a group of related mouse λ chains with implications for the generation of immunoglobulin diversity (Valbuena O., Marcu K. B., Weigert M. and Perry P.) **276,** 780
Rearrangement of genetic information may produce immunoglobulin diversity (Weigert M., Gatmaitan L., Loh E., Schilling J. and Hood L.) **276,** 785
Gene: Globin. Allylisopropylacetamide restricts expression of minor globin gene in Friend cells (Rovera G., Aden D. and Surrey S.) **272,** 172
Gene: β-globin. An intervening sequence of the mouse β-globin major gene shares extensive homology only with β-globin genes (Miller H. I., Konkel D. A. and Leder P.) **275,** 772
Comparison of cloned rabbit and mouse β-globin genes showing strong evolutionary divergence of two homologous pairs of introns (Berg J. van den, Ooyen A. van, Mantei N., Schamböck A., Grosveld G., Flavell R. A. and Weissmann C.) **276** 37
Of mice and men, *news and views,* (Tolstoshev P.) **276,** 13
Gene homology. An intervening sequence of the mouse β-globin major gene shares extensive homology only with β-globin genes (Miller H. I., Konkel D. A. and Leder P.) **275,** 772
Gene: Immunoglobulin. Immunoglobin genes: more facts to guide speculation, *news and views,* (Dunnick W. A.) **276,** 322
Gene insertion. An insert in the single gene for the large ribosomal RNA in yeast mitochondrial DNA (Bos J. L., Heyting C., Borst P., Arnberg A. C. and Van Bruggen E. F. J.) **275,** 336
Transfer of the drug-resistance transposon Tn5 to *Rhizobium* (Beringer J. E., Beynon J. L., Buchanan-Wollaston A. V. and Johnston A. W. B.) **276,** 633
Gene: *lac.* Correlation of nonsense sites in the *lacI* gene with specific codons in the nucleotide sequence (Miller J. H., Coulondre C. and Farabaugh P. J.) **274,** 770
DNA sequence for a low-level promoter of the *lac* repressor gene and an 'up' promoter mutation (Calos M. P.) **274,** 762
Revised sequence for the *lac* repressor (Beyreuther K.) **274,** 767
Sequence of the *lac* gene (Farabaugh P. J.) **274,** 765
Gene linkage. Auxotrophic mutants of *Dictyostelium discoideum* (Franke J. and Kessin R.) **272,** 537
Evolutionary conservation of gene linkage, *news and views,* (Ford E. H. R.) **274,** 112
Gene map. Deletion mapping of the *t* complex of chromosome 17 of the mouse (Erickson R. P., Lewis S. E. and Slusser K. S.) **274,** 163
Gene: Multigene. Is there a correction mechanism in the 5S multigene system? (Miller J. R. and Brownlee G. G.) **275,** 556
Gene mutation. Do radiation-induced thioguanine-resistant mutants of cultured mammalian cells arise by HGPRT gene mutation or X-chromosome rearrangement? (Cox R. and Masson W. K.) **276,** 629
Gene: Mutator. Mutator genes—pacemakers of evolution, *review article,* (Thompson J. N. Jr and Woodruff R. C.) **274,** 317
Gene number. The number of genes in *Drosophila melanogaster* (Garcia-Bellido A. and Ripoll P.) **273,** 399
Gene: ovalbumin. Isolation by molecular cloning of a fragment of the split ovalbumin gene (Garapin A. C., Lepennec J. P., Roskam W., Perrin F., Cami B., Krust A., Breathnach R., Chambon P. and Kourilsky P.) **273,** 349
Gene: Overlapping. Gene *K*, a new overlapping gene in bacteriophage G4 (Shaw D. C., Walker J. E., Northrop F. D., Barrell B. G., Godson G. N. and Fiddes J. C.) **272,** 510
Triple overlapping genes, *news and views,* (Szekely M.) **272,** 492
Gene product. Potential for variability through multiple gene products of bacteriophage ΦX174 (Pollock T. J., Tessman I. and Tessman E. S.) **274,** 34
Gene: Ribosomal. Is there a correction mechanism in the 5S multigene system? (Miller J. R. and Brownlee G. G.) **275,** 556
New cluster of ribosomal genes in *Bacillus subtilis* with regulatory role in sporulation (Trowsdale J., Shiflett M. and Hoch J. A.) **272,** 179
Ribosomal genes dissected, *news and views,* (Maden B. E. H.) **272,** 580
Transcription of cloned *Xenopus* ribosomal genes visualised after injection into oocyte nuclei (Trendelenburg M. F. and Gurdon J. B.) **276,** 292
Unintegrated ribosomal genes and their relation to position effect variegation in *Drosophila melanogaster* (Zuchowski-Berg C. I.) **271,** 60
Gene: Selfish. Selfish genes, evolutionary games, and the adaptiveness of behaviour (Parker G. A.) **274,** 849
Gene: Split. Intervening sequences excised in vitro, *news and views,* (Roberts R. J.) **274,** 530
Split gene transcription, *news and views,* (Williamson B.) **272,** 753
Gene: Structural. Histone genes displayed, *news and views,* (Ford P. J.) **276,** 214
Identification of a new chicken α-globin structural gene by complementary DNA cloning (Cummings I. W., Liu A. Y. and Salser W. A.) **276,** 418
Gene structure. Do genes-in-pieces imply proteins-in-pieces? *news and views,* (Blake C. C. F.) **273,** 267
The nature of an initiator constitutive mutation in *Aspergillus nidulans* (Scazzocchio C. and Arst H. N. Jr) **274,** 177
Gene synteny. Conservation of autosomal gene synteny groups in mouse and man (Lalley P. A., Minna J. D. and Francke U.) **274,** 160
Gene: Transforming. *In vitro* synthesis of a functional avian sarcoma virus transforming-gene product (Erikson E., Collett M. S. and Erikson R. L.) **274,** 919
Gene transposition. Transposition of *Pseudomonas* toluene-degrading genes and expression in *Escherichia coli* (Jacoby G. A., Rogers J. E., Jacob A. E. and Hedges R. W.) **274,** 179
Gene: V. Idiotype sharing by murine strains differing in immunoglobulin allotype (Gearhart P. J. and Cebra J. J.) **272,** 264
Genetic variation. Study of the charge-state model for electrophoretic variation using isoelectric focusing of esterase-5 from *Drosophila pseudoobscura* (Ramshaw J. A. M. and Eanes W. F.) **275,** 68
Genes: *lac.* Molecular basis of base substitution hotspots in *Escherichia coli* (Coulondre C., Miller J. H., Garabaugh P. J. and Gilbert W.) **274,** 775
Genetic defect. Antenatal diagnosis of genetic defects, *news and views,* (Williamson B.) **276,** 114
Genetic differentiation. Humans and apes are genetically very similar (Bruce E. J. and Ayala F. J.) **276,** 264
Genetic engineering. Bacterial gene into monkey cells (Jenkins J.) **275,** 13
Bacterium makes insulin, *news,* **273,** 485
Friends of DNA fight back, *news,* **272,** 664
Gene inquiry is timely, *correspondence,* (Cummins B., Piney M., Turney J., Walden N., and Yoxen E.) **271,** 108
Genetic engineering guidelines, *correspondence,* (Schneider F.) **274,** 10
Genetic scaremongering (Goodfield J.) *book review by* Baltimore D. **272,** 766
Genetic scaremongering (Cooke R.) *book review by* Baltimore D. **272,** 766
MPs seek comments on genetic engineering, *news,* **276,** 312
Recombinant DNA risk-assessment studies to begin at Fort Detrick, *news,* **272,** 488
US geneticists look to Europe for research facilities, *news,* (Douglas J.) **275,** 170
WHO looks for benefits from genetic engineering, *news,* **272,** 663
Genetic information. Rearrangement of genetic information may produce immunoglobulin diversity (Weigert M., Gatmaitan L., Loh E., Schilling J. and Hood L.) **276,** 785
Genetic Manipulation Advisory Group. Blind man's buff at GMAG, *news,* (McClelland A. J.) **276,** 657
European control of genetic manipulation, *news,* **276,** 661
Genetic manipulation: new guidelines for UK **276,** 104
GMAG: Stormy weather ahead? *news,* **271,** 5
GMAG wants to stay on, *news,* **273,** 259
Now reason can prevail, *leading article,* **276,** 103
Plenty for GMAG to do, *leading article,* **276,** 1
Six months in category four, *news,* (Brenner S.) **276,** 2
UK extends the law to genetic engineering, *news,* **273,** 482
Genetic regulation. Genetic regulation of glucose phosphate isomerase in mouse oocytes (Peterson A. C. and Wong G. G.) **276,** 267
Genetic screening. Prevention of spina bifida—the parents' choice, *leading article,* **271,** 595
Genetic sexing. Genetic sexing technique for a mosquito sterile male release (Baker R. H., Sakai R. K. and Saifuddin U. T.) **274,** 253
Genetic variability. Genetic variability and population structure of *Poecilia latipinna* (Simanek D. E.) **276,** 612
Genetic variant. Structural comparison of glycophorins and immunochemical analysis of genetic variants (Furthmayr H.) **271,** 519
Genetic Variation. Genetic structure of the East African domestic populations of *Aedes aegypti* (Tabachnick W. J. and Powell J. R.) **272,** 535
Genetic variation and selective forces (Berry R. J.) *book review by* Mather K. **272,** 764
Unequal crossing over at the rRNA locus as a source of quantitative genetic variation (Frankham R., Briscoe D. A. and Nurthen R. K.) **272,** 80
Genetic variations. Genetic variants in 2-D, *news and views,* (Edwards Y. and Swallow D.) **272,** 309
Geneticist. US geneticists, *correspondence,* (Reimers N. J.) **276,** 438
Genetics. Cellular genetics—recent textbooks Berry R. J. **272,** 94
Fascination of genetics—recent textbooks Emery A. E. H. **272,** 95
Genetics and society (Reilly P.) *book review by* Levy H. L. **272,** 766
Soviet genetics, *correspondence,* (Medvedev Z. A.) **271,** 204
Thoughts on ageing Davies A. J. S. **276,** 851
Tortuous story of DNA (Portugal F. H. and) *book review by* Olby R. **272,** 760
The Genetics of Aging (Schneider E. L., *editor*) *book review by* Emery A. E. H. **275,** 466
Genetics: Extranuclear. Extranuclear Genetics (Beale G. and) *book review by* Jinks J. L. **275,** 258
Genetics: Industrial. Genetics of industrial microorganisms, *news and views,* (Malik V. S.) **274,** 844
Geneva. To Geneva yet again, *leading article,* **275,** 261
Geochronology. ... and geochronological anomalies, *news and views,* **275,** 479
Geography. Contemporary Problems in Geography (three new volumes) Temple P. H. **273,** 252
Geology. Armchair geology—Earth sciences in the comfort of your own home Smith P. J. **276,** 652
Reproduction (Cohen J.) *book review by* Austin C. R. **272,** 382
Principles of Isotope Geology (Faure G., *editor*) *book review by* Turner G. **272,** 103
Geomagnetic field. Oscillations of the Sun and the geomagnetic field (Lanzerotti L. J. and Maclennan C. G.) **275,** 113
Geomagnetic pulsation. ULF tree potentials and geomagnetic pulsations (Fraser-Smith A. C.) **271,** 641
Geomagnetic reversal. Evidence from Iceland on geomagnetic reversal during the Wisconsinan Ice Age (Peirce J. W. and Clark M. J.) **273,** 456
K-Ar and $^{40}Ar/^{39}Ar$ age of the Laschamp geomagnetic polarity reversal (Hall C. M. and York D.) **274,** 462
Transitional field configurations and geomagnetic reversal (Hoffman K. A. and Fuller M.) **273,** 715
Geomagnetic storm. Post geomagnetic storm protonospheric replenishment (Kersley L., Hajeb-Hosseinieh H. and Edwards K. J.) **271,** 429
Geomagnetic variation. Transmission of polar electric fields to the Equator (Kikuchi T., Araki T., Maeda H. and Maekawa K.) **273,** 650
Geomagnetism. Anomalous magnetic fabric in sediments which record an apparent geomagnetic field excursion (Marino R. J. and Ellwood B. B.) **274,** 581

IMF effects on shortperiod fluctuations at low latitudes (Agarwal A. K., Rastogi R. G., Nityananda N. and Singh B. P.) **272,** 517
Meteor radar rates, geomagnetic activity and solar wind sector structure (Lindblad B. A.) **273,** 732
Rejecting ophiolites, *news and views,* (Smith P. J.) **274,** 316
The solar wind at the turn of the century (Feynman J. and Crooker N. U.) **275,** 626
UK geophysics—alive and well? *news and views,* (Tarling D.) **274,** 641

Geomorphology. Applied Geomorphology (Hails J. R. *editor*) *book review by* Lister H. **271,** 192
Geomorphological basics—recent textbooks Embleton C. **272,** 105
Palaeoclimatic and geomorphic implications of $^{230}Th/^{234}U$ dates on speleothems from Britain (Atkinson T. C., Harmon R. S., Smart P. L. and Waltham A. C.) **272,** 24

Geophysics. Congress puts NSF deep sea drilling project in doubt, *news,* **272,** 747
European geophysics (Brown G. M.) **275,** 694
UK geophysics—alive and well? *news and views,* (Tarling D.) **274,** 641

Geos. Geos III not enough for POLO. *correspondence,* (Runcorn S. K.) **276,** 438

Geos 2. Geos 2 in space collision? *news,* (Wrenn G.) **274,** 631

Geos I. Geos IIdentification of natural magnetospheric emissions (Christiansen P., Gough P., Martelli G., Bloch J.-J., Cornilleau N., Etcheto J., Gendrin R., Jones D., Béghin C. and Décréau P.) **272,** 682

Geostimulation. Geostimulation of root growth and pigment synthesis in mustard seedlings (MacDonald I. R. and Gordon D. C.) **272,** 48

Geotherm. Were Archaean continental geothermal gradients much steeper than today? *matters arising,* (Drury S. A.) **274,** 720

Geothermal energy. Fuel from magma, *news and views,* (Cahn, R. W.) **273,** 268

Geothermal gradient. Were Archean continental geothermal gradients much steeper than those of today? (Burke K. and Kidd W. S. F.) **272,** 240

Geothermometry. Opaque mineral alterations states correlated with temperature in an active geothermal system (Abdel-Aal O. Y. and Hall J. M.) **272,** 239

Germ cell. Is sex determination in germ line and soma controlled by separate genetic mechanisms? (Marsh J. L. and Wieschaus E.) **272,** 249

German Democratic Republic. GDR's state of science, *correspondence,* (Hoffman E.) **271,** 500

Germanium. Indentation hardness and semiconductor-metal transition of germanium and silicon (Gerk A. P. and Tabor D.) **271,** 732
Phase transitions and indentation hardness of Ge and diamond, *matters arising,* (Tabor D.) **273,** 406

Germany. Germany's energy plans, *news,* (Gries W.) **271,** 603
Scientists under Hitler: Politics and the Physics Community in the Third Reich (Beyerchen A. D.) *book review by* Mendelssohn K. **272,** 738
West Germany spends more on coal research than on fast breeder research, *news,* (Gries W.) **273,** 6

Germination. Regulation of RNA synthesis in early germination of isolated wheat (*Triticum aestivum* L) embryo (Cheung C. P. and Suhadolnik R. J.) **271,** 357

Giant star. Giant problems, *news and views,* (Edmunds M. G.) **273,** 487

Giant-star. Carbon and M-type giant stars in the Magellanic Clouds (Blanco B. M., Blanco V. M. and McCarthy M. F.) **271,** 638

Glacial. Ice-Age palaeo-oceanography of the Mediterranean, *news and views,* (Shackleton N. J.) **276,** 667
A Glacial Mediterranean (Thiede J.) **276,** 680

Glaciation. Age of earliest mid-latitude glaciation, *matters arising,* (Mercer J. H.) **274,** 926
Infracambrian glaciogenic sediments from Sierra Leone (Culver S. J., Williams H. R. and Bull P. A.) **274,** 49
Record of last interglacial-glacial cycle from northeastern Queensland (Kershaw A. P.) **272,** 159
Termination of last interglacial episode and the Wilson Antarctic surge hypothesis (Chappell J. and Thom B. G.) **272,** 809
The key to sources of the Pliocene and Pleistocene glaciation is at the bottom of the Barents Sea (Kvasov D. D. and Blazchishin A. I.) **273,** 138

Glacier. Volcanic dust influence on glacier mass balance at high latitudes (Bradley R. S. and England J.) **271,** 736
Glacier 'retreat' threatens Alaskan oil tanker route, *news,* **273,** 88
Pressure-melting within a glacier indicated by the chemistry of re-gelation ice (Souchez R., Lemmens M., Lorrain R. and Tison J.-L.) **273,** 454

Glass: Metallic. Metallic glasses: the reason why (Cahn R. W.) **274,** 848

Glial factor. Brain development influences the appearance of glial factor-like activity in rat brain primary cultures (Schurch-Rathgeb Y. and Monard D.) **273,** 308

Glioma cell. New factor released by cultured glioma cells supporting survival and growth of sensory neurones (Barde Y. A., Lindsay R. M., Monard D. and Thoenen H.) **274,** 818

Global change. Seismic stratigraphy and global changes, *news and views,* (Hallam A.) **272,** 400

Globin. Evidence for translation of rabbit globin mRNA after liposome-mediated insertion into a human cell line (Ostro M. J., Giacomoni D., Lavelle D., Paxton W. and Dray S.) **274,** 921
Translation of rabbit globin mRNA introduced by liposomes into mouse lymphocytes (Dimitriadis G. J.) **274,** 923

Globular cluster. Globular clusters, *news and views,* (Trimble V.) **275,** 12

Globulin. T cell origin of human macromolecular insoluble cold globulin (Hauptman S. P. and Kansu E.) **276,** 393
Toxicity of diphtheria toxin for lymphoblastoid cells is increased by conjugation to antilymphocytic globulin (Thorpe P. E., Ross W. C. J., Cumber A. J., Hinson C. A., Edwards D. C. and Davies A. J. S.) **271,** 752
Toxicity of diphtheria toxin for lymphoblastoid cells is increased by conjugation to antilymphocytic globulin (Thorpe P. E., Ross W. C. J., Cumber A. J., Hinson C. A., Edwards D. C. and Davies A. J. S.) **271,** 752

Globus pallidus. Release of enkephalin from rat globus pallidus *in vitro* (Iversen L. L., Iversen S. D., Bloom F. E., Vargo T. and Guillemin R.) **271,** 679

Glucagon receptor. Regulation of the glucagon receptor by physiological hyperglucagonaemia (Soman V. and Felig P.) **272,** 829

Glucocorticoid receptor. Hepatic glucocorticoid receptors and the *H*-2 locus (Butley M. S., Erickson R. P. and Pratt W. B.) **275,** 136

Glucose. δ- Glucose inhibits potassium efflux from pancreatic islet cells (Henquin J. C.) **271,** 271

Glucose phosphate isomerase. Genetic regulation of glucose phosphate isomerase in mouse oocytes (Peterson A. C. and Wong G. G.) **276,** 267

Glucose transport. Cytochalasin B inhibits lymphocyte transformation through its effects on glucose transport (Hume D. A., Hansen K., Weidemann M. J. and Ferber E.) **272,** 359

Glutamate. Chinese Restaurant Syndrome, *news and views,* (Reif-Lehrer L.) **271,** 712
Transformation by concanavalin A of the response of molluscan neurones to D-glutamate (Kehoe J.) **274,** 866
Glutamate neurotoxicity and Huntington's chorea (Olney J. W. Gubareff T. de and) **271,** 557
Supersensitivity to the cyclic GMP response to glutamate during cerebellar maturation (Garthwaite J. and Balázs R.) **275,** 328

Glutathione. Cellular glutathione is a key to the oxygen effect in radiation damage (Morse M. L. and Dahl R. H.) **271,** 660

Glutathione reductase. The structure of the flavoenzyme glutathione reductase (Schultz G. E., Schirmer R. H., Sachsenheimer W. and Pai E. F.) **273,** 120

Glycogen phosphorylase b. Crystallographic studies on the activity of glycogen phosphorylase *b* (Weber I. T., Johnson L. N., Wilson K. S., Yeates D. G. R., Wild D. L. and Jenkins J. A.) **274,** 433

Glycolipid. Cell adhesion mediated by glycolipids (Huang R. T. C.) **276,** 624

Glycophorin. Structural comparison of glycophorins and immunochemical analysis of genetic variants (Furthmayr H.) **271,** 519

Glycoprotein. Differential cell adhesion may result from 'nonspecific interactions between cell surface glycoproteins (Edwards P. A. W.) **271,** 248

Glycoprotein synthesis. Adenylate cyclase in a fibroblast mutant defective in glycolipid and glycoprotein synthesis (Anderson W. B., Jaworski C. J., Gallo M., Pastan I. and Pouysségur J.) **275,** 223

Golgi complex. The Golgi complex and inter-relationships of arthropods, *matters arising,* (Manton S. M.) **276,** 849

Gonadal dysgenesis. Absence of H–Y antigen in XY females with dysgenetic gonads (Ghosh S. N., Shah P. N. and Gharpure H. M.) **276,** 180

Gonadotrophin. Internalisation of gonadotrophin-receptor complex in ovarian luteal cells (Conn P. M., Conti M., Harwood J. P., Dufau M. L. and Catt K. J.) **274,** 598

Gondwanaland. A failed Gondwana spreading axis in southern Africa (Reeves C. V.) **273,** 222
Flood basalts, subduction and the break-up of Gondwanaland (Cox K. G.) **274,** 47
Rb-Sr mantle isochrons and variations in the chemistry of Gondwanalands lithosphere (Brooks C. and Hart S. R.) **271,** 220

Gonococcus. Mutations to increased antibiotic sensitivity in naturally-occuring gonococci (Eisenstein B. I. and Sparling P. F.) **271,** 242

Gonocyte. Extratubular migration of gonocytes in the foetal rabbit testis (Gould R. P. and Haddad F.) **273,** 464

Gorky M. Long live science *news,* (Gorky M.) **272,** 202

Gorringe Bank. Sampling and observation of oceanic mantle and crust on Gorringe Bank (Auzende J.-M., Olivet J.-L., Charvet J., Le Lann A., Le Pichon X., Monteiro J. H., Nicolas A. and Ribeiro A.) **273,** 45

Gothenberg Geomagnetic Event. Rejecting evidence of Gothenberg geomagnetic reversal in New Zealand (Sukroo J. C., Christoffel D. A., Vella P. and Topping W. W.) **271,** 650

Graft. Evidence of fusion between host and donor myoblasts in skeletal muscle grafts (Partridge T. A., Grounds M. and Sloper J. C.) **273,** 306

Graft-versus-host disease. Graft-versus-host disease impairs cerebellar growth (Griffin W. S. T., Head J. R., Woodward D. J. and Carrol C.) **275,** 315

Gramicidin A channel. Interaction of cation fluxes in gramicidin A channels in lipid bilayer membranes (Schagina L. V., Grinfeldt A. E. and Lev A. A.) **273,** 243

Gramicidin S/Æurea complex. The crystal structure of a hydrated gramicidin S-urea complex (Hull S. E., Karlsson R., Main P., Woolfson M. M. and Dodson E. J.) **275,** 206

Granite. Geophysical constraints on structure and emplacement of Shap granite (Locke C. A. and Brown G. C.) **272,** 526
Granite-greenstone terrains of the Rhodesian Archaean craton (Wilson J. F., Bickle M. J., Hawkesworth C. J., Martin A., Nisbet E. G. and Orpen J. L.) **271,** 23
Reinvestigation of the α-activity of Conway granite (Gentry R. V., Halperin J. H., Ketelle B. H., O'Kelley G. D., Stoughton R. W. and Adams J. A. S.) **273,** 217

Grant. Careers for researchers, *correspondence,* (Ayres J. J., Harvey W., Kadlubowski M., Rose M., Russell M. W., Simmonds H. R. and Unger A.) **274,** 208

Granulocyte. Novel cytochrome *b* system in phagocytic vacuoles of human granulocytes (Segal A. W. and Jones O. T. G.) **276,** 515

Grassland. Greener grass? *news and views,* (Moore P. D.) **272,** 209

Graton. Slave—Churchill-collision tectonics (Gibb R. A.) **271,** 50

Graves' disease. Evidence that the TSH receptor acts as a mitogenic antigen in Graves' disease (Mäkinen T., Wägar G., Apter L., Willebrand E. von and Pekonen F.) **275,** 314

Gravitational constant. Gravitation, primordial stars and the dark mass (Shields G. A.) **273,** 519

Gravitational radiation. Revised estimate of gravitational radiation from Crab and Vela pulsars (Zimmermann M.) **271,** 524

Gravity wave. Atmospheric gravity waves generated during a solar eclipse (Goodwin G. L. and Hobson G. J.) **275,** 109
Quasi-periodic fluctuations in electron content during a partial solar eclipse (Vaidyanathan S., Reddi C. R. and Krishnamurthy B. V.) **271,** 40

Great tit. Test of optimal sampling by foraging great tits (Krebs J. R., Kacelnik A. and Taylor P.) **275,** 27

Great tit. Inbreeding and dispersal in the great tit (Greenwood P. J., Harvey P. H. and Perrins C. M.) **271,** 52
Song repertoires and territory defence in the great tit (Krebs J., Ashcroft R. and Webber M.) **271,** 539

Greece. Greek orthodoxy, *news,* (Pantelouris E. M.) **271,** 394
Greek universities, *correspondence,* (Mourkidas G. A.) **274,** 110
Research in Greece, *news,* (Pantelouris E. M.) **271,** 696

Green woodhoopoe. Communal breeding in green woodhoopoes as a case for reciprocity (Ligon J. D. and Ligon S. H.) **276,** 496

Greenland. Jurassic basin evolution of East Greenland (Surlyk F.) **274,** 130
Offshore continuation of East Greenland dyke swarm and North Atlantic Ocean formation (Larsen H. C.) **274,** 220

Grizzly bear. Climate and reproduction of grizzly bears in Yellowstone National Park (Picton H. D.) **274,** 888

Group Theory. Group Theory and General Relativity (Carmeli M.) *book review by* David P. **271,** 690

Growth factor. A human fibrosarcoma cell line producing multiplication stimulating activity (MSA)-related peptides (De Larco J. E. and Todaro G. J.) **272,** 356
Cell saturation density is not determined by a diffusion-limited process (Whittenberger B. and Glaser L.) **272,** 821
Epidermal Growth factors for tumours *news and views,* (Shields R.) **272,** 670

Growth hormone. Effect of growth hormone on vitamin D metabolism (Spanos E., Barrett D., MacIntyre I., Pike J. W., Safilian E. F. and Haussler M. R.) **273,** 246
Synthesis of growth hormone by bacteria (Seeburg P. H., Shine J., Martial J. A., Ivarie R. D., Morris J. A., Ullrich A., Baxter J. D. and Goodman H. M.) **276,** 795

Growth rate. Growth limitation of a coastal diatom by low zinc ion activity (Anderson M. A., Morel F. M. M. and Guillard R. R. L.) **276,** 70

GTPase. GTPase activity at ends of microtubles (David-Pfeuty T., Laporte J. and Pantaloni D.) **272,** 282

Guanethidine. Chronic guanethidine treatment increases cardiac β- adrenergic receptors (Glaubiger G., Tsai B. S., Lefkowitz R. J., Weiss B. and Johnson E. M. Jr) **273,** 240

Guanine nucleotide. Effect of guanine nucleotides on striatal dopamine receptors (Zahniser N. R. and Molinoff P. B.) **275,** 453

Guanosine. Photochemical (83d8) coupling of purine nucleosides to guanosine (Bose S. N., Davies R. J. H., Anderson D. W., Van Niekerk J. C., Nassimbeni L. R. and Macfarlane R. D.) **271,** 783

Guard cell. Abscisic acid and guard cells of *Commelina communis* L. (Itai C., Weyers J. D. B., Hillman J. R., Meidner H. and Willmer C.) **271,** 652

Guinea Current. Guinea Current upwelling (Bakun A.) **271,** 147

Gulf killifish. Temperature-induced phase shift of daily rhythm of serum prolactin in gulf killifish (Spieler R. E., Meier A. H. and Noeske T. A.) **271,** 469

Haem ligand. Identification of the haem ligands of cytochrome b_{562} by X-ray and NMR methods (Xavier A. V., Czerwinski E. W., Bethge P. H. and Mathews F. S.) **275,** 245

Haem metabolism. Heme and Hemoproteins (Matteis F. De and *editor*) *book review by* Gray C. H. **274,** 927

Haem protein. Haem exposure as the determinate of oxidation-reduction potential of haem proteins (Stellwagen E.) **275,** 73

Haematococcus pluvialis. Photoreceptor electric potential in the phototaxis of the alga *Haematococcus pluvialis* (Litvin F. F., Sineshchekov O. A. and Sineshchekov V. A.) **271,** 476

Haemin. Haemin promotes rapid neurite outgrowth in cultured mouse neuroblastoma cells (Ishii D. N. and Maniatis G. M.) **274,** 372

Haemoglobin. Extended X-ray absorption fine structure determination of iron nitrogen distances in haemoglobin (Eisenberger P., Shulman R. G., Kincaid B. M., Brown G. S. and Ogawa S.) **274,** 30
Human Hemoglobin (Bunn H. F., *editor*) *book review by* Weatherall D. J. **272,** 563
Sicily: the world's reservoir of thalassemias and haemoglobinopathies, *news and views,* (Schiliro G.) **276,** 761

Haemoglobin. Competition of normal β chains and sickle haemoglobin β chains for α chains as a post-translational control mechanism (Bunn H.F.) **276,** 631
Haemoglobin J Tongariki is associated with α thalassaemia (Old J. M., Clegg J. B., Weatherall D. J. and Booth P. B.) **273,** 319

Haemoglobin: Carboxyhaemoglobin. Nanosecond transient Raman spectra of photolysed carboxyhaemoglobin (Lyons K. B., Friedman J. M. and Fleury P. A.) **275,** 565

Haemoglobin fibre. Sickle-cell haemoglobin fibres, *news and views,* (Finch J. T.) **272,** 496
Three-dimensional reconstruction of the fibres of sickle cell haemoglobin (Dykes G., Crepeau R. H. and Edelstein S. J.) **272,** 506

Haemoglobin gelation. Requirements for therapeutic inhibition of sickle haemoglobin gelation (Sunshine H. R., Hofrichter J. and Eaton W. A.) **275,** 238

Haemoglobin S. Cellular mechanism for the protective effect of haemoglobin S against *P. falciparum* malaria (Pasvol G., Weatherall D. J. and Wilson R. J. M.) **274,** 701
Diameter of haemoglobin S fibres in sickled cells (Crepeau R. H., Dykes G., Garrell R. and Edelstein S. J.) **274,** 616

Haemopoietic stem cell. Expression of endogenous C-type viral antigen on normal mouse haemopoietic stem cells (Staber F. G., Schlafli E. and Moroni C.) **275,** 669

Haemoprotein. Heme and Hemoproteins (Matteis F. De and *editor*) *book review by* Gray C. H. **274,** 927

Hallucinosis. Effects of lisuride and LSD on cerebral monoamine systems and hallucinosis (Pieri L., Keller H. H., Burkard W. and Da Prada M.) **272,** 278

Halo. Implications on unknown radioactivity of giant and dwarf haloes in Scandinavian rocks (Gentry R. V., Christie W. H., Smith D. H., Boyle J. W., Cristy S. S. and McLaughlin J. F.) **274,** 457

Halobacterium. *Halobacterium* strain 5 contains a plasmid which is correlated with the presence of gas vacuoles (Simon R. D.) **273,** 314

Halobacterium halobium. A mechanism for the light-driven proton pump of *Halobacterium halobium* (Schulten K. and Tavan P.) **272,** 85
More evidence that light isomerises the chromophore of *Halobacterium halobium* purple membrane protein (Hurley J. B., Becher B. and Ebrey T. G.) **272,** 87

Halokinesis. Halokinesis and thermal convection (Talbot C. J.) **273,** 739

Haloperido. Haloperido-induced presynaptic dopamine supersensitivity is blocked by chronic lithium (Gallager, D. W., Pert A.

and Bunney Jr W. E.) **273,** 309
Halophile. Halophilic ribosomes. *news and views,* (Brimacombe R.) **275,** 587
Hamburger. Out of the frying pan. *news,* (Jukes T. H.) **274,** 307
Haploid cell. Haploid cell cultures of *Drosophila melanogaster* (Debec A.) **274,** 255
Haptoglobin. Relationship between haptoglobin and *Streptococcus pyogenes* T4 antigens (Köhler W. and Prokop O.) **271,** 373
Headline. Misleading headlines, *correspondence,* (Percival J. W.) **272,** 396
Health. Lead absorption higher than expected **276,** 553
Health and safety. . . . but let safeguards slip on Brazil deal, *news,* (Schuuring C.) **274,** 735
Birmingham University to be prosecuted **276,** 553
Dioxin source is 'safe', *news,* (Hay A.) **274,** 526
DNA: let the public choose, *news,* **275,** 468
Friends of DNA fight back, *news,* **272,** 664
Genetic engineering guidelines: Europe hopeful about collaboration, *news,* **273,** 331
Genetic manipulation: new guidelines for UK **276,** 104
Germs from Mars? *news and views,* (Zuckerman A. J.) **276,** 326
Hazards of non-nuclear energy, *news,* **272,** 487
HSE report offers little advice to UK universities, *news,* **274,** 108
Methyl mercury and safety, *correspondence,* (Cummins J. E. and Nesbitt B. E.) **273,** 96
Microwaves may be damaging to health, says US report, *news,* **273,** 7
More funds for reactor safety research: *news,* **276,** 9
NIH confirms violation of recombinant DNA research guidelines, *news,* **273,** 5
OSHA defends leap in carcinogen regulation, *news,* **273,** 260
Pochin calls for improvements in safety at Aldermaston **276,** 434
Radiation: how safe is "safe"? *news,* **272,** 197
Recombinant DNA hazards may be reassessed, *news,* **274,** 203
Recombinant DNA risk-assessment studies to begin at Fort Detrick, *news,* **272,** 488
UK extends the law to genetic engineering, *news,* **273,** 482
University safety report hushed up? *news,* **272,** 6
US carcinogen control threatened by costs, *news,* **276,** 204
US firms accused of exporting health hazards, *news,* **273,** 261
US producers fear ban on 2,4,5-trichlorophenol, *news,* **275,** 471
US safety inspectors barred from making spot checks, *news,* **273,** 331
WHO looks for benefits from genetic engineering, *news,* **272,** 663
X-ray health and safety, *news,* (Blow D.) **272,** 196
Health and safety. Health and safety in research laboratories, *news,* (Grover F. and Wallace P.) **272,** 391
Health and safety research gets underway, *news,* (Hay A.) **276,** 435
Health and safety executive. HSE's scientific mediator, *news,* (Hay A.) **276,** 437
Health and safety Carcinogen. US scientists in new row over cancer at work, *news,* (Douglas J.) **275,** 264
Health: Respiratory. Do present levels of air pollution outdoors affect respiratory health? (Bouhuys A., Beck G. J. and Schoenberg J. B.) **276,** 466
Health service. Radio back-up in rural health service (Imam Z.) **275,** 264
Hearing. Dynamics of the amphibian middle ear (Chung S-H., Pettigrew A. and Anson M.) **272,** 142
Neurophysiological basis of directional hearing in amphibia (Pettigrew A., Chung S-H. and Anson M.) **272,** 138
Heart. Behaviour of myosin projections during the staircase phenomenon of heart muscle (Matsubara I., Yagi N. and Endoh M.) **273,** 67
Heart cell. Effect of L-triiodothyronine on (−)^{3}H-dihydroalprenolol binding and cyclic AMP response to (−)adrenaline in cultured heart cells (Tsai J. S. and Chen A.) **275,** 138
Heart disease. Dietary lipids and heart disease, *correspondence,* (Katan M. B.) **271,** 606
Does dietary fat influence plasma lipoprotein structure? *news and views,* (Soutar A.) **273,** 11
Fluoridation and mortality due to heart disease (Taves D. R.) **272,** 361
Masai and heart disease, *correspondence,* (Robinson D.) **274,** 528
The lipid hypothesis, *correspondence,* (Turner R. W. D.) **273,** 422
Heat resistance. Modification of heat resistance in *Drosophila* by selection (Morrison W. W. and Milkman R.) **273,** 49
Heat tolerance. Ethanol-induced tolerance to heat and to adriamycin (Li G. C. and Hahn G. M.) **274,** 699
Heavy ion scattering. Negative deflection angles in heavy ion scattering, *news and views,* (Hodgson P. E.) **271,** 408
Heavy-ion beam. Heavy-ion beam inertial-confinement fusion, *review article,* (Arnold R. C.) **276,** 19
Heavy-ion collision. Multipion production in relativistic heavy-ion collisions, *news and views,* (Irvine J. M.) **276,** 560
Heavy-ion reaction. Two-neutron transfer heavy-ion reactions, *news and views,* (Buttle P. J. A.) **276,** 440
Hebridean Continental margin. Seismic evidence for sedimentary troughs of Mesozoic age on the Hebridean continental margin (Jones E. J. W.) **272,** 789
Hebrides. Seismic evidence for Mesozoic sedimentary troughs on the Hebridean continental margin, *matters arising,* (Smythe D. K., Kenolty N. and Russell M. J.) **276,** 420
Seismic evidence for Mesozoic sedimentary troughs on the Hebridean continental margin—Reply, *matters arising,* (Jones E. J. W.) **276,** 420
Hecatesia. Resonant wing systems in the Australian whistling moth *Hecatesia* (Agarasidae, Lepidoptera) (Bailey W. J.) **272,** 444
Heimaey. What happened at Heimaey? *correspondence,* (Sigurdsson H. and Sparks S.) **271,** 108
HeLa cell. Epidermal growth factor, like phorbol esters, plasminogen activator in HeLa cells (Lee L.-S. and Weinstein I. B.) **274,** 696
Functional stabilisation of HeLa cell histone messenger RNAs injected into *Xenopus* oocytes by 3'-OH polyadenylation (Huez G., Marbaix G., Gallwitz D., Weinberg E., Devos R., Hubert E. and Cleuter Y.) **271,** 572
Helium. Excess ^{3}He and ^{4}He in Galapagos submarine hydrothermal waters (Jenkins W. J., Edmond J. M. and Corliss J. B.) **272,** 156
λ-transition between normal and superfluid ^{4}He in the high-speed rotating frame (Scurlock R. G. and Utton D. B.) **272,** 148
Helium-3. Will detente kill millikelvin research? (McClintock P. V. E.) **276,** 117
Helium. Distribution of helium in metal tritides (Bowman R. C., Jr) **271,** 531
Helium gas bubble lattices in face-centred-cubic metal (Johnson P.B. and Mazey D. J.) **276,** 595
Neutrino stability and cosmological helium production (Tayler R. J.) **274,** 232
New threat to helium reserves, *news,* **271,** 399
Helium: Liquid. Incipient superfluidity in normal liquid ^{3}He, *news and views,* (McClintock P. V. E.) **275,** 585
Helix pomatia. Asymmetrical displacement currents, *matters arising,* (Adams D. J. and Gage P. W.) **271,** 586
Asymmetrical displacement currents — Reply, *matters arising,* (Kostyuk P. G.) **271,** 587
Hellenic Trench. High sedimentation rates and variable dispersal patterns in the western Hellenic Trench (Stanley D. J., Knight R. J., Stuckenrath R. and Catani G.) **273,** 110
Helsinki agreement. Scientific cooperation under attack, *news,* **273,** 331
Hepatitis. A new human hepatitis virus, *news and views,* (Zuckerman A. J.) **271,** 113
Her X-1. High energy X-ray spectrum of Her X-1 (Dennis B. R., Maurer G. S., Cutler E. P., Crannell C. J., Dolan J. F., Frost K. J. and Orwig L. E.) **275,** 195
X-ray lines and magnetic field of Her X-1 (Brecher K. and Ulmer M. P.) **271,** 135
Heraclitus. Heraclitus Revisited, *correspondence,* (Jukes T. H.) **276,** 664
Herbal. An Illustrated History of the Herbals (Anderson F. J.) *book review by* Angel R. **272,** 653
Hercules X-1. Consequences of narrow cyclotron emission from Hercules X-1 (Weaver R. P.) **274,** 571
Reflection of X rays by neutron star surfaces (Lenzen R. and Trumper J.) **271,** 216
X-ray lines and magnetic field of Her X-1 (Brecher K. and Ulmer M. P.) **271,** 135
Hercynian Front. Is the Hercynian Front in Ireland a local feature? (Gardiner P. R. R.) **271,** 538
Heritability. Heritability of external morphology in Darwin's finches (Boag P. T. and Grant P. R.) **274,** 793
Heterozygosity. Relationship between heterozygositytor enzyme loci and variation of morphological characters in natural populations (Mitton J. B.) **273,** 661
Morphological variance and enzyme heterozygosity in the monarch butterfly (Eanes W. F.) **276,** 263
High Altitude. Biology of High Altitude Peoples (Baker P. T. *editor*) *book review by* Ainsworth Harrison G. **274,** 97
High energy physics. Another surprise from Gargamelle, *news and views,* (Miller D. J.) **273,** 99
Can high energy physics be too easy? *leading article,* **273,** 479
Fermilab director resigns over funding, *news,* **271,** 601
More about the beam dump, *news and views,* (Miller D. J.) **272,** 668
High energy physics Electromagnetic interaction. New source of parity violation, *news and views,* (Close F. E.) **274,** 11
High energy physics. PETRA puts European physics in the lead, *news,* **274,** 202
Too many electron neutrinos? *news and views,* (Miller D. J.) **272,** 205
US and Japan to cooperate in fusion and high energy physics, *news,* **276,** 431
High energy radiation. COS B observation of high-energy γ radiation from 3C273 (Swanenburg B. N., Bennett K., Bignami G. F., Caraveo P., Hermsen W., Kanbach, G., Masnou J. L., Mayer-Hasselwander H. A., Paul J. A., Sacco B., Scarsi L. and Wills R. D.) **275,** 298
High-Energy Physics. Deeper Pathways in High-Energy Physics (Perlmutter A. and *editor*) *book review by* Llewellyn Smith C. H. **272,** 192
Himalayas. Mountain Monarchs: Wild Sheep and Goats of the Himalaya (Schaller G. B.) *book review by* Lent P. C. **276,** 306
Hippocamus. Intraventricular kainic acid preferentially destroys hippocampal pyramidal cells (Nadler J. V., Perry B. W. and Cotman C. W.) **271,** 676
Histamine. Opiate-like and abstinence-like effects of intracerebral histamine administration in rats (Glick S. D. and Crane L. A.) **273,** 547
Release of histamine from rat mast cells by acetylcholine (Fantozzi R., Masini E., Blandina P., Mannaioni P. F. and Bani-Sacchi T.) **273,** 473
Histamine liberator. Release of vasoactive intestinal polypeptide in mast cells by histamine liberators (Cutz E., Chan W., Track N. S., Goth A. and Said S. I.) **275,** 661
Histamine receptor. Brain histamine receptors as Targets for antidepressant drugs (Kanof P. D. and Greengard P.) **272,** 329
Impromidine (SK & F 92676) is a very potent and specific agonist for histamine H_2 receptors (Durant G. J., Duncan W. A. M., Ganellin C. R., Parsons M. E., Blakemore R. C. and Rasmussen A. C.) **276,** 403
Histocompatability antigen. H-2 Antigens on a murine lymphoma are associated with additional proteins (Callahan G. N. and Allison J. P.) **271,** 165
Histocompatibility antigen. An association between actin and the major histocompatibility antigen -N2 (Koch G. L. E. and Smith M. J.) **273,** 274
Histocompatibility. Association between an *HLA* haplotype and low responsiveness to tetanus toxoid in man (Sasazuki T., Kohno Y., Iwamoto I., Tanimura M. and Naito S.) **272,** 359
Dissecting H-2 restriction, *news and views,* (Langman R.) **274,** 12
Hepatic glucocorticoid receptors and the *H-2* locus (Butley M. S., Erickson R. P. and Pratt W. B.) **275,** 136
Inverse regulation of cell-mediated and humoral immune responses to oxazolone by *H-2* linked genes (Fachet J. and Andó I.) **273,** 239
Histocompatibility antigen. No evidence for foreign H-2 specificities on the EL4 mouse lymphoma (Flaherty L. and Rinchik E.) **273,** 52
Histone. Binding of additional histones to chromatin core particles (Voordouw G. and Eisenberg H.) **273,** 446
Structural options (Staynov D. Z.) **274,** 15
High frequency recombination in centromeric and histone regions of *Drosophila* genomes (Grell R. F.) **272,** 78
Histone acetylation. Possible use of histone acetylation in mixed leukocyte cultures to assess histocompatibility (Mukherjee A. B. and Fabricant J. D.) **273,** 467
Histone binding. Nucleosomes are assembled by an acidic protein which binds histones and transfers them to DNA (Laskey R. A., Honda B. M., Mills A. D. and Finch J. T.) **275,** 416
Histone synthesis. Histone genes displayed, *news and views,* (Ford P. J.) **276,** 214
Uncoupled synthesis of histones and DNA during Friend cell differentiation (Zlatanova J. and Swetly P.) **276,** 276
History of science. Science in Culture: The Early Victorian Period (Cannon S. F.) *book review by* Knight D. **276** 131
The Visible College: A Collective Biography of British Scientists and Socialists of the 1930s (Werskey G.) *book review by* Rose S. **276,** 136
HLA-D locus. HLA-D locus and susceptibility to disease, *news and views,* (Oliver R. T. D.) **274,** 14
Holocene. Holocene eustatic sea level change (Kidson C. and Heyworth A.) **273,** 748
Vertical zonations of marsh foraminifera as accurate indicators of former sea levels (Scott D. S. and Medioli F. S.) **272,** 528
Fossil Holocene seaweed and attached calcareous polychaetes in an anoxic basin, Gulf of Mexico (Kennett J. P. and Penrose N. L.) **276,** 172
Holography. Understanding Holography (Weyon M.) *book review by* Thetford A. **276,** 652
Homeothermy. Evolution of homeothermy in mammals (Crompton A. W., Taylor C. R. and Jagger J. A.) **272,** 333
Homing pigeon. Ultraviolet light detection by the homing pigeon (Kreithen M. L. and Eisner T.) **272,** 347
Hominid. Homo erectus, *correspondence,* **276,** 664
Hominid ancestor. Pygmy chimpanzee as a possible prototype for the common ancestor of humans, chimpanzees and gorillas (Zihlman A. L., Cronin J. E., Cramer D. L. and Sarich V. M.) **275,** 744
Hominid site. Absolute age of the base of the hominid-bearing beds in Eastern Java (Ninkovich D. and Burckle L. H.) **275,** 306
Re-appraisal of lithostratigraphy of Sterkfontein hominid site (Partridge T. C.) **275,** 282
Hominid skull. Newly discovered fossil hominid skull from the Afar depression Ethiopia (Conroy G. C., Jolly C. J., Cramer D. and Kalb J. E.) **276,** 67
Hominoid. Humans and apes are genetically very similar (Bruce E. J. and Ayala F. J.) **276,** 264
Humeral morphology of the earl st apes (Fleagle J. G. and Simons E. L.) **276,** 705
Hominoid habitat. Hominoid habitat shifts in the Miocene (Kennedy G. E.) **271,** 11
Honey. Bronze Age honey, *news and views,* (Moore P. D.) **276,** 443
Horizontal cell. Effect of polarisation of horizontal cells on the on-centre bipolar cell of carp retina (Toyoda J.-I. and Tonosaki K.) **276,** 399
Horizontal cells influence membrane potential of biopolar cells in the retina of the turtle (Marchiafava P. L.) **275,** 141
Hormone. Ecdysteroids:, *correspondence,* (Goodwin T. W., Horn D. H. S., Karlson P., Koolman J., Nakanishi K., Robbins W. E., Siddall J. B. and Takemoto T.) **272,** 122
Hormones and cell culture, *news and views,* (Rudland P. S.) **276,** 113
Pleiotypic effects of hormones, *news and views,* (Shields R.) **276,** 440
Prostacyclin is circulating hormone (Moncada S., Korbut R., Bunting S. and Vane J. R.) **273,** 767
Transmission of hormonal stimulation by cell-to-cell communication (Lawrence T. S., Beers W. H. and Gilula N. B.) **272,** 501
Hormone Action in the Whole Life of Plants (Thimann K. V.) *book review by* Smith H. **272,** 475
Receptors and Hormone Action (O'Malley B. W. and *editor*) *book review by* Tata J. R. **273,** 412
Hormone activity. Charge separation as a component of the structural requirements for hormone activity (Farrimond J. A., Elliott M. C. and Clack D. W.) **274,** 401
Hormone: Anti-juvenile. Precocene II causes atrophy of corpora allata in *Locusta migratoria,* (Pener M. P., Orshan L. and de Wilde J.) **272,** 350
Hormone production. Ectopic hormone production by tumours, *news and views,* (Shields R.) **272,** 494
Hormone receptor. Mode of coupling between hormone receptors and adenylate cyclase elucidated by modulation of membrane fluidity (Rimon G., Hanski E., Braun S. and Levitzki A.) **276,** 394
Host detection. Attraction of the tick *Ixodes neitzi* to twigs marked by the klipspringer antelope (Rechav Y., Norval R. A. I., Tannock J. and Colborne J.) **275,** 310
Host resistance. Stage-specific antibody-dependent eosinophil-mediated destruction of *Trichinella spiralis* (Kazura J. W. and Grove D. I.) **274,** 588
Hoytink G. J. *obituary* (Hoytink G. J.) **274,** 100
Hubble constant. A larger and more turbulent Universe (Gudehus D. H.) **275,** 514
Accelerating Universe revisited (Tinsley B. M.) **273,** 208
Hubble's constant. Should Hubble's constant be doubled? (Davidson W.) **274,** 449
Human complement. Chido and Rodgers blood groups are distinct antigenic components of human complement C4 (O'Neill G. J., Yang S. Y., Tegoli J., Berger R. and Dupont B.) **273,** 668
Human rights. Argentina—where thought is a crime, *news,* **275,** 470
Boycott of Soviet contacts is for individuals, says NAS, *news,* **275,** 3
Human rights world-wide, *correspondence,* (Chaleff R. S. and Lowendorf H. S.) **274,** 416
It's all in the mind, *news,* **274,** 107
Brothers in human rights test case, *news,* **271,** 399
Humerus. Humeral morphology of the earliest apes (Fleagle J. G. and Simons E. L.) **276,** 705
Humic material. Nuclear magnetic resonance spectroscopy of humic materials (Wilson M. A., Jones A. J. and Williamson B.) **276,** 487
Hungary. Hungary starts to tackle pollution, *news,* **274,** 737
Hungary happy with its science, *news,* **272,** 748
Huntingdon's chorea. Denervation supersensitivity in the striatonigral GABA pathway (Waddington J. L. and Cross A. J.) **276,** 618
Huntington's chorea. Glutamate neurotoxicity and Huntington's

chorea (Olney J. W. and Gubareff T. de) **271,** 557
Hybrid cell lines. Hybrid cell lines secreting monoclonal antibody specific for major histocompatibility antigens of the mouse (Lemke H., Hämmerling G. J., Höhmann C. and Rajewsky K.) **271,** 249
Hydra. The polyp has no I's. *news and views,* (Slack J.) **274,** 313
Hydralazine. Increases in cyclic GMP levels may not mediate relaxant effects of sodium nitroprusside, verapamil and hydralazine in rat vas deferens (Diamond J. and Janis R. A.) **271,** 472
Hydration. Hydration of obsidian (Laursen T. and Lanford W. A.) **276,** 153
Hydrocarbon: Halogenated. Halogenated hydrocarbon effects, *news and views,* (Hay A.) **274,** 533
Hydrocarbons. Multiple regions of metabolic activation of carcinogenic hydrocarbons (Harvey R. G. and Dunne F. B.) **273,** 566
Hydrogen bond. Hydrogen bond dynamics in solution (Bournay J. and Robertson G. N.) **275,** 46
Hydrogen concentration. Influence of cyclic AMP on intracellular *p*H regulation and chloride fluxes in barnacle muscle fibres (Boron W. F., Russell J. M., Brodwick M. S., Keifer D. W. and Roos A.) **276,** 511
Hydrogen cycle. Solar energy storage and conversion by hydrogen cycle, *news and views,* (Cahn R. W.) **276,** 665
Hydrogen sulphide. Volatilisation of methylmercuric chloride by hydrogen sulphide, *matters arising,* (Deacon G. B.) **275,** 344
Hydrothermal waters. Excess ^{3}He and ^{4}He in Galapagos submarine hydrothermal waters (Jenkins W. J., Edmond J. M. and Corliss J. B.) **272,** 156
Hyperglucagonaemia. Regulation of the glucagon receptor by physiological hyperglucagonaemia (Soman V. and Felig P.) **272,** 829
Hypocalcaemia. Inherited disorders in the regulation of serum calcium in rats raised from parathyroidectomised mothers (Fujii T.) **273,** 236
Hypoglossal nucleus. Immunochemical demonstration of reversible reduction in choline acetyltransferase concentration in rat hypoglossal nucleus after hypoglossal nerve transection (Wooten G. F., Park D. H., Joh T. H. and Reis D. J.) **275,** 324
Hypotension. Naloxone reversal of endotoxin hypotension suggests role of endorphins in shock (Holaday J. W. and Faden A. I.) **275,** 450
Hypothalamus. Spontaneous firing of hypothalamic neurones over a narrow temperature interval (Mason P., Hasan H. and Valis M.) **273,** 242
Ventromedial hypothalamus modulates fat mobilisation during fasting (Bray G. A. and Nishizawa Y.) **274,** 900
Ialic acid. Distribution of sialic acid on the red blood cell membrane in β thalassaemia (Kahane I., Polliack A., Rachmilewitz E. A., Bayer E. A. and Skutelsky E.) **271,** 674
Ice. Effect of pressure on the Raman spectrum of ice (Sivakumar T. C., Chew H. A. M. and Johari G. P.) **275,** 524
Excess electrons in ice (Verberne J. B., Loman H., Warman J. M., de Haas M. P., Hummel A. and Prinsen L.) **272,** 343
Low energy cosmic ray erosion of ice grains in interplanetary and interstellar media (Lanzerotti L. J., Brown W. L., Poate J. M. and Augustyniak W. M.) **272,** 431
Possible identification of the 45-μm ice signature in Orion (Papoular R., Lena P., Marten A., Rouan D. and Wijnbergen J.) **276,** 593
Ice age. An investigation of the astronomical theory of the ice ages, using a simple climatic ice sheet model (Pollard D.) **272,** 233
Ice core. Past atmospheric composition and climate, gas parameters measured on ice cores (Berner W., Stauffer B. and Oeschger H.) **276,** 53
Ice particle. A possible mechanism of ice splinter production during riming (Choularton T. W., Latham J. and Mason B. J.) **274,** 791
Ice sheet. Creep rupture at depth in a cold ice sheet (Colbeck S. C., St Lawrence W. and Gow A. J.) **275,** 733
Ice dynamics, *news and views,* **275,** 366
Mercury in the Greenland Ice Sheet (Appelquist H., Jensen K. O., Sevel T. and Hammer C.) **273,** 657
Phosphatic nodule beds in Victoria and the late Miocene–Pliocene eustatic event (Carter A. N.) **276,** 258
'Unmixing' of the deep-sea record and the deglacial meltwater spike, *matters arising,* (Lockwood J. G.) **272,** 188
An investigation of the astronomical theory of the ice ages, using a simple climatic ice sheet model (Pollard D.) **272,** 233
Ice sheet topography by satellite altimetry (Brooks R. L., Campbell W. J., Ramseier R. O., Stanley H. R. and Zwally H. J.) **274,** 539
Possible causes of ice sheet thinning in the Mizuho Plateau (Mae S. and Naruse R.) **273,** 291
Ice shelf. Dissipation of tidal energy by Antarctic ice shelves (Doake C. S. M.) **275,** 304
Iceberg. Iceberg sounding by impulse radar (Rossiter J. R. and Gustajtis K. A.) **271,** 48
Melting of Antarctic icebergs (Donaldson P. B.) **275,** 305
On melting icebergs (Huppert H. E. and Turner J. S.) **271,** 46
Upwelling by icebergs, *matters arising,* (Robe R. Q.) **271,** 687
Iceberg calving. Iceberg calving from floating glaciers by a vibrating mechanism (Holdsworth G. and Glynn J.) **274,** 464
Iceberg: Melting. On melting icebergs, *matters arising,* (Neshyba S.) **275,** 567
Iceland. Cl and Br degassing by volcanism along the Reykjanes Ridge and Iceland (Unni C. K. and Schilling J-G.) **272,** 19
Ge/Si and Ga/Al variations along the Reykjanes Ridge and Iceland (Argollo R. M. de and Schilling J.-G.) **276,** 24
Iceland-Faeroe Ridge. Lower Tertiary laterite on the Iceland-Faeroe Ridge and the Thulean land bridge (Nilsen T. H.) **274,** 786
Icelandic crust. Lateral magma flow within rifted Icelandic crust (Sigurdsson H. and Sparks S. R. J.) **274,** 126
ICUS. Should scientists attend the ICUS? *news,* **276,** 206
Ignition. Ignition by plasma jet (Weinberg F. J., Hom K., Oppenheim A. K. and Teichman K.) **272,** 341
Ileum. Microprobe measurement of Na, K and Cl concentration profiles in epithelial cells and intercellular spaces of rabbit ileum (Gupta B. L., Hall T. A. and Naftalin R. J.) **272,** 70
Image Processing. Digital Image Processing (Gonzalez R. C. and) *book review by* Hawkes P. W. **272,** 740
Imagination. The Origins of Knowledge and Imagination (Bronowski J.) *book review by* Barlow H. **274,**
Immune complex. Circulating immune complexes in infants fed on cow's milk (Delire M., Cambiaso C. L. and Masson P. L.) **272,** 632
Immune dysfunction. Enzyme defects and immune dysfunction, *news and views,* (Rosen F. S.) **276,** 559
Immune response. Adjuvant-induced thymus-derived suppressor cells of cell-mediated tumour immunity (Glaser M.) **275,** 654
α$_1$-Antitrypsin is an effector of immunological stasis (Arora P. K., Miller H. C. and Aronson L. D.) **274,** 589
Autoimmune and polyclonal B cell response during murine malaria (Rosenberg Y. J.) **274,** 170
Cell changes in alloantigen activated T lymphocytes (Dunlap B., Bach F. H. and Bach M. L.) **271,** 253
Circadian variation in immune response to oxazolone, *matters arising,* (Pownall R., Cove-Smith J. R., Kabler T. A., Kowanko I. and Knapp M. S.) **275,** 346
Circadian variation in immune response to oxazolone—Reply, *matters arising,* (Fachet J. and Andó I.) **275,** 346
Cytotoxic T cells learn specificity for self H-2 during differentiation in the thymus (Zinkernagel R. M., Callahan G. N., Klein J. and Dennert G.) **271,** 251
Enhanced NK cell activity in mice injected with interferon and interferon inducers (Gidlund M., Örn A., Wigzell H., Senik A. and Gresser I.) **273,** 759
H-2 restriction, the thymus and the immune response, *news and views,* (Howard J. C.) **272,** 11
HLA-D locus and susceptibility to disease, *news and views,* (Oliver R. T. D.) **274,** 14
HLA–DR specific human suppressor lymphocytes generated by repeated *in vitro* sensitisation against allogeneic cells (Sasportes M., Fradelizi D. and Dausset J.) **276,** 502
Immune response (*Ir*) genes expressed at macrophage-B lymphocyte interactions (Howie S. and Feldmann M.) **273,** 664
Immunity to intestinal parasites, *review article,* (Wakelin D.) **273,** 617
Immunoprevention of naturally occurring endogenous murine type-C RNA viruses (Kende M., Stephenson J. R., Kelloff G. J., Al-Ghazzouli I. K. and Dinowitz M.) **273,** 383
Immunosuppression by *Babesia bovis*against its tick vector, *Boophilus microplus,* (Callow L. L. and Stewart N. P.) **272,** 818
In vivo immunisation and reaction against TNP-modified splenocytes (Bischoff P. and Oth D.) **274,** 806
Inverse regulation of cell-mediated and humoral immune responses to oxazolone by *H-2* linked genes (Fachet J. and Andó I.) **273,** 239
Is serum thymic factor of thymic origin? (Kelemen N., Lasmoles F. and Milhaud G.) **272,** 65
Production of HLA antibody in mice immunised with syngeneic mouse-human hybrid cells containing human chromosome 6 (Aden D. P., Mausner R. and Knowles B. B.) **271,** 375
Recognition and genetic control of helper determinants for cell surface antigen Thy-1 (Lake P. and Douglas T. C.) **275,** 220
Regulating the immune system, *news and views,* (Simpson E.) **273,** 99
Specific suppression of antigen-reactive cells in neonatal transplantation tolerance (Holáň V., Chutná J. and Hašek M.) **274,** 895
Surface antibodies of human myelogenous leukaemia leukocytes reactive with specific type-C viral reverse transcriptases (Jacquemin P. C., Saxinger C. and Gallo R. C.) **276,** 230
T cell origin of human macromolecular insoluble cold globulin (Hauptman S. P. and Kansu E.) **276,** 393
T cell response: nature or nurture, *news and views* (Katzinger P.) **274,** 840
Three forms of delayed skin-test response evoked by mycobacteria (Rook G. A. W.) **271,** 64
T–T cell collaboration in rejection of a syngeneic SV40-induced sarcoma in mice (Glaser M. and Law L. W.) **273,** 385
Two distinct mechanisms of immune suppression by antibody (Hoffman M. K. and Kappler J. W.) **272,** 63
Immune response enhancing factor. Specific immune response enhancing factor in serum of immunised mice (Diamanstein T. and Naher H.) **271,** 257
Immune tolerance. Cyclophosphamide inhibited B cell receptor regeneration as a basis for drug-induced tolerance (Shand F. L. and Howard J. G.) **271,** 255
Immunisation. Specific and nonspecific immunisation against parasitic infections, *review article,* (Cox F. E. G.) **273,** 623
Immunochemistry. Immunochemistry Proteins (Atassi M. Z. *editor*) *book review by* Stanworth D. R. **271,** 285
Immunocompetence. Are T-cell lymphomas immunocompetent? (Roder J. C., Tyler L., Singhal S. K. and Ball J. K.) **273,** 540
Immunogen. Transplantation antigens *per se* are poor immunogens within a species (Batchelor J. R., Welsh K. I. and Burgos H.) **273,** 54
Immunoglobulin. Accessory cell requirement for anti-IgM-induced proliferation of B lymphocytes (Mongini P., Friedman S. and Wortis H.) **276,** 709
Antigen antibody complexes elicit anti-idiotypic antibodies to self-idiotopes (Klaus G. G. B.) **272,** 265
Antisera to frog immunoglobulins cross-react with a periodate-sensitive cell surface determinant (Mattes M. J. and Steiner L. A.) **273,** 761
Cross-linked surface Ig attaches to actin (Flanagan J. and Koch G. L. E.) **273,** 278
Evidence for a C-terminal tyrosine residue in human and mouse B-lymphocyte membrane β chains (McIlhinney R. A. J., Richardson N. E. and Feinstein A.) **272,** 555
High proportion of Ig-producing cells making autoantibody in normal mice (Steele E. J. and Cunningham A. J.) **274,** 483
Immunoglobulin β and γ heavy chain classes are not determined by class-specific RNA-splicing enzymes (Shulman M. J. and Köhler G.) **274,** 917
Induction of IgG production in human B lymphoblastoid cell lines with normal human T cells (Kishimoto T., Hirano T., Kuritani T., Yamamura Y., Ralph P. and Good R. A.) **271,** 756
Loss of Fc receptors for IgG from human T lymphocytes exposed to IgG immune complexes (Moretta L., Mingari M. C. and Romanzi C. A.) **272,** 618
Most IgM-producing cells in the mouse secrete auto-antibodies (rheumatoid factor) (Dresser D. W.) **274,** 480
Receptor interactions on the membrane of resting and activated B cell (Forni L. and Coutinho A.) **273,** 304
Recombination of C_H genes encoding the M1 (IgM) and G1 (IgG) chicken allotypes (Ivanyi J.) **272,** 166
The murine kappa light chain shift (Haughton G., Leanier L. L. and Babcock G. F.) **275,** 154
Trypsin-binding IgG in cystic fibrosis (Romeo G., Parsons M., Bossen A., Blessing-Moore J. and Cavalli-Sforza L.) **274,** 909
V and *C* parts of immunoglobulin κ-chain genes are separate in myeloma (Matthyssens G. and Tonegawa S.) **273,** 763
Evidence for splicing of interrupted immunoglobulin variable and constant region sequences in nuclear RNA (Rabbitts T. H.) **275,** 291
Idiotype sharing by murine strains differing in immunoglobulin allotype (Gearhart P. J. and Cebra J. J.) **272,** 264
Immunoglobulin light-chain structural gene sequences cloned in a bacterial plasmid (Seidman J. G., Edgell M. H. and Leder P.) **271,** 582
Novel form of T-cell stimulation of immunoglobulin secretion (Kern M. and Gollapudi S. V. S.) **276,** 178
Immunoglobulin diversity. Multiplicity of germline genes specifying a group of related mouse κ chains with implications for the generation of immunoglobulin diversity (Valbuena O., Marcu K. B., Weigert M. and Perry P.) **276,** 780
Rearrangement of genetic information may produce immunoglobulin diversity (Weigert M., Gatmaitan L., Loh E., Schilling J. and Hood L.) **276,** 785
The arrangement and rearrangement of antibody genes (Seidman J. G. and Leder P.) **276,** 790
Immunoglobulin G. Partial γ fragment is a 'Natural' bovine IgG1 fragment without detectable class-specific γ determinants (Bokhout B. A.) **271,** 374
Surface antibodies of human myelogenous leukaemia leukocytes reactive with specific type-C viral reverse transcriptases (Jacquemin P. C., Saxinger C. and Gallo R. C.) **276,** 230
Immunoglobulin: surface. Preferential distribution of surface immunoglobulins on microvilli (de Petris S.) **272,** 66
Immunological memory. Immunological memory is regulated in the enhanced rat renal allograft recipient (Weiss A., Fitch F. W., McKearn T. J. and Stuart F. P.) **273,** 662
Suppressor T-cell-memory (Loblay R. H., Pritchard-Briscoe H. and Basten A.) **272,** 620
Immunology. Basic immunology—recent textbooks Heath T. D. **272,** 94
Handbuch der Allgemeinen Pathologie (Masshoff J. W. *editor*) *book review by* Brent L. **274,** 405
Immunity in Evolution (Marchalonis J. J.) *book review by* Cohen N. **271,** 689
Immunochemistry: An Advanced Textbook (Glynn L. E. and *editor*) *book review by* Secher D. **274,** 829
Mathematical models in immunology (Bell G. I., *editor*) *book review by* Mitchison N. A. **275,** 675
A Dictionary of Immunology (Herbert W. J. and *editor*) *book review by* Playfair J. H. L. **273,** 254
Immunology: Parasitic. Immunological properties of the surface of parasitic nematodes (Mackenzie C. D., Preston P. M. and Ogilvie B. M.) **276,** 826
Immunoreactivity. Loss of immunoreactivity in long-term bone marrow culture (Dexter T. M. and Spooncer E.) **275,** 135
Imprinting. Sexual imprinting and optimal outbreeding (Bateson P.) **273,** 659
Impromidine. Impromidine (SK & F 92676) is a very potent and specific agonist for histamine H_2 receptors (Durant G. J., Duncan W. A. M., Ganellin C. R., Parsons M. E., Blakemore R. C. and Rasmussen A. C.) **276,** 403
Inbreeding. Inbreeding and dispersal in the great tit (Greenwood P. J., Harvey P. H. and Perrins C. M.) **271,** 52
Indentation hardness. Indentation hardness and semiconductor-metal transition of germanium and silicon (Gerk A. P. and Tabor D.) **271,** 732
Phase transitions and indentation hardness of Ge and diamond, *matters arising,* (Tabor D.) **273,** 406
India. Atomic scientist to advise India's defence minister, *news,* **272,** 489
Beware of imported technology, says Indian group, *news,* (Calvert P.) **274,** 527
Indian shuffle: *news,* **276,** 205
Indian summer monsoon cyclogenesis and its variability (Keshavamurty R. N., Satyan V. and Goswami B. N.) **274,** 576
Morale at BARC, *correspondence,* (Sankaran M. P.) **274,** 208
Radio back-up in rural health service (Imam Z.) **275,** 264
Taj Mahal out of danger? *news,* **275,** 4
India. Can India afford to save the Taj Mahal from corrosion, *correspondence,* (Agarwal M. K.) **276,** 10
India gets ready to tune in to its satellite, *news,* **276,** 203
India on stand-by for a plague of locusts, *news,* (Salwi D. M.) **275,** 6
India plans to invest in tethered balloon technology, *news,* (Salwi D. M.) **275,** 5
India prepares to launch Earth resources satellite, *news,* (Salwi D. M.) **274,** 526
Indian Ocean. How Ninetyeast Ridge formed, *news and views,* (Smith P. J.) **272,** 752
Indomethacin. Indomethacin in submicromolar concentrations inhibits cyclic AMP-dependent protein kinase (Kantor H. S. and Hampton M.) **276,** 841
Industry. US government to review industrial innovation, *news,* **273,** 330
Infant mortality. Assessment of risk of sudden death in infants, *matters arising,* (Bland J. M.) **273,** 74
Assessment of risk of sudden death in infants—Reply, *matters arising,* (Carpenter R. G. and Emery J. L.) **273,** 74
Infanticide. Infanticide and other reproductive strategies in the collared lemming, *Dicrostonyx groenlandicus* (Mallory F. F. and Brooks R. J.) **273,** 144
Influenza. Solar activity and influenza, *correspondence,* (Ing R.) **276,** 556
Sunspots and flu: a correlation, *correspondence,* (Hope-Simpson R. E.) **275,** 86
Influenza in America, 1918-1976: History, Science and Politics (Osborn J. *editor*) *book review by* Stuart-Harris C. **272,** 564
Information transmission. Accuracy in the transmission of biological information, *news and views,* **276,** 442
Informational suppression. Informational suppression in higher organisms, *news and views,* (Piper P.) **276,** 118
Infrared observation. Infrared observations of the most luminous quasar (Wright E. L. and Kleinmann D. E.) **275,** 298
Infrared source. Infrared sources in the vicinity of 2S1728-337 (Glass I. S.) **273,** 35
Infrared spectrum. Circumstellar methane in the infrared spectrum of IRC + 10 216 (Hall D. N. B. and Ridgway S. T.) **273,** 282
Infra-red telescope. Infra-red telescope will not be ready for Jupiter mission, *news,* **275,** 685

Inheritance. Inherited disorders in the regulation of serum calcium in rats raised from parathyroidectomised mothers (Fujii T.) **273,** 236

Inheritance. Complex patterns of inheritance in human disease, *news and views,* (Ford E. H. R.) **272,** 755

Initiation factor. Initiation activity of EMC virus RNA, binding to initiation factor eIF-4B and shut-off of host cell protein synthesis (Baglioni C., Simili M. and Shafritz D. A.) **275,** 240

Initiator. The nature of an initiator constitutive mutation in *Aspergillus nidulans* (Scazzocchio C. and Arst H. N. Jr) **274,** 177

Innervation. Disorganised and 'excessive' reinnervation of frog cardiac ganglia (Ko C.-P. and Roper S.) **274,** 286

Inotropic effect. Is digitalis inotropy associated with enhanced slow inward calcium current? (Weingart R., Kass R. S. and Tsien R. W.) **273,** 389

INSAT. India gets ready to tune in to its satellite, *news,* **276,** 203
Third World seeks low frequency broadcasting, *news,* (Salwi D. M.) **276,** 203

Insect. Biochemical Insect (Quraishi M. S.) *book review by* Pickett J. A. **274,** 407

Insect ecology. Insect/host plant relationships, *news and views,* **274,** 118

Insecticide. Deaths of owls traced to insecticide-treated timber (Jones D. M., Bennett D. and Elgar K.E.) **272,** 52
Larvicidal activity of diflubenzuron in tsetse fly (Trewern M. A.) **272,** 719
Structural and biological link between pyrethroids and DDT in new insecticides (Holan G., O'Keefe D. F., Virgona C. and Walser R.) **272,** 734
UK investigates virus insecticides, *news,* (McClelland A. J. and Collins P.) **276,** 548

Insecticide. Insect acetylcholine receptors as a site of insecticide action (Gepner J. I., Hall L. M. and Sattelle D. B.) **276,** 188

Insertion Element. DNA Insertion Elements, Plasmids and Episomes (Bukhari A. J., *editor*) *book review by* Hayes W. **273,** 171

Insertion sequence Transposon. Illegitimate recombination legitimised, *news and views,* (Sherratt D.) **274,** 213

Institute of Nuclear Agriculture. Bangladesh sets up Institute of Nuclear Agriculture, *news,* (Kabir M.) **271,** 497

Insulation. Home insulation may increase radiation hazard, *news,* **276,** 431

Insulin. Bacterium makes insulin, *news,* **273,** 485
Insulin-dependent regulation of the insulin-sensitivity of adipocytes (Livingston J. N., Purvis B. J. and Lockwood D. H.) **273,** 394
Mapping of the residues responsible for the negative cooperativity of the receptor-binding region of insulin (De Meyts P., Van Obberghen E., Roth J., Wollmer A. and Brandenburg D.) **273,** 504
Relaxin and its structural relationship to insulin (Isaacs N., James R., Niall H., Bryant-Greenwood G., Dodson G., Evans A. and North A. C. T.) **271,** 278

Insulin receptor. Insulin receptors are widely distributed in the central nervous system of the rat (Havrankova J., Roth J. and Brownstein M.) **272,** 827
Specific insulin binding site on T and B lymphocytes as a marker of cell activation (Helderman J. H. and Strom T. B.) **274,** 62
Sulphonylureas increase the number of insulin receptors (Feinglos M. N. and Lebovitz H. E.) **276,** 184

Insulin source. US geneticists look to Europe for research facilities, *news,* (Douglas J.) **275,** 170

Intelligence. Athletic Eskimos, *correspondence,* (Goodhart C. B.) **272,** 490
Evolution of human intelligence (Sagan C.) *book review by* Mackintosh N. J. **272,** 768
Intelligence, *correspondence,* (Beardmore J. R.) **272,** 576
IQ and environmental variables, *correspondence,* (Havender W. R.) **272,** 666
Mellanby on nature and nuture, *news,* (Mellanby K.) **276,** 753
Nature and nurture, *correspondence,* (Bondi H.) **273,** 96
Race and intelligence (Ehrlich P. R. and) *book review by* Schull W. J. **272,** 765
Racism (Rose S.) **275,** 86
Racism refuted, *correspondence,* (Rose S.) **274,** 738
Racism refuted (Eysenck H. J.) **274,** 738
Racism refuted (Jensen A. J.) **274,** 738
Shining light on intelligence, *correspondence,* (Greenwood J. J. D.) **272,** 576
Sport throws little light on 'nature v nuture', *correspondence,* (Eysenck H. J.) **272,** 490
Training or talent? *correspondence,* (Reeve K. E.) **272,** 490
Was war the origin of intelligence? *correspondence,* (Fremlin J. H.) **274,** 308

Intercalation. Crown ether intercalations with phyllosilicate (Ruiz-Hitzky E. and Casal B.) **276,** 596

Interferon. Active component of HVJ (Sendai virus) for interferon induction in mice (Ito Y., Nishiyama Y., Shimokata K., Takeyama H. and Kunii A.) **274,** 801
Enhanced NK cell activity in mice injected with interferon and interferon inducers (Gidlund M., Orn A., Wigzell H., Senik A. and Gresser I.) **273,** 759
Interferon action may be mediated by activation of a nuclease by pppA2′p5′A2′p5′A (Baglioni C., Minks M. A. and Maroney P. A.) **273,** 684
Interferon affects both G_1 and $S+G_2$ in cells stimulated from quiescence to growth (Balkwill F. and Taylor-Papadimitriou J.) **274,** 798
Purification of mouse interferon by sequential affinity chromatography on poly(U)- and antibody-agarose columns (De Maeyer-Guignard J., Tovey M. G., Gresser I. and De Maeyer E.) **271,** 622
Inactivation of interferon mRNA in the shutoff of human interferon synthesis (Greene J. J., Dieffenbach W. C. and Ts'o P. O. P.) **271,** 81

Interferon. Interferon, dsRNA and the pleiotypic effector, *news and views,* (Hunt T.) **273,** 97

Interferon. Interferon inhibits the release of plasminogen activator from SV3T3 cells (Schroder E. W., Chou I.-N., Jaken S. and Black P. H.) **276,** 828
The actions of interferon are potentiated at elevated temperature (Heron I. and Berg K.) **274,** 508
Translation of interferon messenger RNA *in vivo* and in vitro, *news and views,* (Burke D. and Morser J.) **271,** 10

Intergalactic gas. Extent of hot intergalactic gas in the cluster Abell 2218 (Birkinshaw M., Gull S. F. and Northover K. J. E.) **275,** 40

Intermediate filament. 10 nm filaments, *news and views,* (Gilbert D.) **272,** 572
Intermediate filaments anchor the nuclei in nuclear monolayers of cultured human fibroblasts (Lehto V.-P., Virtanen I. and Kurki P.) **272,** 175

Intermolecular force. Intermolecular forces, *news and views,* (Richards G.) **272,** 669
Intermolecular Interactions (Pullman B. *editor*) *book review by* Richards G. **273,** 324

International Congress of Genetics. ICSU investigates refused visas, *news,* **275,** 577

International Ultraviolet Explorer. In-flight performance of the IUE (Boggess A., Bohlin R. C., Evans D. C., Freeman H. R., Gull T. R., Heap S. R., Klinglesmith D. A., Longanecker G. R., Sparks W., West D. K., Holm A. V., Perry P. M., Schiffer F. H. III, Turnrose B. E., Wu C. C., Lane A. L., Linsky J. L., Savage B. D., Benvenuti P., Cassatella A., Clavel J., Heck A., Macchetto F., Penston M. V., Selvelli P. L., Dunford E., Gondhalekar P., Oliver M. B., Sandford M. C. W., Stickland D., Boksenberg A., Coleman C. I., Snijders M. A. J. and Wilson R.) **275,** 377
International Ultraviolet Explorer to be launched this week, *news,* **271,** 299
IUE observations of cool stars: α Aurigae, HR 1099, λ Andromedae, and ϵ Eridani (Linsky J. L., Ayres T. R., Basri G. S., Morrison N. D., Boggess A., Schiffer F. H. III, Holm A., Cassatella A., Heck A., Macchetto F., Stickland D., Wilson R., Blanco C., Dupree A. K., Jordan C. and Wing R. F.) **275,** 389
IUE observations of hot stars: HZ43, BD + 75° 325, NGC6826, SS Cygni, η Carinae (Heap S. R., Boggess A., Holm A., Klinglesmith D. A., Sparks W., West D., Wu C. C., Boksenberg A., Willis A., Wilson R., Macchetto F., Selvelli P. L., Stickland D., Greenstein J. L., Hutchings J. B., Underhill A. B., Viotti R. and Whelan J. A. J.) **275,** 385
IUE observations of Large Magellanic Cloud members and detection of the 2,200 Å feature (Nandy K. and Morgan D. H.) **276,** 478
IUE observations of Solar System objects (Lane A. L., Hamrick E., Boggess A., Evans D. C., Gull T. R., Schiffer F. H. III, Turnrose B., Perry P., Holm A., Macchetto F., Gondhalekar P. M., Hunt G. E., Wilson R., Owen T. C., Moos H. W., Tomasko M. G., Gehrels T., Conway R. and Barth C. A.) **275,** 414
iue observations of the interstellar medium (Grewing M., Boksenberg A., Seaton M. J., Snijders M. A. J., Wilson R., Boggess A., Bohlin R. C., Perry P. M., Schiffer I. H. III, Gondhalekar P. M., Macchetto F., Savage B. D., Jenkins E. B., Johnson H. M., Perinotto M. and Whittet D. C. B.) **275,** 394
IUE observations of the eclipsing binary Epsilon Aurigae (Hack M. and Selvelli P. L.) **276,** 376
IUE observations of X-ray sources: HD153919 (4U1 700-37), HDE226868 (Cyg X-1), HZ Her (Her X-1) (Dupree A. K., Davis R. J., Gursky H., Hartmann L. W., Raymond J. C., Boggess A., Holm A., Kondo Y., Wu C. C., Macchetto F., Sandford M. C. W., Willis A. J., Wilson R., Ciatti F., Hutchings J. B., Johnson H. M., Jugaku J., Morton D. C., Treves A. and Heuvel E. P. J. van den) **275,** 400
The International Ultraviolet Explorer (IUE), *review article,* (Wilson R.) **275,** 371
The IUE observations of extragalactic objects (Boksenberg A., Snijders M. A. J., Wilson R., Benvenuti P., Clavel J., Macchetto F., Penston M., Boggess A., Gull T. R., Gondhalekar P., Lane A. L., Turnrose B., Wu C. C., Burton W. M., Smith A., Bertola F., Capaccioli M., Elvius A. M., Fosbury R., Tarenghi M., Ulrich M. H., Hackney R. L., Jordan C., Perola C. G., Roeder R. C. and Schmidt M.) **275,** 404
The IUE spacecraft and instrumentation (Boggess A., Carr F. A., Evans D. C., Fischel D., Freeman H. R., Fuechsel C. F., Klinglesmith D. A., Krueger V. L., Longanecker G. W., Moore J. V., Pyle E. J., Rébar F., Sizemore K. O., Sparks W., Underhill A. B., Vitagliano H. D., West D. K., Macchetto F., Fitton B., Barker P. J., Dunford E., Gondhalekar P. M., Hall J. E., Harrison V. A. W., Oliver M. B., Sandford M. C. W., Vaughan P. A., Ward A. K., Anderson B. E., Boksenberg A., Coleman C. I., Snijders M. A. J. and Wilson R.) **275,** 372

International Union against Cancer. International Union against Cancer, *correspondence,* (Tassart G.) **271,** 107

Interplanetary dust. Interplanetary dust: are there two independent populations? (Sergeant L. B. Le and Lamy P. L.) **276,** 800

Interplanetary magnetic field. IMF effects on shortperiod fluctuations at low latitudes (Agarwal A. K., Rastogi R. G., Nityananda N. and Singh B. P.) **272,** 517

Interspecific competition. An explanation of ecological and developmental constants (Maiorana V. C.) **273,** 375

Interstade. $^{230}Th/^{234}U$ age support of an interstadial sea level of −40m at 30,000 yr *bp* (Chappell J. and Veeh H. H.) **276,** 602

Interstellar communication. Preferred frequency for interstellar communications (Morimoto M., Hirabayashi H. and Jugaku J.) **276,** 694

Interstellar medium. Circumstellar methane in the infrared spectrum of IRC+10 . 216 (Hall D. N. B. and Ridgway S. T.) **273,** 282
Hydrogen $L\beta$ and $L\epsilon$ emission lines observed from the interplanetary medium by the Voyager UV spectrometer (Sandel B. R., Shemansky D. E. and Broadfoot A. L.) **274,** 666
Intensity of interstellar Lyman alpha (Draine B. T. and Salpeter E. E.) **271,** 730
iue observations of the interstellar medium (Grewing M., Boksenberg A., Seaton M. J., Snijders M. A. J., Wilson R., Boggess A., Bohlin R. C., Perry P. M., Schiffer I. H. III, Gondhalekar P. M., Macchetto F., Savage B. D., Jenkins E. B., Johnson H. M., Perinotto M. and Whittet D. C. B.) **275,** 394
Ultraviolet spectra of organic molecules and the interstellar medium (Egan W. G. and Hilgeman T.) **273,** 369

Interstellar molecule. Extragalactic molecular hydrogen, *news and views,* (Wynn-Williams C. G.) **274,** 114
First interstellar NO bond, *news and views,* (Richards G.) **271,** 12
Identification of interstellar polysaccharides and related hydrocarbons (Hoyle F., Olavesen A. H. and Wickramasinghe N. C.) **271,** 229
Interstellar carbon, *news and views,* (Edmunds M. G.) **276,** 439
Interstellar nitroxyl (Pickles J. B. and Williams D. A.) **271,** 335
Optical detection of local interstellar particles during an out-of-ecliptic mission (Greenberg J. M. and Schuerman D. W.) **275,** 39
Possible identification of the 45-μm ice signature in Orion (Papoular R., Léna P., Marten A., Rouan D. and Wijnbergen J.) **276,** 593
Radioastronomical frequency for interstellar NH^+ (Wilson I. D. L. and Richards W. G.) **271,** 137
Role of different isomers of the H_2CN^+ ion in the formation of interstellar HCN and HNC (Conrad M. P. and Shaeffer H. F. III) **274,** 456

Interstitial cell. The polyp has no I's, *news and views,* (Slack J.) **274,** 313

Intervening sequence. Comparison of cloned rabbit and mouse β-globin genes showing strong evolutionary divergence of two homologous pairs of introns (Berg J. van den, Ooyen A. van, Mantei N., Schamböck A., Grosveld G., Flavell R. A. and Weissmann C.) **276** 37
Genes, chromosomes and differentiation, *news and views,* **274,** 639
Intervening sequences excised in vitro, *news and views,* (Roberts R. J.) **274,** 530
Intervening sequences in the mitochondrial genome, *news and views,* (Bernardi G.) **276,** 558
Structure and processing of yeast precursor tRNAs containing intervening sequences (O'Farrell P. Z., Cordell B., Valenzuela P., Rutter W. J. and Goodman H. M.) **274,** 438
The natural ovalbumin gene contains seven intervening sequences (Dugaiczyk, A., Woo S. L. C., Lai E. C., Mace M. L. Jr, McReynolds L. and O'Malley B. W.) **274,** 328

Inverse segregation. Precambrian solution photochemistry, inverse segregation, and banded iron formations (Cairns-Smith A. G.) **276,** 807

Io-. Io-phase motion and jovian decametre source locations (Desch M. D.) **272,** 339

Io. Jupiter's S bursts and Io (Whitham P. S.) **272,** 40

Io may have a bright dawn terminator. Io may have a bright dawn terminator (Forman M.) **275,** 519

Ion. Tetrahedral hydration of ions in solution (Michaelian K. H. and Moskovits M.) **273,** 135

Ion activity. Growth limitation of a coastal diatom by low zinc ion activity (Anderson M. A., Morel F. M. M. and Guillard R. R. L.) **276,** 70

Ion gradient. Microprobe measurement of Na, K and Cl concentration profiles in epithelial cells and intercellular spaces of rabbit ileum (Gupta B. L., Hall T. A. and Naftalin R. J.) **272,** 70

Ion Transport. Cell Membranes and Ion Transport: Integrated Themes in Biology (Hall J. L. and *editor*) *book review by* Michell B. **272,** 96
Ionophoretic model for Na-Ca counter transport (Malaisse W. J. and Couturier E.) **275,** 664
Ouabain like activity in toad skin and its implications for endogenous regulation of ion transport (Flier J. S.) **274,** 285

Ionian Sea. Ionian Sea sapropel distribution and late Quaternary palaeoceanography in the eastern Mediterranean (Stanley D. J.) **274,** 149

Ion-impact. Mechanisms of sputtering of solid surfaces by ion-impact (Pollitt K. R., Robb J. C. and Thomas D. W.) **272,** 436

Ionisation. Threshold effects in the excitation of autoionising states of argon atoms by electron impact (Wilden D. G., Comer J. and Hicks P. J.) **273,** 651

Ionisation front. Oblique refraction of an ionisation front (Fu W. B.) **273,** 36

Ionosphere. Atomic oxygen emission at 63 μm as a cooling mechanism in the thermosphere and ionosphere (Grossman K. U. and Offermann D.) **276,** 594
Electric fields in the ionosphere produced by polar field-aligned currents (Maekawa K. and Maeda H.) **273,** 649
Equivalent circuit analysis of neutral wind effects on equatorial electrojet (Reddy C. A. and Devasia C. V.) **273,** 195
Simultaneous observations of equatorial ionospheric scintillation on four frequencies (Rastogi R. G., Deshpande M. R., Vadher N. M., Davies K. and Parikh P. B.) **273,** 285
Plasma fluxes between ionosphere and protonosphere (Kersley L., Hajeb-Hosseinieh H. and Edwards K. J.) **271,** 427

Ionospheric group height. Interpretation of short-period oscillations in ionospheric group heights, *matters arising,* (Monro P. E. and Whitehead J. D.) **274,** 511

Iparagyuirre-Weinstein, B. Argentinian haematologist released, *correspondence,* **272,** 576

Iparrggyuirre-Weinstein, B. Argentinian haematologist disappears, *correspondence,* (Lehmann H.) **272,** 396

IQ. Intelligence is more than IQ *correspondence,* (Fremlin J. H.) **271,** 606
IQ and environmental variables, *correspondence,* (Havender W. R.) **272,** 666
Race and IQ: Jensen retains fellowship, *news,* **271,** 699
IQ or intelligence type? *correspondence,* (Ford B. J.) **271,** 7

Iris. Light-induced calcium release in a photosensitive vertebrate smooth muscle (Zucker R. and Nolte J.) **274,** 78

Irish Sea. Oxidation state of plutonium in the Irish Sea (Nelson D. M. and Lovett M. B.) **276,** 599

Iron. Limited solubility of iron in the Sun's interior (Pollock E. L. and Alder B. J.) **275,** 41

Iron formation. A surface related component of iron metal in lunar samples? (Woodcock M. R., Pillinger C. T. and Stephenson A.) **276,** 697

Iron formation: Banded. Precambrian solution photochemistry, inverse segregation, and banded iron formations (Cairns-Smith A. G.) **276,** 807

Iron Metabolism. Iron Metabolism (Jacobs A. chairman) *book review by* Dagg J. H. **273,** 251

Irregularity belt. Equatorial irregularity belt and its movement during a magnetic storm (Vats H. O., Chandra H., Deshpande M. R., Rastog R. G., Murthy B. S., Janve A. V., Rai R. K., Singh M., Gurm H. S., Jain A. R., Patwari V. M. and Subbarao B. S.) **272,** 345

ISABELLE. Funding delays handicap ISABELLE in race for new particle, *news,* **276,** 200

Islam. Development in the Muslim world, *leading article,* **272,** 195
The Muslim Contribution to Mathematics (Al-Daffa A. A.) *book review by* Whiteside D. T. **273,** 78

Island arc. Constitution and significance of the Troodos sheeted

complex (Desmet A., Lapierre H., Rocci G., Gagny Cl., Parrot J.-F. and Delaloye M.) **273,** 527
Reset Rb/Sr whole-rock systems and chemical control (Bell K. and Blenkinsop J.) **273,** 532
Island chain. Formation of discrete islands in linear island chains (Skilbeck J. N. and Whitehead Jr J. A.) **272,** 499
Isochron. Seafloor spreading in the western Gulf of Aden (Girdler R. W. and Styles P.) **271,** 615
Isoelectric Focusing. Biological and Biomedical Applications of Isoelectric Focusing (Catsimpoolas N. and *editor*) *book review by* Morris C. J. O. R. **273,** 326
Isoenzyme. Dissociation of 'hybrid' isozymes on electrophoresis (Edwards Y. H., Hopkinson D. A. and Harris H.) **271,** 84
Isomerisation. Photochemical *cis-trans* isomerisation of bovine rhodopsin at liquid helium temperatures (Aton B., Callender R. H. and Honig B.) **273,** 784
Isotope. Standards for stable isotope measurements in natural compounds (Gonfiantini R.) **271,** 534
Isotope analysis. Vital effect on stable-isotope composition seen in foraminifera and coral skeletons (Erez J.) **273,** 199
Isotope dating. Silica oxygen isotopes in diatoms: a 20,000 yr record in deep-sea sediments (Mikkelsen N., Labeyrie L., Jr and Berger W. H.) **271,** 536
Isotope ratio. Stable carbon isotopes in human tissues (Lyon T. D. B. and Baxter M. S.) **273,** 750
Isotope separation. Isotope separation by Taylor diffusion (Paiva M.) **271,** 434
Isotopic dating. Anomalous cosmochronology... *news and views,* (Moorbath S. and Schramm D. N.) **275,** 478
Israel. Better Med than Dead *news,* **276,** 746
Israeli participation in Soviet conference. *correspondence,* (Zheludev I. S.) **272,** 666
Israel's place in the sun. *news,* **275,** 581
Israel's scientist-President resigns, *news,* **273,** 93
USSR bars Israeli scientist, *correspondence,* (Lang S. B. and Havlin S.) **271,** 605
Israel wants scientific cooperation with the Arabs, *news,* **275,** 262
Isua. Least radiogenic terrestrial lead from Isua, West Greenland (Appel P. W. U., Moorbath S. and Taylor P. N.) **272,** 524
Sm-Nd isotopic investigation of Isua supracrustals and implications for mantle evolution (Hamilton P. J., O'Nions R. K., Evensen N. M., Bridgwater D. and Allaart J. H.) **272,** 41
Japan. Heaven and Hell (Mellanby K.) **272,** 9
The Japanese Connection, *news,* **272,** 304
Japan is burning to be nuclear, *news,* **272,** 304
Japan makes new study of its science, *news,* (Douglas J.) **271,** 702
US and Japan to cooperate in fusion and high energy physics, *news,* **276,** 431
Java. Absolute age of the base of the hominid-bearing beds in Eastern Java (Ninkovich D. and Burckle L. H.) **275,** 306
Jellyfish. Light-controlled production of spawning-inducing substance in jellyfish ovary (Ikegami S., Honji N. and Yoshida M.) **272,** 611
Jephcott H. *obituary* (Jephcott H. Sir) **274,** 727
JET. German leader for JET project, *news,* **271,** 3
Jet stream. Five-day oscillation in East African low-level jet (Asnani G. C.) **272,** 708
Joint inflammation. Novel treatment for joint inflammation (Dingle J. T., Gordon J. L., Hazleman B. L., Knight C. G., Page Thomas D. P., Phillips N. C., Shaw I. H., Fildes F. J. T., Oliver J. E., Jones G., Turner E. H. and Lowe J. S.) **271,** 372
Journal. Nature: Chinese style, *news and views,* (Kiang T.) **275,** 697
Jupiter. First direct measurement of the beaming of Jupiter's decametric radiation (Poquérusse M. and Lecacheux A.) **275,** 111
Io may have a bright dawn terminator (Forman M.) **275,** 519
Io-phase motion and jovian decametre source locations (Desch M. D.) **272,** 339
Jovian S-burst observations at 32 MHz (Desch M. D., Flagg R. S. and May J.) **272,** 38
Jupiter's S bursts and Io (Whitham P. S.) **272,** 40
Kirkwood Gaps and stability of conservative periodic systems (Kiang T.) **273,** 734
Millisecond microwave spikes in a solar flare (Slottje C.) **275,** 520
Solar wind effect on Jupiter's non-Io-related radio emission (Terasawa T., Maczawa K. and Machida S.) **273,** 131
Infra-red telescope will not be ready for Jupiter mission, *news,* **275,** 685
Jurassic. Jurassic basin evolution of East Greenland (Surlyk F.) **274,** 130
Justice. Prejudicial to the interests of the state? *leading article,* **276,** 307
Kainic acid. Dopamine receptors localised on cerebral cortical afferents to rat corpus striatum (Schwarcz R., Creese I., Coyle J. T. and Snyder S. H.) **271,** 766
Intraventricular kainic acid preferentially destroys hippocampal pyramidal cells (Nadler J. V., Perry B. W. and Cotman C. W.) **271,** 676
Intraventricular kainic acid preferentially destroys hippocampal pyramidal cells (Nadler J. V., Perry B. W. and Cotman C. W.) **271,** 676
Kallikrein. Human urinary kallikrein converts inactive to active renin and is a possible physiological activator of renin (Sealey J. E., Atlas S. A., Laragh J. H., Oza N. B. and Ryan J. W.) **275,** 144
Kamenkovich V. M. and. Variability of the ocean (Monin A. S.) *book review by* Wunsch C. **271,** 286
Kapitza P. L. Fifty years of scientific achievement, *news,* (Shoenberg D.) **275,** 688
K–Ar system. Limited response of the K–Ar system to the Nordlinger Ries giant meteorite impact (Jessberger E. K., Staudacher T., Dominik B., Kirsten T. and Schaeffer O. A.) **271,** 338
Karst: Labyrinth. The origin of labyrinth and tower karst and the climatic conditions necessary for their development (Brook G. A. and Ford D. C.) **275,** 493
Karst: Tower. The origin of labyrinth and tower karst and the climatic conditions necessary for their development (Brook G. A. and Ford D. C.) **275,** 493
Katydid. Photoperiodically determined, dimorphic calling songs in katydid (Whitesell J. J. and Walker T. J.) **274,** 887
Kenner G. W. Kenner G. W. 1922—1978, *obituary* (Kenner G. W.) **275,** 677
Keratin filament. Assembly of stratum corneum basic protein and keratin filaments in macrofibrils (Dale B. A., Holbrook K. A. and Steinert P. M.) **276,** 729
Kerogen. Oil-shale kerogen: low temperature degradation in molten salts (Bugle R. C., Wilson K., Olsen G., Wade L. G. Jr and Osteryoung R. A.) **274,** 578
Kerogen maturation and petroleum genesis (Ujiie) **272,** 438
Kerogen maturation and petroleum generation, *matters arising,* (Jones R. W.) **275,** 567
Kerogen maturation and petroleum generation—Reply, *matters arising,* (Ujiié Y.) **275,** 568
Kew gardens. In for a Penny: A Prospect of Kew gardens (Blunt W.) *book review by* Stearn W. T. **276,** 139
Kidney. Possible use of histone acetylation in mixed leukocyte cultures to assess histocompatibility (Mukherjee A. B. and Fabricant J. D.) **273,** 467
Renal actions of prostacyclin (Bolger P. M., Eisner G. M., Ramwell P. W., Slotkoff L. M. and Corey E. J.) **271,** 467
Site of 1,25(OH)2 vitamin D3 synthesis in the kidney (Brunette M. G., Chan M., Ferriere C. and Roberts K. D.) **276,** 287
Kidney allograft. Immunological memory is regulated in the enhanced rat renal allograft recipient (Weiss A., Fitch F. W., McKearn T. J. and Stuart F. P.) **273,** 662
Kidney cell. Retinoids as well as tumour promoters enhance deacylation of cellular lipids and prostaglandin production in MDCK cells (Levine L. and Ohuchi K.) **276,** 274
Kin. Monkeys prefer kin, *news and views,* (Krebs J.) **274,** 311
Kinase. Indomethacin in submicromolar concentrations inhibits cyclic AMP-dependent protein kinase (Kantor H. S. and Hampton M.) **276,** 841
Structure of pyruvate kinase and similarities with other enzymes: possible implications for protein taxonomy and evolution (Levine M., Muirhead H., Stammers D. K. and Stuart D. I.) **271,** 626
Kinematics. The problem of the thrown string (Bass L. and Bracken A. J.) **275,** 205
Kinship asymmetry. Kinship asymmetry in diploids (Flesness N. R.) **276,** 495
Kirkwood Gap. Kirkwood Gaps and stability of conservative periodic systems (Kiang T.) **273,** 734
Stability problem of Kirkwood Gaps, *matters arising,* (Aoki S.) **275,** 568
Stability problem of Kirkwood Gaps—Reply, *matters arising,* (Kiang T.) **275,** 568
Klüber von H. *obituary* (Klüber von H.) **273,** 414
Knowledge. The Origins of Knowledge and Imagination (Bronowski J.) *book review by* Barlow H. **274,**
Kompfner R. *obituary* (Kompfner R.) **273,** 413
Korea. Tidal power schemes in Korea (Gray F. and Wilson E. M.) **271,** 704
Kosmos. Kosmos—1000 up, *news,* **272,** 574
Kosmos strikes 1000, *news,* **272,** 489
Kranz anatomy. A C4 plant from the Pliocene (Nambudiri E. M. V., Tidwell W. D., Smith B. N. and Hebbert N. P.) **276,** 816
Kunitz M. *obituary* (Kunitz M.) **275,** 351
Kuroshio. Detachment and recombination of a current ring with the Kuroshio (Solomon H.) **274,** 580
Labrador. Deep shelf and slope terraces off northern Labrador (Fillon R. H., Folinsbee R. A. and Palmer R.) **273,** 743
Utilisation of soapstone in Labrador by Indians, Eskimos and Norse (Allen R. O., Allen K. K., Holland C. G. and Fitzhugh W. W.) **271,** 237
Lacertae object. NGC1275: a BL Lacertae object? (Veron P.) **272,** 430
Lamination. Origin of lamination in deep sea, fine-grained sediments (Stow D. A. V. and Bowen A. J.) **274,** 324
Landsat. Better resolution from Landsat, *news and views,* (Allan J. A.) **273,** 189
Landslide. Seismological and geological aspects of the Mantaro landslide in Peru (Berrocal J., Espinosa A. F. and Galdos J.) **275,** 533
Language. Heraclitean Fire: Sketches from a Life Before Nature (Chargaff E.) *book review by* Donohue J. **276,** 133
Langur. The Langurs of Abu (Hardy S.) *book review by* Clutton-Brock T. H. **273,** 325
Large circle. Large circles on the Earth's surface, *matters arising,* (Isachsen Y. W.) **276,** 535
Large circles on the Earth's surface—Reply, *matters arising,* (Saul J. M.) **276,** 535
Larvicidal activity. Larvicidal activity of diflubenzuron in tsetse fly (Trewern M. A.) **272,** 719
Laser. Holiday diary, *leading article,* **271,** 99
Laser spectroscopy (Letokhov V. S. and) *book review by* Knight P. **271,** 788
Lasers, *news,* **276,** 313
Laserswitched collisions, *news and views,* (Knight P.) **273,** 188
Measurement of magnetic fields in a tokamak using laser light scattering (Forrest M. J., Carolan P. G. and Peacock N. J.) **271,** 718
Thermonuclear reactions confirmed in laserdriven fusion, *news and views,* (Beynon D.) **271,** 304
Ultraviolet lasers for purer silicon (Holmes-Siedle A.) **272,** 674
Laser. Atomic and Laser Spectroscopy (Corney A.) *book review by* Knight P. **272,** 291
Laser and Coherence Spectroscopy (Steinfeld J. I. *editor*) *book review by* Knight P. **274,** 192
Laser annealing of semiconductors, *news and views,* (Weaire D. and Wilson J. I. B.) **276,** 668
Laser progress? *correspondence,* (Lucas C.B.) **276,** 754
Laser plasma. Megagauss magnetic fields in laser-produced plasmas, *news and views,* (Key M. H.) **276,** 210
Lattice: Superlattice. FeNi superlattice formation by corrosion of Santa Catharina meteorite (Bowles J. S., Hatherley M. and Malin A. S.) **276,** 168
Laurent-Täckholm V. *obituary* (Laurent-Täckholm V.) **275,** 574
Lava. Field measurements of the rheology of lava (Pinkerton H. and Sparks R. S. J.) **276,** 383
Lava: Basaltic. Effect of degassing on rheology of basaltic lava (Sparks R. S. J. and Pinkerton H.) **276,** 385
Lead. A problem in ^{210}Pb geochronologies of sediments (Megumi K.) **274,** 885
Pb, Nd and Sr isotopes in oceanic ferromanganese deposits and ocean floor basalts (O'Nions R. K., Carter S. R., Cohen R. S., Evensen N. M. and Hamilton P. J.) **273,** 435
Decrease in content of lead in Danish cereals (Solgaard P., Aarkrog A., Fenger J., Flyger H. and Graabaek A. M.) **272,** 346
Identification of lead compounds in urban air (Biggins P. D. E. and Harrison R. M.) **272,** 531
Lead detoxification by a copper-tolerant isopod (Brown B. E.) **276,** 388
Lead levels in Birmingham are typical of urban areas, says UK report, *news,* **273,** 417
Lead levels in Birmingham, *correspondence,* (Stephens R.) **273,** 704
Least radiogenic terrestrial lead from Isua, West Greenland (Appel P. W. U., Moorbath S. and Taylor P. N.) **272,** 524
Organic lead in normal human brains (Neilsen T., Jensen K. A. and Grandjean P.) **274,** 602
Lead dating. Alternative ^{210}Pb dating: results from the New Guinea Highlands and Lough Erne (Oldfield F., Appleby P. G. and Battarbee R. W.) **271,** 339
Learning. Dissociation between learning and remembering in organic amnesia (Huppert F. A. and Piercy M.) **275,** 317
Learning and Memory (Wickelgren W. A.) *book review by* Broadbent D. **272,** 290
Lectin. Two distinct developmentally regulated lectins in chick embryo muscle (Mir-Lechaire F. J. and Barondes S. H.) **272,** 256
Lederberg J. Lederberg named President of Rockefeller University, *news,* **271,** 298
Leghaemoglobin. Biochemical evidence that leghaemoglobin genes are present in the soybean but not in *Rhizobium* genome (Sidloi-Lumbroso R., Kleiman L. and Schulman H. M.) **273,** 558
Legionnaires' disease. Electron microscopy of the organism of Legionnaires' disease (Rodgers F. G., Macrae A. D. and Lewis M. J.) **272,** 825
Leishmaniasis. Antileishmanial activity of antimonials entrapped in liposomes (New R. R. C., Chance M. L., Thomas S. G. and Peters W.) **272,** 55
Epidemiology and ecology of leishmaniasis in Latin-America, *review article,* (Lainson R. and Shaw J. J.) **273,** 595
Leminus tuber-regium. Fungal club-heads in Papua New Guinea (Price T. V., Baldwin J. A. and Simpson J. A.) **273,** 374
LEP. Keeping down the cost of LEP, *news,* **276,** 658
Lepton. A new interaction for leptons? *news and views,* (Close F. E.) **273,** 706
Evidence for leptonic colour? (Pati J. C., Rajpoot S., Salam A. and Strathdee J.) **273,** 736
Lepton: Tau heavy. The tau heavy lepton—a recently discovered elementary particle, *review article,* (Perl M. L.) **275,** 273
Lerner A. Lerner still cannot leave Russia, *news,* **276,** 553
Lesch-Nyhan syndrome. The man-made mouse, *news and views,* (Heath J. K.) **271,** 610
LETS protein. Appearance of fibronectin during differentiation of mouse teratocarcinoma *in vitro* (Wartiovaara J., Leivo I., Virtanen I., Vaheri A. and Graham C. F.) **272,** 355
Retinol induces density-dependent growth inhibition and changes in glycolipids and LETS (Patt L. M., Itaya K. and Hakomori S. I.) **273,** 379
Search for collagen in substrate adhesion site of two murine cell lines (Culp L. A. and Bensusan H.) **273,** 680
Leucyl-tRNA synthetase. A physically altered leucyl-tRNA synthetase complex in a CHO cell mutant (Hampel A. E., Ritter P. O. and Enger M. D.) **276,** 844
Leukaemia. Globin RNA sequences in human leukaemic peripheral blood (Gianni A. M., Favera R. D., Polli E., Merisio I., Gigliani B., Compi P. and Ottolenghi S.) **274,** 610
Spontaneous murine B-cell leukaemia (Slavin S. and Strober S.) **272,** 624
US soldiers in cancer study, *news,* **271,** 399
A new erythroid cell line induced by Rauscher murine leukaemia virus (Both N. J. de, Vermey M., van't Hull E., Klootwijk-van Dijke E., van Griensver L. J. L. D., Mol J. N. M. and Stoof T. J.) **272,** 626
Surface antibodies of human myelogenous leukaemia leukocytes reactive with specific type-C viral reverse transcriptases (Jacquemin P. C., Saxinger C. and Gallo R. C.) **276,** 230
Leukaemia: Myeloid. Control of normal cell differentiation and the phenotypic reversion of malignancy in myeloid leukaemia, *review article,* (Sachs L.) **274,** 535
Myeloid leukaemia in X-ray irradiated CBA mice (Major I. R. and Mole R. H.) **272,** 455
Leukaemia: T-cell. Cytogenetic mapping of the trisomic segment of chromosome 15 in murine T-cell leukaemia (Wiener F., Ohno S., Spira J., Haran-Ghera N. and Klein G.) **275,** 658
Leukaemic cell. Generation of cytotoxic T lymphocytes to autologous human leukaemia cells by sensitisation to pooled allogeneic normal cells (Zarling J. M., Robins H. I., Raich P. C., Bach F. H. and Bach M. L.) **274,** 269
Phagocytic thymus epithelial reticular cells (Peled A. and Haran-Ghera N.) **274,** 266
Leukaemogenesis. Temperature-sensitive mutant of avian erythroblastosis virus suggests a block of differentiation as mechanism of leukaemogenesis (Graf T., Ade N. and Beug H.) **275,** 496
Leukocyte. Rapid stimulation of protein carboxymethylation in leukocytes by a chemotactic peptide (O'Dea R. F., Viveros O. H., Axelrod J., Aswanikumar S., Schiffmann E. and Corcoran B. A.) **272,** 462
Leutinising hormone. Suppression of oestrogen-induced LH surges by social subordination in talapoin monkeys (Bowman L. A., Dilley S. R. and Keverne E. B.) **275,** 56
Levich V. Scepticism over Soviet promise to let Levich go **275,** 264
Libya. Libya bidding to join nuclear club, scientists warn, *news,* **276,** 550
Lichen. Lichen Ecology (Seaward M. R. D. *editor*) *book review by* Ferry B. W. **274,** 297
Life science. Advances in the life sciences—recent textbooks Creed E. R. **272,** 98
Philosophy of ignorance (Duncan R. and *editor*) *book review by* Medawar P. B. **272,** 772
Ligand. Agonist regulation of the human platelet α-adrenergic receptor (Cooper B., Handin R. I., Young L. H. and Alexander R. W.) **274,** 703
Light chain. The murine kappa light chain shift (Haughton G., Lanier L. L. and Babcock G. F.) **275,** 154
Light detection. Magnetic field detection is distinct from light detection in the invertebrates *Tenebrio* and *Talitrus* (Arendse M. C.) **274,** 358
Lighting. Lighting (Golde R. H. *editor*) *book review by* Illingworth A.J. **272,** 192
Light-trap response. The distance and nature of the light-trap response of moths (Baker R. R. and Sadovy Y.) **276,** 818
Limb. Regeneration of reduplicated limbs in contravention of the complete circle rule (Slack J. M. W. and Savage S.) **271,**

760
Supernumerary limbs in the axolotl (Maden M. and Turner R. N.) **273,** 232
Attenuation of positional signalling in the chick limb by high doses of α-radiation (Smith J. C., Tickle C. and Wolpert L.) **272,** 612
Limb morphology and function are transformed by contralateral nerve section in snapping shrimps (Mellon Jr D. and Stephens P. J.) **272,** 246
Limb amputation. Central nervous system effects of limb amputation in man (McComas A., Sica R. and Banerjee, S.) **271,** 73
Limb regeneration. Cyclic AMP and noradrenaline sensitivity fluctuations in regenerating newt tissue (Taban C., Cathieni M. and Schorderet M.) **271,** 470
Linnaeus N. Linnaeus: 200 years after, *news and views,* (Lindley M.) **273,** 589
Lipid. Solvent-depleted bilayer membranes from concentrated lipid solutions (Waldbillig R. and Szabo G.) **272,** 839
Lipid bilayer. A direct method for determination of membrane electron density profiles on an absolute scale (Franks N. P., Arunachalam T. and Caspi E.) **276,** 530
Bilayers containing gangliosides develop channels when exposed to cholera toxin (Tosteson M. T. and Tosteson D. C.) **275,** 142
Degenerate perturbations of protein structure as the mechanism of anaesthetic action (Richards C. D., Martin K. Gregory S., Keightley C. A., Hesketh T. R., Smith G. A., Warren G. B. and Metcalfe J. C.) **276,** 775
Differences in fluidity between bilayer halves of tumour cell plasma membranes (Schroeder F.) **276,** 528
Lipid hypothesis. The lipid hypothesis, *correspondence,* (Turner R. W. D.) **273,** 422
Lipid: Membrane. Growth and membrane lipid properties of *Acholeplasma laidlawii* B lacking fatty acid heterogeneity (Silvius J. R. and McElhaney R. N.) **272,** 645
Lipid sac. Lipid sacs as a buoyancy adaptation in an Antarctic fish (DeVries A. L. and Eastman J. T.) **271,** 352
Lipid vesicle. Does Ca^{2+} cause fusion or lysis of unilamellar lipid vesicles? (Ginsberg L.) **275,** 758
Uptake of charged lipid vesicles by isolated tomato protoplasts (Cassells A. C.) **275,** 760
Lipogenesis. Sensitivity of corticosteroid dependent insulin-resistant lipogenesis in marrow preadipocytes of obese-diabetic (db/db) mice **275,** 752
Lipolysis. Ventromedial hypothalamus modulates fat mobilisation during fasting (Bray G. A. and Nishizawa Y.) **274,** 900
Liposome. Antileishmanial activity of antimonials entrapped in liposomes (New R. R. C., Chance M. L., Thomas S. G. and Peters W.) **272,** 55
Enzyme replacement using liposome carriers in feline G_{M1} gangliosidosis fibroblasts (Reynolds G. D., Baker H. J. and Reynolds R. H.) **275,** 754
Enzyme replacement using liposome carriers in feline G_{M1} gangliosidosis fibroblasts (Reynolds G. D., Baker H. J. and Reynolds R. H.) **275,** 754
Evidence for translation of rabbit globin mRNA after liposome-mediated insertion into a human cell line (Ostro M. J., Giacomoni D., Lavelle D., Paxton W. and Dray S.) **274,** 921
Incorporation of murine MHC antigens into liposome and their effect in the secondary mixed lymphocyte reaction (Curman B., Ostberg L. and Peterson P. A.) **272,** 545
Liposomes in biology and medicine, *news and views,* (Gregoriadis G.) **271,** 112
Liposomes in the therapy of lysosomal storage diseases, *news and views,* (Gregoriadis G.) **275,** 695
Oxygen production from chlorophyll-liposomes, *matters arising,* (Stillwell W. L. and Ti Tien H.) **273,** 406
Translation of rabbit globin mRNA introduced by liposomes into mouse lymphocytes (Dimitriadis G. J.) **274,** 923
Lipovitellin-phosvitin complex. Three-dimensional structure of the lipovitellin-phosvitin complex from amphibian oocytes (Ohlendorf D. H., Wrenn R. F. and Banaszak L. J.) **272,** 28
Liquid. Liquids and their Properties: A Molecular and Macroscopic Treatise with Applications (Temperley H. N. V. and) *book review by* Rowlinson J. S. **276,** 424
Liquid: Basaltic. Olivine fractionation equations for basaltic and ultrabasic liquids (Pearce T. H.) **276,** 771
Liquid crystal. Liquid Crystals (Chandrasekhar S.) *book review by* Leadbetter A. J. **271,** 389
Liquid film. Direct measurement of molecular forces (Derjaguin B. V., Rabinovich Y. I. and Churaev N. V.) **272,** 313
Liquid Physics. Progress in Liquid Physics (Croxton C. A. *editor*) *book review by* Powles J. G. **273,** 789
Liquid: Ultrabasic. Olivine fractionation equations for basaltic and ultrabasic liquids (Pearce T. H.) **276,** 771
Lister Institute. Lister Institute closes vaccine laboratories, *news,* **272,** 747
Lisuride. Effects of lisuride and LSD on cerebral monoamine systems and hallucinosis (Pieri L., Keller H. H., Burkard W. and Da Prada M.) **272,** 278
Lithium. Haloperido-induced presynaptic dopamine supersensitivity is blocked by chronic lithium (Gallager, D. W., Pert A. and Bunney Jr W. E.) **273,** 309
Lithosphere. Age-length dependence of inclined seismic zones (Farrar E. and Lowe R. M.) **273,** 292
Changing He/Ar and N_2/Ar ratios of fault air may be earthquake precursors (Sugisaki R.) **275,** 209
Induced suction and lithospheric plate pull (Shoemaker E. M.) **272,** 241
Induced suction and lithospheric plate pull, *matters arising,* (Stevenson D. J.) **275,** 346
Induced suction and lithospheric plate pull—Reply, *matters arising,* (Shoemaker E. M.) **275,** 346
Oceanic plate motions driven by lithospheric thickening and subducted slabs (Hager B. H.) **276,** 156
Lithostratigraphy. Re-appraisal of lithostratigraphy of Sterkfontein hominid site (Partridge T. C.) **275,** 282
Litter size. Effect of reduced litter size on the suckling behaviour of developing rats (Teicher M. H. and Kenny J. T.) **275,** 644
Liver. Biochemical characterisation of stages of hepatocarcinogenesis after a single dose of diethylnitrosamine (Pitot H. C., Barsness L. Goldsworthy T. and Kitagawa T.) **271,** 456
Liver. ^{31}P nuclear magnetic resonance studies of isolated rat liver cells (Cohen S. M., Ogawa S., Rottenberg H., Glynn P., Yamane T., Brown T. R., Shulman R. G. and Williamson J. R.) **273,** 554
Living system. Ordre et Dynamique du Vivant (Danchin A.) *book review by* Tonnelat J. **275,** 571
Lizard. Inverse relation of survival of lizards with island size and avifaunal richness (Schoener T. W. and Schoener A.) **274,** 685
Thermal acclimation in temperate lizards (Patterson J. W. and Davies P. M. C.) **275,** 646
Lobster. Inhibition of oesophageal peristalsis in the lobster after chemical stimulation (Robertson R. M. and Laverack M. S.) **271** 239
Lock Lomond. Palynology, palaeomagnetism and radiometric dating of Flandrian marine and freshwater sediments of Lock Lomond (Dickson J. H., Stewart D. A., Thompson R., Turner G., Baxter M. S., Drndarsky N. D. and Rose J.) **274,** 548
Locomotion. Mechanics and Energetics of Animal Locomotion (Alexander R. McN. and *editor*) *book review by* Clark R. B. **271,** 98
Membrane movements and microfilaments, *news and views,* (Bray D.) **273,** 265
Locust. Locusts on the march again, *news,* **274,** 5
Locusts: vigilance still needed, *news,* (Collins P.) **273,** 180
Locusta migratoria. Precocene II causes atrophy of corpora allata in *Locusta migratoria,* (Pener M. P., Orshan L. and de Wilde J.) **272,** 350
Locust-swarm. India on stand-by for a plague of locusts, *news,* (Salwi D. M.) **275,** 6
Lough Erne. Alternative ^{210}Pb dating: results from the New Guinea Highlands and Lough Erne (Oldfield F., Appleby P. G. and Battarbee R. W.) **271,** 339
Low temperature physics. Fifty years of scientific achievement, *news,* (Shoenberg D.) **275,** 688
LSD. Effects of lisuride and LSD on cerebral monoamine systems and hallucinosis (Pieri L., Keller H. H., Burkard W. and Da Prada M.) **272,** 278
LSD labels a novel dopamine receptor in molluscan nervous system (Drummond A. H., Bucher F. and Levitan I. B.) **272,** 368
Lubricant. Magnetic orientation of four-ball test specimens and the effect on total test time (Jones J. B. and Pocock G.) **274,** 459
Luliberin. CIDNP in tyrosyl protons of luliberin (Muszkat K. A. and Gilon C.) **271,** 685
Lunar cycle. Nautiloid growth rhythms and dynamical evolution of the Earth-Moon system (Kahn P. G. K. and Pompea S. M.) **275,** 606
Lung. Bombesin-like immunoreactivity in the lung (Wharton J., Polak J. M., Bloom S. R., Ghatei M. A., Solcia E., Brown M. R. and Pearse A. G. E.) **273,** 769
Generation of prostacyclin by lungs *in vivo* and its release into the arterial circulation (Gryglewski R. J., Korbut R. and Ocetkiewicz A.) **273,** 765
Is prostacyclin a circulating anti-coagulant? *news and views,* (Dollery C. T. and Hensby C. N.) **273,** 706
Prostacyclin is circulating hormone (Moncada S., Korbut R., Bunting S. and Vane J. R.) **273,** 767
Direct evidence of two types of β adrenoreceptor binding site in lung tissue (Barnett D. B., Rugg E. L. and Nahorski S. R.) **273,** 166
Lung disease. Pulmonary bronchiolar alkylation and necrosis by 3-methylfurane a naturally occurring potential atmospheric contaminant (Boyd M. R., Statham C. N., Franklin R. B. and Mitchell J. R.) **272,** 270
Lung surfactant. Physical and physiological properties of dry lung surfactant (Morley C. J., Bangham A. D., Johnson P., Thorburn G. D. and Jenkin G.) **271,** 162
Luteinising hormone. Bromocriptine-induced inhibition of plasma dopamine, noradrenaline and adrenaline responses to LH-RF (Van Loon G. R.) **275,** 331
Met-enkephalin inhibits *in vitro* dopamine-induced LHRH release from mediobasal hypothalamus of male rats (Rotsztejn W. H., Drouva S. V., Pattou E. and Kordon C.) **274,** 281
Sensitisation of pituitary cells to luteinising hormone releasing hormone by clomiphene citrate *in vitro* (Hsueh A. J. W., Erickson G. F. and Yen S. S. C.) **273,** 57
Lyman alpha. Intensity of interstellar Lyman alpha (Draine B. T. and Salpeter E. E.) **271,** 730
Lymphocyte. Mycoplasma capping on lymphocyte (Stanbridge E. J. and Weiss R. L.) **276,** 583
Scanning electron microscopy and the surface morphology of human lymphocytes, *review article,* (Routh S., Newell D., Polliac A., Alexander E. and Lin P-S.) **273,** 15
Is protein synthesis necessary for the commitment of lymphocyte transformation? (Milner J.) **272,** 628
The Lymphocyte (Marchalonis J. J. *editor*) *book review by* Heath T. D. **272,** 193
Lymphocyte differentiation. A new Thy-1 alloantigen as a temporal marker of T lymphocyte differentiation (Thomas D. B., Calderon R. A. and Blaxland L. J.) **275,** 711
Lymphocyte inhibitor. Is thymus-derived lymphocyte inhibitor a polyamine? (Rijke E. O. and Ballieux R. E.) **274,** 804
Lymphocyte: Suppressor. HLA DR specific human suppressor lymphocytes generated by repeated *in vitro* sensitisation against allogeneic cells (Sasportes M., Fradelizi D. and Dausset J.) **276,** 502
Lymphoma. No evidence for foreign H-2 specificities on the EL4 mouse lymphoma (Flaherty L. and Rinchik E.) **273,** 52
Lymphoma: Murina B cell. Novel type of murine B-cell lymphoma (Lanier L. L., Lynes M., Haughton G. and Wettstein P. J.) **271,** 554
Lysosomal storage disease. Liposomes in the therapy of lysosomal storage diseases, *news and views,* (Gregoriadis G.) **275,** 695
Lysosome. Lysosomes: A Laboratory Handbook (Dingle J. T. *editor*) *book review by* Allison A. C. **271,** 191
Macaque monkey. Lid closure and refractive error in macaque monkeys (von Noorden G. K. and Crawford M. L. J.) **272,** 53
Macrofibril. Assembly of stratum corneum basic protein and keratin filaments in macrofibrils (Dale B. A., Holbrook K. A. and Steinert P. M.) **276,** 729
Macrophage. Activated macrophages kill tumour cells by releasing arginase (Currie G. A.) **273,** 758
Pharmacological control of prostaglandin and thromboxane release from macrophages (Brune K., Glatt M., Kälin H. and Peskar B. A.) **274,** 261
Induction of macrophage production and proliferation by a purified colony stimulating factor (Stanley E. R., Chen D.-M., and Lin H.-S.) **274,** 168
Madagasca. Conservation in Madagascar, *news,* (Jolly A.) **275,** 586
Magat M. *obituary* (Magat M.) **275,** 573
Magellanic Cloud. IUE observations of Large Magellanic Cloud members and detection of the 2,200 Å feature (Nandy K. and Morgan D. H.) **276,** 478
Magellanic Clouds. Carbon and M-type giant stars in the Magellanic Clouds (Blanco B. M., Blanco V. M. and McCarthy M. F.) **271,** 638
Magma. Rising magma, *news and views,* (Smith P. J.) **274,** 117
Magma rheology. Field measurements of the rheology of lava (Pinkerton H. and Sparks R. S. J.) **276,** 383
Magma: Ultramafic. Derivation of K-rich ultramafic magmas from a peridotitic mantle source (Edgar A. D. and Condliffe E.) **275,** 639
Magnesium. Calcium and magnesium ions and the regulation of multiplication in normal and transformed cells (McKeehan W. L. and Ham R. G.) **275,** 756
Effects of $[Ca^{2+}]$ and $[Mg^{2+}]$ on the decay of miniature endplate currents (Cohen I. and Van der Kloot W.) **271,** 77
Magnetic field. Alfvén waves generated by an inverted plasma energy distribution (Hughes W. J., Southwood D. J., Mauk B., McPherron R. L. and Barfield J. N.) **275,** 43
How to locate the electrically conducting fluid core of a planet from external magnetic observations (Hide R.) **271,** 640
Measurement of magnetic fields in a tokamak using laser light scattering (Forrest M. J., Carolan P. G. and Peacock N. J.) **271,** 718
Megagauss magnetic fields in laser-produced plasmas, *news and views,* (Key M. H.) **276,** 210
Magnetic field in the primitive solar nebula (Levy E. H.) **276,** 481
Magnetic field detection. Magnetic field detection is distinct from light detection in the invertebrates *Tenebrio* and *Talitrus* (Arendse M. C.) **274,** 358
Magnetic field generation. Magnetic field generation in Electrically-Conducting fluids (Moffatt H. K.) *book review by* Hide R. **273,** 322
Magnetic resonance spectroscopy. Measurement of thermal maturation of petroleum by proton magnetic resonance spectroscopy (Alexander R., Kagi R. I. and Woodhouse G. W.) **276,** 598
Magnetic storm. Equatorial irregularity belt and its movement during a magnetic storm (Vats H. O., Chandra H., Deshpande M. R., Rastog R. G., Murthy B. S., Janve A. V., Rai R. K., Singh M., Gurm H. S., Jain A. R., Patwari V. M. and Subbarao B. S.) **272,** 345
Power harmonic radiation enhancement during the sudden commencement of a magnetic storm (Hayashi K., Oguti T., Watanabe T., Tsuruda K., Kokubun S. and Horita R. E.) **275,** 627
Magnetic structure. New magnetic structures in the light rare earth metals, *news and views,* (Palmer S. B.) **275,** 367
Magnetism. Can magnetic order and superconductivity coexist? *news and views,* (Coles B. R.) **276,** 563
Magnetosphere. ARAKS—Controlled or puzzling experiment? (Cambou F., Lavergnat J., Migulin V. V., Morozov A. I., Paton B. E., Pellat R., Pyatsi A. Kh., Rème H., Sagdeev R. Z., Sheldon W. R. and Zhulin I. A.) **271,** 723
Does Mars have a magnetosphere? *news and views,* (Johnstone A.) **272,** 399
Energetic oxygen ions in the magnetosphere, *news and views,* (Young D. T.) **271,** 303
Geomagnetic Diagnosis of the Magnetosphere (Nishida A.) *book review by* Dungey J. W. **276,** 740
Geos Identification of natural magnetospheric emissions (Christiansen P., Gough P., Martelli G., Bloch J.-J., Cornilleau N., Etcheto J., Gendrin R., Jones D., Béghin C. and Décréau P.) **272,** 682
Modulational instability of whistler-mode signals (Shukla P. K.) **274,** 874
Plasma waves in the magnetosphere, *review article,* (Southwood D. J.) **271,** 309
The significance of magnetospheric research for progress on astrophysics (Fälthammar C.-G., Akasofu S.-I. and Alfvén H.) **275,** 185
Maize. C Content of human collagen as a measure of prehistoric diet in woodland North America (van der Merwe N. J. and Vogel J. C.) **276,** 815
Major histocompatibility complex. Heavy HLA-DR (Ia) antigen chain is controlled by the MHC region (Klareskog L., Rask L., Fohlman J. and Peterson P. A.) **275,** 762
Influence of the major histocompatibility complex on lymphocyte interactions in antibody formation (Waldmann H., Pope H., Brent L. and Bighouse K.) **274,** 166
Mapping of *H-2* genes associated with T cell-mediated cytotoxic responses to SV40-tumour-associated specific antigens (Pfizenmaier K., Trinchieri G., Solter D. and Knowles B. B.) **274,** 691
Partial N-terminal amino acid sequence of rat transplantation antigens (Blankenhorn E. P., Cecka J. M., Goetze D. and Hood L.) **274,** 90
Malaria. Autoimmune and polyclonal B cell response during murine malaria (Rosenberg Y. J.) **274,** 170
Cellular mechanism for the protective effect of haemoglobin S against *P. falciparum* malaria (Pasvol G., Weatherall D. J. and Wilson R. J. M.) **274,** 701
Cultivation of malarial parasites, *review article,* (Trager W. and Jenson J. B.) **273,** 621
Current problems in the control of mosquitoes, *review article,* (Busvine J. R.) **273,** 604
Malaria, piroplasmosis and endotoxin, *news and views,* (Cox F. E. G.) **274,** 312
Mosquitos, Malaria and Man: A History of the Hostilities since 1880 (Harrison G.) *book review by* Bruce-Chwatt L. J. **276,** 140
Stage-specific antigens on the surface membrane of sporozoites of malaria parasites (Nardin E. H. and Nussenzweig R. S.) **274,** 55
Malic enzyme. Effect of gene dosage on expression of mitochondrial malic enzyme activity in the mouse (Bernstine E. G., Russell L. B. and Cain C. S.) **271,** 748
Malicenzyme. Effect of gene dosage on expression of mitochondrial malic enzyme activity in the mouse (Bernstine E. G., Russell L. B. and Cain C. S.) **271,** 748
Malignancy. Cell surface market for malignancy, *news and views,* (Yamada M.) **273,** 335
Malpighian tubule. Ecdysterone switches off fluid secretion at pupation in insect Malpighian tubules (Ryerse J. S.) **271,** 745
Ecdysterone switches off fluid secretion at pupation in insect

Malpighian tubules (Ryerse J. S.) **271**, 745

Mammal. Concepts in Mammalian Embryogenesis (Sherman M. I. *editor*) *book review by* Snow M. H. L. **273**, 79

Mammary development. Mammary tumour virus and casein gene transcription during mouse mammary development (Pauley R. J., Rosen J. M. and Socher S. H.) **275**, 455

Mammoth. Study begins on baby mammoth, *news*, **273**, 483

Man. Artificial Intelligence and Natural Man (Boden M.) *book review by* Meltzer B. **272**, 651

Manganese. Desert varnish: evidence for cyclic deposition of manganese (Perry R. S. and Adams J. B.) **276**, 489

Manganese deposit. Growth rate of manganese nodule measured with ^{10}Be and ^{26}Al (Guichard F., Reyss J-L. and Yokoyama Y.) **272**, 155

Man-made mouse. The man-made mouse, *news and views*, (Heath J. K.) **271**, 610

Mannosidase. Mitogenic effect of α-mannosidase on lymphocytes (Paus E.) **272**, 452

Manpower. People before pounds, say SRC, *news*, **276**, 311

Mantle. Anomalous upper mantle structure beneath the Cretaceous Fogo seamounts indicated by P-wave reflection delays (Stewart I. C. F. and Keen C. E.) **274**, 788

Derivation of K-rich ultramafic magmas from a peridotitic mantle source (Edgar A. D. and Condliffe E.) **275**, 639

Exploration of the continental basement by seismic reflection profiling, *review article*, (Oliver J.) **275**, 485

Formation of discrete islands in linear island chains (Skilbeck J. N. and Whitehead Jr J. A.) **272**, 499

Formation of the early Earth regolith (Nussinov M. D. and Vekhov A. A.) **275**, 19

Ge/Si and Ga/Al variations along the Reykjanes Ridge and Iceland (Argollo R. M. de and Schilling J.-G.) **276**, 24

Origin of chlorine and bromine in the oceans (Schilling J.-G., Unni C. K. and Bender M. L.) **273**, 631

Punctuated evolution of tectonic style (Hargraves R. B.) **276**, 459

Rising magma, *news and views*, (Smith P. J.) **274**, 117

Deep seismic zone as an upper mantle reflector of body waves (Fukao Y., Kanjo K. and Nakamura I.) **272**, 606

Mantle ^{40}Ar/^{36}Ar trapped in Cretaceous deep-sea basalts (Takaoka N. and Nagao K.) **276**, 491

Regional structure and geodynamics of the upper mantle beneath the Massif Central (Coisy P. and Nicolas A.) **274**, 429

Sampling and observation of oceanic mantle and crust on Gorringe Bank (Auzende J-M., Olivet J-L., Charvet J., Le Lann A., Le Pichon X., Monteiro J. H., Nicolas A. and Ribeiro A.) **273**, 45

Sm-Nd isotopic investigation of Isua supracrustals and implications for mantle evolution (Hamilton P. J., O'Nions R. K., Evensen N. M., Bridgwater D. and Allaart J. H.) **272**, 41

Mantle isochron. Rb-Sr mantle isochrons and variations in the chemistry of Gondwanalands lithosphere (Brooks C. and Hart S. R.) **271**, 220

Mantle peridotite. Origin of olivine subgrain boundaries in mantle peridotites (Fleet M. E.) **275**, 48

Maoris. Botanical evidence linking the New Zealand Maoris with New Caledonia and the New Hebrides (Stevenson G.) **276**, 704

Map. Large circles on the Earth's surface, *matters arising*, (Isachsen Y. W.) **276**, 535

Large circles on the Earth's surface—Reply, *matters arising*, (Saul J. M.) **276**, 535

Margin. The Ocean Basins and Margins (Nairn A. E. M. *editor*) *book review by* Vine F. J. **274**, 518

Marginal basin. Greenstone belts as ancient marginal basins or ensialic rift zones (Groves D. I., Archibald N. J., Bettenay L. F. and Binns R. A.) **273**, 460

Marine ecology. Coral-reef area and the contributions of reefs to processes and resources of the world's oceans (Smith S. V.) **273**, 225

Marine Ecology A Comprehensive Integrated Treatise on Life in the Oceans and Coastal Waters (Kinne O. *editor*) *book review by* Blaxter J. H. S. **272**, 381

Marine sediment. Organic ^{14}C activity in an abyssal marine sediment (Williams P. M., Stenhouse M. C., Druffel E. M. and Koide M.) **276**, 698

Marinol S. Anti-relativist draws others into the whirlpool, *news*, **271**, 296

Mars. Chemical interpretation of Viking Lander 1 life detection experiment (Ballou E. V., Wood P. C., Wydeven T., Lehwalt M. E. and Mack R. E.) **271**, 644

Excess ^{15}N in the martian atmosphere and cosmic rays in the early Solar System (Yanagita S. and Imamura M.) **274**, 234

Germs from Mars? *news and views*, (Zuckerman A. J.) **276**, 326

Limits to the expansion of Earth Moon Mars and Mercury and to changes in the gravitational constant (McElhinny M. W., Taylor S. R. and Stevenson D. J.) **271**, 316

Model of the fine-grain component of martian soil based on Viking lander data (Nussinov M. D., Chernyak Y. B. and Ettinger J. L.) **274**, 859

Morphology of martian rampart craters (Mouginis-Mark P. J.) **272**, 691

NASA is to investigate Martian "White Rock", *news*, **276**, 434

New light on Phobos, the inner satellite of Mars, *news and views*, (Fielder G.) **271**, 613

Photocatalytic oxidation of organic compounds on Mars (Chun S. F. S., Pang K. D., Cutts J. A. and Ajello J. B.) **274**, 875

Primitive atmosphere and implications for the formation of channels on Mars (Yung Y. L. and Pinto J. P.) **273**, 730

Solar wind sputtering of the martian atmosphere (Haff P. K., Switkowski Z. E. and Tombrello T. A.) **272**, 803

Does Mars have a magnetosphere? *news and views*, (Johnstone A.) **272**, 399

Marsh mallow. Marsh mallow grows in Britain (Temple R. K. G.) **275**, 8

Marsupial. Marsupial trophoblast and mammalian evolution, *matters arising*, (Taylor J. M. and Padykula H. A.) **271**, 588

The Biology of Marsupials (Stonehouse B. and *editor*) *book review by* Tindale-Biscoe H. **271**, 592

Martensite. On the nucleation of the martensite transformation (Galligan J. M. and Garosshen T.) **274**, 674

Mass Spectroscopy. Principles of Field Ionization and Field Desorption Mass Spectroscopy (Beckey H. D.) *book review by* Maccoll A. **273**, 410

Massif Central. Regional structure and geodynamics of the upper mantle beneath the Massif Central (Coisy P. and Nicolas A.) **274**, 429

Thermoluminescence dating of sediment baked by lava flows of the Chaine des Puys (Huxtable J., Aitken M. J. and Bonhommet N.) **275**, 207

Mast cell. Calcium-dependent protein phosphorylation during secretion by exocytosis in the mast cell (Sieghart W., Theoharides T. C., Alper S. L., Douglas W. W. and Greengard P.) **275**, 329

Release of vasoactive intestinal polypeptide in mast cells by histamine liberators (Cutz E., Chan W., Track N. S., Goth A. and Said S. I.) **275**, 661

Materials science. Plasma on the wall at Culham, *news and views*, (Thompson M. W.) **272**, 668

Treatise on Materials Science and Technology (Schultz J. M. *editor*) *book review by* Calvert P. **272**, 292

Maternal effect. Maternal effect in early development (Morriss G. M.) **276**, 17

Mathematics. Ancestral figure of computing (Dubbey J. M.) *book review by* Hyman A. **272**, 779

Mathematics. The Muslim Contribution to Mathematics (Al-Daffa A. A.) *book review by* Whiteside D. T. **273**, 78

Mating. Rare male mating advantage, *matters arising*, (Spiess E. B. and Ehrman L.) **272**, 188

Rare male mating advantage—Reply *matters arising*, (Donald P. O.) **272**, 189

Mating call. Ultrasonic vocalisations facilitate sexual behaviour of female rats (McIntosh T. K., Barfield R. J. and Geyer L. A.) **272**, 163

Mating experience. Male mating experience and competitive courtship success in *Drosophila melanogaster* (Markow T. A., Quaid M. and Kerr S.) **276**, 821

Matter. Cooperative Effects in Matter and Radiation (Bowden C. M., *editor*) *book review by* Knight P. **272**, 742

Dynamic measurement of matter creation (Ritter R. C., Gillies G. T., Rood R. T. and Beams J. W.) **271**, 228

Dynamic measurement of matter creation and Earth expansion (Wesson P.) **273**, 572

Maturation. Hormone-induced release of intracellular Ca^{2+} triggers meiosis in starfish oocytes (Moreau M., Guerrier P., Doree M. and Ashley C. C.) **272**, 251

Measurement. Uniform units, *news*, (Mellanby K.) **271**, 604

Medical education. Medical education and biomedical research: uneasy equilibrium, *news*, (Silver G. A.) **271**, 392

Medical entomology. Status of biocontrol in medical entomology, *news and views*, **276**, 669

Medicinal plant. Marsh mallow grows in Britain (Temple R. K. G.) **275**, 8

Medicinal Plants. Major Medicinal Plants Botany, Culture and Uses (Morton J. F.) *book review by* Angel R. **273**, 79

Medicine. Pakistan needs indigenous medicine, *leading article*, **275**, 1

Molecular Structure of Human Chromosomes: Chromosomes in Biology and Medicine (Yunis J. Y. *editor*) *book review by* Pontecorvo G. **271**, 389

Mediterranean. A Glacial Mediterranean (Thiede J.) **276**, 680

Ice-Age palaeo-oceanography of the Mediterranean, *news and views*, (Shackleton N. J.) **276**, 667

The Ocean Basins and Margins (Nairn A. E. M. *editor*) *book review by* Vine F. J. **274**, 518

Mediterranean pollution: one man's optimism, *news*, **271**, 200

Megakaryocyte. Electrical responses by guinea pig megakaryocytes (Miller J. L., Sheridan J. D. and White J. G.) **272**, 643

Meiosis. Cytological detection of crossing-over in BUdR substituted meiotic chromosomes using the fluorescent plus Giemsa technique (Tease C.) **272**, 823

The number of ancestral genes contributing to a sample of B8 alleles (Thompson E. A.) **272**, 288

Hormone-induced release of intracellular Ca^{2+} triggers meiosis in starfish oocytes (Moreau M., Guerrier P., Doree M. and Ashley C. C.) **272**, 251

Meiosis Hormone: Steroid. Steroid-induced meiotic division in *Xenopus laevis* oocytes: surface and calcium, *review article*, (Baulieu E.-E., Godeau F., Schorderet M. and Schorderet-Slatkine S.) **275**, 593

Melanin. 5,6-Dihydroxyindole is a melanin precursor showing potent cytotoxicity (Pawelek J. M. and Lerner A. B.) **276**, 627

Melanoma. Selection and altered properties of brain-colonising metastatic melanoma (Brunson K. W., Beattie G. and Nicolson G. L.) **272**, 543

Melatonin receptor. Evidence for a cytoplasmic melatonin receptor (Cohen M., Roselle D., Chabner B., Schmidt T. J. and Lippman M.) **274**, 894

Melting. Anisotropy of melting for cubic metals (Chatterjee B.) **275**, 203

Meltwater. 'Unmixing' of the deep-sea record and the deglacial meltwater spike, *matters arising*, (Lockwood J. G.) **272**, 188

Membrane. A direct method for determination of membrane electron density profiles on an absolute scale (Franks N. P., Arunachalam T. and Caspi E.) **276**, 530

Behavioural mutants of *Paramecium caudatum* with defective membrane electrogenesis (Takahashi M. and Naitoh Y.) **271**, 656

Cell Membranes and Ion Transport: Integrated Themes in Biology (Hall J. L. and *editor*) *book review by* Michell B. **272**, 96

Colicin K acts by forming voltage-dependent channels in phospholipid bilayer membranes (Schein S. J., Kagan B. L. and Finkelstein A.) **276**, 159

Complementation analysis of hormone-sensitive adenylate cyclase (Naya-Vigne J., Johnson G. L., Bourne H. R. and Coffino P.) **272**, 720

Membrane. Cytochalasin Binduces polarisation of plasma membrane components and actin in transformed cells (Sundqvist K. G., Otteskog P. and Ege T.) **274**, 915

Membrane. Interaction of cation fluxes in gramicidin A channels in lipid bilayer membranes (Schagina L. V., Grinfeldt A. E. and Lev A. A.) **273**, 243

Ionic channel formation in a living cell membrane (Krawczyk S.) **273**, 56

Lipid-dependent and phloretin-induced modifications of dipicrylamine adsorption by bilayer membranes (Wang C.-C. and Bruner L. J.) **272**, 268

Mechanism of non-adhesiveness of endothelial and epithelial surfaces (Vasiliev J. M. and Gelfand I. M.) **274**, 710

Membrane leakiness after viral infection and a new approach to the development of antiviral agents (Carrasco L.) **272**, 694

Membrane Transport Processes (Hoffman J. F., *editor*) *book review by* Baker P. F. **274**, 829

Neutron diffraction studies on selectively deuterated phospholipid bilayers (Büldt G. Gally H. U., Seelig A., Seelig J. and Zaccai G.) **271**, 182

Potassium channels in the apical membrane of the toad gallbladder (Driessche W. V. and Gogelein H.) **275**, 665

Stimulation of brain membrane protein phosphorylation by calcium and an endogenous heat-stable protein (Schulman H. and Greengard P.) **271**, 478

Cholesterol oxidase as a probe for studying membrane organisation (Patzer E. J., Wagner R. R. and Barenholz Y.) **274**, 394

Membrane: Bilayer. Solvent-depleted bilayer membranes from concentrated lipid solutions (Waldbillig R. and Szabo G.) **272**, 839

Membrane channel. Change in synaptic channel gating during neuromuscular development (Sakmann B. and Brenner H. R.) **276**, 401

Channels in membranes, *news and views*, (Saunders V. A.) **276**, 116

Quantum jumps of conductance during formation of membrane channels at cell-cell junction (Loewenstein W. R., Kanno Y. and Socolar S. J.) **274**, 133

Membrane conductance. Barbiturate-induced slow outward currents in *Aplysia* neurones (Cote I. L., Zbicz K. L. and Wilson W. A.) **274**, 594

GABA-induced conductance fluctuations in cultured spinal neurones (McBurney R. N. and Barker J. L.) **274**, 596

Membrane noise and conductance increase during single spermatozoon-egg interactions (Dale B., De Felice L. J. and Taglietti V.) **275**, 217

Pharmacological evidence for 'fast' sodium channels in nonspiking neurones (Lowe D. A., Bush B. M. H. and Ripley S. H.) **274**, 289

Membrane curvature. Rapid transbilayer diffusion of 1,2-diacylglycerol and its relevance to control of membrane curvature (Allan D., Thomas P. and Michell R. H.) **276**, 289

Membrane fluidity. Enzymatic methylation of phosphatidylethanolamine increases erythrocyte membrane fluidity (Hirata F. and Axelrod J.) **275**, 219

Mode of coupling between hormone receptors and adenylate cyclase elucidated by modulation of membrane fluidity (Rimon G., Hanski E., Braun S. and Levitzki A.) **276**, 394

Membrane fusion. Does Ca^{2+} cause fusion or lysis of unilamellar lipid vesicles? (Ginsberg L.) **275**, 758

Effects of fusogenic agent on membrane structure of erythrocyte ghosts and the mechanism of membrane fusion (Cullis P. R. and Hope M. J.) **271**, 672

Freeze-fracture view of membrane fusion, *news and views*, (Shotton D.) **272**, 16

Membrane insertion. Glycosylation is not necessary for membrane insertion and cleavage of Semliki Forest virus membrane proteins (Garoff H. and Schwarz R. T.) **274**, 487

Membrane: Microsomal. Protein transfer across microsomal membranes reassembled from separated membrane components (Warren G. and Dobberstein B.) **273**, 569

Membrane movement. Membrane movements and microfilaments, *news and views*, (Bray D.) **273**, 265

Membrane: Muscle cell. Electrophoretic movement and localisation of acetylcholine receptors in the embryonic muscle cell membrane (Orida N. and Poo M-m) **275**, 31

Membrane: Plasma. Alterations in the surface properties of cells responsive to nerve growth factor (Schubert D., LaCorbiere M., Whitlock C. and Stallcup W.) **273**, 718

Membrane potential. Effects of cyanine dye membrane probes on cellular properties (Miller J. B. and Koshland Jr D. E.) **272**, 83

Electrical responses by guinea pig megakaryocytes (Miller J. L., Sheridan J. D. and White J. G.) **272**, 643

Horizontal cells influence membrane potential of biopolar cells in the retina of the turtle (Marchiafava P. L.) **275**, 141

Membrane: Target cell. Fusion of Sendai virus with the target cell membrane is required for T cell cytotoxicity (Gething M.-J., Koszinowski U. and Waterfield M.) **274**, 689

Membrane transport. Dimeric β-cyclodextrin complexes may mimic membrane diffusion transport (Stezowski J. J., Jogun K. H., Eckle E. and Bartels K.) **274**, 617

Membrane: Tumour cell. Differences in fluidity between bilayer halves of tumour cell plasma membranes (Schroeder F.) **276**, 528

Memory. Concealed inefficiency of late-night study (Monk T. H. and Folkard S.) **273**, 296

Elements of the Behavioural Code (DeFeudis F. V. and) *book review by* Rosenzweig M. **275**, 256

Human Memory: Theory, Research and Individual Difference (Eysenck M. W.) *book review by* Broadbent D. E. **272**, 383

Learning and Memory (Wickelgren W. A.) *book review by* Broadbent D. **272**, 290

Memory in monkeys severely impaired by combined but not by separate removal of amygdala and hippocampus (Mishkin M.) **273**, 297

Menstrual cycle. Artificial menstrual cycles, behaviour and the role of androgens in female rhesus monkeys (Michael R. P., Richter M. C., Cain J. A., Zumpe D. and Bonsall R. W.) **275**, 439

Mental retardation. Cassava may lead to mental retardation, *news*, (Dorozgnski A.) **272**, 121

Mercury. Limits to the expansion of Earth Moon Mars and Mercury and to changes in the gravitational constant (McElhinny M. W., Taylor S. R. and Stevenson D. J.) **271**, 316

Mercury in the Greenland Ice Sheet (Appelquist H., Jensen K. O., Sevel T. and Hammer C.) **273**, 657

Collection of atomic mercury by electrostatic precipitations (Newman O. M. G. and Palmer D. J.) **275**, 526

Gaseous emissions of mercury from an aquatic vascular plant (Kozuchowski J. and Johnson D. L.) **274**, 468

Mercury Contamination: A Human Tragedy (D'Itri P. A. and) *book review by* Magos L. **271**, 287

Mercury in fish and waters of the Irish Sea and other United Kingdom fishing grounds (Gardner D.) **272**, 49

Transient spectra due to mercury atoms in aqueous solution (Fujiwara K., Umezawa Y., Fujiwara S., Fuwa K., Shima N. and Kamimura H.) **276**, 47

Mesozoic. Seismic evidence for sedimentary troughs of Mesozoic age on the Hebridean continental margin (Jones E. J. W.) **272**, 789

Metabolic deactivation. Metabolic deactivation of mutagens in the *Salmonella*-microsome test (De Flora S.) **271**, 455

Metabolism. α- And β-adrenoreceptor blockers have opposite effects on energy metabolism of the central auditory system

(Savaki H. E., Kadekaro M., Jehle J. and Sokoloff L.) **276,** 521

Metabolism: Carbohydrate. Feeding, blood glucose and plasma insulin of mice at dusk (Petersen S.) **275,** 647

Metal. Electrical Properties of Metals and Alloys (Dugdale J. S., *editor*) *book review by* Rosenberg H. M. **272,** 106

Helium gas bubble lattices in face-centred-cubic metal (Johnson P.B. and Mazey D. J.) **276,** 595

Liquid Metals (Shimoji M.) *book review by* Enderby J. E. **273,** 250

Metal: cubic. Anisotropy of melting for cubic metals (Chatterjee B.) **275,** 203

Metal enrichment. Metal enriched sediments from the TAG Hydrothermal Field (Scott M. R., Scott R. B., Morse J. W., Betzer P. R., Butler L. W. and Rona P. A.) **276,** 811

Metal: Rare earth. New magnetic structures in the light rare earth metals, *news and views,* (Palmer S. B.) **275,** 367

Metal sulphide. Mineral Chemistry of Metal Sulphides (Vaughan D. J. and) *book review by* Love L. G. **275,** 570

Metal tolerance. Lead detoxification by a copper-tolerant isopod (Brown B. E.) **276,** 388

Metal tritide. Distribution of helium in metal tritides (Bowman R. C., Jr) **271,** 531

Metallic alloy glasses. A new structural model for transition metal–metalloid glasses (Gaskell P. H.) **276,** 484

Metallic hydrogen. Metallic hydrogen, *news and views,* (Cussacic N.E.) **276,** 758

Metal-Ligand. Atlas of Metal-Ligand Equilibria in Aqueous Solution (Kragten J.) *book review by* Phillips C. S. G. **273,** 82

Metaphysics. Purpose in a World of Chance (Thorpe W. H.) *book review by* Young J. Z. **274,** 927

Metarhodopsin. Visual response in barnacle photoreceptors is not initiated by transitions to and from metarhodopsin (Atzmon Z., Hillman P. and Hochstein S.) **274,** 74

Metazoa. Did emerging continents trigger metazoan evolution? (Knoll A. H.) **276,** 701

Precambrian geological history and the origin of the Metazoa (LaBarbera M.) **273,** 22

Met-enkephalin. Met-enkephalin inhibits *in vitro* dopamine-induced LHRH release from mediobasal hypothalamus of male rats (Rotsztejn W. H., Drouva S. V., Pattou E. and Kordon C.) **274,** 281

Meteor. Anomalous LF radiowave records associated with meteoric ionisation (Baggaley W. J. and Bennett R. G. T.) **272,** 650

Dissociative recombination and meteor trains, *matters arising,* (Poole L. M. G.) **274,** 624

Meteor radar. Meteor radar rates, geomagnetic activity and solar wind sector structure (Lindblad B. A.) **273,** 732

Meteorite. Acid hydrolysis and α-hydroxy acids in meteorites, *matters arising,* Mizutani H. **276,** 738

FeNi superlattice formation by corrosion of Santa Catharina meteorite (Bowles J. S., Hatherley M. and Malin A. S.) **276,** 168

Structure of taenite in two iron meteorites (Albertsen J. F., Jensen G. B. and Knudsen J. M.) **273,** 453

The origin and relative abundances of C, N and the noble gases on the terrestrial planets and in meteorites (Bogard D. D. and Gibson Jr, E. K.) **271,** 150

Limited response of the K–Ar system to the Nordlinger Ries giant meteorite impact (Jessberger E. K., Staudacher T., Dominik B., Kirsten T. and Schaeffer O. A.) **271,** 338

Meteorite: Allende. The Allende meteorite: evidence for a new cosmothermometer based on Ti^{3+}/Ti^{4+} (Haggerty S. E.) **276,** 221

Meteorite: Estacado. Thermoluminescence and terrestrial age of the Estacado meteorite (McKeever S. W. S. and Sears D. W.) **275,** 629

Meteorology. Meteorology over the tropical oceans, *news and views,* (Shaw D. B.) **276,** 445

The History of Meteorology to 1800 (Howard Frisinger H.) *book review by* Manley G. **273,** 409

Methane. Circumstellar methane in the infrared spectrum of IRC + 10° 216 (Hall D. N. B. and Ridgway S. T.) **273,** 282

Methane thiol. Production of methane and carbon dioxide from methane thiol and dimethyl sulphide by anaerobic lake sediments (Zinder S. H. and Brock T. D.) **273,** 226

Methanogenic bacteria. Methanogenic bacteria, *news and views,* (Steitz J. A.) **273,** 10

Methanogenic bacteria, *news and views,* (Fox G. E. and Woese C. R.) **273,** 101

Methanogenic bacteria: a new primary kingdom? *news and views,* (Wilkinson J. F.) **271,** 707

Methotrexate. Methotrexate resistance by gene amplification, *news and views,* (Shields R.) **273,** 269

Methyl mercury. Methyl mercury and safety, *correspondence,* (Cummins J. E. and Nesbitt B. E.) **273,** 96

Methyladenine. Hormone-induced release of intracellular Ca^{2+} triggers meiosis in starfish oocytes (Moreau M., Guerrier P., Doree M. and Ashley C. C.) **272,** 251

Methylcholanthrene. Vulnerability of methylcholanthrein induced tumours to immunity aroused by syngeneic foetal cells (Medawar P. B. and Hunt R.) **271,** 164

Methylfurane. Pulmonary bronchiolar alkylation and necrosis by 3-methylfurane a naturally occurring potential atmospheric contaminant (Boyd M. R., Statham C. N., Franklin R. B. and Mitchell J. R.) **272,** 270

Methylmercuric chloride. Volatilisation of methylmercuric chloride by hydrogen sulphide, *matters arising,* (Deacon G. B.) **275,** 344

Mexican andesites. Strontium isotope evidence for petrogenesis of Mexican andesites (Moorbath S., Thorpe R. S. and Gibson I. L.) **271,** 437

Microbial ecology. Microbial Life in Extreme Environments (Kushner D. J.) *book review by* Pirt S. J. **276,** 426

Microbiology. Microbial biology—recent textbooks Meadows P. S. **272,** 92

Microbial Interactions (Reissig J. L. *editor*) *book review by* Ellwood D. C. **273,** 411

Microfilament. Membrane movements and microfilaments, *news and views,* (Bray D.) **273,** 265

Microfossil. A new microfossil assemblage from the Archaean of Western Australia (Dunlop J. S. R., Muir M. D., Milne V. A. and Groves D. I.) **274,** 676

Micropulsation. Micropulsations observed by whistler-mode transmissions (Rietveld M. T., Dowden R. L. and Amon L. E. S.) **276,** 165

Microscopy. Analytical and Quantitative Methods in Microscopy (Meek G. A. and *editor*) *book review by* Williams M. A. **271,** 190

Microtuble. GTPase activity at ends of microtubles (David-Pfeuty T., Laporte J. and Pantaloni D.) **272,** 282

Microtubule. 3',5'-cyclic AMP binds to and promotes polymerisation on platelet tubulin (Steiner M.) **272,** 834

Rings, MAPs and microtubules, *news and views,* (Burns R.) **273,** 709

Separate mRNAs code for tubulin subunits (Bryan R. N., Cutter G. A. and Hayashi M.) **272,** 81

Sliding microtubules, *news and views,* (Spencer M.) **273,** 593

Microtubule. Mitotic mechanism based on intrinsic microtubule behaviour (Margolis R. L., Wilson L. and Kiefer B. I.) **272,** 450

Microvillus. Preferential distribution of surface immunoglobulins on microvilli (de Petris S.) **272,** 66

Microwave background. Holes in the microwave background? *news and views,* (Birkinshaw M. and Gull S. F.) **274,** 111

Origin of pregalactic microwave background (Rees M. J.) **275,** 35

Microwave radiation. Microwaves may be damaging to health, says US report, *news,* **273,** 7

Mid-Atlantic Ridge. Photographic Atlas of the mid-Atlantic Ridge Valley (Ballard R. D. and) *book review by* Laughton A. S. **274,** 194

Midbrain. Neurophysiological basis of directional hearing in amphibia (Pettigrew A., Chung S-H. and Anson M.) **272,** 138

Middle ear. Dynamics of the amphibian middle ear (Chung S-H., Pettigrew A. and Anson M.) **272,** 142

Midway. Age of Midway revised, *news and views,* (Smith P. J.) **272,** 12

Migration. Sunset and the orientation of a nocturnal migrant bird (Moore F. R.) **274,** 154

Millikelvin research. Will detente kill millikelvin research? (McClintock P. V. E.) **276,** 117

Minced beef. Making mincemeat of our common language, *correspondence,* (Mellanby K.) **275,** 8

Mincemeat. Mincingly speaking, *correspondence,* (Jukes T. H.) **276,** 438

Making mincemeat of our common language, *correspondence,* (Mellanby K.) **275,** 8

Mind-body problem. Discussion on interactionism (Popper K. R. and) *book review by* Zangwill O. L. **272,** 770

Mineral alterations. Opaque mineral alterations states correlated with temperature in an active geothermal system (Abdel-Aal O. Y. and Hall J. M.) **272,** 239

Mineral Chemistry. Mineral Chemistry of Metal Sulphides (Vaughan D. J. and) *book review by* Love L. G. **275,** 570

Mineralogy. Physical Methods in Determinative Mineralogy (Zussman J. *editor*) *book review by* Strens R. G. J. **273,** 787

Minicells. Selective expression of transduced or cloned DNA in minicells containing plasmid pKB280 (Reeve J. N.) **276,** 728

Mini-insertion IS*2-6.* DNA Sequence of the mini-insertion IS*2-6* and its relation to the sequence of IS*2* (Ghosal D. and Saedler H.) **275,** 611

Mining. Red Sea muds ripe for exploitation, *news,* (Sardar Z.) **275,** 582

Minoan. Soils on Santorini at 1500BC (Davidson D. A.) **272,** 243

Minoan-IB. The Thera eruption and Late Minoan-IB destruction on Crete, *matters arising,* (Sparks R. S. J., Sigurdsson H. and Watkins N. D.) **271,** 91

Minsmere. Minsmere Portrait of a Bird Reserve (Axell H. and) *book review by* Perrins C. M. **271,** 96

M'Intosh, W. C. William Carmichael M'Intosh (Gunther A. E.) *book review by* Yonge C. M. **271,** 487

Miocene. Hominoid habitat shifts in the Miocene (Kennedy G. E.) **271,** 11

Phosphatic nodule beds in Victoria and the late Miocene–Pliocene eustatic event (Carter A. N.) **276,** 258

Dryopithecines from the Miocene of Saudi Arabia (Andrews P., Hamilton W. R. and Whybrow P. J.) **274,** 249

Fauna of fossil mammals from the Miocene of Saudi Arabia (Hamilton W. R., Whybrow P. J. and McClure H. A.) **274,** 248

Misonidazole. Ascorbate enhanced cytotoxicity of misonidazole (Josephy P. D., Palcic B. and Skarsgard L. D.) **271,** 370

Missile site. US plays hide-and-seek with Soviets on missile sites, *news,* **274,** 412

Mitchell P. A man driven by proticity, *news,* (Garland P.) **276,** 8

Mite. Evidence for the functional involvement of carotenoids in the photoperiodic reaction of spider mites (Veerman A. and Helle W.) **275,** 234

Mitochondion. Comparison of the evolution rates of cytosolic and mitochondrial aspartate aminotransferase (Sonderegger P. and Christen P.) **275,** 157

Mitochondrial respiration. Regulation of nitrate reduction by light, ATP and mitochondrial respiration in wheat leaves (Sawhney S. K., Naik M. S. and Nicholas D. J. D.) **272,** 647

Mitochondrion. A temperature-sensitive yeast mitochondrial mutant with altered cytochrome *c* oxidase subunit (Eccleshall T. R., Needleman R. B., Storm E. M., Buchferer B. and Marmur J.) **273,** 67

Forty years of plant mitochondriology, *news and views,* (Moore A. L.) **275,** 14

The importance of CO_2 for Ca^{2+} uptake by some mitochondria (Harris E. J.) **274,** 820

Mitogen. Mitogenic effect of α-mannosidase on lymphocytes (Paus E.) **272,** 452

Mitogenic stimulation of the host enhances susceptibility to scrapie (Dickinson A. G., Fraser H., McConnell I. and Outram G. W.) **272,** 54

Mitogen receptor. Receptor interactions on the membrane of resting and activated B cell (Forni L. and Coutinho A.) **273,** 304

Mitogenic factor. Stimulation of DNA synthesis by tumour promoter and pure mitogenic factors (Dicker P. and Rozengurt E.) **276,** 723

Mitosis. Aphidicolin prevents mitotic cell division by interfering with the activity of DNA polymerase-α (Ikegami S., Taguchi T., Ohashi M., Oguro M., Nagano H. and Mano Y.) **275,** 458

Induced intragenic recombination in yeast can occur during the G_1 mitotic phase (Fabre F.) **272,** 795

Mitotic coincidence of chick embryo hepatocytes *in vivo* and the transition probability model of the cell cycle (Domingo J., Serratosa J., Vidal C. and Rius E.) **273,** 50

Mitotic mechanism based on intrinsic microtubule behaviour (Margolis R. L., Wilson L. and Kiefer B. I.) **272,** 450

Mixed ligand chelate. Mixed ligand chelate therapy for plutonium and cadmium poisoning (Schubert J. and Derr S. K.) **275,** 311

Mixed lymphocyte reaction. Incorporation of murine MHC antigens into liposome and their effect in the secondary mixed lymphocyte reaction (Curman B., Ostberg L. and Peterson P. A.) **272,** 545

Mixing. Catastrophic events in a surface mixed layer (Dillon T. M. and Caldwell D. R.) **276,** 601

Mizuho Plateau. Possible causes of ice sheet thinning in the Mizuho Plateau (Mae S. and Naruse R.) **273,** 291

Molecular biology. How molecular biology won its place in the USSR, *news,* **276,** 662

Insect Molecular biology on Crete, *news and views,* (Gehring W. J.) **275,** 364

Molecular Biophysics. Molecular Biophysics (Volkenstein M. V.) *book review by* Staynov D. Z. **274,** 98

Molecular collision. Dynamics of Molecular Collisions (Miller W. H. *editor*) *book review by* Buckingham A. D. **271,** 97

Molecular force. Direct measurement of molecular forces (Derjaguin B. V., Rabinovich Y. I. and Churaev N. V.) **272,** 313

Molecular morphology. Computer simulation of the solvent structure around biological macromolecules (Hagler A. T. and Moult J.) **272,** 222

Molecular morphology in semicrystalline polymers (Flory P. J. and Do Yeung Yoon) **272,** 226

Molecular physics. Atomic and molecular physics (Weissbluth M.) *book review by* Eissner W. **276,** 852

Molecular Structure. Molecular Structures and Dimensions: Guide to the Literature, 1935-76 (Kennard O., *editor*) *book review by* Sim G. **274,** 928

Size and symmetry, *news and views,* **274,** 17

X-ray crystal structure analysis of plastocyanin at 2.7Å resolution (Colman P. M., Freeman H. C., Guss J. M., Murata M., Norris V. A., Ramshaw J. A. M. and Venkatappa M. P.) **272,** 319

Molecular vibration. Internal Rotation and Inversion: An Introduction to Large Amplitude Motions in Molecules (Lister D. G.,) *book review by* Mills I. M. **276,** 305

Molecule. Long-range molecules, *news and views,* (Richards G.) **276,** 758

Molecule: Diatomic. Diatomic molecules Richards G. **275,** 676

Mollugo nudicaulis. Simultaneous occurrence of C_3 and C_4 photosynthesis in relation to leaf position in *Mollugo nudicaulis* (Raghavendra A. S., Rajendrudu G. and Das V. S. R.) **273,** 143

Mongolia. Special treatment for Cuba and Mongolia **271,** 700

Monkey. Living New World Monkeys (Hershkovitz P.) *book review by* Clutton-Brock T. H. **273,** 173

Monkeys prefer kin, *news and views,* (Krebs J.) **274,** 311

Monochromacy. Transient tritanopia experiment in blue cone monochromacy (Hansen E., Seim T. and Olsen B. T.) **276,** 390

Monocyte. Resorbing bone is chemotactic for monocytes (Mundy G. R., Varani J., Orr W., Gondek M. D. and Ward P. A.) **275,** 132

Monoplacophora. Recovery, behaviour and evolutionary implications of live Monoplacophora (Lowenstam H. A.) **273,** 231

Monsoon. Five-day oscillation in East African low-level jet (Asnani G. C.) **272,** 708

Wind shear in a monsoon depression (Raman C. R. V., Rao Y. P., Subramanian S. K. and Sheikh Z. E.) **276,** 51

Monsoon cyclogenesis. Indian summer monsoon cyclogenesis and its variability (Keshavamurty R. N., Satyan V. and Goswami B. N.) **274,** 576

Moon. A surface related component of iron metal in lunar samples? (Woodcock M. R., Pillinger C. T. and Stephenson A.) **276,** 697

Dissipation of tidal energy by Antarctic ice shelves (Doake C. S. M.) **275,** 304

Limits to the expansion of Earth Moon Mars and Mercury and to changes in the gravitational constant (McElhinny M. W., Taylor S. R. and Stevenson D. J.) **271,** 316

Lunar atmosphere past and present, *news and views,* (Hughes D. W.) **273,** 489

On recent lunar atmosphere (Chernyak Yu. B.) **273,** 497

Supernovae and lunar melting (Singer C. E.) **272,** 239

The origin of lunar palaeomagnetism (Runcorn S. K.) **275,** 430

Senate slashes NASA's moon rock research . . . *news,* **274,** 522

Morphine. High-affinity enkephalin-degrading peptidase in brain is increased after morphine (Malfroy B., Swerts J. P., Guyon A., Roques B. P. and Schwartz J. C.) **276,** 523

Hypersensitivity to noradrenaline in cortex after chronic morphine: relevance to tolerance and dependence (Llorens C., Martres M. P., Baudry M. and Schwartz J. C.) **274,** 603

Resistance of morphine-seeking behaviour in rats to pharmacological and behavioural 'treatments' (Mumford L., Teixeira A. R. and Kumar R.) **272,** 167

Morphine and β-endorphin inhibit release of noradrenaline from cerebral cortex but not of dopamine from rat striatum (Arbilla S. and Langer S. Z.) **271,** 559

Morphine and βendorphin influence the secretion of the endocrine pancreas (Ipp E., Dobbs R. and Unger R. H.) **276,** 190

Tolerance of locus coeruleus neurones to morphine and suppression of withdrawal response by clonidine (Aghajanian G. K.) **276,** 186

Morphogenesis. Vertebrate Limb and Somite Morphogenesis (Ede D. A. *editor*) *book review by* Gaze R. M. **274,** 408

Morphological variance. Morphological variance and enzyme heterozygosity in the monarch butterfly (Eanes W. F.) **276,** 263

Morphological variation. Relationship between heterozygositfor enzyme loci and variation of morphological characters in natural populations (Mitton J. B.) **273,** 661

Mosquito. Failure of acids to eliminate aziridinyl residues in chemosterilised mosquitoes, *matters arising,* (Seawright J. A., Carlson D. A. and Konyha K. D.) **273,** 76

Moth. Portraits of the Lepidoptera—the world of butterflies and moths Clarke C. A. **276,** 649

The distance and nature of the light-trap response of moths (Baker R. R. and Sadovy Y.) **276,** 818

Motility. The proton pump is a molecular engine of motile bacteria (Glagolev A. N. and Skulachev V. P.) **272,** 280

Motoneurone. Connectivity changes in a class of motoneurone during the development of a nematode (White J. G., Albertson D. G. and Anness M. A. R.) **271,** 764

Coupled motoneurones are part of the crayfish swimmeret central oscillator (Heitler W. J.) **275,** 231

Serially homologous neurones as concomitants of functional specialisation (Wilson J. A. and Hoyle G.) **274,** 377

Transmitter output increases in an identifiable lobster motoneurone with growth of its muscle fibres (DeRosa R. A. and Govind C. K.) **273,** 676

Motoneurone sprouting. Degenerating nerve products affect innervated muscle fibres (Brown M. C., Holland R. L. and Ironton R.) **275,** 652

Motor learning. Long-term retention of single and multistate prismatic adaptation by humans (McGonigle B. O. and Flook J.) **272,** 364

Motor nerve. Repressed motor nerve terminals in normal frog skeletal muscle, *matters arising*, (Proske U. and Luff A. R.) **274,** 925

Repressed motor nerve terminals in normal frog skeletal muscle (Grinnell A. D., Rheuben M. B. and Letinsky M. S.) **274,** 925

Motor response. Calcium-dependent sensory-motor response of a marine dinoflagellate to CO_2 (Hauser D. C. R., Petrylak D., Singer G. and Levandowsky M.) **273,** 230

Motor Unit. Reversal of recruitment order of single motor units produced by cutaneous stimulation during voluntary muscle contraction in man (Stephens J. A., Garnett R. and Buller N. P.) **272,** 362

Mountain mammal. Mountain Monarchs: Wild Sheep and Goats of the Himalaya (Schaller G. B.) *book review by* Lent P. C. **276,** 306

Mozambique. Frelimo concentrates on the practical side of science, *news*, (Smith P. and Wield D.) **276,** 751

α-MSH. Immunoreactive α-MSH in human plasma in pregnancy (Clark D., Thody A. J., Shuster S. and Bowers H.) **273,** 163

Müllerian duct. Anti-Müllerian hormone, *correspondence*, (Muller G. H.) **271,** 300

Multinational corporation. Multinationals and development, *news*, (Branscomb L.) **275,** 168

Multiple sclerosis. Membrane specialisations between demyelinated axons and astroglia in chronic EAE lesions and multiple sclerosis plaques (Raine C.S.) **275,** 326

Multiplication stimulating activity. A human fibrosarcoma cell line producing multiplication stimulating activity (MSA)-related peptides (De Larco J. E. and Todaro G. J.) **272,** 356

Muon. Muon spin rotation, *news and views*, (Stirling G. C.) **276,** 324

Murchison meteorite. α-Hydroxycarobxylic acids in the Murchison meteorite (Peltzer E. T. and Bada J. L.) **272,** 443

Murton R. K. *obituary* (Murton R. K.) **275,** 352

Muscarinic receptor-. Desensitisation of muscarinic receptor-mediated cyclic GMP formation by cultured nerve cells (Richelson E.) **272,** 366

Muscimol. Striatal dopamine release and contraversive rotation elicited by intranigrally applied muscimol (Martin G. E. and Haubrich D. R.) **275,** 230

Use of ^{3}H-muscimol for GABA receptor studies (Snodgrass S. R.) **273,** 392

Muscle. Actin filaments form the backbone of nemaline myopathy rods (Yamaguchi M., Robson R. M., Stromer M. H., Dahl D. S. and Oda T.) **271,** 265

Behaviour of myosin projections during the staircase phenomenon of heart muscle (Matsubara I., Yagi N. and Endoh M.) **273,** 67

Can a myosin molecule bind to two actin filaments? (Offer G. and Elliott A.) **271,** 325

Changes in crossbridge attachment in a myosin-regulated muscle (Vibert P., Szent-Gyorgyi A. G., Craig R., Wray J. and Cohen C.) **273,** 64

Coenzyme A is a purine nucleotide modulator of acetylcholine output (Cook M. A., Hamilton J. T. and Okwuasaba F. K.) **271,** 768

Comparison of amino acid sequence of troponin I from different striated muscles (Wilkinson J. M. and Grand R. J. A.) **271,** 31

Composition of acetylcholine receptor protein from skeletal muscle (Shorr R. G., Dolly J. O. and Barnard E. A.) **274,** 283

Fast and slow myosin in developing muscle fibres (Gauthier G. F., Lowey S. and Hobbs A. W.) **274,** 25

Muscular fatigue investigated by phosphorus nuclear magnetic resonance (Dawson M. J., Gadian D. G. and Wilkie D. R.) **274,** 861

Myosin: polymorphism and promiscuity, *news*, (Weeds A.) **274,** 417

Nicotinic cholinergic stimulation increases cyclic GMP levels in vertebrate skeletal muscle (Nestler E. J., Beam K. G. and Greengard P.) **275,** 451

Transmitter output increases in an identifiable lobster motoneurone with growth of its muscle fibres (DeRosa R. A. and Govind C. K.) **273,** 676

Two distinct developmentally regulated lectins in chick embryo muscle (Mir-Lechaire F. J. and Barondes S. H.) **272,** 256

Evidence of fusion between host and donor myoblasts in skeletal muscle grafts (Partridge T. A., Grounds M. and Sloper J. C.) **273,** 306

Increase in free Ca^{2+} in muscle after exposure to CO_2 (Lea T. J. and Ashley C. C.) **275,** 236

Neural induction of the 16S acetylcholinesterase in muscle cell cultures (Koenig J. and Vigny M.) **271,** 75

Reversible loss of calcium control of tension in scallop striated muscle associated with the removal of regulatory light chains (Simmons R. M. and Szent-Györgyi) **273,** 62

Muscle: Cardiac. Calcium transients in aequorin-injected frog cardiac muscle (Allen D. G. and Blinks J. R.) **273,** 509

Muscle Contraction. Reversal of recruitment order of single motor units produced by cutaneous stimulation during voluntary muscle contraction in man (Stephens J. A., Garnett R. and Buller N. P.) **272,** 362

Muscle control. Unfolding Troponin-C, *news and views*, (Seymour J.) **275,** 177

Muscle fibre. Degenerating nerve products affect innervated muscle fibres (Brown M. C., Holland R. L. and Ironton R.) **275,** 652

Influence of cyclic AMP on intracellular *p*H regulation and chloride fluxes in barnacle muscle fibres (Boron W. F., Russell J. M., Brodwick M. S., Keifer D. W. and Roos A.) **276,** 511

Neuromuscular transmission is adequate in identified abnormal dystrophic muscle fibres (Harris J. B. and Ribchester R. R.) **271,** 362

Muscle: Papillary. Positive inotropism of vanadate in cat papillary muscle (Hackbarth I., Schmitz W., Scholz H., Erdmann E., Krawietz W. and Philipp G.) **275,** 67

Muscle: Striated. Thick-filament-linked calcium regulation in vertebrate striated muscle (Lehman W.) **274,** 80

Muscular dystrophy. Neuromuscular transmission is adequate in identified abnormal dystrophic muscle fibres (Harris J. B. and Ribchester R. R.) **271,** 362

Mussel. Mussel watching, *news and views*, (Bayne B. L.) **275,** 87

Mutagen. Are physiological oxygen concentrations mutagenic? (Bruyninckx W. J., Mason H.S. and Morse S. A.) **274,** 606

Mutagenic action of aromatic epoxy resins (Andersen M., Kiel P., Larsen H. and Maxild J.) **276,** 391

Mutagenicity of thymidine to cultured Chinese hamster cells (Bradley M. O. and Sharkey N. S.) **274,** 607

Mutagen-oligonucleotide complexes with a bulged base as models for frameshift mutation (Che-Lee C. H. and Tinoco I. Jr) **274,** 609

Mutagenesis. Direct or proximate contact between cells and metabolic activation systems is required for mutagenesis (Kuroki T. and Drevon C.) **271,** 368

Does carcinogenic potency correlate with mutagenic potency in the Ames assay? (Ashby J. and Styles J. A.) **271,** 452

Testing for mutagenicity, *news and views*, (Ford E. H. R.) **271,** 503

Mutagenesis. Bromodeoxyuridine mutagenesis in mammalian cells is stimulated by thymidine and suppressed by deoxycytidine (Davidson R. L. and Kaufman E. R.) **276,** 722

Mutagenesis of Chinese hamster cells is facilitated by thymidine and deoxycytidine (Peterson A. R., Landolph J. R., Peterson H. and Heidelberger C.) **276,** 508

Mutagenesis. Sister chromatid exchange as an indicator of mutagenesis (Carrano A. V., Thompson L. H., Lindl P. A. and Minkler J. L.) **271,** 551

Mutagenesis: Ultraviolet. Initiation of UV mutagenesis in *Saccharomyces cerevisiae* (Kilbey B. J., Brychcy T. and Nasim A.) **274,** 889

Mutant. Do radiation-induced thioguanine-resistant mutants of cultured mammalian cells arise by HGPRT gene mutation or X-chromosome rearrangement? (Cox R. and Masson W. K.) **276,** 629

Naturally occurring respiratory deficient *Candida slooffii* **strains resemble** *petite* **mutants.** (Arthur H., Watson K., McArthur C. R. and Clark-Walker G. D.) **271,** 750

Saccharomyces cerevisiae cell cycle mutant *cdc*9 is defective in DNA ligase (Johnston L. H. and Nasmyth K. A.) **274,** 891

Mutant: Behavioural. Behavioural mutants of *Paramecium caudatum* with defective membrane electrogenesis (Takahashi M. and Naitoh Y.) **271,** 656

Mutant: Homoeotic. *Tumorous head* is a maternal-effect homoeotic mutant of *Drosophila melanogaster* (Bournias-Vardiabasis N. and Bownes M.) **276,** 611

Mutation. DNA polymerase and mutation, *news and views*, (Bridges B.) **275,** 591

Mutator genes—pacemakers of evolution, *review article*, (Thompson J. N. Jr and Woodruff R. C.) **274,** 317

Somatic mutations, *news and views*, (Cramer F.) **273,** 423

Temperature induced seizure and frequency-dependent neuromuscular block in a *ts* mutant of *Drosophila* (Salkoff L. and Kelly L.) **273,** 156

Mutation: Dominant. Evidence for dominant mutations reducing HGPRT activity (Kadouri A., Kunee J. J. and Lark K. G.) **274,** 256

Mutation: Nonsense. Informational suppression in higher organisms, *news and views*, (Piper P.) **276,** 118

Mutation: Nude. An athymic nude mutation in the rat (Festing M. F. W., May D., Connors T. A., Lovell D. and Sparrow S.) **274,** 365

Mutation rate. Estimating human mutation rates from polymorphisms, *news and views*, (Edwards J. H.) **274,** 845

Mutation: Suppressor. A suppressor mutation in the nematode acting on specific alleles of many genes (Waterston R. H. and Brenner S.) **275,** 715

Myasthenia gravis. Acetylcholine-induced channels and transmitter release at human endplates (Cull-Candy S. G., Miledi R. and Trautmann A.) **271,** 74

Mycobacterium. Three forms of delayed skin-test response evoked by mycobacteria (Rook G. A. W.) **271,** 64

Mycolase. Mycolase a new kind of systemic antimycotic (Davies D. A. L. and Pope A. M. S.) **273,** 235

Mycoplasma. Mycoplasma capping on lymphocyte (Stanbridge E. J. and Weiss R. L.) **276,** 583

Myeloma cell. A better cell line for making hybridomas secreting specific antibodies (Shulman M., Wilde C. D. and Köhler G.) **276,** 269

Myenteric plexus. Does substance P mediate slow synaptic excitation within the myenteric plexus? (Katayama Y. and North R. A.) **274,** 387

Myoblast. Evidence of fusion between host and donor myoblasts in skeletal muscle grafts (Partridge T. A., Grounds M. and Sloper J. C.) **273,** 306

Myocardium. DNA polymerases during postnatal myocardial development (Limas C. J. and Limas C.) **271,** 781

Myopathy. Actin filaments form the backbone of nemaline myopathy rods (Yamaguchi M., Robson R. M., Stromer M. H., Dahl D. S. and Oda T.) **271,** 265

Myopia. Hormonal influences on ocular refraction in the rat (Kok-van Alphen C. C. and Noach E. L.) **271,** 62

Lid closure and refractive error in macaque monkeys (von Noorden G. K. and Crawford M. L. J.) **272,** 53

Myosin. Binding of monovalent and divalent myosin fragments onto sites on actin (Hill T. L.) **274,** 825

Changes in crossbridge attachment in a myosin-regulated muscle (Vibert P., Szent-Gyorgyi A. G., Craig R., Wray J. and Cohen C.) **273,** 64

Myosin: polymorphism and promiscuity, *news*, (Weeds A.) **274,** 417

Reversible loss of calcium control of tension in scallop striated muscle associated with the removal of regulatory light chains (Simmons R. M. and Szent-Györgyi) **273,** 62

The structural gene for myosin: a closer look, *news and views*, (Smith S. J.) **272,** 495

What is a myosin?: *Acanthamoeba* revisited, *news and views*, (Wagner P.) **274,** 846

Behaviour of myosin projections during the staircase phenomenon of heart muscle (Matsubara I., Yagi N. and Endoh M.) **273,** 67

Can a myosin molecule bind to two actin filaments? (Offer G. and Elliott A.) **271,** 325

Fast and slow myosin in developing muscle fibres (Gauthier G. F., Lowey S. and Hobbs A. W.) **274,** 25

Immunohistochemical evidence for myosin polymorphism in the chicken heart (Sartore S., Pierobon-Bormioli S. and Schiaffino S.) **274,** 82

Myotube. Acetylcholineinduced conductance fluctuations in cultured human myotubes (Bevan S., Kullberg R. W. and Rice J.) **273,** 469

Myzus persicae. Chromosomal rearrangement involved in insecticide resistance of *Myzus persicae* (Blackman R. L., Takada H. and Kawakami K.) **271,** 450

N Galaxy. N Galaxies – a new class of X-ray sources (Marshall F. E., Mushotzky R. F., Boldt E. A., Holt S. S., Rothschild R. E. and Serlemitsos P. J.) **275,** 624

Naked singularity. Classical instability of naked singularity (Felice F. de) **273,** 429

Nalidixic acid. An unusual interaction between the target of nalidixic acid and novobiocin (Chao L.) **271,** 385

Naloxone. Primary afferent depolarisation of tooth pulp afferents is not affected by naloxone (Hu J. W., Dostrovsky J. O. and Sessle B. J.) **276,** 283

The narcotic antagonist naloxone enhances clinical pain (Levine J. D., Gordon N. C., Jones R. T. and Fields H. L.) **272,** 826

Naloxone reversal of endotoxin hypotension suggests role of endorphins in shock (Holaday J. W. and Faden A. I.) **275,** 450

Naples Zoological Station. History of biology at the Naples Zoological Station, *news and views*, (Olby R.) **275,** 10

NASA. NASA plans to upgrade the role of academics **273,** 586

Senate slashes NASA's moon rock research . . . *news*, **274,** 522

Facultative sex ratios and population dynamics (Werren J. H. and Charnov E. L.) **272,** 349

Modification of heat resistance in *Drosophila* by selection (Morrison W. W. and Milkman R.) **273,** 49

The Limits of Altruism: An Ecologist's View of Survival (Hardin G.) *book review by* Jukes T. H. **276,** 130

Naturalist. A World of Naturalists (Kastner J.) *book review by* Desmond Ray **274,** 627

Nautiloid. Nautiloid growth rhythms and dynamical evolution of the Earth-Moon system (Kahn P. G. K. and Pompea S. M.) **275,** 606

Near East. A Near-Eastern sighting of the supernova explosion of 1054 (Brecher K., Lieber E. and Lieber A. E.) **273,** 728

Nematode. A suppressor mutation in the nematode acting on specific alleles of many genes (Waterston R. H. and Brenner S.) **275,** 715

Biology of Nematodes (Croll N. A. and *editor*) *book review by* Lee D. L. **272,** 93

Connectivity changes in a class of motoneurone during the development of a nematode (White J. G., Albertson D. G. and Anness M. A. R.) **271,** 764

Immunological properties of the surface of parasitic nematodes (Mackenzie C. D., Preston P. M. and Ogilvie B. M.) **276,** 826

Neodymium. Pb, Nd and Sr isotopes in oceanic ferromanganese deposits and ocean floor basalts (O'Nions R. K., Carter S. R., Cohen R. S., Evensen N. M. and Hamilton P. J.) **273,** 435

Neolithic. Neolithic hyperarid period preceded the present climate of the Central Sahel (Dumont H. J.) **274,** 356

Neotectonics. Proterozoic intraplate deformation in the light of South-east Asian neotectonics (Watterson J.) **273,** 636

Neptune. Atmospheres of Uranus and Neptune, *news and views*, (Hunt G. E.) **272,** 403

NERC. NERC support for UK geophysics not adequate, *correspondence*, (Runcorn S. K.) **271,** 704

Nerve. Coenzyme A is a purine nucleotide modulator of acetylcholine output (Cook M. A., Hamilton J. T. and Okwuasaba F. K.) **271,** 768

Directed outgrowth of optic fibres regenerating *in vitro* (Johns P. R., Yoon M. G. and Agranoff B. W.) **271,** 360

Does cyclic GMP mediate the slow excitatory synaptic potential in sympathetic ganglia? (Hashiguchi T., Ushiyama N. S.,

Kobayashi H. and Libet B.) **271,** 267
Postsynaptic modulation of excitatory process in sympathetic ganglia by cyclic AMP (Kobayashi H., Hashiguchi T. and Ushiyama N. S.) **271,** 268
Response properties of dipteran giant visual interneurones involved in control of optomotor behaviour (Eckert H. E.) **271,** 358
Nerve. Limb morphology and function are transformed by contralateral nerve section in snapping shrimps (Mellon Jr D. and Stephens P. J.) **272,** 246
Quantal size is not altered by abrupt changes in nerve terminal volume (Van der Kloot W.) **271,** 561
Nerve cell. Desensitisation of muscarinic receptor-mediated cyclic GMP formation by cultured nerve cells (Richelson E.) **272,** 366
Nerve fibre. Degenerating nerve products affect innervated muscle fibres (Brown M. C., Holland R. L. and Ironton R.) **275,** 652
Nerve growth factor. Alterations in the surface properties of cells responsive to nerve growth factor (Schubert D., LaCorbiere M., Whitlock C. and Stallcup W.) **273,** 718
Induction of ornithine decarboxylase by nerve growth factor dissociated from effects on survival and neurite outgrowth (Greene L. A. and McGuire J. C.) **276,** 191
Nerve injury. Reorganisation of spinal cord sensory map after peripheral nerve injury (Devor M. and Wall P. D.) **276,** 75
Nerve membrane. Immobilisation of gating charge by a substance that simulates inactivation (Yeh J. Z. and Armstrong C. M.) **273,** 387
Nerve: Saccular. Phase-locking in goldfish saccular nerve fibres accounts for frequency discrimination capacities (Fay R. R.) **275,** 320
Nerve: Sciatic. Rapid accumulation of high molecular weight acetylcholinesterase in transected sciatic nerve (Di Giamberardino L. and Couraud J. Y.) **271,** 170
Nerve terminal. Release of acetylcholinesterase from rat hemidiaphragm preparations stimulated through the phrenic nerve (Skau K. A. and Brimijoin S.) **275,** 224
Repressed motor nerve terminals in normal frog skeletal muscle, *matters arising*, (Proske U. and Luff A. R.) **274,** 925
Repressed motor nerve terminals in normal frog skeletal muscle (Grinnell A. D., Rheuben M. B. and Letinsky M. S.) **274,** 925
Nervous system. I.SD labels a novel dopamine receptor in molluscan nervous system (Drummond A. H., Bucher F. and Levitan I. B.) **272,** 368
Soma potential of an interneurone controls transmitter release in a monosynaptic pathway in *Aplysia* (Shimahara T. and Peretz B.) **273,** 158
Netherlands. Greater powers for Dutch science minister, *news*, (Schuuring C.) **276,** 109
New science policy minister for Netherlands, *news*, (Schuuring C.) **272,** 7
Neurite. Haemin promotes rapid neurite outgrowth in cultured mouse neuroblastoma cells (Ishii D. N. and Maniatis G. M.) **274,** 372
Neurite outgrowth. Induction of ornithine decarboxylase by nerve growth factor dissociated from effects on survival and neurite outgrowth (Greene L. A. and McGuire J. C.) **276,** 191
Neurobiology. Neurotoxins in Venice, *news and views*, (Strong P. and Vincent A.) **274,** 843
Neurobiology at Heidelberg, *news and views*, **273,** 424
Peptides in Neurobiology (Gainer H. *editor*) *book review by* Pearse A. G. E. **271,** 388
Neuroblastoma. Cyclic-AMP-induced differentiation in neuroblastoma is independent of cell division rate (Waymire J. C., Gilmer-Waymire K. and Haycock J. W.) **276,** 194
Haemin promotes rapid neurite outgrowth in cultured mouse neuroblastoma cells (Ishii D. N. and Maniatis G. M.) **274,** 372
Neuroendocrine cell. Neurone-specific enolase is a molecular marker for peripheral and central neuroendocrine cells (Schmechel D., Marangos P. J. and Brightman M.) **276,** 834
Neuroleptic. Binding of ^{3}H-neuroleptics and ^{3}H-apomorphine in schizophrenic brains (Lee T., Seeman P., Tourtellotte W. W., Farley I. J. and Hornykeiwicz O.) **274,** 897
Neuroleptic receptors. Serotonergic component of neuroleptic receptors (Leysen J. E., Niemegeers C. J. E., Tollenaere J. P. and Laduron P. M.) **272,** 168
Neurology. The Integrated Mind (Gazzaniga M. I. S. and) *book review by* Ettlinger G. **275,** 347
Neuromuscular block. Temperature induced seizure and frequency-dependent neuromuscular block in a *ts* mutant of *Drosophila* (Salkoff L. and Kelly L.) **273,** 156
Neuromuscular junction. α-Bungarotoxin enhances transmitter 'released' at the neuromuscular junction (Miledi R., Molenaar P. C. and Polak R. L.) **272,** 641
Cholines terase is associated with the basal lamina at the neuromuscular junction (McMahan U. J., Sanes J. R. and Marshall L. M.) **271,** 172
Synaptic channel gating differences at snake twitch and slow neuromuscular junctions (Dionne V. E. and Parsons R. L.) **274,** 902
Neuromuscular synapse. Gating properties of acetylcholine receptor in newly formed neuromuscular synapses (Brenner H. R. and Sakmann B.) **271,** 366
Neuromuscular transmission. Neuromuscular transmission is adequate in identified abnormal dystrophic muscle fibres (Harris J. B. and Ribchester R. R.) **271,** 362
Neuronal peptide. Ubiquitous neuronal peptides, *news and views*, (Hughes J. and Iverson L.) **271,** 706
Neuronal system. Evidence for two separate opiate peptide neuronal systems (Watson S. J., Akil H., Richard C. W. III and Barchas J. D.) **275,** 226
Neurone. Asymmetrical displacement currents, *matters arising*, (Adams D. J. and Gage P. W.) **271,** 586
Asymmetrical displacement currents — Reply, *matters arising*, (Kostyuk P. G.) **271,** 587
Barbiturate-induced slow outward currents in *Aplysia* neurones (Cote I. L., Zbicz K. L. and Wilson W. A.) **274,** 594
Benzodiazepines specifically modulate GABA-mediated postsynaptic inhibition in cultured mammalian neurones (Macdonald R. and Barker J. L.) **271,** 563
Corticospinal Neurones (Phillips C. G. and) *book review by* Granit R. **273,** 789
Evidence for local hormonal communication between neurones in *Aplysia* (Branton W. D., Mayeri E., Brownell P. and Simon S. B.) **274,** 70
GABA-induced conductance fluctuations in cultured spinal neurones (McBurney R. N. and Barker J. L.) **274,** 596
Inactivation without facilitation of calcium conductance in caesium-loaded neurones of *Aplysia* (Tillotson D. and Horn R.) **273,** 312
Isolation of specific neurones by affinity methods (Dvorak, D. J., Gipps E. and Kidson C.) **271,** 564
Neuromuscular blockade increases motoneurone survival during normal cell death in the chick embryo (Pittman R. H. and Oppenheim R. W.) **271,** 364
Opiate tolerance and dependence induced *in vitro* in single myenteric neurones (North R. A. and Karras P. J.) **272,** 73
Paired helical filaments of the Alzheimer type in cultured neurones (De Boni U. and Crapper D. R.) **271,** 566
Pharmacological evidence for 'fast' sodium channels in nonspiking neurones (Lowe D. A., Bush B. M. H. and Ripley S. H.) **274,** 289
Slow relaxations of acetylcholine-induced potassium currents in *Aplysia* neurones (Marty A. and Ascher P.) **274,** 494
The units of calcium conduction in *Helix* neurones (Akaike N., Fishman H. M., Lee K. S., Moore L. E. and Brown A. M.) **274,** 379
Transformation by concanavalin A of the response of molluscan neurones to L-glutamate (Kehoe J.) **274,** 866
Neurone growth. New factor released by cultured glioma cells supporting survival and growth of sensory neurones (Barde Y. A., Lindsay R. M., Monard D. and Thoenen H.) **274,** 818
Neurone: Locus coeruleus. Tolerance of locus coeruleus neurones to morphine and suppression of withdrawal response by clonidine (Aghajanian G. K.) **276,** 186
Neurone: Sensory. Sensory neurones recognise defined pathways in *Drosophila* central nervous system (Ghysen A.) **274,** 869
Neurone: Serotonergic. Activity of an individual serotonergic neurone in *Aplysia* enhances synthesis of cyclic adenosine monophosphate (Weiss K. R., Schonberg M., Mandelbaum D. E. and Kupfermann I.) **272,** 727
Neurone-specific enolase. Neurone-specific enolase is a molecular marker for peripheral and central neuroendocrine cells (Schmechel D., Marangos P. J. and Brightman M.) **276,** 834
Neurophysiology. Progress in Clinical Neurophysiology (Desmedt J. E. *editor*) *book review by* Barrett G. **274,** 296
Neurophysiology. Progress in Clinical Neurophysiology (Desmedt J. E. *editor*) *book review by* Ettlinger G. **274,** 517
Neurotensin. Calcium-dependent release of stomatostatin and neurotensin from rat brain *in vitro* (Iversen L. L., Iversen S. D., Bloom F., Douglas C., Brown M. and Vale W.) **273,** 161
Neurotoxin. Neurotoxins in Venice, *news and views*, (Strong P. and Vincent A.) **274,** 843
Neurotoxins may go unrecognised, *news*, (Hay A.) **274,** 206
Real advances in neurotoxicity have been made, *correspondence*, (Aldridge W. N.) **274,** 528
Neurotransmitter. Neurotransmitters decrease the calcium component of sensory neurone action potentials (Dunlap K. and Fischbach G. D.) **276,** 837
Selective inhibitors of biosynthesis of aminergic neurotransmitters (Kollonitsch J., Patchett A. A., Marburg S., Maycock A. L., Perkins L. M., Doldouras G. A., Duggan D. E. and Aster S. D.) **274,** 906
Transmitter release statistics are meaningful, *matters arising*, (Hansert E., Wernig A. and Carmody J. J.) **271,** 688
Transmitter release statistics are meaningful—Reply, *matters arising*, (Barton S. B. and Cohen I. S.) **271,** 688
Ubiquitous neuronal peptides, *news and views*, (Hughes J. and Iverson L.) **271,** 706
Neutral current. Another surprise from Gargamelle, *news and views*, (Miller D. J.) **273,** 99
Neutrino. Deep-sea neutrinos, *news and views*, (Eichler D.) **276,** 15
More about the beam dump, *news and views*, (Miller D. J.) **272,** 668
Too many electron neutrinos? *news and views*, (Miller D. J.) **272,** 205
(Eichler D. Roy C. R.) **275,** 734
Gravitational radiation from supernova neutrino bursts (Turner M. S.) **274,** 565
Low energy neutrino elastic scattering and supernova explosions (Bailin D. and Dombey N.) **275,** 300
Neutrino stability and cosmological helium production (Tayler R. J.) **274,** 232
Orthodoxy restored in neutrino physics? *news and views*, (Miller D. J.) **274,** 531
N rino source. High energy neutrino astronomy (Eichler D. and Schramm D. N.) **275,** 704
Neutron beam. Neutron beams in active galactic nuclei (Eichler D. and Wiita P. J.) **274,** 38
Neutron chopper. A fast interferometric chopper for neutrons and X rays (Hart M. and Siddons D. P.) **275,** 45
Neutron diffraction. Neutron diffraction studies on selectively deuterated phospholipid bilayers (Büldt G. Gally H. U., Seelig A., Seelig J. and Zaccai G.) **271,** 182
Neutron scattering. Dynamics of protein hydration by quasi-elastic neutron scattering (Randall, J. T., Middendorf H. D., Crespi H. L. and Taylor A. D.) **276,** 636
Neutrons. Ultracold neutrons, *news and views*, (Asghar M.) **272,** 127
New Guinea. Rats, pigs and men in New Guinea, *news and views*, (May R. M.) **275,** 590
New Guinea Highlands. Alternative ^{210}Pb dating: results from the New Guinea Highlands and Lough Erne (Oldfield F., Appleby P. G. and Battarbee R. W.) **271,** 339
New Zealand. Botanical evidence linking the New Zealand Maoris with New Caledonia and the New Hebrides (Stevenson G.) **276,** 704
Newton I. Newton and Newtoniana, 1672–1975 (Wallis P. and R.) *book review by* Cohen I. B. **273,** 575
The Correspondence of Isaac Newton (Hall A. R. and *editor*) *book review by* Cohen I. B. **275,** 777
Niche Space. Food Webs and Niche Space (Cohen J. E.) *book review by* Lawton J. H. **276,** 425
Nicotinic receptor. Nicotinic cholinergic stimulation increases cyclic GMP levels in vertebrate skeletal muscle (Nestler E. J., Beam K. G. and Greengard P.) **275,** 451
Ninetyeast Ridge. How Ninetyeast Ridge formed, *news and views*, (Smith P. J.) **272,** 752
Ninetyeast Ridge not aseismic after all, *news and views*, (Smith P. J.) **274,** 533
Nippostrongylus brasiliensis. Eosinophil chemotactic factor release from neutrophils by *Nippostrongylus brasiliensis* larvae (Czarnetzki B. M.) **271,** 553
Nitogen. Influenza A viruses of the H2N2 subtype are lymphocyte mitogens (Butchko G. M., Armstrong R. B., Martin W. J., and Ennis F. A.) **271,** 66
Nitrate. US plans to ban the use of nitrites in food, *news*, **274,** 736
Nitrate reduction. Regulation of nitrate reduction by light, ATP and mitochondrial respiration in wheat leaves (Sawhney S. K., Naik M. S. and Nicholas D. J. D.) **272,** 647
Nitrite. Nitrates and nitrites cannot be eliminated, *correspondence*, (Boyland E.) **275,** 8
Nitrogen. The origin and relative abundances of C, N and the noble gases on the terrestrial planets and in meteorites (Bogard D. D. and Gibson Jr, E. K.) **271,** 150
Nitrogen cycle: Photorespiratory. Photorespiratory nitrogen cycle (Keys A. J., Bird I. F., Cornelius M. J., Lea P. J., Wallsgrove R. M. and Miflin B. J.) **275,** 741
Nitrogen dioxide. Extreme pollution sensitivity of grasses when SO_2 and NO_2 are present in the atmosphere together (Ashenden T. W. and Mansfield T. A.) **273,** 142
Ratio of HNO_3 to NO_2 concentrations in daytime stratosphere (Harries J. E.) **274,** 235
Nitrogen fertiliser. SSTs, nitrogen fertiliser and stratospheric ozone (Turco R. P., Whitten R. C., Poppoff I. G. and Capone L. A.) **276,** 805
Nitrogen fixation. Nitrogen-fixing root nodules in Ulmaceae (Akkermans A. D. L., Abdulkadir S. and Trinick M. J.) **274,** 190
Non-biogenic fixed nitrogen in Antarctica and some ecological implications (Parker B. C., Heiskell L. E., Thompson W. J. and Zeller E. J.) **271,** 651
Rhizobium japonicum mutants unable to use hydrogen (Maier R. J., Postgate J. R. and Evans H. J.) **276,** 494
Nitrogen fixation. Biological nitrogen fixation by way of an enzyme-bound dinitrogen-hydride intermediate (Thorneley R. N. F., Eady R. R. and Lowe D. J.) **272,** 557
Nitrogen fixation in the rhizosphere of rice (Hirota Y., Fujii T., Sano Y. and Iyama S.) **276,** 416
Recent Developments in Nitrogen Fixation (Newton W., *editor*) *book review by* Beringer J. E. **272,** 475
Nitrogen: Fixed. Non-biogenic fixed nitrogen in Antarctic surface waters, *matters arising*, (Bauer E., Biggs D. C., Parker B. C. and Heiskill L. E.) **276,** 96
Non-biogenic fixed nitrogen in Antarctic surface waters—Reply, *matters arising*, (Thompson W. J. and Zeller E. J.) **276,** 97
Non-biogenic fixed nitrogen in Antarctic surface waters—Comment, *matters arising*, (El-Sayed S. Z.) **276,** 97
Nitrogen metabolism. Mutations in *nir* A gene of *Aspergillus nidulans* and nitrogen metabolism (Rand K. N. and Arst H. N. Jr) **272,** 732
Nitrogen oxide. (Eichler D. Roy C. R.) **275,** 734
Nitrosamine. Volatile nitrosamines in normal human faeces (Wang T., Kakizoe T., Dion P., Furrer R., Varghese A. J. and Bruce W. R.) **276,** 280
Nitrosamine. Estimate of the volatile nitrosamine content of UK food (Gough T. A., Webb K. S. and Coleman R. F.) **272,** 161
Nitrous oxide. Aquatic sources and sinks for nitrous oxide (Elkins J. W., Wofsy S. C., McElroy M. B., Kolb C. E. and Kaplan W. A.) **275,** 602
Soil as a source or sink for atmospheric nitrous oxide (Freney J. R., Denmead O. T. and Simpson J. R.) **273,** 530
Consumption of dissolved nitrous oxide in an anoxic basin, Saanich Inlet British Columbia (Cohen Y.) **272,** 235
Continuous measurements of nitrous oxide in the troposphere (Pierotti D., Rasmussen R. A. and Chatfield R.) **274,** 574
NK cell. Enhanced NK cell activity in mice injected with interferon and interferon inducers (Gidlund M., Orn A., Wigzell H., Senik A. and Gresser I.) **273,** 759
NO bond. First interstellar NO bond, *news and views*, (Richards G.) **271,** 12
Interstellar nitroxyl (Pickles J. B. and Williams D. A.) **271,** 335
Nobel prize. A man driven by proticity, *news*, (Garland P.) **276,** 8
A sensitive ear for the Big Bang, *news*, (Rowan-Robinson M.) **275,** 687
Fifty years of scientific achievement, *news*, (Shoenberg D.) **275,** 688
From modest beginnings… *news*, (Roberts R.) **275,** 689
Good and bad Nobel prizes, *correspondence*, **276,** 664
Nobel Prizes should give encouragement, *leading article*, **276,** 199
Nobel Symposium. Cholera and related diarrhoeas ("turista") *news and views*, (Finkelstein R. A. and Boesman-Finkelstein M.) **275,** 173
Noble gas. The origin and relative abundances of C, N and the noble gases on the terrestrial planets and in meteorites (Bogard D. D. and Gibson Jr, E. K.) **271,** 150
Nodulation. High frequency transfer of nodulating ability between strains and species of *Rhizobium* (Johnston A. W. B., Beynon J. L., Buchanan-Wollaston A. V., Setchell S. M., Hirsch P. R. and Beringer J. E.) **276,** 634
Nomenclature. Bio-chemical nomenclature (Karlson P. and Dixon H.B.F.) **276,** 754
Non-Proliferation Treaty. Is proliferation unstoppable? *leading article*, **275,** 681
The Non-proliferation treaty — a requirement to reprocess? *news*, **272,** 302
Noradrenaline. Local perfusion of noradrenaline maintains visual cortical plasticity (Pettigrew J. D. and Kasamatsu T.) **271,** 761
Bromocriptine-induced inhibition of plasma dopamine, noradrenaline and adrenaline responses to LH-RF (Van Loon G. R.) **275,** 331
Cyclic AMP and noradrenaline sensitivity fluctuations in regenerating newt tissue (Taban C., Cathieni M. and Schorderet M.) **271,** 470
Effect of tetraethylammonium on noradrenaline release from cat spleen treated with tetrodotoxin (Kirpekar S. M. and Prat J. C.) **276,** 623
Hypersensitivity to noradrenaline in cortex after chronic morphine: relevance to tolerance and dependence (Llorens C., Martres M. P., Baudry M. and Schwartz J. C.) **274,** 603
Morphine and β-endorphin inhibit release of noradrenaline from cerebral cortex but not of dopamine from rat striatum (Arbilla S. and Langer S. Z.) **271,** 559
Possible role of cyclic nucleotides in regulation of noradrenaline release from rat pineal through presynaptic adrenoceptors (Pelayo F., Dubocovich M. L. and Langer S. Z.) **274,** 76
Ultradian rhythm of plasma noradrenaline in rhesus monkeys (Levin B. E., Goldstein A. and Natelson B. H.) **272,** 164
Norfolk Broad. The Norfolk Broads under pressure, *news and*

views, (Moore P. D.) **274**, 644
North Atlantic. Offshore continuation of East Greenland dyke swarm and North Atlantic Ocean formation (Larsen H. C.) **274**, 220
North Sea. Oxygen isotope palaeotemperatures from the Tertiary period in the North Sea area (Buchardt B.) **275**, 121
Novobiocin. An unusual interaction between the target of nalidixic acid and novobiocin (Chao L.) **271**, 385
Nuclear accelerator. Funding delays handicap ISABELLE in race for new particle, *news*, **276**, 200

Nuclear power station. Further protests planned at Seabrook nuclear plant, *news*, **274**, 632
Nuclear reactor. Carter can kill fast breeder project, *news*, **274**, 3
Carter juggles with fast breeder and natural gas, *news*, (Douglas J.) **275**, 2
Fast breeder delay would help proliferate weapons, *news*, **273**, 262
Government accuses nuclear industry of using propaganda, *news*, **271**, 202
Moves to terminate US fast breeder project may be illegal, *news*, **272**, 303
Out of the frying-pan into the PWR, *leading article*, (Lovins A. B.) **271**, 2
Tory attacks energy gap forecasting—and the fast breeder, *news*, **271**, 105
US Congressional committee rejects Carter compromise on fast breeder programme, *news*, **272**, 660
Nuclear reprocessing. . . . and against, *news*, (Conroy C.) **271**, 3
After Windscale, what? *leading article*, **272**, 111
Argentina plans nuclear reprocessing plant, *news*, **275**, 580
Energy how to decide (Pearce D., Edwards L. and Bucret G.) **272**, 115
France falls out with Pakistan over reprocessing, *news*, (Kidwai A.) **271**, 397
Mr Justice Parker and technical fact, *news*, **272**, 300
Nuclear reprocessing. New reprocessing technique promises diversion safeguards, *news*, **272**, 117
Nuclear reprocessing. Reprocessing nuclear fuel: for . . . *news*, (Bainbridge G. R.) **272**, 2
The Japanese Connection, *news*, **272**, 304
The Windscale report, *news*, **272**, 298
Nuclear reprocessing. UK report recommends nuclear reprocessing, *news*, **272**, 117
Nuclear reprocessing. Windscale go-ahead; waste committee set up, *news*, **273**, 179
windscale issues need more debate, *leading article*, **272**, 297
Windscale: preparing MPs for an informed debate, *correspondence*, (Hooley F. M.P.) **272**, 576
Windscale to be debated again, *news*, **272** 570
Nuclear research. Nuclear waste ban threatens research at Brookhaven laboratory, *news*, **274**, 733
Bangladesh plans nuclear research centre . . . *news*, (Kabir M.) **271**, 701
Nuclear resonance. Excitation of nuclear giant resonances by heavy ions, *news and views*, (Hodgson P. E.) **274**, 117
Nuclear resonance. Nuclear resonance & synchroton radiation, *news and views*, (Marr G. V.) **275**, 178
Nuclear security. On cave paintings and nuclear security, *news*, (Weinburg A.) **276**, 663
Nuclear structure. Nuclear Heavy Ion Reactions (Hodgson P. E.) *book review by* Broglia R. A. **276**, 739
Pions probe nuclei, *news and views*, (Hodgson P. E.) **272**, 498
Nuclear test. To Geneva yet again, *leading article*, **275**, 261
Nuclear transfer. Nuclear spectroscopy with (p, α) reactions, *news and views*, (Hodgson P. E.) **274**, 421
Nuclear transplantation. Cloning (McKinnell R. G.) *book review by* Gurdon J. B. **275**, 466
Nuclear waste. Actinide activities in water entering the northern North Sea (Murray C.N., Kautsky H., Hoppenheit M. and Domian M.) **276**, 225
Burying high level wastes, *correspondence*, (Brookins D. G., Register J. K. and Register M. E.) **273**, 704
Durability of vitrified highly active waste from nuclear reprocessing (Morris J. B., Boult K. A., Dalton J. T., Delve M. H., Gayler R., Herring L., Hough A. and Marples J. A. C.) **273**, 215
France leads in vitrification of radiowastes, *news and views*, (Cahn R. W.) **274**, 743
Nuclear waste ban threatens research at Brookhaven laboratory, *news*, **274**, 733
Radionuclide adsorption by manganese oxides and implications for radioactive waste disposal (Means J. L., Crerar D. A., Borcsik M. P. and Duguid J. O.) **274**, 44
Reprocessing plant still closed: *news*, **276**, 205
Interactions between nuclear waste and surrounding rock (McCarthy G. J., White W. B., Roy R., Scheetz B. E., Komarneni S., Smith D. K. and Roy D. M.) **273**, 216
"No scientific barriers to nuclear waste disposal" says US report: *news*, **276**, 112
Nuclear waste disposal, *news*,
Nuclear waste may be stored in synthetic rock, *news*, **274**, 413
Nuclear waste problem solved, claims Sweden's nuclear industry, *news*, (Barnaby W.) **274**, 6
Nuclear weapon. Beyond the neutron bomb, *leading article*, **272**, 569
Is proliferation unstoppable? *leading article*, **275**, 681
Libya bidding to join nuclear club, scientists warn, *news*, **27**[illegible] 550
MIT physicists attack proposed MX missile system, *news*, **272**, 487
Twenty years of test ban talk, *leading article*, **272**, 481
US asked to reveal data on A-bomb tests, *news*, **276**, 553
Why we should ban the military use of satellites, *news*, **273**, 416
Nucleic acid. Direct proton exchange between complementary nucleic acid bases (Iwahashi H. and Kyogoku Y.) **271**, 277
God's bonds, *correspondence*, (Eisenberg H.) **273**, 486
Nucleic acid duplex. Two contiguous conformations in a nucleic acid duplex (Sehing E., Wells R. D., Early T. A. and Kearns D. R.) **275**, 249
Nucleic acid insertion. Translation of rabbit globin mRNA introduced by liposomes into mouse lymphocytes (Dimitriadis G. J.) **274**, 923
Nucleon. Nucleon-nucleon interactions, *news and views*, **275**, 589
Nucleon-nucleon interactions, *news and views*, **275**, 589
Nucleoprotamine. à-Helix-double helix interaction shown in the structure of a protamine-transfer RNA complex and a nucleoprotamine model (Warrant R. W. and Kim S-H.) **271**, 130
Nucleoside. Structure of DNA predicted from stereochemistry of nucleoside derivatives (Sasisekharan V. and Pattabiraman N.) **275**, 159
Nucleosome. Bleomycin causes release of nucleosomes from chromatin and chromosomes (Kuo M. T. and Hsu T. C.) **271**, 83
Certain rheumatoid factors react with nucleosomes (Hannestad K. and Stollar B. D.) **275**, 671
Chromatin, *review article*, (Felsenfeld G.) **271**, 115
Nucleosomes are assembled by an acidic protein which binds histones and transfers them to DNA (Laskey R. A., Honda B. M., Mills A. D. and Finch J. T.) **275**, 416
The length of nucleosome-associated DNA is the same in both transcribed and nontranscribed regions of chromatin (Gottesfeld J. M. and Melton D. A.) **273**, 317
Nucleotide sequence. Complete nucleotide sequence of SV40 DNA (Fiers W., Contreras R., Haegeman G., Rogiers R., Voorde A. Van de, Heuverswyn H. Van., Heereweghe J. Van, Volckaertand G. and Ysebaer M.) **273**, 113
Complete sequence and secondary structure of a viroid, *news and views*, (Hull R.) **273**, 187
Correlation of nonsense sites in the *lacI* gene with specific codons in the nucleotide sequence (Miller J. H., Coulondre C. and Farabaugh P. J.) **274**, 770
DNA sequence of the bacteriophage λ *cI* gene (Sauer R. T.) **276**, 301
Multiplicity of germline genes specifying a group of related mouse κ chains with implications for the generation of immunoglobulin diversity (Valbuena O., Marcu K. B., Weigert M. and Perry P.) **276**, 780
Nucleotide sequence and secondary structure of potato spindle tuber viroid (Gross H. J., Domdey H., Lossow C., Jank P., Raba M., Alberty H. and Sänger H. L.) **273**, 203
Nucleotide sequence at the insertion sites of a kanamycin transposon (Oka A., Nomura N., Sugimoto K., Sugisaki H. and Takanami M.) **276**, 845
Nucleotide sequence homology at 12 intron-exon junctions in the chick ovalbumin gene (Catterall J. F., O'Malley B. W., Robertson M. A., Staden R., Tanaka Y. and Brownlee G. G.) **275**, 510
Nucleotide sequence of bacteriophage G4 DNA (Godson G. N., Barrell B. G., Staden R. and Fiddes J. C.) **276**, 236
Nucleotide sequence of *cro*, *cII* and part of *O* gene in phage λDNA (Schwarz E., Scherer G., Hobom G. and Kössel) **272**, 410
Nucleotide sequences at the ends of bacteriophage Mu DNA (Allet B.) **274**, 553
Sequence from the genome of a non-transforming mutant of polyoma virus (Soeda E. and Griffin B. E.) **276**, 294
3'-Terminal nucleotide sequences in the genome RNA of picornaviruses (Porter A. G., Fellner P., Black D. N., Rowlands D. J., Harris T. J. R. and Brown F.) **276**, 298
The regulatory region of the *trp* operon of *Serratia marcescens* (Miozzari G. F. and Yanofsky C.) **276**, 684
The regulatory region of the biotin operon in *Escherichia coli* (Otsuka A. and Abelson J.) **276**, 689
The relationship between function and DNA sequence in an intercistronic regulatory region in phage λ (Rosenberg M., Court D., Shimatake H. and Wulff D. L.) **272**, 414
The sequence of *E. coli* 16S ribosomal RNA (Brimacombe R.) **276**, 445
Nucleus. Nuclear matter distributions, *news and views*, (Hodgson P. E.) **272**, 129
Zellkern und Zellzyklen (Nagl W.) *book review by* Tobler H. **272**, 383
Nucleus: Anchorage. Intermediate filaments anchor the nuclei in nuclear monolayers of cultured human fibroblasts (Lehto V-P., Virtanen I. and Kurki P.) **272**, 175
Nuffield Foundation. "Erosion of spirit" in British science, *news*, **275**, 577
Nutrient deficiency. Tolerance of *Triticale* wheat and rye to copper deficiency (Graham R. D.) **271**, 542
Nutrient: Plant. Sinks and sources of plant nutrients, *news and views*, (Moore P. D.) **276**, 560
Nutrition. Breeding more protein, *news and views*, (Miflin B. J.) **275**, 483
Development, Reform, and Malnutrition in Chile (Hakim P. and) *book review by* Miller D. S. **276**, 542
Enough is enough, *news*, (Mellanby K.) **271**, 203
Plants, Food and People (Chrispeels M. J. and) *book review by* Hill T. A. **272**, 381
Vitamin needs, *news and views*, (Jukes T. H.) **272**, 395
Obese-diabetic. Sensitivity of coricosteroid dependent insulin-resistant lipogenesis in marrow preadipocytes of obese-diabetic (db/db) mice **275**, 752
Object reconstruction. Object reconstruction from intensity data, *matters arising*, (Fiddy M. A. and Greenaway A. H.) **276**, 421
Obsidian. Hydration of obsidian (Laursen T. and Lanford W. A.) **276**, 153
Ocean. The Dynamics of the Upper Ocean (Phillips O. M. *editor*) *book review by* Webb D.J. **272**, 194
The Dynamics of the Upper Ocean (Phillips O. M. *editor*) *book review by* Webb D.J. **272**, 194
Ocean. Variability of the ocean (Monin A. S.) *book review by* Wunsch C. **271**, 286
Ocean colour. Colour, ultraviolet absorbance and salinity of the surface waters off the west coast of Ireland (Monahan E. C. and Pybus M. J.) **274**, 782
Ocean floor. Contrasts between oceanic and continental 'unconformities' in the Oligocene of the Australian region (Carter A. N.) **274** 152
Vertical particulate spires or walls within the Florida current and near the Antilles Current (Proni J. R., Newman F. C., Ostapoff F. and Walter D. J.) **276**, 360
Ocean floor. Pb, Nd and Sr isotopes in oceanic ferromanganese deposits and ocean floor basalts (O'Nions R. K., Carter S. R., Cohen R. S., Evensen N. M. and Hamilton P. J.) **273**, 435
Ocean history. Injection events in ocean history (Thierstein H. R. and Berger W. H.) **276**, 461
Ocean wave. Waves in the Ocean (LeBlond P. H. and) *book review by* Webb D. J. **274**, 724
Oceanic crust. Dates, rates and angles of faulting in the Peru-Chile Trench (Prince R. A. and Schweller W. J.) **271**, 743
Ophiolites match oceanic crust, *news and views*, (Smith P. J.) **273**, 270
Oceanography. A Voyage of Discovery (Angel M. *editor*) *book review by* Yonge C. M. **273**, 82
Oceanic Micropalaeontology (Ramsay A. T. S. *editor*) *book review by* Funnell B. M. **273**, 576
Oceanographic sciences—recent textbooks Charnock H. **272**, 104
Octave illusion. Deutsch's octave illusion, *matters arising*, (Deutsch D. and Gregory A. H.) **274**, 721
Octopus. The blind octopus, *Cirrothauma* (Aldred R. G., Nixon M. and Young J. Z.) **275**, 547
Octopus (Wells M. J.) *book review by* Messenger J. B. **273**, 249
Ocular motility. Ocular motility and recovery of orientational properties of visual cortical neurones in dark-reared kittens (Buisseret P., Gary-Bobo E. and Imbert M.) **272**, 817
Oesophagus. Inhibition of oesophageal peristalsis in the lobster after chemical stimulation (Robertson R. M. and Laverack M. S.) **271** 239
Oestradiol induction. Translation of *Xenopus* vitellogenin mRNA during primary and secondary induction (Farmer S. R., Henshaw E. C., Berridge M. V. and Tata J. R.) **273**, 401
Oestrogen. Oestrogen content of the embryonic rabbit ovary (George F. W., Milewich L. and Wilson J. D.) **274**, 172
Oestrogen modulates progestin receptor concentrations in some rat brain regions but not in others (MacLusky N. J. and McEwen B. S.) **274**, 276
Oestrogen receptor. Assessment of specificity of oestrogen receptor—DNA interaction by a competitive assay (Kallos J. and Hollander V. P.) **272**, 177
Official Secrets Act. Opening up Government, *leading article*, **274**, 301
Prejudicial to the interests of the state? *leading article*, **276**,

307
Too many official secrets. *leading article*, **273**, 1
Oil substitute. What substitutes for oil? *news*, (Spurgeon D.) **273**, 702
Oilshale. Oil-shale kerogen: low temperature degradation in molten salts (Bugle R. C., Wilson K., Olsen G., Wade L. G. Jr and Osteryoung R. A.) **274**, 578
Oklo. Natural fission reactors—Oklo style. *news and views*, (Durrani S. A.) **271**, 306
Olby–Laschamp magnetic event. Age of the Olby–Laschamp geomagnetic polarity event (Condomines M.) **276**, 257
Oligodendrocyte. Galactocerebroside is a specific cell-surface antigenic marker for oligodendrocytes in culture (Raff M. C., Mirsky R., Fields K. L., Lisak R. P., Dorfman S. H., Silberberg D. H., Gregson N. A., Leibowitz S. and Kennedy M. C.) **274**, 813
Oligonucleotide. Inhibition of protein synthesis by 2′—5′ linked adenine oligonucleotides in intact cells (Williams B. R. G. and Kerr I. M.) **276**, 88
Mutagen-oligonucleotide complexes with a bulged base as models for frameshift mutation (Che-Lee C. H. and Tinoco I. Jr) **274**, 609
Olivine. Origin of olivine subgrain boundaries in mantle peridotites (Fleet M. E.) **275**, 48
O^6-methylguanine. Dimethylnitrosamine inhibits enzymatic removal of O^6-methylguanine from DNA (Pegg A. E.) **274**, 182
Ommatidium. Clonal segregation and positional information in late ommatidial development in *Drosophila* (Campos-Ortega J. A., Jürgens G. and Hofbauer A.) **274**, 584
Oncogenic transformations. X-ray dose fractionation and oncogenic transformationss in cultured mouse embryo cells (Miller R. and Hall E. J.) **272**, 58
Oncogenicity. Homologous DNA sequences in different Ti-plasmids are essential for oncogenicity (Depicker A., Van Montagu M. and Schell J.) **275**, 150
Ontogeny. Ontogenetic analogy (Gould J. G.) *book review by* Cain A. J. **272**, 758
Oocyte. Activation of mammalian oocytes by intracellular injection of calcium (Fulton B. P. and Whittingham D. G.) **273**, 149
Functional stabilisation of HeLa cell histone messenger RNAs injected into *Xenopus* oocytes by 3′-OH polyadenylation (Huez G., Marbaix G., Gallwitz D., Weinberg E., Devos R., Hubert E. and Cleuter Y.) **271**, 572
Genetic regulation of glucose phosphate isomerase in mouse oocytes (Peterson A. C. and Wong G. G.) **276**, 267
Hormone-induced release of intracellular Ca^{2+} triggers meiosis in starfish oocytes (Moreau M., Guerrier P., Doree M. and Ashley C. C.) **272**, 251
Intracellular migration of nuclear proteins in *Xenopus* oocytes (De Robertis E. M., Longthorne R. F. and Gurdon J. B.) **272**, 256
Steroid-induced meiotic division in *Xenopus laevis* oocytes: surface and calcium. *review article*, (Baulieu E.-E., Godeau F., Schorderet M. and Schorderet-Slatkine S.) **275**, 593
Three-dimensional structure of the lipovitellin-phosvitin complex from amphibian oocytes (Ohlendorf D. H., Wrenn R. F. and Banaszak L. J.) **272**, 28
Opal. Ordered arrangements of spheres of two different sizes in opal (Sanders J. V. and Murray M. J.) **275**, 201
Operon. Identification of a single promoter in *E. coli* for *rplJ*, *rplL* and *rpoBC* (Linn T. and Scaife J.) **276**, 33
The regulatory region of the *trp* operon of *Serratia marcescens* (Miozzari G. F. and Yanofsky C.) **276**, 684
The regulatory region of the biotin operon in *Escherichia coli* (Otsuka A. and Abelson J.) **276**, 689
Ophiolite. Ophiolites match oceanic crust. *news and views*, (Smith P. J.) **273**, 270
Rejecting ophiolites. *news and views*, (Smith P. J.) **274**, 316
Ophiolite complex. An ophiolite complex of probable early Caledonian age discovered on Karmøy (Sturt B. A. and Thon A.) **275**, 538
Ophiolitic rock. Tectonic emplacement of ophiolitic rocks in the Precambrian Mona Complex of Anglesey (Thorpe R. S.) **276**, 57
Opiate. Opiate tolerance and dependence induced *in vitro* in single myenteric neurones (North R. A. and Karras P. J.) **272**, 73
Opiate receptor. CXBK mice deficient in opiate receptors show poor electroacupuncture analgesia (Peets J. M. and Pomeranz B.) **273**, 675
Phospholipase A inhibition of opiate receptor binding can be reversed by albumin (Lin H-K. and Simon E. J.) **271**, 383
Opsin. The chromophore binding space of opsin (Daemen F. J. M.) **276**, 847
Optic tectum. Axons from eyes grafted in *Xenopus* can grow into the spinal cord and reach the optic tectum (Giorgi P. P. and Van der Loos H.) **275**, 746
Optical burst. Discovery of optical bursts from X-ray burst source MXB1735-44 (Grindlay J. E., McClintock J. E., Canizares C. R., Paradijs van J. Cominsky L., Li F. K. and Lewin W. H. G.) **274**, 567
Optical potential. Microscopic optical potentials. *news and views*, (Hodgson P. E.) **276**, 216
Orbital Motion. Orbital Motion (Roy A. E.) *book review by* Jupp A. H. **274**, 408
Orchid. A Field Guide to the Orchids of Britain and Europe with North Africa and the Middle East (Williams A.E. and) *book review by* Collins P. **276**, 651
Organic acid. Characterisation of organic acids trapped in coals (Hayatsu R., Winans R. E., Scott R. G., Moore L. P. and Studier M. H.) **275**, 116
Orientation. Egocentric orientation is influenced by trained voluntary cyclorotary eye movements (Balliet R. and Nakayama K.) **275**, 214
Orion. Possible identification of the 45-μm ice signature in Orion (Papoular R., Léna P., Marten A., Rouan D. and Wijnbergen J.) **276**, 593
Ornithine decarboxylase. Induction of ornithine decarboxylase by nerve growth factor dissociated from effects on survival and neurite outgrowth (Greene L. A. and McGuire J. C.) **276**, 191
Ornothology. Solving the problem of bird identity—books for the amateur bird-watcher Conder P. **276**, 643
Oscillator: Coupled. Coupled oscillators in chaotic modes. *news and views*, (MacDonald N.) **274**, 847
Osmolarity. Effect of osmolarity on quantal size. *matters arising*, (Marchbanks R. M.) **274**, 513
Osteoarthritis. Immunofluorescence in osteoarthritis (Pringle J. A., Byers P. D. and Brown M. E. A.) **274**, 94
Osteopetrosis. Host-donor cellular interations in the treatment of experimental osteopetrosis (Nisbet N. W., Menage J. and Loutit J. F.) **271**, 464
Ouabain. Differential metabolism and leakage of protein in an inherited cataract and a normal lens cultured with ouabain (Piatigorsky J., Fukui H. N. and Kinoshita J. H.) **274**, 558
Ouabain like activity in toad skin and its implications for endogenous regulation of ion transport (Flier J. S.) **274**, 285
Outbreeding. Sexual imprinting and optimal outbreeding (Bateson P.) **273**, 659
Out-of-ecliptic mission. Optical detection of local interstellar particles during an out-of-ecliptic mission (Greenberg J. M. and Schuerman D. W.) **275**, 39
Ovalbumin. Nucleotide sequence homology at 12 intron-exon junctions in the chick ovalbumin gene (Catterall J. F., O'Malley B. W., Robertson M. A., Staden R., Tanaka Y. and Brownlee G. G.) **275**, 510
Sequence of chicken ovalbumin mRNA (McReynolds L., O'Malley B. W., Nisbet A. D., Fothergill J. E., Givol D., Fields S., Robertson M. and Brownlee G. G.) **273**, 723
The natural ovalbumin gene contains seven intervening sequences (Dugaiczyk, A., Woo S. L. C., Lai E. C., Mace M. L. Jr, McReynolds L. and O'Malley B. W.) **274**, 328
Ovary. Internalisation of gonadotrophin-receptor complex in ovarian luteal cells (Conn P. M., Conti M., Harwood J. P., Dufau M. L. and Catt K. J.) **274**, 598
Ovulation. Urine-induced reflex ovulation in anovulatory rats may be a vomeronasal effect (Johns M. A., Feder H. H., Komisaruk B. R. and Meyer A. D.) **272**, 446
Owl. Deaths of owls traced to insecticide-treated timber (Jones D. M., Bennett D. and Elgar K.E.) **272**, 52
Oxazolone. Circadian variation in immune response to oxazolone, *matters arising*, (Pownall R., Cove-Smith J. R., Kabler T. A., Kowanko I. and Knapp M. S.) **275**, 346
Circadian variation in immune response to oxazolone—Reply, *matters arising*, (Fachet J. and Andó I.) **275**, 346
Inverse regulation of cell-mediated and humoral immune responses to oxazolone by *H-2* linked genes (Fachet J. and Andó I.) **273**, 239
Oxidation. Photocatalytic oxidation of organic compounds on Mars (Chun S. F. S., Pang K. D., Cutts J. A. and Ajello J. B.) **274**, 875
Oxygen. Early Precambrian oxygen: a case against photosynthesis (Towe K. M.) **274**, 657
Energetic oxygen ions in the magnetosphere, *news and views*, (Young D. T.) **271**, 303
Oxygen in the Palaeoaquatic environment (Henderson-Sellers B. and Henderson-Sellers A.) **272**, 439
Oxygen isotope. Factors controlling oxygen isotopic composition of fallen snow in Antarctica (Kato K.) **272**, 46
Oxygen: Physiological. Are physiological oxygen concentrations mutagenic? (Bruyninckx W. J., Mason H.S. and Morse S. A.) **274**, 606
Oxymyoglobin. Structure of oxymyoglobin (Phillips S. E. V.) **273**, 247
Ozone. A simple calculation of ozone depletion by chlorofluoromethanes using a two-dimensional model (Pyle, J. A.) **271**, 42
A threat from fluorocarbons? *news and views*, **276**, 215
Effect of the reaction $HO_2 + O_3 \rightarrow OH + 2O_2$ on stratospheric ozone (Whitten R. C., Borucki W. J., Capone L. A. and Turco R. P.) **275**, 523
Evidence of photochemical haze in the atmosphere of Greater London (Ball D. J. and Bernard R. E.) **271**, 733
Increased atmospheric carbon dioxide and stratospheric ozone (Groves K. S., Mattingly S. R. and Tuck A. F.) **273**, 711
Long-range transport of tropospheric ozone (Hov O., Hesstvedt E. and Isaksen I. S. A.) **273**, 341
Nature's ozone, *correspondence*, (Cegielski C. M.) **274**, 10
Ozone in London—Reply, *matters arising*, (Williams M. L. and Sullivan E. J.) **273**, 408
Possible climatic and biological impact of nearby supernovae (Hunt G. E.) **271**, 430
Relation between monthly variations of global ozone and solar activity (Keating G. M.) **274**, 873
SSTs, nitrogen fertiliser and stratospheric ozone (Turco R. P., Whitten R. C., Poppoff I. G. and Capone L. A.) **276**, 805
The origin of ozone in the troposphere (Fishman J. and Crutzen P. J.) **274**, 855
(Eichler D. Roy C. R.) **275**, 734
Ozone. A survey of ozone levels in the British Isles using indicator plants (Ashmore M. R., Bell J. N. B. and Reily C. L.) **276**, 813
Ozone in London. *matters arising*, (Thornes J. E.) **273**, 407
Ozone increase from Concorde operations? *news and views*, (Fabian P.) **272**, 306
Ozone layer. Effects of intense stratospheric ionisation events (Reid G. C., McAfee J. R. and Crutzen P. J.) **275**, 489
Pacific. Zinc in north-east Pacific water (Bruland K. W., Knauer G. A. and Martin J. H.) **271**, 741
Zinc in north-east Pacific water (Bruland K. W., Knauer G. A. and Martin J. H.) **271**, 741
Pacific plate. Roll cell mantle convection under the Pacific plate (Furlong K. P. and Chapman D. S.) **274**, 145
Pain. The narcotic antagonist naloxone enhances clinical pain (Levine J. D., Gordon N. C., Jones R. T. and Fields H. L.) **272**, 826
Pakistan. UNEP scheme to bring power to Pakistan's villages, *news*, **272** 571
US refuses nuclear fuels to South Africa and Pakistan, *news*, **273**, 330
France falls out with Pakistan over reprocessing, *news*, (Kidwai A.) **271**, 397
Pakistan calls for new international institutions, *news*, (Kidwai A.) **274**, 109
Pakistan needs indigenous medicine, *leading article*, **275**, 1
Palaeoaquatic. Oxygen in the Palaeoaquatic environment (Henderson-Sellers B. and Henderson-Sellers A.) **272**, 439
Palaeoclimate. Test size variation in *Globigerina bulloides* in response to Quaternary palaeoceanographic changes (Malmgren B. A. and Kennett J. P.) **275**, 123
Palaeoclimatology. Palaeoclimatic and geomorphic implications of $^{230}Th/^{234}U$ dates on speleothems from Britain (Atkinson T. C., Harmon R. S., Smart P. L. and Waltham A. C.) **272**, 24
Palaeoecology. Botanical fingerprinjs, *news and views*, (Moore P. D.) **274**, 18
Palaeoenvironment. Geology, fauna and palaeoenvironments of Lower Sivalik deposits around Ramnagar, India (Vasishat R. N., Gaur R. and Chopra S. R. K.) **275**, 736
Organic geochemical indicators of palaeoenvironmental conditions of sedimentation (Brassell S. C. and Eglinton G.) **272**, 216
Palaeogeomagnetism. What happened to the high-latitude palaeomagnetic poles? (Lapointe P. L., Roy J. L. and Morris W. A.) **273**, 655
Palaeogeotherm. Palaeogeotherms: implications of disequilibrium in garnet lherzolite xenoliths (Fraser D. G. and Lawless P. J.) **273**, 220
Palaeogeotherms. Palaeogeotherms: implications of disequilibrium in garnet lherzolite xenoliths, *matters arising*, Carswell D. A. **276**, 737
Palaeogeotherms: implications of disequilibrium in garnet lherzolite xenoliths—Reply, *matters arising*, Fraser D. G. and **276**, 737
Palaeogravity. Limits to palaeogravity since the late Precambrian (Stewart A. D.) **271**, 153
Palaeomagnetism. The origin of lunar palaeomagnetism (Runcorn S. K.) **275**, 430
Palaeontology. Oceanic Micropalaeontology (Ramsay A. T. S. *editor*) *book review by* Funnell B. M. **273**, 576
Palaeoquatic environment. Oxygen in the palaeoquatic environment, *matters arising*, (Anderson M. M.) **275**, 775
Oxygen in the palaeoquatic environment—Reply, *matters arising*, (Henderson-Sellers B. and Henderson-Sellers A.) **275**, 776
Palaeotemperature. Oxygen isotope palaeotemperatures from the Tertiary period in the North Sea area (Buchardt B.) **275**, 121
Palaeo-wind. Holocene palaeo-wind evidence from palynology in Baffin Island (Nichols H., Kelly P. M. and Andrews J. T.) **273**,
Palynology. The North-West European Pollen Flora (Punt W., *editor*) *book review by* Moore P. D. **271**, 591
Palynology. Palynology, palaeomagnetism and radiometric dating of Flandrian marine and freshwater sediments of Lock Lomond (Dickson J. H., Stewart D. A., Thompson R., Turner G., Baxter M. S., Drndarsky N. D. and Rose J.) **274**, 548
Pancreas. δ- Glucose inhibits potassium efflux from pancreatic islet cells (Henquin J. C.) **271**, 271
Infection of human pancreatic beta cell cultures with mumps virus (Prince G. A., Jenson A. B., Billups L. C. and Notkins A. L.) **271**, 158
Morphine and β-endorphin influence the secretion of the endocrine pancreas (Ipp E., Dobbs R. and Unger R. H.) **276**, 190
Paper. Foxing a fungal infection of paper (Meynell G. G. and Newsam R. J.) **274**, 466
Paramecium caudatum. Behavioural mutants of *Paramecium caudatum* with defective membrane electrogenesis (Takahashi M. and Naitoh Y.) **271**, 656
Parasite. Immunological properties of the surface of parasitic nematodes (Mackenzie C. D., Preston P. M. and Ogilvie B. M.) **276**, 826
Parasitology. Identification of economically important parasites, *review article*, (Godfrey D. G.) **273**, 600
Introductory parasitology—recent textbooks Lumsden W. H. R. **272**, 93
Parity. New source of parity violation, *news and views*, (Close F. E.) **274**, 11
Parity of non-conservation. Handedness of atoms and parity of non-conservation, *review article*, (Feinberg, G.) **271**, 509
Parker J. Mr Justice Parker and technical fact, *news*, **272**, 300
Parkinson's disease. Receptor basis for dopaminergic supersensitivity in Parkinson's disease (Lee T., Seeman P., Rajput A., Farley I. J. and Hornykiewicz O.) **273**, 59
Parkinson's Law. An empirical test of Parkinson's Law, *correspondence*, (Moss R.) **273**, 184
Parkinson's Law, *correspondence*, (Moss R.) **274**, 208
Parkinson's Law in the Antarctic, *correspondence*, (Fuchs V. E.) **273**, 486
Parthenogenesis. Totipotent cells of parthenogenetic origin in a chimaeric mouse (Stevens L. C.) **276**, 266
Parthenogenone. Impaired gene activity for 18S and 28S rRNA in early embryonic development of mouse parthenogenones (Hansmann I., Gebauer J. and Grimm T.) **272**, 377
α-particle. Alpha-particle clustering in light nuclei, *news and views*, (Hodgson P. E.) **273**, 340
Particle physics. A massive particle conference, *news*, (Close F.) **275**, 267
A new interaction for leptons? *news and views*, (Close F. E.) **273**, 706
Alpha-particle clustering in light nuclei, *news and views*, (Hodgson P. E.) **273**, 340
Dodging Heisenberg, *news and views*, (MacDonald N.) **272**, 667
Electron cooling and its applications in elementary particle physics, *review article*, (Dikansky N. S., Meshkov I. N. and Skrinsky'A. N.) **276**, 763
Field energies and principles of equivalence (McGruder III C. H.) **272**, 806
Intermolecular forces, *news and views*, (Richards G.) **272**, 669
Isoscalar breathing mode states identified in ^{144}Sm and ^{208}Pb, *news and views*, (Hodgson P. E.) **271**, 212
Measurement of Weak Forces in Physics Experiments (Braginsky V. B. and) *book review by* Everitt C. W. F. **272**, 737
Microscopic optical potentials, *news and views*, (Hodgson P. E.) **276**, 216
Orthodoxy restored in neutrino physics? *news and views*, (Miller D. J.) **274**, 531
Photon fridge, *news and views*, **273**, 13
Pre-equilibrium theory, *news and views*, (Hodgson P. E.) **273**, 12
SU(2) × U(1): A gauge theory of weak interactions? (Bailin D. and Dombey N.) **271**, 20
Success for unified field theory **273**, 584
The LEP summer study, *news and views*, **275**, 482
Two-stage multiwire proportional chambers for high flux operation? *news and views*, (Imric D.) **274**, 638
Where should LEP be built? *news*, **275**, 469
Patent. European Patent Office poses problems for microbiologists, *news*, **273**, 583
Genetically engineered bacterium patented, *news*, **272**, 121
Supreme Court nullifies patent ruling on living organisms, *news*, **274**, 2
Patent rights for university researchers, *news*, **276**, 434

Patent rights: once more around the block. *news*, **273,** 420
Universities can patent recombinant DNA results **272,** 199
University patent rights on research: US thinks again. *news*, **272,** 488

Pathogen. Pathogenicity of conventional and debilitated *Escherichia coli* K12 (Levy S. B., Sullivan N. and Gorbach S. L.) **274,** 395

Pathogenesis. Plasmid-induced loss of virulence in *Vibrio cholerae* (Sinha V. B. and Srivastava B. S.) **276,** 708

Pathology. Handbuch der Allgemeinen Pathologie (Masshoff J. W. *editor*) *book review by* Brent L. **274,** 405
Seed Pathology (Neergaard P.) *book review by* Griffiths D. J. **272,** 474

Peanuts. Corn and Peanuts. *news*, (Jukes T. H.) **271,** 499

Pegasus. Sea moths pinned down. *news and views*, **275,** 693

Peking University. Scientist to head Peking University. *news*, **273,** 483

Pelican. Brown pelican threat to space shuttle. *news*, **274,** 304

Penicillin-binding protein. Identification of the binding protein which may be the target of penicillin action in *Bacillus megaterium* (Reynolds P. E., Shepherd S. T. and Chase H. A.) **271,** 568

Pentacyclic Triterpane. First proof of structure of a C_{28}-pentacyclic triterpane in petroleum (Seifert W. K., Moldowan J. M., Smith G. W. and Whitehead E. V.) **271,** 436

Penzias A. A. A sensitive ear for the Big Bang. *news*, (Rowan-Robinson M.) **275,** 687

Peptide: Chemotactic. Rapid stimulation of protein carboxymethylation in leukocytes by a chemotactic peptide (O'Dea R. F., Viveros O. H., Axelrod J., Aswanikumar S., Schiffmann E. and Corcoran B. A.) **272,** 462

Peptide: Neuronal. Isolation, structure and biological activity of two cholecystokinin octapeptides from sheep brain (Dockray G. J., Gregory R. A., Hutchison J. B., Harris J. I. and Runswick M. J.) **274,** 711

Peptidyl-tRNA hydrolase. Peptidyl-transfer RNA hydrolase prevents inhibition of protein synthesis initiation (Atherly A. G.) **275,** 769

Perception. The Perceptual World (Ficandt K. von and) *book review by* Barnes-Gutteridge W. **273,** 323
Why do we not perceive photons? (Ross J. and Campbell F. W.) **275,** 541

Perception: Motion. Does colour provide an input to human motion perception? (Ramachandran V. S. and Gregory R. L.) **275,** 55

Persia. The blind fishes of Persia. *news and views*, (Smith A.) **271,** 711

Persian Gulf. Pollution in the Persian Gulf. *news*, **272,** 573

Peru. Pre-ceramic maize on the north-central coast of Peru (Grobman A. and Bonavia D.) **276,** 386
Seismological and geological aspects of the Mantaro landslide in Peru (Berrocal J., Espinosa A. F. and Galdos J.) **275,** 533
The Inca's ancient answer to food shortage. *news*, (Weber E. J.) **272,** 486
Peru rings the changes in science policy. *news*, **275,** 473

Peru-Chile Trench. Dates, rates and angles of faulting in the Peru-Chile Trench (Prince R. A. and Schweller W. J.) **271,** 743
Dates, rates and angles of faulting in the Peru-Chile Trench (Prince R. A. and Schweller W. J.) **271,** 743

Pest control. Genetic sexing technique for a mosquito sterile male release (Baker R. H., Sakai R. K. and Saifuddin U. T.) **274,** 253
Locusts: vigilance still needed. *news*, (Collins P.) **273,** 180

Pesticide. Cuticle under attack. *news and views*, (Vincent J. F. V.) **273,** 339
Pesticides in the diet. *news*, **276,** 661
Pesticides: Preparation and Mode of Action (Cremlyn R.) *book review by* Moriarty F. **276,** 742

Pesticides. An intervening sequence of the mouse β-globin major gene shares extensive homology only with β-globin genes (Miller H. I., Konkel D. A. and Leder P.) **275,** 772

Petite mutant. Naturally occurring respiratory deficient *Candida slooffii* **strains resemble** *petite* **mutants.** (Arthur H., Watson K., McArthur C. R. and Clark-Walker G. D.) **271,** 750

PETRA. Difficulties at PETRA worry designers of Europe's next accelerator. *news*, **276,** 658

PETRA puts European physics in the lead. PETRA puts European physics in the lead. *news*, **274,** 202

Petrification. Petrified cotton? *news and views*, (Vogel F. L. and Zemel J. N.) **275,** 11

Petrogenesis. Strontium isotope evidence for petrogenesis of Mexican andesites (Moorbath S., Thorpe R. S. and Gibson I. L.) **271,** 437

Petroleum. First proof of structure of a C_{28}-pentacyclic triterpane in petroleum (Seifert W. K., Moldowan J. M., Smith G. W. and Whitehead E. V.) **271,** 436
Kerogen maturation and petroleum genesis (Ujiie) **272,** 438
Kerogen maturation and petroleum generation. *matters arising*, (Jones R. W.) **275,** 567
Kerogen maturation and petroleum generation—Reply. *matters arising*, (Ujiié Y.) **275,** 568
Measurement of thermal maturation of petroleum by proton magnetic resonance spectroscopy (Alexander R., Kagi R. I. and Woodhouse G. W.) **276,** 598

Petrology. Chemical Petrology (Mueller R. F., *editor*) *book review by* Fraser D. G. **272,** 103

Phage. Lysogeny by f2 phage?—Reply. *matters arising*, (Zgaga V.) **271,** 188

Phage λ. Nucleotide sequence of *cro*, cII and part of *O* gene in phage λDNA (Schwarz E., Scherer G., Hobom G. and Kossel) **272,** 410

Phage. The relationship between function and DNA sequence in an intercistronic regulatory region in phage λ (Rosenberg M., Court D., Shimatake H. and Wulff D. L.) **272,** 414

Phage: Bacteriophage T4. Bacteriophages inhibit degradation of abnormal proteins in *E. coli* (Simon L. D., Tomczak K. and St John A. C.) **275,** 424

Phage: Bacteriophage λ. cI. DNA sequence of the bacteriophage λ cI gene (Sauer R. T.) **276,** 301

Phage: Bacteriophage T4. *In vitro* transcription and isolation of polycistronic RNA product of the T4 tRNA operon (Goldfarb A., Seaman E. and Daniel V.) **273,** 562

Phage: Bacteriophage G4. Nucleotide sequence of bacteriophage G4 DNA (Godson G. N., Barrell B. G., Staden R. and Fiddes J. C.) **276,** 236

Phage: Corynebacteriophage. Relationship between β converting and γ non-converting corynebacteriophage DNA (Buck G., Groman N. and Falkow S.) **271,** 683

Phage f2. Lysogeny by f2 phage?. *matters arising*, (Weissmann C.) **271,** 188

Phage: G4. Gene *K*, a new overlapping gene in bacteriophage G4 (Shaw D. C., Walker J. E., Northrop F. D., Barrell B. G., Godson G. N. and Fiddes J. C.) **272,** 510

Phage Mu. Invertible DNA in phage Mu. *news and views*, (Howe M. M.) **271,** 608
Involvement of phage Mu-1 early functions in Mu-mediated chromosomal rearrangements (Faelen M., Huisman O. and Toussaint A.) **271,** 580
Nucleotide sequences at the ends of bacteriophage Mu DNA (Allet B.) **274,** 553
The invertible segment of bacteriophage Mu DNA determines the adsorption properties of Mu particles (Bukhari A. I. and Ambrosio L.) **271,** 575
Inversion of the G DNA segment of phage Mu controls phage infectivity (Kamp D., Kahmann R., Zipser D., Broker T. R. and Chow L. T.) **271,** 577

Phage Qn. Qβ DNA-containing hybrid plasmids giving rise to Qβ phage formation in the bacterial host (Taniguchi T., Palmieri M. and Weissmann C.) **274,** 223

Phage: T4. *In vivo* synthesis and properties of uracil-containing DNA (Warner H. R. and Duncan B. K.) **272,** 32

Phage VX174. Potential for variability through multiple gene products of bacteriophage ΦX174 (Pollock T. J., Tessman I. and Tessman E. S.) **274,** 34

Phagocytic vacuole. Novel cytochrome *b* system in phagocytic vacuoles of human granulocytes (Segal A. W. and Jones O. T. G.) **276,** 515

Pharmacology. Psychopharmacology: A Generation of Progress (Lipton M. A.,) *book review by* Edwards G. **274,** 406
Quantum Pharmacology (Richards W. G.) *book review by* Roberts G. C. K. **271,** 288

Phase Mu. Role of the G segment in the growth of phase Mu (Symonds N. and Coelho A.) **271,** 573

Phase Transition. Phase Transitions in Solids (Rao C. N. R. and) *book review by* Nelson D. R. **275,** 258
Phase transitions in spin glasses. *news and views*, **276,** 762

Phenotype. IQ and environmental variables. *correspondence*, (Havender W. R.) **272,** 666
Nature and nurture. *correspondence*, (Bondi H.) **272,** 204

Phenylpiperidine. New structural concepts for narcotic antagonists defined in a 4-phenylpiperidine series (Zimmerman D. M., Nickander R., Horng J. S. and Wong D. T.) **275,** 332

Pheromone. A photoaffinity-labelled insect sex pheromone for the moth antheraea polyphemus (Ganjian I., Pettei M. J., Nakanishi K. and Kaissling K-E.) **271,** 157
Pheromonal chirality and integrity of aggregation response in southern species of the bark beetle *Ips* sp. (Vite J. P., Ohloff G. and Billings R. F.) **272,** 817
Sex pheromones in bacteria (Saunders J. R.) **275,** 692
Temporal decline in attractiveness of honeybee queen tracks (Juska A.) **276,** 261

Philosophy. A Rational Animal, and other Philosophical Essays on the Nature of Man (Flew A.) *book review by* Sutherland S. **275,** 347
Discussion on interactionism (Popper K. R. and) *book review by* Zangwill O. L. **272,** 770

Phobos. New light on Phobos, the inner satellite of Mars. *news and views*, (Fielder G.) **271,** 613
Origin of the grooves on Phobos (Thomas P., Veverka J. and Duxbury T.) **273,** 282

Phosphate. Sorption of phosphate by hydrolytic reaction products of aluminium (Ng Kee Kwong K. F. and Huang P. M.) **271,** 336

Phosphatidylethanolamine. Enzymatic methylation of phosphatidylethanolamine increases erythrocyte membrane fluidity (Hirata F. and Axelrod J.) **275,** 219

Phospholipase A. Phospholipase A and the mechanism of action of aldosterone (Yorio T. and Bentley P. J.) **271,** 79
Phospholipase A inhibition of opiate receptor binding can be reversed by albumin (Lin H-K. and Simon E. J.) **271,** 383

Phospholipid. Neutron diffraction studies on selectively deuterated phospholipid bilayers (Büldt G. Gally H. U., Seelig A., Seelig J. and Zaccai G.) **271,** 182
Physical and physiological properties of dry lung surfactant (Morley C. J., Bangham A. D., Johnson P., Thorburn G. D. and Jenkin G.) **271,** 162

Phospholipid annulus. Transbilayer disposition of the phospholipid annulus surrounding a calcium transport protein (Bennett J. P., McGill K. A. and Warren G. B.) **274,** 823

Phosphonopeptide. Phosphonopeptides, a new class of synthetic antibacterial agents (Allen J. G., Atherton F. R., Hall M. J., Hassall C. H., Holmes S. W., Lambert R. W., Nisbet L. J. and Ringrose P. S.) **272,** 56

Phosphorus. Phosphorus (Corbridge D. E. C.) *book review by* Kirby A. J. **273,** 324
Phosphorus in the Environment: Its Chemistry and Biochemistry (Williams R. J. P., chairman) *book review by* Corbridge D. E. C. **276,** 426

Phosphoryl transfer. Stereochemistry of phosphoryl group transfer using a chiral [^{16}O, ^{17}O, ^{18}O] phosphate monoester: the stereochemical course of alkaline phosphatase (Jones S. R., Kindman L. A. and Knowles J. R.) **275,** 564

Phosphosilicate. On the occurrence of phosphosilicates (Dent Glasser L. S. and Smith D. N.) **274,** 878

Photochemical haze. Evidence of photochemical haze in the atmosphere of Greater London (Ball D. J. and Bernard R. E.) **271,** 733

Photochemistry. Photochemical conversion of solar energy. *news and views*, (Harriman A.) **276,** 15
Photochemical (8—8) coupling of purine nucleosides to guanosine (Bose S. N., Davies R. J. H., Anderson D. W., Van Niekerk J. C., Nassimbeni L. R. and Macfarlane R. D.) **271,** 783

Photochromic system. Quasi-crystals from irradiated photochromic dyes in an applied electric field (Krongauz V. A. and Goldburt E. S.) **271,** 43

Photoelectrochemical cell. Photoelectrochemical cell with cadium telluridefilm (Danaher W. J. and Lyons L. E.) **271,** 139

Photoelectrochemistry. Photoelectrochemical reduction of aqueous carbon dioxide on p-type gallium phosphide in liquid junction solar cells (Halmann M.) **275,** 115

Photoelectrolysis. Irreversibilities in the mechanism of photoelectrolysis (Williams F. and Nozik A. J.) **271,** 137

Photoemission. Photoemission and the Electronic Properties of Surfaces (Feuerbacher B. *editor*) *book review by* Woodruff D. P. **275,** 163

Photofixation. Photofixation of carbon dioxide to formic acid *in vitro* using water as hydrogen source (Tazuke S. and Kitamura N.) **275,** 301

Photography. Photographic amplification of faint astronomical images (Malin D. F.) **276,** 591

Photolysis. Nanosecond transient Raman spectra of photolysed carboxyhaemoglobin (Lyons K. B., Friedman J. M. and Fleury P. A.) **275,** 565

Photon. Deflection of polarised radiation: relative phase delay technique (Dennison B., Melnick G., Harwit M., Sato T., Stelzreid C. T. and Jauncey D.) **273,** 33
Why do we not perceive photons? (Ross J. and Campbell F. W.) **275,** 541

Photoperiod. Evidence for the functional involvement of carotenoids in the photoperiodic reaction of spider mites (Veerman A. and Helle W.) **275,** 234

Photoreceptor. Desensitisation of peripheral photoreceptors shown by blue-induced decrease in transmittance of *Drosophila* rhabdomeres (Lo C. M. and Pak W. L.) **273,** 772
Light-induced calcium release in a photosensitive vertebrate smooth muscle (Zucker R. and Nolte J.) **274,** 78
Nature of light-induced conductance changes in ventral photoreceptors of *Limulus* (Wong F.) **276,** 76
Photoreceptor shedding can be initiated within the eye (Hollyfield J. G. and Basinger S. F.) **274,** 794
Visual response in barnacle photoreceptors is not initiated by transitions to and from metarhodopsin (Atzmon Z., Hillman P. and Hochstein S.) **274,** 74
Photoreceptor electric potential in the phototaxis of the alga *Haematococcus pluvialis* (Litvin F. F., Sineshchekov O. A. and Sineshchekov V. A.) **271,** 476

Photoregulation. Light-regulated body ion balance in marine slug *Elysia viridis* (Montagu) (Deutch B.) **274,** 159

Photorespiration. Light-dependent net production of carbon monoxide by plants (Fischer K. and Lüttge U.) **275,** 740
Photorespiratory nitrogen cycle (Keys A. J., Bird I. F., Cornelius M. J., Lea P. J., Wallsgrove R. M. and Miflin B. J.) **275,** 741

Photoresponse. Contribution of a caesium-sensitive conductance increase to the rod photoresponse (Fain G. L., Quandt F. N., Bastian B. L. and Gerschenfeld H. M.) **272,** 467

Photosphere. Cooling of the Sun's photosphere coincident with increased sunspot activity (Livingston W. C.) **272,** 340

Photosynthesis. Early Precambrian oxygen: a case against photosynthesis (Towe K. M.) **274,** 657
Biochemistry of Photosynthesis (Gregory R. P. F., *editor*) *book review by* Barber J. **272,** 97
Simultaneous occurrence of C_3 and C_4 photosynthesis in relation to leaf position in *Mollugo nudicaulis* (Raghavendra A. S., Rajendrudu G. and Das V. S. R.) **273,** 143

Phototactic response. Light-controlled production of spawning-inducing substance in jellyfish ovary (Ikegami S., Honji N. and Yoshida M.) **272,** 611
Sunflower's blooming floscule is a compass. *correspondence*, (Polikarpov G. G.) **272,** 122

Phototaxis. Loss of phototaxis in silkworm larvae after smelling mulberry leaves and recovery after electroconvulsive shock (Shimizu I. and Kato M.) **272,** 248
Photoreceptor electric potential in the phototaxis of the alga *Haematococcus pluvialis* (Litvin F. F., Sineshchekov O. A. and Sineshchekov V. A.) **271,** 476

Phyllosilicate. Crown ether intercalations with phyllosilicate (Ruiz-Hitzky E. and Casal B.) **276,** 596

Phylogeny. Ontogenetic analogy (Gould J. G.) *book review by* Cain A. J. **272,** 758

Physical Chemistry. Chemistry: Physical Physical Chemistry with Applications to Biological Systems (Chang R., *editor*) *book review by* Kellett G. L. **272,** 100

Physical Science. Cosmological Mafia (Duncan R. and *editor*) *book review by* Davies D. **272,** 774

Physics. A Perspective of Physics (Peierls, R. *editor*) *book review by* Massey H. **272,** 741
Meteoric growth of American physics (Kevles D. J.) *book review by* Weisskopf V. F. **272,** 776
Scientists under Hitler: Politics and the Physics Community in the Third Reich (Beyerchen A. D.) *book review by* Mendelssohn K. **272,** 738

Physiology. Handbook of PhysiologyA Critical Comprehensive Presentation of Knowledge and Concepts (Brookhart J. M., *editor*) *book review by* Bliss T. V. P. **272,** 654

Phytoalexin. Diverse modes of action of biotic and abiotic phytoalexin elicitors (Yoshikawa M.) **275,** 546

Phytochrome. Evidence for symmetry in the phytochrome subunit (Stoker B. M., Roux S. J. and Brown W. E.) **271,** 180
Natural Plant Growth Inhibitors and Phytochromes (Kefeli V. I.) *book review by* Smith H. **275,** 571

Phytolith. Botanical fingerprints. *news and views*, (Moore P. D.) **274,** 18

Phytophthora palmivora. Fatty acids, aldehydes and alcohols as attractants for zoospores of *Phytophthora palmivora* (Cameron J. N. and Carlile M. J.) **271,** 448

Phytoplankton. Phytoplankton biology of a thermal front in the Celtic Sea (Savidge G. and Foster P.) **271,** 155

Piezomagnetism. Dilatancy has magnetic effect. *news and views*, (Smith P. J.) **272,** 130

Pigment development. Geostimulation of root growth and pigment synthesis in mustard seedlings (MacDonald I. R. and Gordon D. C.) **272,** 48

Pigment granule. A microtubule-independent component may be involved in granule transport in pigment cells (Schliwa M. and Euteneuer U.) **273,** 556

Pilin. *N*-methylphenylalanine at the N-terminus of pilin isolated from *Pseudomonas aeruginosa* K (Frost L. S., Carpenter M. and Paranchych W.) **271,** 87

Piltdown man. New light on the Piltdown hoax? *news and views*, (Halstead L. B.) **276,** 11

Pineal. Clocks, pineals and compasses. *news and views*, (Krebs J.) **274,** 115

Pineal eye. Pineal eye and behaviour in *Xenopus* tadpoles (Roberts A.) **273,** 774

Pion. Pions probe nuclei. *news and views*, (Hodgson P. E.) **272,** 498
Pion production in heavy-ion collisions. *news and views*, (Hodgson P. E.) **273,** 102

Piretanide. Inhibition of active chloride transport by piretanide (Zeuthen T., Ramos M. and Ellory J. C.) **273,** 678

Piroplasmosis. Malaria, piroplasmosis and endotoxin. *news and views*, (Cox F. E. G.) **274,** 312

Pit latrines. Pit latrines, *correspondence*, (Pickford J.) **272,** 204
Pituitary. Sensitisation of pituitary cells to luteinising hormone releasing hormone by clomiphene citrate *in vitro* (Hsueh A. J. W., Erickson G. F. and Yen S. S. C.) **273,** 57
Placenta. C-type viral antigen expression in human placenta (Sawyer M. H., Nachlas N. E. Jr and Panem S.) **275,** 62
Placental inhibition of foetal growth enhancement in the rat (Croskerry P. G. and Dobbing J.) **273,** 147
Plague-forming cell. Induction and separation of antigen-dependent T helper and T suppressor cells in man (Shore A., Dosch H. -M. and Gelfand E. W.) **274,** 586
Planet: Cone. How to locate the electrically conducting fluid core of a planet from external magnetic observations (Hide R.) **271,** 640
Planet: magnetism. Re-evaluating Bode's law of planetary magnetism (Russell C. T.) **272,** 147
Planet: Nonsolar. Detecting nonsolar planets by spinning infrared interferometer (Bracewell R. N.) **274,** 780
Planets. The origin and relative abundances of C, N and the noble gases on the terrestrial planets and in meteorites (Bogard D. D. and Gibson Jr, E. K.) **271,** 150
Plankton. Cybernetic mechanism in lake plankton systems: how to control undesirable algae (Briand F. and McCauley E.) **273,** 228
Plant breeding. Wheat genetics, *news and views*, (Lupton F. G. H.) **272,** 497
Plant distribution. Clutch size in plants, *news and views*, (May R. M.) **276,** 671
Plant ecology. Competition among desert perennials (Fonteyn P. J. and Mahall B. E.) **275,** 544
Plant hormone. Hormone binding in plants, *news and views*, (Lamb C. J.) **274,** 312
Natural Plant Growth Inhibitors and Phytochromes (Kefeli V. I.) *book review by* Smith H. **275,** 571
Plant pathology. Diverse modes of action of biotic and abiotic phytoalexin elicitors (Yoshikawa M.) **275,** 546
Recognition and defence in plants, *news and views*, (Smith H.) **273,** 266
Plant Pathology and Plant Pathogens (Dickinson C. H. and *editor*) *book review by* Smith I. M. **272,** 92
Plant physiology. Abscisic acid and guard cells of *Commelina communis* L. (Itai C., Weyers J. D. B., Hillman J. R., Meidner H. and Willmer C.) **271,** 652
Adaptations to waterlogged environments, *news and views*, (Moore P. D.) **271,** 209
Crops for the desert, *news and views*, (Moore P. D.) **272,** 14
Effect of abscisic acid on solute transport in epidermal tissue (Itai C. and Meidner H.) **271,** 653
Gaseous emissions of mercury from an aquatic vascular plant (Kozuchowski J. and Johnson D. L.) **274,** 468
Hormone Action in the Whole Life of Plants (Thimann K. V.) *book review by* Smith H. **272,** 475
How plants respond to stress, *news and views*, (Jones H. G.) **271,** 610
Molecular Biology of Plant Cells (Smith H. *editor*) *book review by* Flavell R. B. **273,** 788
Plant cells without walls? *news and views*, (Burgess J.) **275,** 588
Plant Root Systems: Their Function and Interaction with the Soil (Scott Russell R. *editor*) *book review by* Roberts J.M. **272,** 193
Separation of seed development from monocarpic senescence in soybeans (Noodén L. D., Rupp D. C. and Derman B. D.) **271,** 354
Simulated sunflecks have large, rapid effects on plant stem extension (Morgan D. C. and Smith H.) **273,** 534
Sinks and sources of plant nutrients, *news and views*, (Moore P. D.) **276,** 560
Solute Movement in the Soil-Root System (Nye P. H. and) *book review by* Barber A. S. **272,** 564
The Physiology and Biochemistry of Seed Dormancy and Germination (Khan A. A. *editor*) *book review by* Bradbeer J. W. **273,** 174
When C_4 plants do best, *news and views*, (Moore P. D.) **272,** 400
Plant tissue culture. Plant tissue culture in China—major change ahead? *news and views*, (Sunderland N. and Cocking E. C.) **274,** 643
Plasma. Cytochalasin Binduces polarisation of plasma membrane components and actin in transformed cells (Sundqvist K. G., Otteskog P. and Ege T.) **274,** 915
Geos Identification of natural magnetospheric emissions (Christiansen P., Gough P., Martelli G., Bloch J.-J., Cornilleau N., Etcheto J., Gendrin R., Jones D., Béghin C. and Décréau P.) **272,** 682
Recombination in semiconductors, *news and views*, (Landsberg P. T.) **275,** 270
Analogues in other mammals and in fish of human plasma proteins. C-reactive protein and amyloid P component (Pepys M. B., Dash A. C., Fletcher T. C., Richardson N., Munn E. A. and Feinstein A.) **273,** 168
Plasma energy. Alfvén waves generated by an inverted plasma energy distribution (Hughes W. J., Southwood D. J., Mauk B., McPherron R. L. and Barfield J. N.) **275,** 43
Plasma flux. Plasma fluxes between ionosphere and protonosphere (Kersley L., Hajeb-Hosseinieh H. and Edwards K. J.) **271,** 427
Plasma jet. Ignition by plasma jet (Weinberg F. J., Hom K., Oppenheim A. K. and Teichman K.) **272,** 341
Plasma membrane. Calcium-dependent exocytosis in bovine adrenal medullary cells with leaky plasma membranes (Baker P. F. and Knight D. E.) **276,** 620
Fibronectin-plasma membrane interactions in the adhesion and spreading of hamster fibroblasts (Pena S. D. J. and Hughes R. C.) **276,** 80
Lateral diffusion in plasma membrane of mouse egg is restricted after fertilisation (Johnson M. and Edidin M.) **272,** 448
Plasma physics. ARAKS—Controlled or puzzling experiment? (Cambou F., Lavergnat J., Migulin V. V., Morozov A. I., Paton B. E., Pellat R., Pyatsi A. Kh., Rème H., Sagdeev R. Z., Sheldon W. R. and Zhulin I. A.) **271,** 723
Plasma wave. Plasma waves in the magnetosphere, *review article*, (Southwood D. J.) **271,** 309
Plasmasphere. The solar wind influences plasmasphere electron content (Sethia G., Deshpande M. R. and Rastogi R. G.) **276,** 482
Plasmid. Anaerobes and transferable drug resistance, *news and views*, (Saunders J. R.) **274,** 113
DNA Insertion Elements, Plasmids and Episomes (Bukhari A. J., *editor*) *book review by* Hayes W. **273,** 171
Eukaryotic gene cloning and expression in yeast, *news and views*, (Nasmyth K.) **274,** 741
Halobacterium strain 5 contains a plasmid which is correlated with the presence of gas vacuoles (Simon R. D.) **273,** 314
Highly conserved DNA of Ti plasmids overlaps T-DNA maintained in plant tumours (Chilton M.-D., Drummond M. H., Merlo D. J. and Sciaky D.) **275,** 147
Homologous DNA sequences in different Ti-plasmids are essential for oncogenicity (Depicker A., Van Montagu M. and Schell J.) **275,** 150
Identification of a conjugative R plasmid in *Bacteroides ochraceus* capable of transfer to *Escherichia coli* (Guiney D. G. Jr and Davis C. E.) **274,** 181
Immunoglobulin light-chain structural gene sequences cloned in a bacterial plasmid (Seidman J. G., Edgell M. H. and Leder P.) **271,** 582
Isolation and partial sequence of recombinant plasmids containing human α-, β- and γ-globin cDNA fragments (Little P., Curtis P., Coutelle C., Van Den Berg J., Dalgleish R., Malcolm S., Courtney M., Westaway D. and Williamson R.) **273,** 640
Substrate induction of conjugative activity of *Agrobacterium tumefaciens* Ti plasmids (Petit A., Tempe J., Kerr A., Holsters M., Van Montagu M. and Schell J.) **271,** 570
Transposition of *Pseudomonas* toluene-degrading genes and expression in *Escherichia coli* (Jacoby G. A., Rogers J. E., Jacob A. E. and Hedges R. W.) **274,** 179
Determination of plasmid molecular weights from ultraviolet sensitivities (Sancar A. and Rupert C. S.) **272,** 471
Plasmid incompatibility: cloning analysis of an *inc* FII determinant of R6-5 (Timmis K. N., Andrès I. and Slocombe P. M.) **273,** 27
Plasmid: ColE1. ColE1 plasmid mobility and relaxation complex (Warren G. J., Twigg A. J. and Sherratt D. J.) **274,** 259
Plasmid ColEI. Transformation of yeast by a replicating hybrid plasmid (Beggs J. D.) **275,** 104
Plasmid: IncP2. IncP2 group of *Pseudomonas*, a class of uniquely large plasmids (Hansen J. B. and Olsen R. H.) **274,** 715
Plasminogen. Epidermal growth factor, like phorbol esters, plasminogen activator in HeLa cells (Lee L.-S. and Weinstein I. B.) **274,** 696
Plasminogen activator. Interferon inhibits the release of plasminogen activator from SV3T3 cells (Schroder E. W., Chou I.-N., Jaken S. and Black P. H.) **276,** 828
Plastic deformation. Plastic deformation of diamond at room temperature (Humble P. and Hannink R. H. J.) **273,** 37
Plastocyanin. X-ray crystal structure analysis of plastocyanin at 2.7Å resolution (Colman P. M., Freeman H. C., Guss J. M., Murata M., Norris V. A., Ramshaw J. A. M. and Venkatappa M. P.) **272,** 319
Plate. Induced suction and lithospheric plate pull (Shoemaker E. M.) **272,** 241
Plate boundary. Intraplate earthquakes, *news and views*, (Smith P. J.) **275,** 480
Plate motion. Absolute motion of an individual plate estimated from its ridge and trench boundaries (Gordon R. G., Cox A. and Harter C. E.) **274,** 752
Plate tectonics. Abnormal conditions, normal earthquakes, *news and views*, (Smith P. J.) **272,** 307
Composition and development of the continental tectosphere (Jordan T. H.) **274,** 544
Induced suction and lithospheric plate pull, *matters arising*, (Stevenson D. J.) **275,** 346
Induced suction and lithospheric plate pull—Reply, *matters arising*, (Shoemaker E. M.) **275,** 346
Oceanic plate motions driven by lithospheric thickening and subducted slabs (Hager B. H.) **276,** 156
Proterozoic intraplate deformation in the light of South-east Asian neotectonics (Watterson J.) **273,** 636
Punctuated evolution of tectonic style (Hargraves R. B.) **276,** 459
Tectonic controls of late Cretaceous sedimentation, western interior, USA (Cross T. A. and Pilger R. H. Jr.) **274,** 653
Plate tectonics in the Arabian Pan-African? *news and views*, (Brown G. C. and Hepworth J. V.) **272,** 210
Platelet. 9, 11-Epoxyiminoprosta-5, 13-dienoic acid is a thromboxane A_2 antagonist in human platelets (Fitzpatrick F. A., Bundy G. L., Gorman R. R. and Honohan T.) **275,**
Electrical responses by guinea pig megakaryocytes (Miller J. L., Sheridan J. D. and White J. G.) **272,** 643
Synthetic α-adrenergic agonists are potent α-adrenergic blockers in human platelets (Jakobs K. H.) **274,** 819
Platelet tublin. 3',5'-cycle AMP binds to and promotes polymerisation on platelet tubulin (Steiner M.) **272,** 834
Pleiotypic effect. Pleiotypic effects of hormones, *news and views*, (Shields R.) **276,** 440
Pleistocene. Corrected age of the Pliocene/ Pleistocene boundary—Reply (Haq B. U., Berggren W. A. and Van Couvering J. A.) **272,** 287
Vital effect on stable-isotope composition seen in foraminifera and coral skeletons (Erez J.) **273,** 199
Pleistocene. Corrected age of the Pliocene/Pleistocene boundary (Jenkins D. G.) **272,** 287
K–Ar age of the late Pleistocene eruption of Toba, north Sumatra (Ninkovich D., Shackleton N. J., Abdel-Monem A. A. Obradovich J.D. and Izett G.) **276,** 574
Pleistocene land-sea correlations, *news and views*, (Smalley Jl. J.) **272,** 754
Pliocene. A C4 plant from the Pliocene (Nambudiri E. M. V., Tidwell W. D., Smith B. N. and Hebbert N. P.) **276,** 816
Corrected age of the Pliocene/Pleistocene boundary (Jenkins D. G.) **272,** 287
Corrected age of the Pliocene/ Pleistocene boundary—Reply (Haq B. U., Berggren W. A. and Van Couvering J. A.) **272,** 287
Late Pliocene climate and south-west Atlantic abyssal circulation (Ledbetter M. T., Williams D. F. and Ellwood B. B.) **272,** 239
Ploidy. Endopolyploidy and Polyteny in Differentiation and Evolution (Nagl W.) *book review by* Jones K. W. **276,** 539
Plume. Formation of discrete islands in linear island chains (Skilbeck J. N. and Whitehead Jr J. A.) **272,** 499
Pluto. Pluto's satellite, *news and views*, (Hughes D. W.) **274,** 309
Plutonium. Mixed ligand chelate therapy for plutonium and cadmium poisoning (Schubert J. and Derr S. K.) **275,** 311
Oxidation state of plutonium in the Irish Sea (Nelson D. M. and Lovett M. B.) **276,** 599
Podrabinek. Supreme court rejects Podrabinek's appeal, *news*, **276,** 434
Podrabinek A. Londoner may defend dissident **274,** 415
Poland. Copernicus Astronomical Centre opens in Warsaw, *news*, (Mitton S.) **273,** 92
Polish censorship, *news*, **271,** 399
'Problem' solving still claims Poland's scientists, *news*, **276,** 313
Space medicine: a Polish speciality, *news*, **274,** 106
Torun: local conditions provide new possibilities for research, *news*, **273,** 263
Water holds Poland back says Gierek, *news*, **274,** 415
Poland plans hydrological atlas, *news*, **272,** 570
Poland tries the taste of space, *news*, **276,** 110
Polanyi M. Correspondence and papers of Michael Polanyi, *correspondence*, (Burkhardt G. N., Mansfield Cooper W., Hardy A., Hodgkin R., Koestler A., Scott Todd D., Torrance T. F. and Wedgwood V.) **275,** 476
Polar orbiting lunar observatory. Geos III not enough for POLO, *correspondence*, (Runcorn S. K.) **276,** 438
Pole. Pole movement and sea levels (Weyer E. M.) **273,** 18
Political prisoner. Argentina: concern over continued disappearances **275,** 263
Politics. Scientists under Hitler: Politics and the Physics Community in the Third Reich (Beyerchen A. D.) *book review by* Mendelssohn K. **272,** 738
World Futures: The Great Debate (Freeman C. and) *book review by* Ashby E. **276,** 144
Pollen. Holocene palaeo-wind evidence from palynology in Baffin Island (Nichols H., Kelly P. M. and Andrews J. T.) **273,**
Pollen analysis. Bronze Age honey, *news and views*, (Moore P. D.) **276,** 443
Pollination: Rodent. Rodent pollination in southern African *Protea* spp. (Wiens D. and Rourke J. P.) **276,** 71
Pollutant. Dioxin: Toxicological and Chemical Aspects (Cattabeni F., *editor*) *book review by* Hay A. **276,** 304
Halogenated hydrocarbon effects, *news and views*, (Hay A.) **274,** 533
Pollution. Climatological effects of atmospheric particulate pollution (Idso S. B. and Brazel A. J.) **274,** 781
Decrease in content of lead in Danish cereals (Solgaard P., Aarkrog A., Fenger J., Flyger H. and Graabaek A. M.) **272,** 346
Friends of the Czech earth go underground, *news*, **274,** 414
Growth limitation of a coastal diatom by low zinc ion activity (Anderson M. A., Morel F. M. M. and Guillard R. R. L.) **276,** 70
Heaven and Hell (Mellanby K.) **272,** 9
Hungary starts to tackle pollution, *news*, **274,** 737
Identification of lead compounds in urban air (Biggins P. D. E. and Harrison R. M.) **272,** 531
Lead absorption higher than expected **276,** 553
Lead levels in Birmingham are typical of urban areas, says UK report, *news*, **273,** 417
Mediterranean pollution: one man's optimism, *news*, **271,** 200
Seveso: premature optimism, *correspondence*, (Manara L. and Garattini S.) **276,** 556
SO_2 emission in the UK, *correspondence*, (Reed L. E.) **273,** 334
Taj Mahal out of danger? *news*, **275,** 4
Water holds Poland back says Gierek, *news*, **274,** 415
Air Pollution (Stern A. C. *editor*) *book review by* Lawther P. J. **274,** 726
Extreme pollution sensitivity of grasses when SO_2 and NO_2 are present in the atmosphere together (Ashenden T. W. and Mansfield T. A.) **273,** 142
Isotopic variation as an index of sulphur pollution in lakes around Sudbury, Ontario (Nriagu J. O. and Harvey H. H.) **273,** 223
Pollution in the Persian Gulf, *news*, **272,** 573
Pollution: Air. Do present levels of air pollution outdoors affect respiratory health? (Bouhuys A., Beck G. J. and Schoenberg J. B.) **276,** 466
Pollution tolerance. Evolution of sulphur dioxide tolerance in perennial ryegrass (Horsman D. C., Roberts T. M. and Bradshaw A. D.) **276,** 493
Pollution: Water. Mussel watching, *news and views*, (Bayne B. L.) **275,** 87
Polyamide. Aromatic polyamides, *news and views*, (Calvert P.) **272,** 670
Polyamine. Is thymus-derived lymphocyte inhibitor a polyamine? (Rijke E. O. and Ballieux R. E.) **274,** 804
Polyamine deficiency reduces the rate of DNA replication fork movement in *Escherichia coli* (Geiger L. E. and Morris D. R.) **272,** 730
What do the polyamines do? *news and views*, (Cohen S. S.) **274,** 209
Polybrominated biphenyl. US judge claims low levels of PBBs "not toxic". *news*, **276,** 205
Polycyclic aromatic hydrocarbon. Induction of antibodies against carcinogenic polycyclic aromatic hydrocarbons (Moolten F. L., Capparell N. J., Boger E. and Mahathalang P.) **272,** 614
Polyethylene. Molecular morphology of polyethylene determined by NMR (Natarajan K. M., Samulski E. T. and Cukier R. I.) **275,** 527
Polymer. Anionic copolymerisation of elemental sulphur (Penczek S., Slazak R. and Duda A.) **273,** 738
Chromatography of Synthetic and Biological Polymers (Epton R. *editor*) *book review by* Morris C. J. O. R. **273,** 790
Drag-reducing polymers and turbulent bursts (McComb W. D. and Rabie L. H.) **273,** 653
Evidence for reptation in an entangled polymer melt (Klein J.) **271,** 143
Ion-Containing Polymers: Physical Properties and Structure (Eisenberg A. and) *book review by* Clegg P. L. **271,** 486
Molecular morphology in semicrystalline polymers (Flory P. J. and Do Yeung Yoon) **272,** 226
Order in amorphous polymers, *news and views*, (Calvert P.) **271,** 507
Physical Aging in Amorphous Polymers and Other Materials (Struik L. C. E.) *book review by* Mackley M. R. **273,** 253
Polymer diffusion disentangled, *news and views*, (Calvert P. D.) **271,** 113
Polymer Sequence Determination (Randall J. C.) *book review by* Billingham N. C. **273,** 691
Polymer process. Polymerization Processes (Schildknecht C. E. and *editor*) *book review by* Billingham N. C. **274,** 296
Polymer solution. Stimulated resonance between electrical and shear fields by a colloid system (Block H., Goodwin K. M. W., Gregson E. M. and Walker S. M.) **275,** 632
Polymorphism. Estimating human mutation rates from polymorphisms, *news and views*, (Edwards J. H.) **274,** 845

Ethanol tolerance and the *Adh* polymorphism in a natural population of *Drosophila melanogaster* (McKenzie J. A. and McKechnie S. W.) **272,** 75

Protein polymorphism and the rate of loss of duplicate gene expression (Allendorf F. W.) **272,** 76

Somatic polymorphism and seed dispersal (Sorensen A. E.) **276,** 174

Polypeptides as markers of lens. α-Crystallin polypeptides as markers of lens cell differentiation (Vermorken A. J. M. and Bloemendal H.) **271,** 779

Polystyrene. The Rankine—Hugoniot relation for shock waves in very porous media (Bolkhovitinov L. G. and Khvostov Y. B.) **274,** 882

Population. Human reproduction reconsidered, *news and views,* (May R. M.) **272,** 491

Population control. Mammals, resources and reproductive strategies, *review article,* (Clutton-Brock T. H. and Harvey P. H.) **273,** 191

Population density. Control of microbial surface-growth by density (Rosenberger R. F., Grover N. B., Zaritsky A. and Woldringh C. L.) **271,** 244

Population diversity. Equalisation of prey numbers by migratory shore birds (Schneider D.) **271,** 353

Population dynamics. Facultative sex ratios and population dynamics (Werren J. H. and Charnov E. L.) **272,** 349

Population dynamics and the length of food chains, *matters arising,* (Saunders P. T.) **272,** 189

Population dynamics and the length of food chains—Replies *matters arising,* (Lawton J. H. and Pimm S. L.) **272,** 190

Population fluctuation. Is *Acanthaster planci* an *r*-strategist? (Moore R. J.) **271,** 56

Population genetics. Ethanol tolerance and the *Adh* polymorphism in a natural population of *Drosophila melanogaster* (McKenzie J. A. and McKechnie S. W.) **272,** 75

Evolution and the Genetics of Populations (Wright S.) *book review by* Crow J. F. **272,** 561

Evolution and the Genetics of Populations (Wright S.) *book review by* Robertson A. **275,** 569

Protein polymorphism and the rate of loss of duplicate gene expression (Allendorf F. W.) **272,** 76

Population growth. Nations and numbers 1977, *news and views,* (May R. M.) **271,** 504

Population growth. World population growth is slowing, *news,* **276,** 312

Population Kinetics. An Introduction to Cell Population Kinetics Aherne W. A., **272,** 289

Portugese Africa. Portugese Africa forgotten, *correspondence,* (Feijó A. C.) **273,** 334

Position effect variegation. Unintegrated ribosomal genes and their relation to position effect variegation in *Drosophila melanogaster* (Zuchowski-Berg C. I.) **271,** 60

Positron. Positrons at surfaces, *news and views,* (Pendry J.) **276,** 756

Positrons at the centre of the Galaxy, *news and views,* (Quenby J. J.) **276,** 115

Postreplication repair. Does ultraviolet light enhance postreplication repair in mammalian cells? (Painter R. B.) **275,** 243

Potassium. δ- Glucose inhibits potassium efflux from pancreatic islet cells (Henquin J. C.) **271,** 271

Slow relaxations of acetylcholine-induced potassium currents in *Aplysia* neurones (Marty A. and Ascher P.) **274,** 494

Potassium channel. Potassium channels in the apical membrane of the toad gallbladder (Driessche W. V. and Gogelein H.) **275,** 665

Spike frequency adaptation in amphibian sensory fibres is probably due to slow K channels (Krylov B. V. and Makovsky V. S.) **275,** 549

Potassium-argon dating. Limited response of the K–Ar system to the Nordlinger Ries giant meteorite impact (Jessberger E. K., Staudacher T., Dominik B., Kirsten T. and Schaeffer O. A.) **271,** 338

Potato. Potato research (Harris P. M. *editor*) *book review by* Simmonds N. W. **275,** 77

Powder metallurgy. Powder metallurgy: new techniques, new applications, *news and views,* (Cahn R. W.) **276,** 209

Power harmonic radiation. Power harmonic radiation enhancement during the sudden commencement of a magnetic storm (Hayashi K., Oguti T., Watanabe T., Tsuruda K., Kokubun S. and Horita R. E.) **275,** 627

Prealbumin. Anti-idiotypic antibodies against anti- vitamin A transporting protein react with prealbumin (Sege K. and Peterson P. A.) **271,** 167

Precambrian. Early Precambrian oxygen: a case against photosynthesis (Towe K. M.) **274,** 657

Precambrian geological history and the origin of the Metazoa (LaBarbera M.) **273,** 22

Precambrian solution photochemistry, inverse segregation, and banded iron formations (Cairns-Smith A. G.) **276,** 807

Precambrian dyke. A preferred orientation of intrusion of Precambrian dykes (Morris W. A. and Tanczyk E. I.) **275,** 120

Precambrian Mona Complex. Tectonic emplacement of ophiolitic rocks in the Precambrian Mona Complex of Anglesey (Thorpe R. S.) **276,** 57

Pre-ceramic maize. Pre-ceramic maize on the north-central coast of Peru (Grobman A. and Bonavia D.) **276,** 386

Precocene II. Precocene II causes atrophy of corpora allata in *Locusta migratoria,* (Pener M. P., Orshan L. and de Wilde J.) **272,** 350

Predaceous insect. Predaceous insects in aphids' clothing, *news and views,* (May R. M.) **272,** 208

Predation. Equalisation of prey numbers by migratory shore birds (Schneider D.) **271,** 353

Pregnancy. Immunoreactive α-MSH in human plasma in pregnancy (Clark D., Thody A. J., Shuster S. and Bowers H.) **273,** 163

Suppression of fever at term of pregnancy (Kasting N. W., Veale W. L. and Cooper K. E.) **271,** 245

Suppression of human T-cell colony formation during pregnancy (Stahn R., Fabricius H.-&. and Hartleitner W.) **276,** 831

Prehistoric diet. C Content of human collagen as a measure of prehistoric diet in woodland North America (van der Merwe N. J. and Vogel J. C.) **276,** 815

Prehistoric man. New light on the Piltdown hoax? *news and views,* (Halstead L. B.) **276,** 11

Prehistoric site. Problems of preserving a 2,500-year-old township, *news,* **276,** 202

Prehistoric stone site. Prehistoric standing stone sites (Wood J. E.) *book review by* MacKie E. **275,** 75

Prehnite. Prehnitepumpellyite facies metamorphism in County Cavan, Ireland (Oliver G. J. H.) **274,** 242

Premelting. Premelting near crystal defects, *matters arising,* (Tallon J. L.) **276,** 849

Premelting near crystal defects—Reply, *matters arising,* (Bartis F. J.) **276,** 849

Prenatal screening. Prenatal screening: information before decision, *correspondence,* (Dagnall B.) **272,** 490

Preplanetary disk. Preplanetary disk? *news and views,* (Fabian A.) **271,** 503

Pressure-melting. Pressure-melting within a glacier indicated by the chemistry of re-gelation ice (Souchez R., Lemmens M., Lorrain R. and Tison J.-L.) **273,** 454

Pressurised water reactor. Navy lifts veil on PWR research, *news,* (Fishlock D.) **272,** 4

Presynapse. Do presynaptic auto-receptors control dopamine release? (Raiteri M., Cervoni A. M., Carmine R. del and Levi G.) **274,** 706

Presynaptic receptor. Presynaptic receptors, *news and views,* (Langer S. Z.) **275,** 479

Primary afferent depolarisation. Primary afferent depolarisation of tooth pulp afferents is not affected by naloxone (Hu J. W., Dostrovsky J. O. and Sessle B. J.) **276,** 283

Primary production. Benthic nutrient regeneration and high rate of primary production in continental shelf waters, *matters arising,* (Carpenter E. J. and McCarthy J. J.) **274,** 188

Primary response. Clones of cytotoxic lymphocytes can recognise uninfected cells in a primary response against influenza virus (Komatsu Y., Nawa Y., Bellemy A. R. and Marbrook J.) **274,** 802

Primase. Primase initiates Okazaki pieces during polyoma DNA synthesis (Eliasson R. and Reichard P.) **272,** 184

Primate. Canine tooth size in female primates (Harvey P. H., Kavanagh M. and Clutton-Brook T. H.) **276,** 818

Primatology studies and methodology (Clutton-Brock T. H. *editor*) *book review by* Deag J. M. **271,** 786

Scaling of sexual dimorphism in body size and breeding system in primates (Leutenegger W.) **272,** 610

Primates. Evolutionary and dietary aspects of salivary basic (Pb) and post Pb (PPb) proteins in anthropoid primates (Azen E. A., Leutenegger W. and Peters E. H.) **273,** 775

Priroda. Russian science magazine dates from before the revolution, *news,* **272,**

Proalbumin. A circulating variant of human proalbumin (Brennan S. O. and Carrell R. W.) **274,** 908

Calcium ion-dependent vesicle fusion in the conversion of proalbumin to albumin (Judah J. D. and Quinn P. S.) **271,** 384

Probability Theory. Elementary Probability Theory (Hausner M., *editor*) *book review by* Lush G. J. **272,** 107

Prochirality theory. Ogston and the development of prochirality theory (Bentley R.) **276,** 673

Progestin receptor. Oestrogen modulates progestin receptor concentrations in some rat brain regions but not in others (MacLusky N. J. and McEwen B. S.) **274,** 276

Prolactin. Inhibition of prolactin secretion by histidyl-proline-diketopiperazine (Bauer K., Gräf K. J., Faivre-Bauman A., Beier S., Tixier-Vidal A. and Kleinkauf H.) **274,** 174

Temperature-induced phase shift of daily rhythm of serum prolactin in gulf killifish (Spieler R. E., Meier A. H. and Noeske T. A.) **271,** 469

Prolactin cell. Catecholamines of supposed inhibitory hypophysiotrophic function suppress action potentials in prolactin cells (Taraskevich P. S. and Douglas W. W.) **276,** 832

Prostacyclin. Antibodies which antagonise the effects of prostacyclin (Smith J. B., Ogletree M. L., Lefer A. M. and Nicolaou K. C.) **274,** 64

Biosynthesis of prostacyclin in rat liver endothelial cells and its control by prostaglandin E_2 (Tomasi V., Meringolo C., Bartolini G. and Orlandi M.) **273,** 670

Generation of prostacyclin by lungs *in vivo* and its release into the arterial circulation (Gryglewski R. J., Korbut R. and Ocetkiewicz A.) **273,** 765

Prostacyclin is circulating hormone (Moncada S., Korbut R., Bunting S. and Vane J. R.) **273,** 767

Renal actions of prostacyclin (Bolger P. M., Eisner G. M., Ramwell P. W., Slotkoff L. M. and Corey E. J.) **271,** 467

Is prostacyclin a circulating anti-coagulant? *news and views,* (Dollery C. T. and Hensby C. N.) **273,** 706

Localisation and stimulation of prostacyclin production in vascular cells (MacIntyre D. E., Pearson J. D. and Gordon J. L.) **271,** 549

Prostaglandin. Biosynthesis of prostacyclin in rat liver endothelial cells and its control by prostaglandin E_2 (Tomasi V., Meringolo C., Bartolini G. and Orlandi M.) **273,** 670

Enhancement of carcinogenesis by prostaglandins (Lupulescu A.) **272,** 634

Prostaglandin synthesis (Mitra A.) *book review by* Harris C. J. **271,** 787

Prostaglandins in urine of foetal lambs (Walker D. W. and Mitchell M. D.) **271,** 161

Synthesis of Prostaglandins (Szántay C. S. and) *book review by* Harris C. J. **273,** 81

Amide and l-amino derivatives of F prostaglandins as prostaglandin antagonists (Maddox Y. T., Ramwell P. W., Shiner C. S. and Corey E. J.) **273,** 549

Inhibition of prostaglandin biosynthesis by corticosteroids requires RNA and protein synthesis (Danon A. and Assouline G.) **273,** 552

Pharmacological control of prostaglandin and thromboxane release from macrophages (Brune K., Glatt M., Kälin H. and Peskar B. A.) **274,** 261

Retinoids as well as tumour promoters enhance deacylation of cellular lipids and prostaglandin production in MDCK cells (Levine L. and Ohuchi K.) **276,** 274

Prostaglandin endoperoxide. An antiserum against 9, 11 - azo - 15 hydroxy - prosta - 5, 13 - dienoic acid (Fitzpatrick F. A., Gorman R. R. and Bundy G. L.) **273,** 302

Protea. Rodent pollination in southern African *Protea* spp. (Wiens D. and Rourke J. P.) **276,** 71

Protease. Structural evidence for gene duplication in the evolution of the acid proteases (Tang J. James M. N. G. Hse I. N. Jenkins J. A. and Blundell T. L.) **271,** 618

Protease inhibitor. Protease inhibitors suppress radiation-induced malignant transformation *in vitro* (Kennedy A. R. and Little J. B.) **276,** 825

Protein. Analogues in other mammals and in fish of human plasma proteins, C-reactive protein and amyloid P component (Pepys M. B., Dash A. C., Fletcher T. C., Richardson N., Munn E. A. and Feinstein A.) **273,** 168

Protein: Antigenic. A single chain precursor of C4 in human serum (Gigli I.) **272,** 836

Protein biosynthesis. Molecular Mechanisms of Protein Biosynthesis (Weissbach H. and *editor*) *book review by* Smith J. D. **271,** 390

Protein chemistry. The decline and fall of protein chemistry? *news and views,* (Malcolm A. D. B.) **275,** 90

Protein: Chromatin. Free ubiquitin is a non-histone protein of trout testis chromatin (Watson D. C., Levy B. W., and Dixon G. H.) **276,** 196

Protein conformation. Dynamic model of globular protein conformations based on NMR studies in solution (Wagner G. and Wüthrich K.) **275,** 247

Protein: Contractile. Is digitalis inotropy associated with enhanced slow inward calcium current? (Weingart R., Kass R. S. and Tsien R. W.) **273,** 389

Protein degradation. Bacteriophages inhibit degradation of abnormal proteins in *E. coli* (Simon L. D., Tomczak K. and St John A. C.) **275,** 424

Protein: Globular. Evolutionary substitutions and the antigenic structure of globular proteins (White T. J., Ibrahimi I. M. and Wilson A. C.) **274,** 92

Protein folding and heterogeneity inside globular proteins (Crampin J., Nicholson B. H. and Robson B.) **272,** 558

Regular and non-regular secondary structure in globular proteins (Jones R. J.) **272,** 185

Protein: Haem. Haem exposure as the determinate of oxidation-reduction potential of haem proteins (Stellwagen E.) **275,** 73

Protein: Heavy chain disease. Unusual genes at the aminoterminus of human immunoglobulin variants (Frangione B., Franklin E. C. and Smithies O.) **273,** 400

Protein hydration. Dynamics of protein hydration by quasi-elastic neutron scattering (Randall, J. T., Middendorf H. D., Crespi H. L. and Taylor A. D.) **276,** 636

Protein kinase. An endogenous substrate for cGMP-dependent protein kinase in mammalian cerebellum (Schlichter D. J., Casnellie J. E. and Greengard P.) **273,** 61

Protein: Membrane. Polymerisation of red cell membrane protein contributes to spherocchinocyte shape irreversibility (Palek J., Liu P. A. and Liu S. C.) **274,** 505

Protein Metabolism. Protein Metabolism of the Brain (Palladin A. V., Belik Ya. V. and) *book review by* Lim L. **271,** 487

Protein: Nuclear. Intracellular migration of nuclear proteins in *Xenopus* oocytes (De Robertis E. M., Longthorne R. F. and Gurdon J. B.) **272,** 256

Protein: Ovalbumin. Synthesis of an ovalbumin-like protein by *Escherichia coli* K12 harbouring a recombinant plasmid (Mercereau-Puijalon O., Royal A., Cami B., Garapin A., Krust A., Gannon F. and Kourilsky P.) **275,** 505

Protein phosphorylation. Calcium-dependent protein phosphorylation during secretion by exocytosis in the mast cell (Sieghart W., Theoharides T. C., Alper S. L., Douglas W. W. and Greengard P.) **275,** 329

Protein: plasma. Genetic variants in 2-D, *news and views,* (Edwards Y. and Swallow D.) **272,** 309

Plasma Proteins (Allen P. C.,) *book review by* Geisow M. J. **274,** 518

Protein: Precursor. Snips in secreted proteins, *news and views,* (Geisow M. J.) **272,** 308

Protein production. Efficiency of protein production from yeast grown in liquor derived from anaerobically fermented tropical pasture (Henry D. P., Greenfield P. F., Ouano E. A., Thomson R. H., Fleming G. and Minson D. J.) **274,** 619

Protein sequence. X-ray sequencing of proteins by refinement, *news and views,* (Blake C. C. F.) **274,** 420

Protein source. Breeding more protein, *news and views,* (Miflin B. J.) **275,** 483

Protein structure. Computer simulation of the solvent structure around biological macromolecules (Hagler A. T. and Moult J.) **272,** 222

Crystallographic studies on the activity of glycogen phosphorylase *b* (Weber I. T., Johnson L. N., Wilson K. S., Yeates D. G. R., Wild D. L. and Jenkins J. A.) **274,** 433

Do genes-in-pieces imply proteins-in-pieces? *news and views,* (Blake C. C. F.) **273,** 267

Hydrophobic character of amino acid residues in globular proteins (Manavalan P. and Ponnuswamy K.) **275,** 673

Mapping of the residues responsible for the negative cooperativity of the receptor-binding region of insulin (De Meyts P., Van Obberghen E., Roth J., Wollmer A. and Brandenburg D.) **273,** 504

Prediction of chain turns in globular proteins on a hydrophobic basis (Rose G. D.) **272** 586

Protein folding and heterogeneity inside globular proteins (Crampin J., Nicholson B. H. and Robson B.) **272,** 558

Regular and non-regular secondary structure in globular proteins (Jones R. J.) **272,** 185

The covalent and tertiary structure of bovine liver rhodanese (Ploegman J. H., Drent G., Kalk K. H., Hol W. G. J., Heinrikson R. L., Keim P., Weng L. and Russell J.) **273,** 124

The α-helix dipole and the properties of proteins (Hol W. G. J., van Duijnen P. T. and Berendsen H. J. C.) **273,** 443

The structure of the flavoenzyme glutathione reductase (Schultz G. E., Schirmer R. H., Sachsenheimer W. and Pai E. F.) **273,** 120

Turning points in predicted protein structures (Geisow M.) **274,** 642

Protein structure. Prediction of protein structure from amino acid sequence, *review article,* (Sternberg M. J. E. and Thornton J. M.) **271,** 15

Protein subunit. Protein disk of tobacco mosaic virus at 2.8 Å resolution showing the interactions within and between subunits (Bloomer A. C., Champness J. N., Bricogne G., Staden R. and Klug A.) **276,** 362

Protein synthesis. Methotrexate resistance by gene amplification, *news and views,* (Shields R.) **273,** 269

Peptidyl-transfer RNA hydrolase prevents inhibition of protein synthesis initiation (Atherly A. G.) **275,** 769

Possible transcriptional control of three polypeptides which accumulate in a temperature-sensitive mammalian cell line (Melero J. A. and Smith A. E.) **272,** 725

Inhibition of protein synthesis by 2′—5′ linked adenine oligonucleotides in intact cells (Williams B. R. G. and Kerr I. M.) **276,** 88

Protein synthesis inhibitor. Interferon, dsRNA and the pleiotypic effector, *news and views,* (Hunt T.) **273,** 97

Protein taxonomy. Structure of pyruvate kinase and similarities

with other enzymes: possible implications for protein taxonomy and evolution (Levine M., Muirhead H., Stammers D. K. and Stuart D. I.) **271,** 626

Protein thermostability. Relationship of protein thermostability to accessible surface area (Stellwagen E. and Wilgus H.) **275,** 342

Protein transfer. Protein transfer across microsomal membranes reassembled from separated membrane components (Warren G. and Dobberstein B.) **273,** 569

Protein: Viral. Abrogation of lymphocyte blastogenesis by a feline leukaemia virus protein (Mathes L. E., Olsen R. G., Hebebrand L. C., Hoover E. A. and Schaller J. P.) **274,** 687

Cytochalasin D induces the capping of both leukaemia viral proteins and actin in infected cells (Mousa G. Y., Trevithick J. R., Bechberger J. and Blair D. G.) **274,** 808

Unusual segmental flexibility in a region of tobacco mosaic virus coat protein (Jardetzky O., Akasaka K., Vogel D., Morris S. and Holmes K. C.) **273,** 564

Protista. Biochemical Phylogeny of the Protists (Ragan M. A. and) *book review by* Dickerson A. G. **274,** 407

Proton pump. More evidence that light isomerises the chromophore of *Halobacterium halobium* purple membrane protein (Hurley J. B., Becher B. and Ebrey T. G.) **272,** 87

Proton pump. A mechanism for the light-driven proton pump of *Halobacterium halobium* (Schulten K. and Tavan P.) **272,** 85

The proton pump is a molecular engine of motile bacteria (Glagolev A. N. and Skulachev V. P.) **272,** 280

Protonosphere. Plasma fluxes between ionosphere and protonosphere (Kersley L., Hajeb-Hosseinich H. and Edwards K. J.) **271,** 427

Post geomagnetic storm protonospheric replenishment (Kersley L., Hajeb-Hosseinich H. and Edwards K. J.) **271,** 429

Protoplast. Plant cells without walls? *news and views,* (Burgess J.) **275,** 588

Uptake of charged lipid vesicles by isolated tomato protoplasts (Cassells A. C.) **275,** 760

Prototermite. A winged élite in a subcortical beetle as a model for a prototermite (Taylor V. A.) **276,** 73

Protozoa. Diversity in constant and fluctuating environments (Eddison J. C. and Ollason J. G.) **275,** 309

Pseudomonas, a class of uniquely large plasmids. IncP2 group of *Pseudomonas*, a class of uniquely large plasmids (Hansen J. B. and Olsen R. H.) **274,** 715

Psychiatry. Medical profession to investigate torture, *news and views,* **272,** 394

Psychology. The Essential Tension (Kuhn T. S.) *book review by* Medawar P. B. **273,** 575

Thinking: Readings in Cognitive Science (Johnson-Laird P. N. and *editor*) *book review by* Young R. M. **272,** 742

The Psychology of Cognition (Cohen G.) *book review by* Johnson-Laird P. N. **273,** 476

Ptolemy. The Crime of Claudius Ptolemy (Newton R.) *book review by* Whiteside D. T. **276,** 151

Public participation. US to increase public participation in regulation of DNA research, *news,* **276,** 430

Pugwash. Allegations against Indian research unit refuted, *correspondence,* (Borstel R. C. and Curtis C. F.) **273,** 96

Research in third world countries: Pugwash plans controls, *news,* **272,** 8

Pulmonary alveolar macrophage. Human pulmonary alveolar macrophages metabolise benzo(*a*)pyrene to proximate and ultimate mutagens (Harris C. C., Hsu I. C., Stoner G. D., Trump B. F. and Selkirk J. K.) **272,** 632

Pulsar. Observability of γ-ray pulsars (Buccheri R., D'Amico N., Massaro E. and Scarsi L.) **274,** 572

Revised estimate of gravitational radiation from Crab and Vela pulsars (Zimmermann M.) **271,** 524

Submicrosecond time resolution observations of PSR0950+08 (Hankins T. H. and Boriakoff V.) **276,** 45

Pulsar (Manchester R. N. and) *book review by* Smith F. G. **271,** 285

Pulsar: Binary. (Eichler D. Roy C. R.) **275,** 734

Pulsar: Crab. Pulsed and unpulsed light from the Vela and Crab pulsars (Peterson B. A., Murdin P., Wallace P., Manchester R. N., Penny A. J., Jorden A., Hartley K. F. and King D.) **276,** 475

Pulsar radiation. Neutron beams in active galactic nuclei (Eichler D. and Wiita P. J.) **274,** 38

Pulsar: Vela. Pulsed and unpulsed light from the Vela and Crab pulsars (Peterson B. A., Murdin P., Wallace P., Manchester R. N., Penny A. J., Jorden A., Hartley K. F. and King D.) **276,** 475

Pulse compression radar. Observations of strong wind shear using pulse compression radar (Browning K. A., James P. K., Parkes D. M., Rowley C. and Whyman A. J.) **271,** 529

Pumpellyite. Prehnitepumpellyite facies metamorphism in County Cavan, Ireland (Oliver G. J. H.) **274,** 242

Purple membrane protein. More evidence that light isomerises the chromophore of *Halobacterium halobium* purple membrane protein (Hurley J. B., Becher B. and Ebrey T. G.) **272,** 87

Pygmy chimpanzee. Pygmy chimpanzee as a possible prototype for the common ancestor of humans, chimpanzees and gorillas (Zihlman A. L., Cronin J. E., Cramer D. L. and Sarich V. M.) **275,** 744

Pyramidal neurone. Ectopic dendritic growth in mature pyramidal neurones in human ganglioside storage disease (Purpura D. P.) **276,** 520

Pyrethroid. Structural and biological link between pyrethroids and DDT in new insecticides (Holan G., O'Keefe D. F., Virgona C. and Walser R.) **272,** 734

Pyrolysis. Initial pyrolysis ions in hydrocarbon flames (Tse R. S., Michaud P. and Delfau J.-L.) **272,** 153

Pyruvate dehydrogenase. Evidence for extramitochondrial pyruvate dehydrogenase involved in acetylcholine synthesis in nerve endings (Lefresne P., Beaujouan J. C. and Glowinski J.) **274,** 497

QSO. Discovery of an X-ray QSO (Ricker G. R., Clarke G. W., Doxsey R. E., Dower R. J., Jernigan J. G., Delvaille J. P., MacAlpine G. M. and Hjellming R. M.) **271,** 35

Selection effects in redshift distribution of QSOs (Basu D.) **273,** 130

Q-statistic. The *Q*-statistic and the diversity of floras, *matters arising,* (Lamont B. B., Downes S. and Fox J. E. D.) **275,** 252

Quantum biochemistry. Biomolecular Information Theory (Fraga S.) *book review by* Robson B. **276,** 540

Quantum electrodynamics. Quantum electrodynamics textbook (Gupta S. N.) *book review by* Taylor J. C. **275,** 77

Quantum mechanics. Quantum Mechanics of One- and Two-Electron Atoms (Bethe H. A. and) *book review by* Seaton M. J. **271,** 390

Symmetry and Quantum Systems (Wolbarst A. B., *editor*) *book review by* Sillitto R. M. **272,** 107

Why has Regge pole theory survived?, *review article,* (Leader E.) **271,** 213

Quantum theory. Dodging Heisenberg, *news and views,* (MacDonald N.) **272,** 667

Quark. How many quarks? *news and views,* (Close F. E.) **274,** 418

Quark stars with 'realistic' equations of state (Fechner W. B. and Joss P. C.) **274,** 347

The tau heavy lepton—a recently discovered elementary particle, *review article,* (Perl M. L.) **275,** 273

Quark: Heavy. A possible practical application of heavy quark physics (Freund P. G. O. and Hill C. T.) **276,** 250

Quasar. Astronomers licked by QSOs and active galactic nuclei, *news and views,* (Faulkner J. and Gaskell M.) **275,** 91

Infrared observations of the most luminous quasar (Wright E. L. and Kleinmann D. E.) **275,** 298

Space density evolution of quasars (Stewart N. J. and Hawkins M. R. S.) **276,** 163

Thermal continuum from accretion disks in quasars (Shields G. A.) **272,** 706

4U0241+61: a luminous low-redshift QSO (Apparao K. M. V., Bignami G. F., Maraschi L., Helmken H., Margon B., Hjellming R., Bradt H. V. and Dower R. G.) **273,** 450

Quasar luminosity, *news and views,* (Smith F. G.) **273,** 428

Relative quasar luminosities determined from emission line strengths (Baldwin J. A., Burke W. L., Gaskell C. M. and Wampler E. J.) **273,** 431

Quaternary. Test size variation in *Globigerina bulloides* in response to Quaternary palaeoceanographic changes (Malmgren B. A. and Kennett J. P.) **275,** 123

Quaternary research. British Quaternary Studies (Shotton F. W. *editor*) *book review by* Webb T. **273,** 411

Quinoa. The Inca's ancient answer to food shortage, *news,* (Weber E. J.) **272,** 486

Race. Blacks in science: a US national scandal? *leading article,* **274,** 409

Race and intelligence (Ehrlich P. R. and) *book review by* Schull W. J. **272,** 765

Race and IQ: Jensen retains fellowship, *news,* **271,** 699

Racial resegregation. Racial resegregation measured, *news,* (Douglas J.) **275,** 85

Racism. Racism (Rose S.) **275,** 86

Racism refuted, *correspondence,* (Rose S.) **274,** 738

Racism refuted (Eysenck H. J.) **274,** 738

Racism refuted (Jensen A. J.) **274,** 738

Radar. Resonance region of a PC5 micropulsation examined by a dual auroral radar system (Walker A. D. M., Greenwald R. A., Stuart W. F. and Green C. A.) **273,** 646

Three-dimensional storm motion detection by conventional weather radar (Rinehart R. E. and Garvey E. T.) **273,** 287

Radiation. Absorption by water vapour at 7.1 cm^{-1} and its temperature dependence (Llewellyn Jones D. T., Knight R. J. and Gebbie H. A.) **274,** 876

An indifference to facts, *correspondence,* (Goldstein H.) **272,** 750

Cooperative Effects in Matter and Radiation (Bowden C. M., *editor*) *book review by* Knight P. **272,** 742

Deflection of polarised radiation: relative phase delay technique (Dennison B., Melnick G., Harwit M., Sato T., Stelzreid C. T. and Jauncey D.) **273,** 33

Low-level radiation, *correspondence,* (Fremlin J.) **272,** 204

Radiation: how safe is "safe"? *news,* **272,** 197

Deficient recovery from potentially lethal radiation damage in ataxia telangiectasia and xeroderma pigmentosum (Weichselbaum R. R., Nove J. and Little J. B.) **271,** 261

Electromagnetic Vibrations, Waves, and Radiation (Bekefi G. and *editor*) *book review by* Grant I. S. **272,** 107

Home insulation may increase radiation hazard, *news,* **276,** 431

Radiation: Cosmic. Relative abundance of antiprotons and antihelium in the primary cosmic radiation (Badhwar G. D., Golden R. L., Lacy J. L., Zipse J. E., Daniel R. R. and Stephens S. A.) **274,** 137

Radiation damage. Cellular glutathione is a key to the oxygen effect in radiation damage (Morse M. L. and Dahl R. H.) **271,** 660

Radiation: Decametric. First direct measurement of the beaming of Jupiter's decametric radiation (Poquérusse M. and Lecacheux A.) **275,** 111

Radiation effect. Radiation research in Scandinavia, *news and views,* (Cundall R. B.) **275,** 696

Radio beam. Relativistic jets and beams in radio galaxies (Rees M. J.) **275,** 516

Radio emission. Solar wind effect on Jupiter's non-Io-related radio emission (Terasawa T., Maezawa K. and Machida S.) **273,** 131

Radio flare. Interferometric observations of weak radio flares from a red dwarf star (Davis R. J., Lovell B., Palmer H. P. and Spencer R. E.) **273,** 644

Radio galaxy. A jet in the nucleus of NGC6251 (Readhead A. C. S., Cohen M. H. and Blandford R. D.) **272,** 131

Incidence of ionised gas in E/SO radio galaxies (O'Connell R. W. and Dressel L. L.) **276,** 374

Nuclear jet in a radio galaxy, *news and views,* (Smith F. G.) **272,** 124

Relativistic jets and beams in radio galaxies (Rees M. J.) **275,** 516

NGC326—a radio galaxy with a precessing beam? (Ekers R. D., Fanti R., Lari C. and Parma P.) **276,** 588

Radio source. Apparent superluminal expansion velocities in the dipole magnetic field model (Milgrom M. and Bahcall J. N.) **274,** 349

Bent beams and the overall size of extragalactic radio sources (Readhead A. C. S., Cohen M. H., Pearson T. J. and Wilkinson P. N.) **276,** 768

Do compact radio sources contain non-relativistic plasma? *matters arising,* (Scott J. S. and Christiansen W. A.) **273,** 572

Do compact radio sources contain non-relativistic plasma?—Reply, *matters arising,* (Wardle J. F. C.) **273,** 572

Holes in the microwave background? *news and views,* (Birkinshaw M. and Gull S. F.) **274,** 111

Is HD26676 an unusual radio star? (Popper D. M. and Margon B.) **274,** 137

New highly variable radio source, possible counterpart of γ-ray source CG135+1 (Gregory P. C. and Taylor A. R.) **272,** 704

Simultaneous radio and X-ray observations of MXB1837+05 (Ser X−1) (Ulmer M. P., Hjellming R. M., Lewin W. H. G., Hoffman J. A., Jernigan J. G., Wheaton W., Primmi F., Doty J. and Marshall H.) **276,** 799

Statistical investigation of compact emitting regions in extragalactic radio sources (Anderson B., Palmer H. P., Richards P. J., Speed B. and Warwick R. S.) **271,** 636

The central source in the supernova remnant G127.1 + 0.5 (Kirshner R. P. and Chevalier R. A.) **276** 480

Radioactive waste. Burying high-level wastes, *correspondence,* (Macintyre R. M.) **271,** 605

Radioactivity. Radioactive whales? *correspondence,* (Thackray M.) **272,** 396

Implications on unknown radioactivity of giant and dwarf halues in Scandinavian rocks (Gentry R. V., Christie W. H., Smith D. H., Boyle J. W., Cristy S. S. and McLaughlin J. F.) **274,** 457

Radioastronomy. Image reconstruction from incomplete and noisy data (Gull S. F. and Daniel G. J.) **272,** 686

Radioisotope dating. Accelerator dating techniques, *news and views,* (Mast T. S.) **273,** 491

Radionuclide. Growth rate of manganese nodule measured with ^{10}Be and ^{26}Al (Guichard F., Reyss J-L. and Yokoyama Y.) **272,** 155

Radionuclide loss from marine sediment (Hess C. T., Smith C. W. and Price A. H.) **272,** 807

Radionuclide adsorption by manganese oxides and implications for radioactive waste disposal (Means J. L., Crerar D. A., Borcsik M. P. and Duguid J. O.) **274,** 44

Radioscintillation. Simultaneous observations of equatorial ionospheric scintillation on four frequencies (Rastogi R. G., Deshpande M. R., Vadher N. M., Davies K. and Parikh P. B.) **273,** 285

Radiotelescope. First Ratan results published, *news,* **271,** 701

Radiowave. Anomalous LF radiowave records associated with meteoric ionisation (Baggaley W. J. and Bennett R. G. T.) **272,** 650

Radon. Home insulation may increase radiation hazard, *news,* **276,** 431

Radon. Radon emanation on San Andreas Fault (King C-Y.) **271,** 516

Rain forest. Apomixis may be widespread among the trees of the climax rain forest (Kaur A., Ha C. O., Jong K., Sands V. E., Chan H. T., Soepadmo E. and Ashton P. S.) **271,** 440

Raman spectroscopy. Low frequency coherent anti-Stokes Raman spectroscopy of air (Beattie I. R., Gilson T.R. and Greenhalgh D. A.) **276,** 378

Raman spectrum. Nanosecond transient Raman spectra of photolysed carboxyhaemoglobin (Lyons K. B., Friedman J. M. and Fleury P. A.) **275,** 565

Triplet state resonance Raman spectroscopy (Wilbrandt R., Jensen N. H., Pagsberg P., Sillesen A. H. and Hansen K. B.) **276,** 167

Effect of pressure on the Raman spectrum of ice (Sivakumar T. C., Chew H. A. M. and Johari G. P.) **275,** 524

Rapakivi granite. Rapakivi granite anorthosite and charnockitic plutonism (Hubbard F. H. and Whitley J. E.) **271,** 439

Rapid eye movement. Experimental acceleration and slowing of REM sleep ultradian rhythm by cholinergic agonist and antagonist (Sitaram N., Moore A. M. and Gillin J. C.) **274,** 490

Rare earth element. Behaviour of rare earth elements during submarine weathering of tholeiitic basalt (Ludden J. N. and Thompson G.) **274,** 147

Rare-Earth Metal. The Electronic Structure of Rare-Earth Metals and Alloys (Coqblin B.) *book review by* Bagguley D. M. S. **273,** 577

Rationality. A Rational Animal, and other Philosophical Essays on the Nature of Man (Flew A.) *book review by* Sutherland S. **275,** 347

Rattail. Metabolism of the abyssopelagic rattail *Coryphaenoides armatus* measured *in situ* (Smith K. L. Jr) **274,** 362

Rb/Sr dating. Reset Rb/Sr whole-rock systems and chemical control (Bell K. and Blenkinsop J.) **273,** 532

Reading backwardness. Difficulties in auditory organisation as a possible cause of reading backwardness (Bradley L. and Bryant P. E.) **271,** 746

Difficulties in auditory organisation as a possible cause of reading backwardness (Bradley L. and Bryant P. E.) **271,** 746

Receptor. Receptors and Recognition (Cuatrecacas P. and *editor*) *book review by* Michell R. H. **276,** 540

Reciprocity. Communal breeding in green woodhoopoes as a case for reciprocity (Ligon J. D. and Ligon S. H.) **276,** 496

Recognition. Accuracy in the transmission of biological information, *news and views,* **276,** 442

Carbohydrates recognised, *news and views,* (Colin Hughes R. and Sharon N.) **274,** 637

Receptors and Recognition (Cuatrecacas P. and *editor*) *book review by* Michell R. H. **276,** 540

Recombinant DNA. Denmark follows UK on DNA guidelines, *news,* (Godtfredsen S.) **271,** 700

DNA: let the public choose, *news,* **275,** 468

DNA: the controversy continues, *news,* **272,** 663

European Patent Office pases problems for microbiologists, *news,* **273,** 583

Friends of DNA fight back, *news,* **272,** 664

Genetic engineering guidelines: Europe hopeful about collaboration, *news,* **273,** 331

Genetically engineered bacterium patented, *news,* **272,** 121

GMAG: Stormy weather ahead? *news,* **271,** 5

GMAG wants to stay on, *news,* **273,** 259

Isolation and partial sequence of recombinant plasmids containing human α-, β- and γ-globin cDNA fragments (Little P., Curtis P., Coutelle C., Van Den Berg J., Dalgleish R., Malcolm S., Courtney M., Westaway D. and Williamson R.) **273,** 640

New diseases in new niches, *news,* (King J.) **276,** 4

Plenty for GMAG to do, *leading article,* **276,** 1

Recombinant DNA, *news,* (Jukes T. H.) **271,** 703

Recombination: old and new, *news,* **276,** 7

Rogers suggests interim legislation on DNA research, *news,* **271,** 201

Six months in category four, *news,* (Brenner S.) **276,** 2

Stevenson to introduce new DNA legislation in US, *news,* **275,** 686

Supreme Court nullifies patent ruling on living organisms, *news,* **274,** 2

UK extends the law to genetic engineering, *news,* **273,** 482

US proposes exemptions from DNA guidelines, *news,* **274,** 411

US to increase public participation in regulation of DNA research, *news*, **276**, 430
Dutch recombinant DNA guidelines to be relaxed, *news*, (Schurring C.) **273**, 698
NIH confirms violation of recombinant DNA research guidelines, *news*, **273**, 5
NIH may loosen recombinant DNA research guidelines, *news*, **273**, 179
NIH relaxes recombinant DNA guidelines, *news*, **274**, 303
Recombinant DNA hazards may be reassessed, *news*, **274**, 203
Recombinant DNA is safe, *news*, (Pritchard R. H.) **273**, 696
Recombinant DNA risk-assessment studies to begin at Fort Detrick, *news*, **272**, 488
Universities can patent recombinant DNA results **272**, 199
US extends recombinant DNA controls to private industry, *news*, **276**, 744

Recombination: Male. Male recombination is not induced in *Drosophila melanogaster* by extracts of strains with male recombination potential (Sved J. A., Murray D. C., Schaefer R. E. and Kidwell M. G.) **275**, 457

Red blood cell. Rapid transbilayer diffusion of 1,2-diacylglycerol and its relevance to control of membrane curvature (Allan D., Thomas P. and Michell R. H.) **276**, 289
Distribution of sialic acid on the red blood cell membrane in β thalassaemia (Kahane I., Polliack A., Rachmilewitz E. A., Bayer E. A. and Skutelsky E.) **271**, 674

Red cell. Membrane Transport in Red cells (Ellory J. C. and *editor*) *book review by* Lieb W. R. **273**, 254
Polymerisation of red cell membrane protein contributes to spherocchinocyte shape irreversibility (Palek J., Liu P. A. and Liu S. C.) **274**, 505

Red giant. Constraints on the corona model for Sirius B (D'Antona F. and Mazzitelli I.) **275**, 726

Red Sea. Changing hydrothermal activity in the Atlantis II Deep geothermal system (Schoell M. and Hartmann M.) **274**, 784
Red Sea muds ripe for exploitation, *news*, (Sardar Z.) **275**, 582
Saudi Arabia invests in fishing, *news*, (Sardar Z.) **275**, 686
New isotopic evidence for the origin of Red Sea brines (Schoell M. and Faber E.) **275**, 436

Reddish V. Top Scottish astronomer resigns after staffing row, *news*, **276**, 109

Redshift. Selection effects in redshift distribution of QSOs (Basu D.) **273**, 130

Refrigeration. Will detente kill millikelvin research? (McClintock P. V. E.) **276**, 117

Regeneration. Embryonic and regenerating patterns, *news and views*, (Cooke J.) **271**, 705
Limb morphology and function are transformed by contralateral nerve section in snapping shrimps (Mellon Jr D. and Stephens P. J.) **272**, 246
Regeneration of reduplicated limbs in contravention of the complete circle rule (Slack J. M. W. and Savage S.) **271**, 760
Supernumerary limbs in the axolotl (Maden M. and Turner R. N.) **273**, 232

Regge pole theory. Why has Regge pole theory survived?, *review article*, (Leader E.) **271**, 213

Regolith. Formation of the early Earth regolith (Nussinov M. D. and Vekhov A. A.) **275**, 19

Relativity. Essential relativity, *correspondence*, (Rindler W.) **271**, 300
Group Theory and General Relativity (Carmeli M.) *book review by* David P. **271**, 690
Speed of light and relativity, *news and views*, (Hodgson P. E.) **271**, 13
Tensors, Relativity and Cosmology (Lord E. A., *editor*) *book review by* Davies P. **272**, 109

Relaxin. Relaxin and its structural relationship to insulin (Isaacs N., James R., Niall H., Bryant-Greenwood G., Dodson G., Evans A. and North A. C. T.) **271**, 278

Remote viewing. Information transmission in remote viewing experiments (Marks D. and Kamman R.) **274**, 680

Renin. Effect of calcium ionophore Br-X537A on renin synthesis and release in amphiuma means kidney culture (Worley, R. T. S., Rich G. T. and Pryor J. S.) **271**, 174
Human urinary kallikrein converts inactive to active renin and is a possible physiological activator of renin (Sealey J. E., Atlas S. A., Laragh J. H., Oza N. B. and Ryan J. W.) **275**, 144

Renin. Immunochemical identification of renin in rat brain and distinction from acid proteases (Hirose S., Yokosawa H. and Inagami T.) **274**, 392

Replication. Plasmid incompatibility: cloning analysis of an *inc* FII determinant of R6-5 (Timmis K. N., Andrés I. and Slocombe P. M.) **273**, 27
Replication: twenty-five years after, *news and views*, **274**, 210

Reproduction. Infanticide and other reproductive strategies in the collared lemming, *Dicrostonyx groenlandicus* (Mallory F. F. and Brooks R. J.) **273**, 144
Methods in Mammalian Reproduction (Daniel J. C. *editor*) *book review by* McLaren A. **276**, 304
Reproduction (Cohen J.) *book review by* Austin C. R. **272**, 382
The Langurs of Abu (Hardy S.) *book review by* Clutton-Brock T. H. **273**, 325
Human reproduction reconsidered, *news and views*, (May R. M.) **272**, 491
Human reproduction reconsidered, *matters arising*, (Howell N.) **276**, 421

Reptile. For herpetological novices—two field guides to amphibians and reptiles Cloudsley-Thompson J. L. **276**, 648

Research. Departments urged to support basic research, *news*, **274**, 523
Heraclitean Fire: Sketches from a Life Before Nature (Chargaff E.) *book review by* Donohue J. **276**, 133
Temporary contracts, *correspondence*, (Golub R.) **274**, 416

Research and development. Canada announces major research boost, *news*, **273**, 581
Hungary happy with its science, *news*, **272**, 748
Lederberg suggests national foundation to exploit fruits of university research, *news*, **274**, 2
Proposition 13 threatens US basic research, *news*, **273**, 699
R & D figures show US innovation study may be redundant, *news*, **274**, 4
US government to review industrial innovation, *news*, **273**, 330

Research Council. Construction shares, *news*, **271**, 3
Research councils dislocated, *leading article*, **276**, 655
Scientists appeal to PM over grant, *news*, **272**, 662

Research data. US court rules against releasing research data, *news*, **274**, 201

Residence time. Zooplankton fecal pellets and element residence times in the ocean (Cherry R. D., Higgo J. J. W. and Fowler S. W.) **274**, 246

Resource. Science: a means of locating resources, *news*, (Harada H.) **275**, 265
The Twenty-Ninth Day: Accommodating Human Needs and Numbers to the Earth's Resources (Brown L. R.) *book review by* Ashby E. **275**, 163

Respiration. Metabolism of the abyssopelagic rattail *Coryphaenoides armatus* measured *in situ* (Smith K. L. Jr) **274**, 362

Respiratory distress syndrome. Physical and physiological properties of dry lung surfactant (Morley C. J., Bangham A. D., Johnson P., Thorburn G. D. and Jenkin G.) **271**, 162

Restriction enzyme. Methylation of single-stranded DNA *in vitro* introduces new restriction endonuclease cleavage sites (Gronenborn B. and Messing J.) **272**, 375

Retina. A surprising property of electrical spread in the network of rods in the turtle's retina (Detwiler P. B., Hodgkin A. L. and McNaughton P. A.) **274**, 562
Effect of polarisation of horizontal cells on the on-centre bipolar cell of carp retina (Toyoda J.-I. and Tonosaki K.) **276**, 399
Evidence for passive electrotonic interactions in red rods of toad retina (Leeper H. F., Normann R. A. and Copenhagen D. R.) **275**, 234
Spectral sensitivity of the red and yellow oil droplet fields of the pigeon (*Columba livia*) (Martin G. R. and Muntz W. R. A.) **274**, 620
Horizontal cells influence membrane potential of biopolar cells in the retina of the turtle (Marchiafava P. L.) **275**, 141

Retinoid. Retinoids as well as tumour promoters enhance deacylation of cellular lipids and prostaglandin production in MDCK cells (Levine L. and Ohuchi K.) **276**, 274
Retinoids block phenotypic cell transformation produced by sarcoma growth factor (Todaro G. J., De Larco J. E. and Sporn M. B.) **276**, 272

Retinol. Retinol induces density-dependent growth inhibition and changes in glycolipids and LETS (Patt L. M., Itaya K. and Hakomori S. I.) **273**, 379

Reverse transcriptase. Surface antibodies of human myelogenous leukaemia leukocytes reactive with specific type-C viral reverse transcriptases (Jacquemin P. C., Saxinger C. and Gallo R. C.) **276**, 230

Reykjanes Ridge. Cl and Br degassing by volcanism along the Reykjanes Ridge and Iceland (Unni C. K. and Schilling J-G.) **272**, 19
Ge/Si and Ga/Al variations along the Reykjanes Ridge and Iceland (Argollo R. M. de and Schilling J.-G.) **276**, 24
Vesicularity of basalt erupted at Reykjanes Ridge crest (Duffield W. A.) **274**, 217

Rhabdomere. Desensitisation of peripheral photoreceptors shown by blue-induced decrease in transmittance of *Drosophila* rhabdomeres (Lo C. M. and Pak W. L.) **273**, 772

Rheology. A reduction in $^{87}Sr/^{86}Sr$ during basalt alteration (Hawkesworth C. J. and Morrison M. A.) **276**, 381
Effect of degassing on rheology of basaltic lava (Sparks R. S. J. and Pinkerton H.) **276**, 385

Rheumatoid arthritis. Novel treatment for joint inflammation (Dingle J. T., Gordon J. L., Hazleman B. L., Knight C. G., Page Thomas D. P., Phillips N. C., Shaw I. H., Fildes F. J. T., Oliver J. E., Jones G., Turner E. H. and Lowe J. S.) **271**, 372

Rheumatoid factors. Certain rheumatoid factors react with nucleosomes (Hannestad K. and Stollar B. D.) **275**, 671

Rhizobium. High frequency transfer of nodulating ability between strains and species of *Rhizobium* (Johnston A. W. B., Beynon J. L., Buchanan-Wollaston A. V., Setchell S. M., Hirsch P. R. and Beringer J. E.) **276**, 634
Transfer of the drug-resistance transposon Tn5 to *Rhizobium* (Beringer J. E., Beynon J. L., Buchanan-Wollaston A. V. and Johnston A. W. B.) **276**, 633
A *Rhizobium* mutant incapable of nodulation and normal polysaccharide secretion (Sanders R. E., Carlson R. W. and Albersheim P.) **271**, 240
Rhizobium recognition *news and views*, (Beringer J. E.) **271**, 206

Rhizobium japonicum. *Rhizobium japonicum* mutants unable to use hydrogen (Maier R. J., Postgate J. R. and Evans H. J.) **276**, 494

Rhodanese. The covalent and tertiary structure of bovine liver rhodanese (Ploegman J. H., Drent G., Kalk K. H., Hol W. G. J., Heinrikson R. L., Keim P., Weng L. and Russell J.) **273**, 124

Rhodopsin. Light in the middle of the tunnel, *news and views*, (Flanagan M. T.) **272**, 307
More evidence that light isomerises the chromophore of *Halobacterium halobium* purple membrane protein (Hurley J. B., Becher B. and Ebrey T. G.) **272**, 87
Nature of light-induced conductance changes in ventral photoreceptors of *Limulus* (Wong F.) **276**, 76
Photochemical *cis-trans* isomerisation of bovine rhodopsin at liquid helium temperatures (Aton B., Callender R. H. and Honig B.) **273**, 784
The chromophore binding space of opsin (Daemen F. J. M.) **276**, 847

Ribosomal subunit. Resistance to viomycin conferred by RNA of either ribosomal subunit (Yamada T., Mizugichi Y., Nierhaus K. H. and Wittmann H. G.) **275**, 460

Ribosome. Halophilic ribosomes, *news and views*, (Brimacombe R.) **275**, 587
The ribosome: still a knotty problem, *news and views*, (Nierhaus K. H.) **274**, 743

Ribosome: Cytoplasmic. Chloroplast DNA codes for tRNA from cytoplasmic polyribosomes (McCrea J. M. and Hershberger C. L.) **274**, 717

Ribulose biphosphate carboxylase. Control of photorespiration at RuBP carboxylase/oxygenase level in ryegrass cultivars (Garrett M. K.) **274**, 913

Ribulose bisphosphate carboxylase. Synthesis and transport of the small subunit of chloroplast ribulose bisphosphate carboxylase (Highfield P. E. and Ellis R. J.) **271**, 420

Rift. Lateral magma flow within rifted Icelandic crust (Sigurdsson H. and Sparks S. R. J.) **274**, 126

Rift Valley fever. Rift Valley fever, *news and views*, (Zuckerman A. J. and Simpson D. I. H.) **271**, 308

Rift zone. Greenstone belts as ancient marginal basins or ensialic rift zones (Groves D. I., Archibald N. J., Bettenay L. F. and Binns R. A.) **273**, 460

Rifting. Rifting crustal attenuation and subsidence in the Bay of Biscay (Charpal O. de Guennoc P., Montadert L. and Roberts D. G.) **275**, 706

Riming. A possible mechanism of ice splinter production during riming (Choularton T. W., Latham J. and Mason B. J.) **274**, 791

Risk. Rothschild: an antidote to panic, *correspondence*, (Rothschild and Cahn R.) **276**, 555
Rothschild's numerate arrogance, *leading article*, **276**, 429
Risk assessment is more than numbers, Swedish seminar concludes, *news*, (Barnaby W.) **276**, 554

RNA. Analysis of virion RNA segments and polypeptides of influenza A virus recombinants of defined virulence (Oxford J. S., McGeoch D. J., Schild G. C. and Beare A. S.) **273**, 778
Why do nucleic acids have 3'5' phosphodiester bonds (Dhingra M. M. and Sarma R. H.) **272**, 798
Resistance to viomycin conferred by RNA of either ribosomal subunit (Yamada T., Mizugichi Y., Nierhaus K. H. and Wittmann H. G.) **275**, 460

RNA biology. The Ribonuccleic Acids (Stewart P. R. and *editor*) *book review by* Hamlyn P. **275**, 164

RNA: Cardiac. 'Cardiac' RNA, *news and views*, (Slack J.) **271**, 12

RNA conformation. Two contiguous conformations in a nucleic acid duplex (Selsing E., Wells R. D., Early T. A. and Kearns D. R.) **275**, 249

RNA: Double-stranded. Induction of specific antibodies to poly(ADP-ribose) in rabbits by double-stranded RNA, poly(A).poly(U) (Kanai Y., Sugimura T. and Matsushima T.) **274**, 809
Interferon, dsRNA and the pleiotypic effector, *news and views*, (Hunt T.) **273**, 97

RNA: Globin. Globin RNA sequences in human leukaemic peripheral blood (Gianni A. M., Favera R. D., Polli E., Merisio I., Gigliani B., Compi P. and Ottolenghi S.) **274**, 610

RNA ligase. 3'-Terminal labelling of RNA with T4 RNA ligase (England T. E. and Uhlenbeck O. C.) **275**, 560

RNA: Messenger. AUG is the only recognisable signal sequence in the 53a non-coding of eukaryotic in RNA (Baralle F. E. and Brownlee G. G.) **274**, 84
Different cap 1: cap 2 ratios in rabbit α and β globin mRNA (Lockard R. E.) **275**, 153
Evidence for 'splicing' of SV40 16S mRNA (Haegeman G. and Fiers W.) **273**, 70
Functional stabilisation of HeLa cell histone messenger RNAs injected into *Xenopus* oocytes by 3'-OH polyadenylation (Huez G., Marbaix G., Gallwitz D., Weinberg E., Devos R., Hubert E. and Cleuter Y.) **271**, 572
Inactivation of interferon mRNA in the shutoff of human interferon synthesis (Greene J. J., Dieffenbach W. C. and Ts'o P. O. P.) **271**, 81
Novel cell cycle control of RNA synthesis in yeast (Fraser R. S. S. and Nurse P.) **271**, 726
Nuclear conversion of microinjected avian leukosis virion RNA into an envelope-glycoprotein messenger (Stacey D. W. and Hanafusa H.) **273**, 779
Separate mRNAs code for tubulin subunits (Bryan R. N., Cutter G. A. and Hayashi M.) **272**, 81
Sequence of chicken ovalbumin mRNA (McReynolds L., O'Malley B. W., Nisbet A. D., Fothergill J. E., Givol D., Fields S., Robertson M. and Brownlee G. G.) **273**, 723
Sequences and efficiencies of processed mRNA terminators (McMahon J. E. and Tinoco Jr I.) **271**, 275
The use of *Xenopus* egg cells to assay the mRNA of single cells (van der Donk J. A., van Dam R. H. and Bazin H.) **271**, 479
Translation of interferon messenger RNA *in vivo* and in vitro, *news and views*, (Burke D. and Morser J.) **271**, 10
Translation of rabbit globin mRNA introduced by liposomes into mouse lymphocytes (Dimitriadis G. J.) **274**, 923
Translation of *Xenopus* vitellogenin mRNA during primary and secondary induction (Farmer S. R., Henshaw E. C., Berridge M. V. and Tata J. R.) **273**, 401

RNA Messenger. *V* and *C* parts of immunoglobulin κ-chain genes are separate in myeloma (Matthyssens G. and Tonegawa S.) **273**, 763

RNA: Messenger. Virion RNA can be used to study nuclear processing of messenger RNA, *news and views*, (Weiss R.) **273**, 707
Yeast has a true stringent response (Warner J. R. and Gorenstein C.) **275**, 338

RNA: Nuclear. Evidence for splicing of interrupted immunoglobulin variable and constant region sequences in nuclear RNA (Rabbitts T. H.) **275**, 291

RNA Polymerase. β Subunit of bacterial RNA polymerase is responsible for streptolydigin resistance in *Bacillus subtilis* (Halling S. M., Burtis K. C. and Doi R. H.) **272**, 837
Identification of a single promoter in *E. coli* for *rplJ*, *rplL* and *rpoBC* (Linn T. and Scaife J.) **276**, 33
A mutation affecting the σ subunit of RNA polymerase changes transcriptional specificity (Travers A. A., Buckland R., Goman M., Le Grice S. S. G. and Scaife J. G.) **273**, 354

RNA processing. RNA processing, *news and views*, (Travers A.) **275**, 365

RNA: Qβ. Inhibition of Qβ RNA 70S ribosome initiation complex formation by an oligonucleotide complementary to the 3' terminal region of *E. coli* 16S ribosomal RNA (Taniguchi T. and Weissmann C.) **275**, 770

RNA: Radiolabelled. 3'-Terminal labelling of RNA with T4 RNA ligase (England T. E. and Uhlenbeck O. C.) **275**, 560

RNA: Ribosomal. An insert in the single gene for the large ribosomal RNA in yeast mitochondrial DNA (Bos J. L., Heyting C., Borst P., Arnberg A. C. and Van Bruggen E. F. J.) **275**, 336
Impaired gene activity for 18S and 28S rRNA in early embryonic development of mouse parthenogenones (Hansmann I., Gebauer J. and Grimm T.) **272**, 377
Mechanism of resistance to thiostrepton in the producing-organism *Streptomyces azureus* (Cundliffe E.) **272**, 792
Preparation-sensitive conformations in ribosomal RNAs (Hochkeppel H.-K. and Gordon J.) **273**, 560
The ribosome: still a knotty problem, *news and views*, (Nierhaus K. H.) **274**, 743
The sequence of *E. coli* 16S ribosomal RNA (Brimacombe R.) **276**, 445
Unequal crossing over at the rRNA locus as a source of quantitative genetic variation (Frankham R., Briscoe D. A. and Nurthen R. K.) **272**, 80

RNA: 5S. Pseudogene structure in 5S RNA genes, *news and views*, (Ford P.) **271**, 205

RNA sequence. A different approach to RNA sequencing (Stanley J. and Vassilenko S.) **274**, 87
Sequence of chicken ovalbumin mRNA (McReynolds L.,

O'Malley B. W., Nisbet A. D., Fothergill J. E., Givol D., Fields S., Robertson M. and Brownlee G. G.) **273,** 723
Sequence of chicken ovalbumin mRNA (McReynolds L., O'Malley B. W., Nisbet A. D., Fothergill J. E., Givol D., Fields S., Robertson M. and Brownlee G. G.) **273,** 723
RNA: SV40. Splicing of SV40 late mRNA is a post-transcriptional process (Horowitz M., Laub O., Bratosin S. and Aloni Y.) **275,** 558
RNA synthesis. A ρ-dependent termination site in the gene coding for tyrosine tRNA su3 of *Escherichia coli* (Küpper H., Sekiya T., Rosenberg M., Egan J. and Landy A.) **272,** 423
Novel cell cycle control of RNA synthesis in yeast (Fraser R. S. S. and Nurse P.) **271,** 726
Regulation of RNA synthesis in early germination of isolated wheat (*Triticum aestivum* L) embryo (Cheung C. P. and Suhadolnik R. J.) **271,** 357
RNA: Transcriptional. *In vitro* transcription and isolation of polycistronic RNA product of the T4 tRNA operon (Goldfarb A., Seaman E. and Daniel V.) **273,** 562
RNA: Transfer. ä-Helix-double helix interaction shown in the structure of a protamine-transfer RNA complex and a nucleoprotamine model (Warrant R. W. and Kim S-H.) **271,** 130
Structure and processing of yeast precursor tRNAs containing intervening sequences (O'Farrell P. Z., Cordell B., Valenzuela P., Rutter W. J. and Goodman H. M.) **274,** 438
The ribosome: still a knotty problem, *news and views,* (Nierhaus K. H.) **274,** 743
Tumour-specific phenylalanine tRNA contains two super-numerary methylated bases (Kuchino Y. and Borek E.) **271,** 126
What do the polyamines do? *news and views,* (Cohen S. S.) **274,** 209
RNA: Viral. Diameter of haemoglobin S fibres in sickled cells (Crepeau R. H., Dykes G., Garrell R. and Edelstein S. J.) **274,** 616
In vivo aminoacylation and 'processing' of turnip yellow mosaic virus RNA in *Xenopus laevis* oocytes (Joshi S., Haenni A. L., Hubert E., Huez G. and Marbaix G.) **275,** 339
Initiation activity of EMC virus RNA, binding to initiation factor eIF-4B and shut-off of host cell protein synthesis (Baglioni C., Simili M. and Shafritz D. A.) **275,** 240
Tomato bushy stunt virus at 2.9 Å resolution (Harrison S. C.) Olson A. J., Schutt C. E., Winkler F. K. and Bricogne G.) **276,** 368
RNA: Virus-specific. Effect of dibutyryl cyclic AMP on intracellular levels of avian sarcoma virus-specific RNA (Guntaka R. V. and Weiner A. J.) **274,** 274
RNase. RNase H hydrolysis of the 5' terminus of the avian sarcoma virus genome during reverse transcription (Collett M. S., Dierks P., Parsons J. T. and Faras A. J.) **272,** 181
Rockefeller University. Lederberg named President of Rockefeller University, *news,* **271,** 298
Rocket. Skylark rockets could be made from spare parts say UK geophysicists, *news,* **276,** 311
Rockslide. Rockslides and Avalanches (Voight B. *editor*) *book review by* Smalley I. J. **272,** 654
Rod. Contribution of a caesium-sensitive conductance increase to the rod photoresponse (Fain G. L., Quandt F. N., Bastian B. L. and Gerschenfeld H. M.) **272,** 467
Evidence for passive electrotonic interactions in red rods of toad retina (Leeper H. F., Normann R. A. and Copenhagen D. R.) **275,** 234
Rod outer segment. Photoreceptor shedding can be initiated within the eye (Hollyfield J. G. and Basinger S. F.) **274,** 794
Rodgers. Localisation of Chido and Rodgers determinants to the C4d fragment of human C4 (Tilley C. A., Romans D. G. and Crookston M. C.) **276,** 713
Rogers, P. Rogers proposes commission on research ethics, *news,* **274,** 523
Roll cell. Roll cell mantle convection under the Pacific plate (Furlong K. P. and Chapman D. S.) **274,** 145
Romania. Fellowship for wife of Romanian President **273,** 585
Root. Plant Root Systems: Their Function and Interaction with the Soil (Scott Russell R. *editor*) *book review by* Roberts J.M. **272,** 193
Root growth. Geostimulation of root growth and pigment synthesis in mustard seedlings (MacDonald I. R. and Gordon D. C.) **272,** 48
Root nodule. Nitrogen-fixing root nodules in Ulmaceae (Akkermans A. D. L., Abdulkadir S. and Trinick M. J.) **274,** 190
Rostherne Mere. Confirmation of ^{137}Cs dating by algal stratigraphy in Rostherne Mere (Livingstone D. and Cambray R. S.) **276,** 259
Rothschild. Glimpses of Rothschild (Rothschild V.) *book review by* Bullard E. **272,** 775
Rothschild: an antidote to panic, *correspondence,* (Rothschild and Cahn R.) **276,** 555
Rothschild, Lord. Rothschild's numerate arrogance, *leading article,* **276,** 429
Royal Navy. Navy lifts veil on PWR research, *news,* (Fishlock D.) **272,** 4
Royal Observatory. Top Scottish astronomer resigns after staffing row, *news,* **276,** 109
Royal Society. Transposed sentence, *correspondence,* (Keay R. W. J.) **271,** 300
Rutherford Laboratory. Appleton and Rutherford to merge **276,** 109
Rye. Tolerance of *Triticale* wheat and rye to copper deficiency (Graham R. D.) **271,** 542
Ryegrass. Evolution of sulphur dioxide tolerance in perennial ryegrass (Horsman D. C., Roberts T. M. and Bradshaw A. D.) **276,** 493
S burst. Jovian S-burst observations at 32 MHz (Desch M. D., Flagg R. S. and May J.) **272,** 38
Jupiter's S bursts and Io (Whitham P. S.) **272,** 40
Saanich Inlet. Consumption of dissolved nitrous oxide in an anoxic basin, Saanich Inlet British Columbia (Cohen Y.) **272,** 235
Saccharin. Saccharin: the risks and benefits, *news,* (Cohen B. L.) **271,** 492
Saccharin: the risks and benefits, *correspondence,* (Cohen B. L.) **273,** 704
Saccharin—the risks and benefits, *correspondence,* (Miller A. B. and Howe G. R.) **273,** 8
US agencies to study links between saccharin and cancer, *news,* **271,** 396
Sahel. What next in the Sahel? *news,* (Collins P.) **273,** 484
Sahel desert. Neolithic hyperarid period preceded the present climate of the Central Sahel (Dumont H. J.) **274,** 356
Salinity. Crops for the desert, *news and views,* (Moore P. D.) **272,** 14
The Messinian salinity crisis, *correspondence,* (Adams C. G.) **271,** 8
Very low salinity regions of estuaries: important sites for chemical and biological reactions (Morris A. W., Mantoura R. F. C., Bale A. J. and Howland R. J. M.) **274,** 678
Salivary gland. Virus-like particles pathogenic to salivary glands of the tick *Boophilus microplus* (Megaw M. W. J.) **271,** 483
Salivary protein. Evolutionary and dietary aspects of salivary basic (Pb) and post Pb (PPb) proteins in anthropoid primates (Azen E. A., Leutenegger W. and Peters E. H.) **273,** 775
Salk Institute. 17m for Salk Institute, *news,* **271,** 106
Salt marsh. Sedimentation rates determined by ^{137}Cs dating in a rapidly accreting salt marsh (Delaune R. D., Patrick W. H. Jr and Buresh R. J.) **275,** 532
Salyut. Poland tries the taste of space, *news,* **276,** 110
Salyut-6 used for weightlessness experiments, *news,* **271,** 601
Soviets plan 'a new space event', *news,* **273,** 482
Tsiolkovskii's dream, *news,* **271,** 201
San Andreas Fault. Radon emanation on San Andreas Fault (King C-Y.) **271,** 516
Sand desert. Sand deserts during glacial maximum and climatic optimum (Sarnthein M.) **272,** 43
Sandwave. Bedforms and their hydraulic stability relationships in a tidal environment, Bay of Fundy, Canada (Dalrymple R. W., Knight R. J. and Lambiase J. J.) **275,** 100
Sapropel. Ionian Sea sapropel distribution and late Quaternary palaeoceanography in the eastern Mediterranean (Stanley D. J.) **274,** 149
Sarcoma growth factor. Retinoids block phenotypic cell transformation produced by sarcoma growth factor (Todaro G. J., De Larco J. E. and Sporn M. B.) **276,** 272
Sarcoma induction. Cyclophosphamide delays 3-methylcholanthrene sarcoma induction in mice (Hellström I. and Hellström K. E.) **275,** 129
Sarcoplasmic reticulum. Transient kinetics of sarcoplasmic reticulum Ca^{2+}+Mg^{2+} ATPase studied by fluorescence (Dupont Y. and Leigh J. B.) **273,** 396
Satellite. Better resolution from Landsat, *news and views,* (Allan J. A.) **273,** 189
Canada's nuclear visitor, *news,* **271,** 396
Congress approves solar power satellites—and asteroid mining, *news,* **274,** 3
Council of Europe experiments with remote sensing, *news,* **272,** 201
Europe evaluates Seasat, *news,* **274,** 203
Geos 2 in space collision? *news,* (Wrenn G.) **274,** 631
Geos III not enough for POLO, *correspondence,* (Runcorn S. K.) **276,** 438
Horizontal structure of scintillation-producing irregularities in southern mid-latitudes (Hajkowicz L. A.) **276,** 252
India gets ready to tune in to its satellite, *news,* **276,** 203
India prepares to launch Earth resources satellite, *news,* (Salwi D. M.) **274,** 526
Killer satellites, *news,* (Hussain F.) **271,** 293
Oceans ahoy: Seasat-A to go aloft **273,** 586
Power-failure knocks out Seasat, *news,* **275,** 576
The facts about Kosmos-954, *news,* **271,** 497
The multi-discipline refurbishable satellite, *news,* **275,** 358
Why we should ban the military use of satellites, *news,* **273,** 416
Ice sheet topography by satellite altimetry (Brooks R. L., Campbell W. J., Ramseier R. O., Stanley H. R. and Zwally H. J.) **274,** 539
Re-usable satellite the future for UK space research? *news,* **273,** 178
Satellite launcher. Ariane heads south, *news,* (Schurring C.) **273,** 698
Satellite performance. In-flight performance of the IUE (Boggess A., Bohlin R. C., Evans D. C., Freeman H. R., Gull T. R., Heap S. R., Klinglesmith D. A., Longanecker G. R., Sparks W., West D. K., Holm A. V., Perry P. M., Schiffer F. H. III, Turnrose B. E., Wu C. C., Lane A. L., Linsky J. L., Savage B. D., Benvenuti P., Cassatella A., Clavel J., Heck A., Macchetto F., Penston M. V., Selvelli P. L., Dunford E., Gondhalekar P., Oliver M. B., Sandford M. C. W., Stickland D., Boksenberg A., Coleman C. I., Snijders M. A. J. and Wilson R.) **275,** 377
Satellite: Solar. Solar orbital satellite launched, *news,* **274,** 630
Saturn. Azimuthal brightness variation of Saturn's ring-A and size of particles (Ferrin I.) **271,** 528
Major satellites cause wavy deformation of Saturns rings (Bobrov M. S.) **273,** 284
Photometric confirmation of the Encke division in Saturn's ring A (Reitsema H. J.) **272,** 601
Width of a planetary ring system and the C-ring of Saturn (Smoluchowski R.) **274,** 669
Sauce béarnaise. Sauce béarnaise, *correspondence,* (Johnson R.) **271,** 402
Sauce béarnaise, *correspondence,* (Stearns G. and Weininger R.) **271** 402
Sauce béarnaise, *correspondence,* (Loutit J. F.) **271,** 402
Sauce béarnaise, *correspondence,* (Tweedie T. S.) **271, 271,** 402
Saudi Arabia. Saudis warm to solar energy, *news,* (Sardar Z.) **273,** 700
Saudi Arabia and the travelling scientist, *news,* **271,** 392
Saudi Arabia invests in fishing, *news,* (Sardar Z.) **275,** 686
S-burst. Jovian S-burst observations at 32 MHz (Desch M. D., Flagg R. S. and May J.) **272,** 38
Scanning Electron Microscopy. Introduction to Biological Scanning Electron Microscopy (Hayat M. A.) *book review by* Echlin P. **274,** 98
Scanning electron microscopy and the surface morphology of human lymphocytes, *review article,* (Roath S., Newell D., Polliac A., Alexander E. and Lin P-S.) **273,** 15
Scanning transmission electron microscopy. Scanning transmission electron microscopy of unstained biological sections (Jones A. V. and Leonard K. R.) **271,** 659
Schistosomiasis. The pathology, pathobiology and pathogenesis of schistosomiasis, *review article,* (Warren K. S.) **273,** 609
Schizophrenia. Binding of ^{3}H-neuroleptics and ^{3}H-apomorphine in schizophrenic brains (Lee T., Seeman P., Tourtellotte W. W., Farley I. J. and Hornykeiwicz O.) **274,** 897
It's all in the mind . . . *news,* **274,** 107
Schwann cell. Cyclic AMP as a mitogenic signal for cultured rat Schwann cells (Raff M. C., Hornby-Smith A. and Brockes J. P.) **273,** 672
Science. A Sense of the Future (Bronowski J.) *book review by* Ashby E. **271,** 589
Popular science **275,** 575
Trans-science, *news,* (Weinberg. A. M.) **273,** 93
Science and technology. Cinderella in the UN, *leading article,* **271,** 195
Development in the Muslim world, *leading article,* **272,** 195
Gene inquiry is timely, *correspondence,* (Cummins B., Piney M., Turney J., Walden N., and Yoxen E.) **271,** 108
Hazard export: a case for international concern, *leading article,* **273,** 5
Linking science to technology: harder than it seems for Third World, *leading article,* **275,** 467
Long live science *news,* (Gorky M.) **272,** 202
Regional co-operative programmes, *news,* **274,** 634
Science: a means of locating resources, *news,* (Harada H.) **275,** 265
Science and technology for development: no escaping the politico-economic context, *news,* (Singh Narendra) **27**?, 112
Science and technology in Southeast Asia *news,* (Yu avong Y.) **274,** 634
Scientists prepare for UNCSTD, *news,* (Collins P.) **272,** 748
South Korea to raise investment in science and technology, *news,* **272,** 6
Soviet technology (Amann R., *editor*) *book review by* Freeman C. **272,** 781
UNCSTD: a ray of hope despite delay in planning, *news,* (Collins P.) **274,** 631
UNCSTD: a survival exercise for the developed world? *leading article,* **273,** 327
UNCSTD prepares for action, *news,* (Collins P.) **272,** 113
UNCSTD—not just for bureaucrats, *leading article,* **271,** 1
Vietnam calls its scientists to arms, *news,* (Hay A.) **273,** 94
Science award. £350,000 science awards, *news,* **276,** 553
Science budget. Surprise Christmas present for British science, *news,* (McKie R.) **276,** 657
Science education. Kennedy seeks legislation on women in science, *news and views,* **272,** 395
Science for the People. Science for the People, *news,* (Schneider S., Loechler E., King J. and Beckwith J.) **274,** 732
Science for the People, or by the people? *news,* (Weinberg A. M.) **274,** 410
Science funding. Polishing a tarnished image, *news,* **271,** 297
Science Museum. Holiday diary, *leading article,* **271,** 99
Science policy. Democracy's day, *leading article,* **272,** 389
Greater powers for Dutch science minister, *news,* (Schuuring C.) **276,** 109
Japan makes new study of its science, *news,* (Douglas J.) **271,** 702
Moralistic fallacies, *correspondence,* (Hawthorne J. N. and Simms D. L.) **272,** 750
NATO looks at its science programme, *leading article,* **272,** 657
NSF budget under fire, *news,* **273,** 418
Peru rings the changes in science policy, *news,* **275,** 473
Post-docs take up ARMS, *news,* **276,** 310
Research in Greece, *news,* (Pantelouris E. M.) **271,** 696
The moralistic fallacy, *news,* (Davis B. B.) **272,** 390
USSR Academy plans for 1990, *news,* **272,** 200
Venezuela: still out in the cold, *news,* **275,** 472
New science policy minister for Netherlands, *news,* (Schuuring C.) **272,** 7
New Spanish Constitution leaves science policy open, *news,* (Puigdoménech P.) **276,** 431
Science research. "Erosion of spirit" in British science, *news,* **275,** 577
Science Research Council. Appleton and Rutherford to merge **276,** 109
People before pounds, say SRC, *news,* **276,** 311
Research councils dislocated, *leading article,* **276,** 655
Science teaching. Science in a Social Context (SISCON Series) Rose S. **272,** 89
Science unity. Mr. Moon's philosophy, *correspondence,* (Salter J.) **276,** 754
Scientific aid. Vietnam extends scientific links, *news,* (Hay A.) **273,** 419
Scientific intelligence. Most Secret War (Jones R. V.) *book review by* Bullard E. **274,** 191
Scientific knowledge. Decline in scientific knowledge among 17-year-olds, *news,* **274,** 105
Scientific method. Science as a Human Endeavour (Kneller G. F.) *book review by* Ziman J. **276,** 127
Scientific process. How We Know: An Exploration of the Scientific process (Goldstein M. and) *book review by* Sutherland S. **276,** 126
Scientific progress. Aesthetics and scientific progress—on the relationship between Art and Science Pollock M. **276,** 639
How We Know: An Exploration of the Scientific process (Goldstein M. and) *book review by* Sutherland S. **276,** 126
Science as a Human Endeavour (Kneller G. F.) *book review by* Ziman J. **276,** 127
Scientific Progress: A Philosophical Essay on the Economics of Research in Natural Science (Rescher N.) *book review by* Dainton F. S. **276,** 128
Scientific research. China's science has 20 years to catch up, *news,* (Tang T. B.) **272,** 482
Counting the costs of US research, *news,* **272,** 572
Scientific unity. Should scientists attend the ICUS? *news,* **276,** 206
Scientist. Are women scientists getting a fair deal? *news,* (Brown J. W.) **272,** 658
Scientist's career. Bright minds not wasted, *correspondence,* (Dover S. D.) **271,** 402
Scintillation region. Horizontal structure of scintillation-producing irregularities in southern mid-latitudes (Hajkowicz L. A.) **276,** 252
Scrapie. Mitogenic stimulation of the host enhances susceptibility to scrapie (Dickinson A. G., Fraser H., McConnell I. and Outram G. W.) **272,** 54
Transmission of Creutzfeldt-Jakob disease with scrapie- like syndromes to mice (Manuelidis E. E., Gorgacz E. J. and Manuelidis L.) **271,** 778
Evidence for an essential DNA component in the Scrapie agent (Marsh R. F., Malone T. G., Semancik J. S., Lancaster W. D. and Hanson R. P.) **275,** 146
Sea floor. Age-length dependence of inclined seismic zones (Farrar E. and Lowe R. M.) **273,** 292
Deep shelf and slope terraces off northern Labrador (Fillon R. H., Folinsbee R. A. and Palmer R.) **273,** 743
Observations of the deep-sea floor from 202 days of time-lapse

photography (Paul A. Z., Thorndike E. M., Sullivan L. G., Heezen B. C. and Gerard R. D.) **272,** 812
Sea level. Holocene eustatic sea level change (Kidson C. and Heyworth A.) **273,** 748
Pole movement and sea levels (Weyer E. M.) **273,** 18
Sea level-air temperature correlations near a coastal zone (Tont S. A.) **276,** 171
Termination of last interglacial episode and the Wilson Antarctic surge hypothesis (Chappell J. and Thom B. G.) **272,** 809
Vertical zonations of marsh foraminifera as accurate indicators of former sea levels (Scott D. S. and Medioli F. S.) **272,** 528
$^{230}Th/^{234}U$ age support of an interstudial sea level of —40m at 30,000 yr *bp* (Chappell J. and Veeh H. H.) **276,** 602
Sea limit. Law of the Sea: five years of negotiations, *leading article*, **274,** 521
Sea moth. Sea moths pinned down, *news and views*, **275,** 693
Sea water. Actinide activities in water entering the northern North Sea (Murray C.N., Kautsky H., Hoppenheit M. and Domian M.) **276,** 225
Colour, ultraviolet absorbance and salinity of the surface waters off the west coast of Ireland (Monahan E. C. and Pybus M. J.) **274,** 782
Seabrook. Further protests planned at Seabrook nuclear plant, *news*, **274,** 632
Seafloor spreading. Lower Tertiary laterite on the Iceland-Faeroe Ridge and the Thulean land bridge (Nilsen T. H.) **274,** 786
Oblique spreading and fracture zones, *matters arising*, (Collette B. J. and Slootweg A. P.) **274,** 187
Off-ridge volcanism and seafloor spreading in the Shikoku Basin (Klein G. D., Kobayashi K., Chamley H., Curtis D. M., Dick H. J. B., Echols D. J., Fountain D. M., Kinoshita H., Marsh N. G., Mizuno A., Nisterenko G. V., Okada H., Sloan J. R., Waples D. M. and White S. M.) **273,** 746
Offshore continuation of East Greenland dyke swarm and North Atlantic Ocean formation (Larsen H. C.) **274,** 220
Seafloor spreading. Seafloor spreading in the western Gulf of Aden (Girdler R. W. and Styles P.) **271,** 615
Seasat. Europe evaluates Seasat, *news*, **274,** 203
Power-failure knocks out Seasat, *news*, **275,** 576
Seawater. Seawater:basalt ratio effects on the chemistry and mineralogy of spilites from the ocean floor (Seyfried W. E. Jr, Mottl M. J. and Bischoff J. L.) **275,** 211
Seawater surface. Minor metal content of surface seawater particulates and organic-rich shelf sediments (Chester R., Griffiths A. and Stoner J. H.) **275,** 308
Secretory system. Biosynthetic relationships of big and little gastrins (Dockray G. J., Vaillant C. and Hopkins C. R.) **273,** 770
Sediment. A problem in ^{210}Pb geochronologies of sediments (Megumi K.) **274,** 885
Anomalous magnetic fabric in sediments which record an apparent geomagnetic field excursion (Marino R. J. and Ellwood B. B.) **274,** 581
Dating sediments by a K-Ar method (Langley K. M.) **276,** 56
Mass mortality of photosynthetic bacteria as a mechanism for dark lamina formation in sediments of the Black Sea (Dickman M. and Artuz I.) **275,** 191
Metal enriched sediments from the TAG Hydrothermal Field (Scott M. R., Scott R. B., Morse J. W., Betzer P. R., Butler L. W. and Rona P. A.) **276,** 811
Minor metal content of surface seawater particulates and organic-rich shelf sediments (Chester R., Griffiths A. and Stoner J. H.) **275,** 308
Organic geochemical indicators of palaeoenvironmental conditions of sedimentation (Brassell S. C. and Eglinton G.) **272,** 216
Pleistocene land-sea correlations, *news and views*, (Smalley Jl. J.) **272,** 754
Production of methane and carbon dioxide from methane thiol and dimethyl sulphide by anaerobic lake sediments (Zinder S. H. and Brock T. D.) **273,** 226
Radionuclide loss from marine sediment (Hess C. T., Smith C. W. and Price A. H.) **272,** 807
Rifting crustal attenuation and subsidence in the Bay of Biscay (Charpal O. de Guennoc P., Montadert L. and Roberts D. G.) **275,** 706
Silicate in anoxic pore waters and oxidation effect during sampling (Loder T. C., Lyons W. B., Murray S. and McGuinness H. D.) **273,** 373
The sedimentary environment of the Deweras Group in Rhodesia (Cooper M. R.) **272,** 810
Thermoluminescence dating of sediment baked by lava flows of the Chaine des Puys (Huxtable J., Aitken M. J. and Bonhommet N.) **275,** 207
Sediment: Pelagic. Evidence for denitrification in aerobic pelagic sediments (Wilson T. R. S.) **274,** 354
Sedimentary trough. Seismic evidence for Mesozoic sedimentary troughs on the Hebridean continental margin, *matters arising*, (Smythe D. K., Kenolty N. and Russell M. J.) **276,** 420
Seismic evidence for Mesozoic sedimentary troughs on the Hebridean continental margin—Reply, *matters arising*, (Jones E. J. W.) **276,** 420
Seismic evidence for sedimentary troughs of Mesozoic age on the Hebridean continental margin (Jones E. J. W.) **272,** 789
Sedimentation. High sedimentation rates and variable dispersal patterns in the western Hellenic Trench (Stanley D. J., Knight R. J., Stuckenrath R. and Catani G.) **273,** 110
Organic ^{14}C activity in an abyssal marine sediment (Williams P. M., Stenhouse M. C., Druffel E. M. and Koide M.) **276,** 698
Sedimentation rate. Sedimentation rates determined by ^{137}Cs dating in a rapidly accreting salt marsh (Delaune R. D., Patrick W. H. Jr and Buresh R. J.) **275,** 532
Seed. Palaeolithic–Neolithic seed remains at Franchthi Cave Greece (Hansen J. and Renfrew J., M.) **271,** 349
The Physiology and Biochemistry of Seed Dormancy and Germination (Khan A. A. *editor*) *book review by* Bradbeer J. W. **273,** 174
Seed development. Separation of seed development from monocarpic senescence in soybeans (Noodén L. D., Rupp D. C. and Derman B. D.) **271,** 354
Seed dispersal. Somatic polymorphism and seed dispersal (Sorensen A. E.) **276,** 174
Seed viability. DNA lesions occur with loss of viability in embryos of ageing rye seed (Cheah K. S. E. and Osborne D. J.) **272,** 593
Seismic reflection profiling. Exploration of the continental basement by seismic reflection profiling, *review article*, (Oliver J.) **275,** 485
Seismology. Ninetyeast Ridge not aseismic after all, *news and views*, (Smith P. J.) **274,** 533
Seismological and geological aspects of the Mantaro landslide in Peru (Berrocal J., Espinosa A. F. and Galdos J.) **275,** 533
Select committee on. Gene inquiry is timely, *correspondence*, (Cummins B., Piney M., Turney J., Walden N., and Yoxen E.) **271,** 108
Selenium. Behaviour and speciation of dissolved selenium in estuarine waters (Measures C. I. and Burton J. D.) **273,** 293
Self discrimination. Cytotoxic T cells learn specificity for self H-2 during differentiation in the thymus (Zinkernagel R. M., Callahan G. N., Klein J. and Dennert G.) **271,** 251
Self sufficiency. Self-sufficiency on one-tenth of an acre, *news*, (Mellanby K.) **273,** 701
Semantics. Anti anti-'x' antibodies, *correspondence*, (Groschel-Stewart U.) **274,** 10
Browsers and their browse, *correspondence*, (Lewin R. A. and Enright J. T.) **276,** 10
Science has a word for it, *leading article*, **276,** 547
Semicircular canal. Semicircular canals in squids (Stephens P. R. and Young J. Z.) **271,** 444
Semiconductor. Indentation hardness and semiconductor-metal transition of germanium and silicon (Gerk A. P. and Tabor D.) **271,** 732
Laser annealing of semiconductors, *news and views*, (Weaire D. and Wilson J. I. B.) **276,** 668
Semi-conductor. Liquid Semiconductors (Cutler M.) *book review by* Davis E. A. **271,** 689
Semiconductor. New results from linearised charge transport theory (Manifacier J.-C. and Henisch H. K.) **272,** 521
Prospects for the use of amorphous semiconductors in solar energy conversion, *review article*, (Wilson J. I. B. and Weaire D.) **275,** 93
Recombination in semiconductors, *news and views*, (Landsberg P. T.) **275,** 270
Temperature dependence of flatband potentials at semiconductor-electrolyte interfaces (Butler M. A. and Ginley D. S.) **273,** 524
Physical mechanisms for chemically sensitive semiconductor devices (Bergveld P., De Rooij N. F. and Zemel J. N.) **273,** 438
Revolution in Miniature: The History of and Impact of Semiconductor Electronics (Braun E. and) *book review by* Holmes-Siedle A. **276,** 147
The Physics of Semiconductor Devices (Fraser D. A., *editor*) *book review by* Holmes-Siedle A. **272,** 108
Wet semiconductor devices, *news and views*, (Laurence P.) **273,** 490
Senescence. The Genetics of Aging (Schneider E. L. *editor*) *book review by* Emery A. E. H. **275,** 466
Separation of seed development from monocarpic senescence in soybeans (Noodén L. D., Rupp D. C. and Derman B. D.) **271,** 354
Sensory deprivation. Possible plasticity in the rat superior colliculus (Vidyasagar T. R.) **275,** 140
Removal of whiskers in young rats causes functional changes in cerebral cortex (Waite P. M. E. and Taylor P. K.) **274,** 600
Serotonergic mechanism. No evidence for a central serotonergic mechanism in arrhythmogenic effects of deslanoside, *matters arising*, (Helke C. J., Souza J. D., Hamilton B. and Gillis R.) **274,** 925
Serotonin. Slow synaptic excitation mediated by serotonin in Auerbach's plexus (Wood J. D. and Mayer C. J.) **276,** 836
Serum. A single chain precursor of C4 in human serum (Gigli I.) **272,** 836
Serum thymic factor. Is serum thymic factor of thymic origin? (Kelemen N., Lasmoles F. and Milhaud G.) **272,** 65
Seveso. Company's claim sparks fresh controversy over Seveso, *news*, (Hay A.) **274,** 108
Seveso: premature optimism, *correspondence*, (Manara L. and Garattini S.) **276,** 556
What caused the Seveso explosion? *news*, (Hay A.) **273,** 582
Sex. Evolution of Sex (Smith J. M.) *book review by* Robertson A. **276,** 123
Sex determination. Is sex determination in germ line and soma controlled by separate genetic mechanisms? (Marsh J. L. and Wieschaus E.) **272,** 249
Sex difference. Sex difference in Lewis rats in the incidence of recurrent experimental allergic encephalomyelitis (Keith A. B.) **272,** 824
Sex ratio. Facultative sex ratios and population dynamics (Werren J. H. and Charnov E. L.) **272,** 349
Genetic variability and population structure of *Poecilia latipinna* (Simanek D. E.) **276,** 612
Sexual dimorphism. Scaling of sexual dimorphism in body size and breeding system in primates (Leutenegger W.) **272,** 610
Seyfert galaxy. Diffuse γ-ray background from Seyfert galaxies (Grindlay J. E.) **273,** 211
Extragalactic molecular hydrogen, *news and views*, (Wynn-Williams C. G.) **274,** 114
Is Fairall 9 an X-ray Seyfert galaxy? (Ricker G. R.) **271,** 334
NGC1275: a BL Lacertae object? (Veron P.) **272,** 430
Origin of MeV-excess in the energy spectrum of diffuse cosmic γ rays (Schonfelder V.) **274,** 344
Seymour Island. Biostratigraphy of Seymour Island, Antarctica, *matters arising*, (Elliot D. H. and Zinsmeister W. J.) **271,** 586
Biostratigraphy of Seymour island, Antarctica — Reply, *matters arising*, (Hall S. A.) **271,** 586
Shap. Geophysical constraints on structure and emplacement of Shap granite (Locke C. A. and Brown G. C.) **272,** 526
Shcharanskii. Shcharanskii trial stirs new anti-Soviet protests, *news*, **274,** 107
Shcharanskii A. Shcharanskii may soon be brought to trial—without a lawyer, *news*, **271,** 104
Shcharanskii, A. Shcharanskii trial delayed again, others exiled, *news*, **274,** 6
Shcharanskii A. The secret is to have no secrets, *news*, **274,** 305
Shear. Composition waves in iron-doped rutile and the relationship between Young's modulus minima and crystallographic shear orientations (Bursill L. A., Netherway D. J. and Grey I. E.) **272,** 405
Intense progressive shear in the He de Groix blueschists and compatibility with subduction or obduction (Quinquis H., Audren Cl., Brun J. F. and Cobbold P. R.) **273,** 43
Shear deformation. Coaxial pure shear in Jamaican blueschists and deformation associated with subduction (Draper G.) **275,** 735
Shear plane. Non-stoichiometry and dielectric properties (Catlow C. R. A. and James R.) **272,** 603
Shields J. *obituary* (Shields J.) **274,** 728
Shikoku Basin. Off-ridge volcanism and seafloor spreading in the Shikoku Basin (Klein G. D., Kobayashi K., Chamley H., Curtis D. M., Dick H. J. B., Echols D. J., Fountain D. M., Kinoshita H., Marsh N. G., Mizuno A., Nisterenko G. V., Okada H., Sloan J. R., Waples D. M. and White S. M.) **273,** 746
Shock. Naloxone reversal of endotoxin hypotension suggests role of endorphins in shock (Holaday J. W. and Faden A. I.) **275,** 450
Shock wave. The Rankine—Hugoniot relation for shock waves in very porous media (Bolkhovitinov L. G. and Khvostov Y. B.) **274,** 882
Shot noise model. Physical reality of shot noise model for the short-term variability of Cyg X-1 (Doi K.) **275,** 197
Sialon. α3a-Sialon ceramics (Hampshire S., Park H. K., Thompson D. P. and Jack K. H.) **274,** 880
New materials in the Si-C-Al-O-N and related systems (Cutler I. B., Miller P. D., Rafanicllo W., Park H. K., Thompson D. P. and Jack K. H.) **275,** 434
Sicily. Sicily's scientific evangelist, *news*, **275,** 171
Sickel cell anaemia. Effects *in vitro* of the proposed antisickling agent DBA (Honig G. R., Vida L. N. and Ferenc C.) **272,** 833
Sickle cell. Cellular mechanism for the protective effect of haemoglobin S against *P. falciparum* malaria (Pasvol G., Weatherall D. J. and Wilson R. J. M.) **274,** 701
Sickle cell anaemia. Diameter of haemoglobin S fibres in sickled cells (Crepeau R. H., Dykes G., Garrell R. and Edelstein S. J.) **274,** 616
Requirements for therapeutic inhibition of sickle haemoglobin gelation (Sunshine H. R., Hofrichter J. and Eaton W. A.) **275,** 238
Sickle cell: a metastable disease, *news and views*, (Briehl R.) **276,** 666
Sickle-cell haemoglobin fibres, *news and views*, (Finch J. T.) **272,** 496
Three-dimensional reconstruction of the fibres of sickle cell haemoglobin (Dykes G., Crepeau R. H. and Edelstein S. J.) **272,** 506
Sickle cell anemia. Competition of normal β chains and sickle haemoglobin β chains for α chains as a post-translational control mechanism (Bunn H.F.) **276,** 631
Therapeutic agents for sickle cell disease, *news and views*, (Perutz M. F., Rosa J. and Schechter A.) **275,** 369
Sierra Leone. Infracambrian glaciogenic sediments from Sierra Leone (Culver S. J., Williams H. R. and Bull P. A.) **274,** 49
Volcanics from the Sierra Leone Rise (Hékinian R., Bonte P., Dudley W., Blanc P. L., Jehano C., Labeyrie L. and Duplessy J. C.) **275,** 536
Silica. Coesite and stishovite in the Vredefort Dome, South Africa (Martini J. E. J.) **272,** 715
Silicate in anoxic pore waters and oxidation effect during sampling (Loder T. C., Lyons W. B., Murray S. and McGuinness H. D.) **273,** 373
Single crystal analysis of the structure of stishovite (Sinclair W. and Ringwood A. E.) **272,** 714
Silicalite a new hydrophobic crystalline silica molecular sieve (Flanigen E. M., Bennett J. M., Grose R. W., Cohen J. P., Patton R. L., Kirchner R. M. and Smith J. V.) **271,** 512
Silicalite. Silicalite a new hydrophobic crystalline silica molecular sieve (Flanigen E. M., Bennett J. M., Grose R. W., Cohen J. P., Patton R. L., Kirchner R. M. and Smith J. V.) **271,** 512
Silicate. Rates of chemical denudation of silicate rocks in tropical catchments (Dunne T.) **274,** 244
Silicon. A new amorphous silicon-based alloy for electronic applications (Ovshinsky S. R. and Madan A.) **276,** 482
A new type of chemisorptive bond, *news and views*, **271,** 405
Amorphous silicon, *news and views*, **276,** 441
Indentation hardness and semiconductor-metal transition of germanium and silicon (Gerk A. P. and Tabor D.) **271,** 732
Marine alga *Platymonas* sp. accumulates silicon without apparent requirement (Fuhrman J. A., Chisholm S. W. and Guillard R. R. L.) **272,** 244
Ultraviolet lasers for purer silicon (Holmes-Siedle A.) **272,** 674
Amorphous silicon: MIS solar cells (Wilson J. I. B., McGill J. and Kinmond S.) **272,** 152
Silicon carbide fibre. Development of high tensile strength silicon carbide fibre using an organosilicon polymer precursor (Yajima S., Hasegawa Y., Okamura K. and Matsuzawa T.) **273,** 525
Silkworm. Loss of phototaxis in silkworm larvae after smelling mulberry leaves and recovery after electroconvulsive shock (Shimizu I. and Kato M.) **272,** 248
Sinoatrial node. Sinus node extracellular potassium transients following vagal stimulation (Kronhaus K. D., Spear J. F., Moore E. N. and Kline R. P.) **275,** 322
Sirius B. Constraints on the corona model for Sirius B (D'Antona F. and Mazzitelli I.) **275,** 726
Sister chromatid exchange. Effect of cocultivation on sister chromatid exchange frequencies in Bloom's syndrome and normal fibroblast cells (Tice R., Windler G. and Rary J. M.) **273,** 538
Parallel induction of sister chromatid exchanges and infectious virus from SV40-transformed cells by alkylating agents (Kaplan, J. C., Zamansky G. B., Black P. H. and Latt S. A.) **271,** 662
Sister chromatid exchange as an indicator of mutagenesis (Carrano A. V., Thompson L. H., Lindl P. A. and Minkler J. L.) **271,** 551
Sivalik deposit. Geology, fauna and palaeoenvironments of Lower Sivalik deposits around Ramnagar, India (Vasishat R. N., Gaur R. and Chopra S. R. K.) **275,** 736
Skeleton. Normal and experimental variations in proportions of skeleton of chick embryo wing (Summerbell D.) **274,** 472
Skin. Vertebrate skin, *news and views*, (Spearman R. I. C.) **276,** 442
Skylab. Skylab Explores the Earth (NASA) Anderson V. H. **273,** 690
Skylab coming down, *news*, **271,** 499
Slime mould. Development and Differentiation in the Cellular Slime Moulds (Cappuccinelli P. and *editor*) *book review by* Bonner J. T. **271,** 192
Slime mould. Progress on slime mould morphogens, *news and views*, (Newell P. C.) **271,** 302
Slope deposit. The Bucegi Conglomerate: a Romanian Carpathian submarine slope deposit (Stanley D. J. and Hall B. A.) **276,**

60

Slow synaptic excitation. Does substance P mediate slow synaptic excitation within the myenteric plexus? (Katayama Y. and North R. A.) **274,** 387

Smith H. O. and. From modest beginnings... *news,* (Roberts R.) **275,** 689

Sm–Nd dating. Sm-Nd isotopic investigation of Isua supracrustals and implications for mantle evolution (Hamilton P. J., O'Nions R. K., Evensen N. M., Bridgwater D. and Allaart J. H.) **272,** 41

Smut fungus. Chromosome transfer in dikaryons of a smut fungus (Day A. W.) **273,** 753

Snail darter. The fish that roared. *news,* **273,** 177

Snow. Natural enrichment of elements in snow (Weiss H. V., Herron M. M. and Langway C. C. Jr) **274,** 352

Soapstone. Utilisation of soapstone in Labrador by Indians, Eskimos and Norse (Allen R. O., Allen K. K., Holland C. G. and Fitzhugh W. W.) **271,** 237

Social behaviour. Monkeys prefer kin. *news and views,* (Krebs J.) **274,** 311

Social insect. Production Ecology of Ants and Termites (Brian M. V. *editor*) *book review by* Cherrett J. M. **273,** 80

Society. The Twenty-Ninth Day: Accommodating Human Needs and Numbers to the Earth's Resources (Brown L. R.) *book review by* Ashby E. **275,** 163

Sociobiology. Selfish genes, evolutionary games, and the adaptiveness of behaviour (Parker G. A.) **274,** 849

Sociology. Genetics and society (Reilly P.) *book review by* Levy H. L. **272,** 766

Technology and Social Shock (Lawless E. W.) *book review by* Ashby E. **274,** 295

The Reward System in British and American Science (Gaston J.) *book review by* Blume S. **276,** 129

Perspectives in the Sociology of Science (Blume S. S. *editor*) *book review by* Ziman J. **273,** 80

Sociology of astronomical innovation. *news and views,* (Hughes D. W.) **271,** 210

Sodium chlorate. X-ray photoelectron spectroscopic evidence for trapped oxygen species in irradiated $NaClO_3$ (Copperthwaite R. G. and Lloyd J.) **271,** 141

Sodium nitroprusside. Increases in cyclic GMP levels may not mediate relaxant effects of sodium nitroprusside, verapamil and hydralazine in rat vas deferens (Diamond J. and Janis R. A.) **271,** 472

Sodium pump. ATP levels modify the activation of the Na pump by external cations in squid axons (Beauge L. A. and DiPolo R.) **271,** 777

Distribution of Na^+ pump sites in the frog gallbladder (Mills J. W. and DiBona D. R.) **271,** 273

Sodium transport. Arginine-specific reagents remove sodium channel inactivation (Eaton D. C., Brodwick M. S., Oxford G. S. and Rudy B.) **271,** 473

Soil. Plant Root Systems: Their Function and Interaction with the Soil (Scott Russell R. *editor*) *book review by* Roberts J.M. **272,** 193

Quantitative and Numerical Methods in Soil Classification and Survey (Webster R.) *book review by* Alexander M. J. **273,** 173

Soil as a source or sink for atmospheric nitrous oxide (Freney J. R., Denmead O. T. and Simpson J. R.) **273,** 530

Soil erosion. Accelerated soil erosion. *news and views,* (Low A. J.) **274,** 13

Soil stabilisation. Soil stabilisation by cellulose xanthate (Menefee E. and Hautala E.) **275,** 530

Soil Survey. Aerial Photography and Remote Sensing for Soil Survey (White L. P.) *book review by* Curtis L. F. **271,** 289

Soil-Root System. Solute Movement in the Soil-Root System (Nye P. H. and) *book review by* Barber A. S. **272,** 564

Solar. Possible solar eclipse effect 23 October 1976. *matters arising,* (Scheepers G. L. M.) **271,** 91

Solar activity. Magnetic bottles for cosmic rays. *news and views,* **272,** 312

Predicted intensity of the solar maximum (Kane R. P.) **274,** 139

Relation between monthly variations of global ozone and solar activity (Keating G. M.) **274,** 873

Solar plages and the vorticity of the Earth's atmosphere (Olson R. H., Roberts W. O., Prince H. D. and Hedeman E. R.) **274,** 140

Solar activity and influenza. *correspondence,* (Ing R.) **276,** 556

Solar cell. Amorphous silicon. *news and views,* **276,** 441

Amorphous silicon MIS solar cells (Wilson J. I. B., McGill J. and Kinmond S.) **272,** 152

Photoelectrochemical reduction of aqueous carbon dioxide on p-type gallium phosphide in liquid junction solar cells (Halmann M.) **275,** 115

Planar solar energy converter and concentrator based on uranyl-doped glass (Reisfeld R. and Neuman S.) **274,** 144

Progress in solar cells. *news and views,* (Landsberg P. T.) **274,** 116

Solar cycle. Meteor radar rates, geomagnetic activity and solar wind sector structure (Lindblad B. A.) **273,** 732

New light on sunspot darkness and the solar cycle (Albregtsen F. and Maltby P.) **274,** 41

Solar eclipse. Atmospheric gravity waves generated during a solar eclipse (Goodwin G. L. and Hobson G. J.) **275,** 109

Quasi-periodic fluctuations in electron content during a partial solar eclipse (Vaidyanathan S., Reddi C. R. and Krishnamurthy B. V.) **271,** 40

Solar energy. Congress approves solar power satellites—and asteroid mining. *news,* **274,** 3

Israel's place in the sun. *news,* **275,** 581

Photochemical conversion of solar energy. *news and views,* (Harriman A.) **276,** 15

Saudis warm to solar energy. *news,* (Sardar Z.) **273,** 700

Temperature dependence of flatband potentials at semiconductor-electrolyte interfaces (Butler M. A. and Ginley D. S.) **273,** 524

Prospects for the use of amorphous semiconductors in solar energy conversion. *review article,* (Wilson J. I. B. and Weaire D.) **275,** 93

Solar energy storage and conversion by hydrogen cycle. *news and views,* (Cahn R. W.) **276,** 665

Solar flare. Millisecond microwave spikes in a solar flare (Slottje C.) **275,** 520

Solar fluctuation. Does the troposphere respond to day-to-day changes in solar magnetic field? (Williams R. G. and Gerety E. J.) **275,** 200

Solar magnetic field. Does the troposphere respond to day-to-day changes in solar magnetic field? (Williams R. G. and Gerety E. J.) **275,** 200

Solar nebula. Magnetic field in the primitive solar nebula (Levy E. H.) **276,** 481

Solar oscillation. Brightness oscillations of daytime sky (Clarke D.) **274,** 670

Evidence for long-period global oscillations of the Sun (Snider J. L., Kearns M. D. and Tinker P. A.) **275,** 730

New data from solar oscillations. *news,* (Gough D.) **274,** 739

Oscillations of the Sun and the geomagnetic field (Lanzerotti L. J. and Maclennan C. G.) **275,** 113

Solar System. More puzzles about the early Solar System. *news and views,* (Edmunds M.) **272,** 337

Science in the Solar System. *news,* **275,** 363

IUE observations of Solar System objects (Lane A. L., Hamrick E., Boggess A., Evans D. C., Gull T. R., Schiffer F. H. III, Turnrose B., Perry P., Holm A., Macchetto F., Gondhalekar P. M., Hunt G. E., Wilson R., Owen T. C., Moos H. W., Tomasko M. G., Gehrels T., Conway R. and Barth C. A.) **275,** 414

Solar wind. A surface related component of iron metal in lunar samples? (Woodcock M. R., Pillinger C. T. and Stephenson A.) **276,** 697

Anomalous acceleration of minor ions in the solar wind (McKenzie J. F., Ip W.-H. and Axford W. I.) **274,** 350

Solar wind sputtering of the martian atmosphere (Haff P. K., Switkowski Z. E. and Tombrello T. A.) **272,** 803

The solar wind at the turn of the century (Feynman J. and Crooker N. U.) **275,** 626

Solar wind effect on Jupiter's non-lo-related radio emission (Terasawa T., Maezawa K. and Machida S.) **273,** 131

The solar wind influences plasmasphere electron content (Sethia G., Deshpande M. R. and Rastogi R. G.) **276,** 482

Solid solution. New materials in the Si-C-Al-O-N and related systems (Cutler I. B., Miller P. D., Rafaniello W., Park H. K., Thompson D. P. and Jack K. H.) **275,** 434

Solid-state battery. Copper-ion solid-state battery system involving sulphonium iodide electrolytes (Dahm R. H., Hackwood S., Linford R. G. and Pollock J. M.) **272,** 522

Solvent structure. Computer simulation of the solvent structure around biological macromolecules (Hagler A. T. and Moult J.) **272,** 222

Soma potential. Soma potential of an interneurone controls transmitter release in a monosynaptic pathway in *Aplysia* (Shimahara T. and Peretz B.) **273,** 158

Somatic cell. Is sex determination in germ line and soma controlled by separate genetic mechanisms? (Marsh J. L. and Wieschaus E.) **272,** 249

Somatostatin. Is somatostatin an excitatory transmitter in the hippocampus? (Dodd J. and Kelly J. S.) **273,** 674

Song. Regularity versus irregularity in specific songs of closely-related drosophilid flies (Bennet-Clark H. C. and Leroy Y.) **271,** 442

Resonant wing systems in the Australian whistling moth *Hecatesia* (Agarasidae, Lepidoptera) (Bailey W. J.) **272,** 444

Song repertoires and territory defence in the great tit (Krebs J., Ashcroft R. and Webber M.) **271,** 539

Soufriere Crater Lake. The Soufriere Crater Lake as a calorimeter (Shepherd J. B. and Sigurdsson H.) **271,** 344

South Africa. Boycotts and repressive regimes. *correspondence,* (Richfield J. M.) **272,** 396

Split gene. Genes, chromosomes and differentiation, *news and views,* **274,** 639

Intervening sequences in the mitochondrial genome, *news and views,* (Bernardi G.) **276,** 558

Isolation by molecular cloning of a fragment of the split ovalbumin gene (Garapin A. C., Lepennec J. P., Roskam W., Perrin F., Cami B., Krust A., Breathnach R., Chambon P. and Kourilsky P.) **273,** 349

Spontaneous Generation. The Spontaneous Generation Controversy (Farley J.) *book review by* Cox F. E. G. **273,** 689

Spontaneous killer cell. Human spontaneous killer cells selective for tumour-derived target cells (Jondal M., Spina C. and Targan S.) **272,** 62

Spore: fungal. Function of rodlets on the surface of fungal spores (Beever R. E. and Dempsey G. P.) **272,** 608

Sporulation. New cluster of ribosomal genes in *Bacillus subtilis* with regulatory role in sporulation (Trowsdale J., Shiflett M. and Hoch J. A.) **272,** 179

Sputtering. Mechanisms of sputtering of solid surfaces by ion-impact (Pollit K. R., Robb J. C. and Thomas D. W.) **272,** 436

Squid. Semicircular canals in squids (Stephens P. R. and Young J. Z.) **271,** 444

Staphylococcus. Fibronectin binds to *Staphylococcus aureus* (Kuusela P.) **276,** 718

Star. A galaxy associated with 3C273 (Stockton A.) **274,** 342

An unusual emission-line star X-ray source radio star, possibly associated with an SNR (Clark D. H. and Murdin P.) **276,** 44

Giant problems, *news and views,* (Edmunds M. G.) **273,** 487

Runaway stars as witness to supernova explosions (Kochhar R. K.) **271,** 527

Stellar Atmospheres (Mihalas D.) *book review by* Pagel B. **276,** 99

A star called M, *news and views,* (Bell Burnell S. J.) **276,** 564

Star: Binary. IUE observations of the eclipsing binary Epsilon Aurigae (Hack M. and Selvelli P. L.) **276,** 376

X-ray emission from the companion to V861 Sco (Polidan R. S., Pollard G. S. G., Sanford P. W. and Locke M. C.) **275,** 296

Star: Companion. If the Sun has a companion. . . . (Pineault S.) **275,** 727

Star: Cool. IUE observations of cool stars: α Aurigae, HR 1099, λ Andromedae, and ε Eridani (Linsky J. L., Ayres T. R., Basri G. S., Morrison N. D., Boggess A., Schiffer F. H. III, Holm A., Cassatella A., Heck A., Macchetto F., Stickland D., Wilson R., Blanco C., Dupree A. K., Jordan C. and Wing R. F.) **275,** 389

Star: Double. Double Stars (Heintz W. D.) *book review by* Kopal Z. **276,** 742

Star: Hot. IUE observations of hot stars: HZ43, BD + 75° 325, NGC6826, SS Cygni, η Carinae (Heap S. R., Boggess A., Holm A., Klinglesmith D. A., Sparks W., West D., Wu C. C., Boksenberg A., Willis A., Wilson R., Macchetto F., Selvelli P. L., Stickland D., Greenstein J. L., Hutchings J. B., Underhill A. B., Viotti R. and Whelan J. A. J.) **275,** 385

Star: Primordial. Gravitation, primordial stars and the dark mass (Shields G. A.) **273,** 519

Star: Quark. A galaxy associated with 3C273 (Stockton A.) **274,** 342

Quark stars with 'realistic' equations of state (Fechner W. B. and Joss P. C.) **274,** 347

Star: Radio. Is HD26676 an unusual radio star? (Popper D. M. and Margon B.) **274,** 137

Star: Radiostar. A new class of radio star (Ryle M., Caswell J. L., Hine G. and Shakeshaft J.) **276,** 571

Star: Red dwarf. Interferometric observations of weak radio flares from a red dwarf star (Davis R. J., Lovell B., Palmer H. P. and Spencer R. E.) **273,** 644

Star: Ultraviolet. An ultraviolet subdwarf companion to HD 17576 (Darius J. and Whitelock P. A.) **275,** 428

Steel. Clean surface reactions between diamond and steel (Thornton A. G. and Wilks J.) **274,** 792

Steel: Mild. Grain-size dependence of cleavage fracture toughness in mild steel (Curry D. A.) **276,** 50

Steiner G. Truth at any price, *leading article,* **271,** 391

Stella wind. Upper limits to X-ray emission from colliding stellar winds (Cooke B. A., Fabian A. C. and Pringle J. E.) **273,** 645

Stem cell. A common progenitor for human myeloid and lymphoid cells (Prchal J. T., Throckmorton D. W., Carroll A. J. III, Fuson E. W., Gams R. A. and Prchal J. F.) **274,** 590

The origin of lymphoid stem cells studied in chick yolk sac-embryo chimaeras (Lassila O., Eskola J., Toivanen P., Martin C. and Dieterlen-Lievre F.) **272,** 353

Stem extension. Simulated sunflecks have large, rapid effects on plant stem extension (Morgan D. C. and Smith H.) **273,** 534

Stereochemistry. Stereochemistry of phosphoryl group transfer using a chiral [^{16}O, ^{17}O, ^{18}O] phosphate monoester: the stereochemical course of alkaline phosphatase (Jones S. R., Kindman L. A. and Knowles J. R.) **275,** 564

Stereopsis. Limit of single vision in stereopsis depends on contour sharpness (Kulikowski J. J.) **275,** 126

Sterkfontein. Re-appraisal of lithostratigraphy of Sterkfontein hominid site (Partridge T. C.) **275,** 282

Steroid. Pleiotypic effects of hormones, *news and views,* (Shields R.) **276,** 440

Stishovite. Coesite and stishovite in the Vredefort Dome, South Africa (Martini J. E. J.) **272,** 715

Single crystal analysis of the structure of stishovite (Sinclair W. and Ringwood A. E.) **272,** 714

Stomatostatin. Calcium-dependent release of stomatostatin and neurotensin from rat brain *in vitro* (Iversen L. L., Iversen S. D., Bloom F., Douglas C., Brown M. and Vale W.) **273,** 161

Stonehenge. On Stonehenge (Hoyle F.) *book review by* Meadows J. **271,** 189

Some new measurements on Stonehenge (Atkinson R. J. C.) **275,** 50

Storm. Three-dimensional storm motion detection by conventional weather radar (Rinehart R. E. and Garvey E. T.) **273,** 287

Strains resemble. Naturally occurring respiratory deficient *Candida slooffii* **strains resemble** *petite* **mutants,** (Arthur H., Watson K., McArthur C. R. and Clark-Walker G. D.) **271,** 750

Stratigraphy. Seismic stratigraphy and global changes, *news and views,* (Hallam A.) **272,** 400

Stratosphere. Change the nature of stratospheric aerosol collected at 34 °S (Gras J. L.) **271,** 231

Effect of the reaction $HO_2 + O_3$ — $OH + 2O_2$ on stratospheric ozone (Whitten R. C., Borucki W. J., Capone L. A. and Turco R. P.) **275,** 523

Effects of intense stratospheric ionisation events (Reid G. C., McAfee J. R. and Crutzen P. J.) **275,** 489

First mass analysis of stratospheric negative ions (Arnold F. and Henschen G.) **275,** 521

Increased atmospheric carbon dioxide and stratospheric ozone (Groves K. S., Mattingly S. R. and Tuck A. F.) **273,** 711

Mass spectrometric measurement of the positive ion composition in the stratosphere (Arijs E., Ingels J. and Nevejans D.) **271,** 642

Ratio of HNO_3 to NO_2 concentrations in daytime stratosphere (Harries J. E.) **274,** 235

Stratum corneum. Assembly of stratum corneum basic protein and keratin filaments in macrofibrils (Dale B. A., Holbrook K. A. and Steinert P. M.) **276,** 729

Streptococcus pyogenes. Relationship between haptoglobin and *Streptococcus pyogenes* T4 antigens (Köhler W. and Prokop O.) **271,** 373

Streptolydigin. β Subunit of bacterial RNA polymerase is responsible for streptolydigin resistance in *Bacillus subtilis* (Halling S. M., Burtis K. C. and Doi R. H.) **272,** 837

Streptomyces. Transformation of plasmid DNA into *Streptomyces* at high frequency (Bibb M. J., Ward J. M. and Hopwood D. A.) **274,** 398

Streptomyces azureus. Mechanism of resistance to thiostrepton in the producing-organism *Streptomyces azureus* (Cundliffe E.) **272,** 792

Stringent response. Yeast has a true stringent response (Warner J. R. and Gorenstein C.) **275,** 338

Strontium. Pb, Nd and Sr isotopes in oceanic ferromanganese deposits and ocean floor basalts (O'Nions R. K., Carter S. R., Cohen R. S., Evensen N. M. and Hamilton P. J.) **273,** 435

Structural gene. The structural gene for myosin: a closer look, *news and views,* (Smith S. J.) **272,** 495

Study. Concealed inefficiency of late-night study (Monk T. H. and Folkard S.) **273,** 296

Styela clava. Evidence for a 'mammalian' thyroglobulin in endostyle of the ascidian *Styela clava* (Thorndyke M.) **271,** 61

Subduction. Coaxial pure shear in Jamaican blueschists and deformation associated with subduction (Draper G.) **275,** 735

Tectonic emplacement of ophiolitic rocks in the Precambrian Mona Complex of Anglesey (Thorpe R. S.) **276,** 57

Submuclear physics. Where should LEP be built? *news,* **275,** 469

Substance P. Increased spontaneous activity following substance P. infusion into A10 dopaminergic area (Stinus L., Kelley A. E. and Iversen S. D.) **276** 616

Sucrose. Survival of sucrose-loaded erythrocytes in the circulation (Kinosita Jr K. and Tsong T. Y.) **272,** 258

Sugar substitute. Alternatives to sugar, *news,* (Parker K. J.) **271,** 493

Saccharin, *correspondence,* (Jukes T. H.) **274,** 416

Saccharin: the risks and benefits, *news,* (Cohen B. L.) **271,** 492

Saccharin: the risks and benefits, *correspondence,* (Cohen B. L.) **273,** 704

Saccharin—the risks and benefits, *correspondence,* (Miller A. B. and Howe G. R.) **273,** 8

US Academy confirms saccharin as potential carcinogen: *news,* **276,** 205

Sulphate deposits. Stable isotopic compositions of early Archaean sulphate deposits of probable evaporitic and volcanogenic origins (Lambert I. B., Donnelly T. H., Dunlop J. S. R. and Groves D. I.) **276,** 808

Sulphate evaporite. Mid-proterozoic sulphate evaporites at Mount Isa mine, Queensland, Australia (McClay K. R. and Carlile D. G.) **274,** 240

Sulphonylurea. Sulphonylureas increase the number of insulin receptors (Feinglos M. N. and Lebovitz H. E.) **276,** 184

Sulphur. Anionic copolymerisation of elemental sulphur (Penczek S., Slazak R. and Duda A.) **273,** 738

Isotopic composition of sulphur in atmospheric precipitation around Sudbury, Ontario (Nriagu J. O. and Coker R. D.) **274,** 883

Isotopic variation as an index of sulphur pollution in lakes around Sudbury, Ontario (Nriagu J. O. and Harvey H. H.) **273,** 223

Sulphur budget. Reevaluation of the role of dimethyl sulphide in the sulphur budget (Nguyen B. C., Gaudry A., Bonsang B. and Lambert G.) **275,** 637

Sulphur dioxide. Diffusion-coupled oxidation of atmospheric sulphur dioxide (Freiberg J.) **274,** 42

Evidence of photochemical haze in the atmosphere of Greater London (Ball D. J. and Bernard R. E.) **271,** 733

Extreme pollution-sensitivity of grasses when SO_2 and NO_2 are present in the atmosphere together (Ashenden T. W. and Mansfield T. A.) **273,** 142

SO_2 emission in the UK, *correspondence,* (Reed L. E.) **273,** 334

Evolution of sulphur dioxide tolerance in perennial ryegrass (Horsman D. C., Roberts T. M. and Bradshaw A. D.) **276,** 493

Sulphur lake. Subaqueous sulphur lake in Volcan Poas (Bennett F. D. and Raccichini S. M.) **271,** 342

Sun. Analysis of a possible Sunweather correlation (Gerety E. J., Olson R. H. and Orr Roberts W.) **272,** 231

Cooling of the Sun's photosphere coincident with increased sunspot activity (Livingston W. C.) **272,** 340

Has the Sun really got a companion star? (Henrichs H. F. and Staller R. F. A.) **273,** 132

If the Sun has a companion. . . . (Pineault S.) **275,** 727

Is there a chronometer hidden deep in the Sun? (Dicke R. H.) **276,** 676

Limited solubility of iron in the Sun's interior (Pollock E. L. and Alder B. J.) **275,** 41

Solar modulation of atmospheric electrification and possible implications for the Sun-weatherrelationship (Markson R.) **273,** 103

Solar–terrestrial influences on weather and climate (Siscoe G. L.) **276,** 348

Has the Sun a companion star? *matters arising,* (Wright E. L.) **272,** 649

Is the Sun almost-intransitive? (Tavakol R. K.) **276,** 802

Sun Day. President Carter gives Sun Day official blessing, *news,* **272,** 484

Sunfleck. Simulated sunflecks have large, rapid effects on plant stem extension (Morgan D. C. and Smith H.) **273,** 534

Sunflower. Sunflower's blooming floscule is a compass, *correspondence,* (Polikarpov G. G.) **272,** 122

Sunspot. Sunspots and flu: a correlation, *correspondence,* (Hope-Simpson R. E.) **275,** 86

Cooling of the Sun's photosphere coincident with increased sunspot activity (Livingston W. C.) **272,** 340

New light on sunspot darkness and the solar cycle (Albregtsen F. and Maltby P.) **274,** 41

Sun-weather effect. Possible Sun-weather correlation, *matters arising,* (Xanthakis J.) **275,** 775

Possible Sun-weather correlation—Reply, *matters arising,* (Gerety E. J.) **275,** 775

Sun-weather effects, *news and views,* (Olson R. H.) **275,** 368

Super fluid helium. A liquid permanent magnet confirmed, *news and views,* (McClintock P. V. E.) **272,** 671

Superconductivity. Can magnetic order and superconductivity coexist? *news and views,* (Coles B. R.) **276,** 563

Supercooling. A possible mechanism of ice splinter production during riming (Choularton T. W., Latham J. and Mason B. J.) **274,** 791

Superfluid. Incipient superfluidity in normal liquid ^3He, *news and views,* (McClintock P. V. E.) **275,** 585

Superfluid ^3He at Manchester, *news and views,* (McClintock P. V. E.) **273,** 337

Superfluid ^3He in narrow cylinders (Vollhardt D.) **276,** 325

λ-transition between normal and superfluid ^4He in the high-speed rotating frame (Scurlock R. G. and Utton D. B.) **272,** 148

Ultra-cold neutrons in superfluid helium, *news and views,* (McClintock P. V. E.) **275,** 174

Superheated liquid. Superheated Liquid containing suspended particles (Buivid M. G. and Sussman M. V.) **275,** 203

Superior colliculus. Possible plasticity in the rat superior colliculus (Vidyasagar T. R.) **275,** 140

Superluminal expansion. Apparent superluminal expansion velocities in the dipole magnetic field model (Milgrom M. and Bahcall J. N.) **274,** 349

Supernova. A Near-Eastern sighting of the supernova explosion of 1054 (Brecher K., Lieber E. and Lieber A. E.) **273,** 728

Possible climatic and biological impact of nearby supernovae (Hunt G. E.) **271,** 430

Supernovae and lunar melting (Singer C. E.) **272,** 239

The New Astronomy (Murdin P. and L.) *book review by* Hughes D. W. **274,** 828

Association of young supernova remnants with γ-ray sources, *matters arising,* (Lamb R. C.) **274,** 720

Gravitational radiation from supernova neutrino bursts (Turner M. S.) **274,** 565

Low energy neutrino elastic scattering and supernova explosions (Bailin D. and Dombey N.) **275,** 300

Runaway stars as witness to supernova explosions (Kochhar R. K.) **271,** 527

The central source in the supernova remnant G127.1 + 0.5 (Kirshner R. P. and Chevalier R. A.) **276** 480

The spectrum of the supernova in MCG43223 (Elliott K. H., Blades J. C., Zealey W. J. and Tritton S.) **275,** 198

Supernova remnant. An unusual emission-line star X-ray source radio star, possibly associated with an SNR (Clark D. H. and Murdin P.) **276,** 44

Coincidence of compact supernovae remnants with three COS-B γ-ray sources (Lamb R. C.) **272,** 429

Suppressor. HLA–DR specific human suppressor lymphocytes generated by repeated *in vitro* sensitisation against allogeneic cells (Sasportes M., Fradelizi D. and Dausset J.) **276,** 502

Supracrustal rock. Zonation of supracrustal relics in the Archaean of Sierra Leone, Liberia, Guinea and Ivory Coast (Rollinson H. R.) **272,** 440

Surface layer. Catastrophic events in a surface mixed layer (Dillon T. M. and Caldwell D. R.) **276,** 601

Surface reaction. Clean surface reactions between diamond and steel (Thornton A. G. and Wilks J.) **274,** 792

Surface structure. Positrons at surfaces, *news and views,* (Pendry J.) **276,** 756

Survival. Inverse relation of survival of lizards with island size and avifaunal richness (Schoener T. W. and Schoener A.) **274,** 685

Survivorship curve. Adaptive value, entropy and survivorship curves (Demetrius L.) **275,** 213

Sweat secretion. Functions of calcium in sweat secretion (Prompt C. A. and Quinton P. M.) **272,** 171

Sweden. Nuclear power reaches the Swedish stage, *news,* (Barnaby W.) **275,** 583

Nuclear waste problem solved, claims Sweden's nuclear industry, *news,* (Barnaby W.) **274,** 6

Sweden's new government wrestles with nuclear power, *news,* **276,** 432

Sweden's sunny future, *news,* (Barnaby W.) **273,** 584

Sweden's view of development science, *news,* (Barnaby W.) **273,** 328

Swedish experts recommend nuclear energy — without reprocessing, *news,* **272,** 302

Swimmeret. Coupled motoneurones are part of the crayfish swimmeret central oscillator (Heitler W. J.) **275,** 231

Sylvester-Bradley P. C. *obituary* (Sylvester-Bradley P. C.) **274,** 727

Symbiosis. A *Rhizobium* mutant incapable of nodulation and normal polysaccharide secretion (Sanders R. E., Carlson R. W. and Albersheim P.) **271,** 240

Biochemical evidence that leghaemoglobin genes are present in the soybean but not in *Rhizobium* genome (Sidloi-Lumbroso R., Kleiman L. and Schulman H. M.) **273,** 558

High frequency transfer of nodulating ability between strains and species of *Rhizobium* (Johnston A. W. B., Beynon J. L., Buchanan-Wollaston A. V., Setchell S. M., Hirsch P. R. and Beringer J. E.) **276,** 634

Light-regulated body ion balance in marine slug *Elysia viridis* (Montagu) (Deutch B.) **274,** 159

Nitrogen fixation in the rhizosphere of rice (Hirota Y., Fujii T., Sano Y. and Iyama S.) **276,** 416

Rhizobium recognition *news and views,* (Beringer J. E.) **271,** 206

Inorganic polyphosphate involved in the symbiosis between chloroplasts of alga *Codium fragile* and mollusc *Elysia viridis* (Cobb A. H.) **272**, 554

Synapse. Dual action of erbium on transmitter release at the frog neuromuscular synapse (Metral S., Bonneton C., Hort-Legrand C. and Reynes J.) **271**, 773

Intercellular Junctions and Synapses (Feldman J. D., *editor*) *book review by* Warner A. **273**, 410

Synaptic channel gating differences at snake twitch and slow neuromuscular junctions (Dionne V. E. and Parsons R. L.) **274**, 902

Synapses. Synapses (Cottrell G. A. & *editor*) *book review by* Rang H. P. **271**, 191

Synaptic excitation. Slow synaptic excitation mediated by serotonin in Auerbach's plexus (Wood J. D. and Mayer C. J.) **276**, 836

Synaptic projection. Mechanism for the formation of synaptic projections in the arthropod visual system (Macagno E. R.) **275**, 318

Synchrotron radiation. Synchrotron radiation at York, *news and views*, (Marr G. V. and Munro I. H.) **276**, 672

Synthetic compound. Friedrich Wöhler, F. RIP *news*, (Jukes T. H.) **273**, 421

news, (Wöhler F.) **273**, 421

Synthetic fibre. Aromatic polyamides, *news and views*, (Calvert P.) **272**, 679

Dyeing increases the friction of synthetic polymer yarns (Hepworth K., Hewa-Kapuge A., Munden D. L. and Speakman P. T.) **276**, 250

Systemic lupus erythematosus. Absence of measles proviral DNA in systemic lupus erythematosus (Viola M. V., Gann K., Scott C. and Rothfield N.) **275**, 667

T cell. A common progenitor for human myeloid and lymphoid cells (Prchal J. T., Throckmorton D. W., Carroll A. J. III, Fuson E. W., Gams R. A. and Prchal J. F.) **274**, 590

A new Thy-1 alloantigen as a temporal marker of T lymphocyte differentiation (Thomas D. B., Calderon R. A. and Blaxland L. J.) **275**, 711

Abrogation of lymphocyte blastogenesis by a feline leukaemia virus protein (Mathes L. E., Olsen R. G., Hebebrand L. C., Hoover E. A. and Schaller J. P.) **274**, 687

Are T-cell lymphomas immunocompetent? (Roder J. C., Tyler L., Singhal S. K. and Ball J. K.) **273**, 540

Cell changes in alloantigen activated T lymphocytes (Dunlap B., Bach F. H. and Bach M. L.) **271**, 253

Clones of alloreactive T cells (Fatham C. G. and Hengartner H.) **272**, 617

Clones of cytotoxic lymphocytes can recognise uninfected cells in a primary response against influenza virus (Komatsu Y., Nawa Y., Bellemy A. R. and Marbrook J.) **274**, 802

Cytotoxic T cells learn specificity for self H-2 during differentiation in the thymus (Zinkernagel R. M., Callahan G. N., Klein J. and Dennert G.) **271**, 251

Cytotoxic T lymphocyte response to murine cytomegalovirus infection (Quinnan G. V., Manischewitz J. E. and Ennis F. A.) **273**, 541

Different rules govern help for cytotoxic T cells and B cells (Bennink J. R. and Doherty P. C.) **276**, 829

Electrophoretic mobility as a sensitive probe of lectin-lymphocyte interaction (Blume P., Malley A., Knox R. J. and Seaman G. V. F.) **271**, 378

Fusion of Sendai virus with the target cell membrane is required for T cell cytotoxicity (Gething M.-J., Koszinowski U. and Waterfield M.) **274**, 689

Generation of cytotoxic T lymphocytes to autologous human leukaemia cells by sensitisation to pooled allogeneic normal cells (Zarling J. M., Robins H. I., Raich P. C., Bach F. H. and Bach M. L.) **274**, 269

Guinea pig Ia antigens are not derivatised on trinitrophenyl-modified cells (Clement L. T., Thomas D. W., Kask A. M. and Shevach E. M.) **274**, 592

H-2 restriction, the thymus and the immune response, *news and views*, (Howard J. C.) **272**, 11

Human spontaneous killer cells selective for tumour-derived target cells (Jondal M., Spina C. and Targan S.) **272**, 62

Induction and separation of antigen-dependent T helper and T suppressor cells in man (Shore A., Dosch H. -M. and Gelfand E. W.) **274**, 586

Induction of autoreactive T lymphocytes and their suppressor cells by cyclophosphamide (Lage-Stehr J. and Diamantstein T.) **271**, 663

Induction of IgG production in human B lymphoblastoid cell lines with normal human T cells (Kishimoto T., Hirano T., Kuritani T., Yamamura Y., Ralph P. and Good R. A.) **271**, 756

Loss of Fc receptors for IgG from human T lymphocytes exposed to IgG immune complexes (Moretta L., Mingari M. C. and Romanzi C. A.) **272**, 618

Lymphocyte induced stimulation of human chorionic gonadotrophin production by trophoblastic cells *in vitro* (Dickman W. J. and Cauchi M. N.) **271**, 377

Mapping of *H-2* genes associated with T cell-mediated cytotoxic responses to SV40-tumour-associated specific antigens (Pfizenmaier K., Trinchieri G., Solter D. and Knowles B. B.) **274**, 691

Novel form of T-cell stimulation of immunoglobulin secretion (Kern M. and Gollapudi S. V. S.) **276**, 178

Suppressor T cells in experimental autoimmune haemolytic anaemia (Cooke A., Hutchings P. R. and Playfair J. H. L.) **273**, 154

Suppressor T-cell-memory (Loblay R. H., Pritchard-Briscoe H. and Basten A.) **272**, 620

T and B cell hybridomas, *news and views*, (Simpson E.) **272**, 751

T-cell lines producing antigen-specific suppressor factor (Kontiainen S., Simpson E., Bohrer E., Beverley P. C. L., Herzenberg L. A., Fitzpatrick W. C., Vogt P., Torano A., McKenzie I. F. C. and Feldmann M.) **274**, 477

Transfer of specific cytotoxic T lymphocytes protects mice inoculated with influenza virus (Yap K. L., Ada G. L. and McKenzie I. F. C.) **273**, 238

T cell hybrids: shortcut or dead end? *news and views*, (Melchers F.) **271**, 9

T cell response: nature or nurture, *news and views*, (Matzinger P.) **274**, 840

T cell: Antigen-specific. Induction of antigen-specific human suppressor T lymphocytes *in vitro* (UytdeHaag F., Heynen C. J. and Ballieux R. E.) **271**, 556

T cell marker. Specific insulin binding site on T and B lymphocytes as a marker of cell activation (Helderman J. H. and Strom T. B.) **274**, 62

T cell suppression. Suppression of human T-cell colony formation during pregnancy (Stahn R., Fabricius H.-&. and Hartleitner W.) **276**, 831

T complex. Deletion mapping of the *t* complex of chromosome 17 of the mouse (Erickson R. P., Lewis S. E. and Slusser K. S.) **274**, 163

T lymphocyte. Adjuvant-induced thymus-derived suppressor cells of cell-mediated tumour immunity (Glaser M.) **275**, 654

T cell origin of human macromolecular insoluble cold globulin (Hauptman S. P. and Kansu E.) **276**, 393

Taenite. Structure of taenite in two iron meteorites (Albertsen J. F., Jensen G. B. and Knudsen J. M.) **273**, 453

Taj Mahal. The fate of the Taj Mahal, *correspondence*, (Vidyasagar T. R.) **276**, 208

Can India afford to save the Taj Mahal from corrosion, *correspondence*, (Agarwal M. K.) **276**, 10

Taj Mahal out of danger? *news*, **275**, 4

Talitrus. Magnetic field detection is distinct from light detection in the invertebrates *Tenebrio* and *Talitrus* (Arendse M. C.) **274**, 358

Tasmania. The Tasmanians: the longest isolation, the simplest technology, *news and views*, (Diamond J. M.) **273**, 185

Taste receptor. Antibodies to thaumatin as a model of the sweet taste receptor (Hough C. A. M. and Edwardson J. A.) **271** 381

Tau. The tau heavy lepton—a recently discovered elementary particle, *review article*, (Perl M. L.) **275**, 273

Taxonomy. Cladistic revolution—can it make the grade? *news and views*, (Halstead L. B.) **276**, 759

Identification of economically important parasites, *review article*, (Godfrey D. G.) **273**, 600

Taxonomy: Microbial. Dictionary of Microbial Taxonomy (The late Cowan S. T.) *book review by* Smith J. E. **276**, 741

Taylor diffusion. Isotope separation by Taylor diffusion (Paiva M.) **271**, 434

Tay-Sachs disease. Altered α subunits in Tay-Sachs disease (Srivastava S. K. and Ansari N. H.) **273**, 245

T-cell. T–T cell collaboration in rejection of a syngeneic SV40-induced sarcoma in mice (Glaser M. and Law L. W.) **273**, 385

Technology. Benefit-cost analysis and the linear hypothesis, *news*, (Weinberg A. M.) **271**, 596

Beware of imported technology, says Indian group, *news*, (Calvert P.) **274**, 527

The Shorter Science and Civilization in China (Ronan C. A.) *book review by* Sivin N. **276**, 423

Third World needs 'barefoot' science, *news*, (Moravcsik M. and Exell R. H. B.) **276**, 315

Technology and Social Shock (Lawless E. W.) *book review by* Ashby E. **274**, 295

Tectosphere. Composition and development of the continental tectosphere (Jordan T. H.) **274**, 544

Telescope. Telescopes of the future, *news and views*, (Kibblewhite E. and Whelan J.) **271**, 307

Tenebrio. Magnetic field detection is distinct from light detection in the invertebrates *Tenebrio* and *Talitrus* (Arendse M. C.) **274**, 358

Terato carcinoma. The man-made mouse, *news and views*, (Heath J. K.) **271**, 610

Teratocarcinoma. Appearance of fibronectin during differentiation of mouse teratocarcinoma *in vitro* (Wartiovaara I., Leivo I., Virtanen I., Vaheri A. and Graham C. F.) **272**, 35.

X-chromosome inactivation during differentiation of female teratocarcinoma stem cells *in vitro*, (Martin G. R., Epstein C. J., Travis B., Tucker G., Yatziv S., Martin D. W. Jr, Clift S. and Cohen S.) **271**, 329

Teratogen. Human foetal palatal corticoid receptors and teratogens for cleft palate (Goldman A. S., Shapiro B. H. and Katsumata M.) **272**, 464

Normal and experimental variations in proportions of skeleton of chick embryo wing (Summerbell D.) **274**, 472

Teratology. Handbook of Teratology (Wilson J. G. and *editor*) *book review by* Laurence K. M. **273**, 325

Terminology. Arborescent animals and other colonoids, *correspondence*, (Van Valen L.) **276**, 318

Termite. A winged élite in a subcortical beetle as a model for a prototermite (Taylor V. A.) **276**, 73

Production Ecology of Ants and Termites (Brian M. V. *editor*) *book review by* Cherrett J. M. **273**, 80

Terpyridine platinum compound. Molecular structure of a double helical DNA fragment intercalator complex between deoxy CpG and a terpyridine platinum compound (Wang A. H. J., Nathans J., van der Marel G., van Boom J. H. and Rich A.) **276**, 471

Tertiary temperature. Oxygen isotope palaeotemperatures from the Tertiary period in the North Sea area (Buchardt B.) **275**, 121

Test ban. Monitoring Underground Nuclear Explosions (Dahlman O. and) *book review by* Julian B. R. **273**, 578

Twenty years of test ban talk, *leading article*, **272**, 481

Testicular feminisation. Microscopic epididymides in testicular feminisation (Blecher S. R.) **275**, 748

Testis. Extratubular migration of gonocytes in the foetal rabbit testis (Gould R. P. and Haddad F.) **273**, 464

Testosterone. Oestrogen content of the embryonic rabbit ovary (George F. W., Milewich L. and Wilson J. D.) **274**, 172

Tetanus. Association between an *HLA* haplotype and low responsiveness to tetanus toxoid in man (Sasazuki T., Kohno Y., Iwamoto I., Tanimura M. and Naito S.) **272**, 359

Tetraalkyllead. Natural source of tetraalkyllead in air (Harrison R. M. and Laxen D. P. H.) **275**, 738

Tetracycline resistance. Plasmid-determined tetracycline resistance involves new transport systems for tetracycline (Levy S. B. and McMurry L.) **276**, 90

Tetraethylammonium. Effect of tetraethylammonium on noradrenaline release from cat spleen treated with tetrodotoxin (Kirpekar S. M. and Prat J. C.) **276**, 623

Tetrahydropapaveroline. Tetrahydropapaveroline induces small granular vesicles in brain dopamine fibres (Koda L. Y., Koob G. F., Shier W. T. and Bloom F. E.) **276**, 281

Tetrahymena. Demonstration of a cell-free factor involved in cell interactions during mating in *Tetrahymena* (Adair W. S., Barker R., Turner R. S. Jr and Wolfe J.) **274**, 54

Tetrodotoxin. Effect of tetraethylammonium on noradrenaline release from cat spleen treated with tetrodotoxin (Kirpekar S. M. and Prat J. C.) **276**, 623

Thackeray A. D. *obituary* (Thackeray A. D.) **274**, 100

Thalassaemia. Distribution of sialic acid on the red blood cell membrane in β thalassaemia (Kahane I., Polliack A., Rachmilewitz E. A., Bayer E. A. and Skutelsky E.) **271**, 674

Thalassemia. Of mice and men, *news and views*, (Tolstoshev P.) **276**, 13

Sicily: the world's reservoir of thalassemias and haemoglobinopathies, *news and views*, (Schiliro G.) **276**, 761

Thaumatin. Antibodies to thaumatin as a model of the sweet taste receptor (Hough C. A. M. and Edwardson J. A.) **271** 381

The Netherlands. Dutch delay decision on nuclear expansion . . . *news*, **274**, 735

Thera. Has Atlantis disappeared again? (Tarling D. H.) **275**, 271

Thera eruption. Soils on Santorini at 1500BC (Davidson D. A.) **272**, 243

Thermal acclimation. Thermal acclimation in temperate lizards (Patterson J. W. and Davies P. M. C.) **275**, 646

Thermal convection. Halokinesis and thermal convection (Talbot C. J.) **273**, 739

Thermal effluent. Effects of thermal effluent on body condition of largemouth bass (Gibbons J. W., Bennett D. H., Esch G. W. and Hazen T. C.) **274**, 470

Thermal interaction. Fragmentation requirements for detonating thermal explosions (Patel P. D. and Theofanous T. G.) **274**, 142

Thermodynamics. The Concepts and Logic of Classical Thermodynamics as a Theory of Heat Engines (Truesdell C. and) *book review by* Landsberg P. T. **274**, 929

Thermoluminescence. Thermoluminescence and terrestrial age of the Estacado meteorite (McKeever S. W. S. and Sears D. W.) **275**, 629

Thermoregulation. Spontaneous firing of hypothalamic neurones over a narrow temperature interval (Mason P., Hasan H. and Valis M.) **273**, 242

Thermoregulation and the maternal behaviour of the rat (Croskerry P. G., Smith G. K. and Leon M.) **273**, 299

Thermosphere. Atomic oxygen emission at 63 μm as a cooling mechanism in the thermosphere and ionosphere (Grossman K. U. and Offermann D.) **276**, 594

Thick filament. Thick-filament-linked calcium regulation in vertebrate striated muscle (Lehman W.) **274**, 80

Thin film. Thin films: Interdiffusion and Reactions (Poate J. M., *editor*) *book review by* Holland L. **276**, 305

Thin films. Thin films: present and future, *news and views*, (Hill R. M.) **275**, 9

Thiol residue. Electron microscopic location of protein thiol residues (Stewart M. and Diakiw V.) **274**, 184

Thiostrepton. Mechanism of resistance to thiostrepton in the producing-organism *Streptomyces azureus* (Cundliffe E.) **272**, 792

Third world. All research is collaborative, *correspondence*, (Penzer G. R.) **273**, 184

Allegations against Indian research unit refuted, *correspondence*, (Borstel R. C. and Curtis C. F.) **273**, 96

Collaboration with the first world can be fruitful, *news*, (Haskell Dr P. T.) **273**, 480

Developing countries need appropriate science policy, *correspondence*, (Mungai J. M.) **273**, 486

Developing countries to boost joint research, *news*, **275**, 169

Development, Reform, and Malnutrition in Chile (Hakim P. and) *book review by* Miller D. S. **276**, 542

First things first in the Third World, *leading article*, **275**, 167

Linking science to technology: harder than it seems for Third World, *leading article*, **275**, 467

Science and technology for development: no escaping the politico-economic context, *news*, (Singh Narendra) **272**, 112

Separate development for science, *news*, (Sardar Z.) **273**, 176

Western attitude in jeopard, *correspondence*, (Hay A.) **273**, 704

Third world. A third world energy view, *correspondence*, (Melamed M. D.) **271**, 7

Carter backs Third World technology, *news*, **273**, 181

Research in third world countries: Pugwash plans controls, *news*, **272**, 8

Third World needs 'barefoot' science, *news*, (Moravcsik M. and Exell R. H. B.) **276**, 315

Thromboxane. 9, 11-Epoxyiminoprosta-5, 13-dienoic acid is a thromboxane A_2 antagonist in human platelets (Fitzpatrick F. A., Bundy G. L., Gorman R. R. and Honohan T.) **275**,

Pharmacological control of prostaglandin and thromboxane release from macrophages (Brune K., Glatt M., Kälin H. and Peskar B. A.) **274**, 261

Thrown string. The problem of the thrown string (Bass L. and Bracken A. J.) **275**, 205

Thy-1. Recognition and genetic control of helper determinants for cell surface antigen Thy-1 (Lake P. and Douglas T. C.) **275**, 220

Thymic epithelium. Phagocytic thymus epithelial reticular cells (Peled A. and Haran-Ghera N.) **274**, 266

Thymidine. Bromodeoxyuridine mutagenesis in mammalian cells is stimulated by thymidine and suppressed by deoxycytidine (Davidson R. L. and Kaufman E. R.) **276**, 722

Mutagenesis of Chinese hamster cells is facilitated by thymidine and deoxycytidine (Peterson A. R., Landolph J. R., Peterson H. and Heidelberger C.) **276**, 508

Mutagenicity of thymidine to cultured Chinese hamster cells (Bradley M. O. and Sharkey N. S.) **274**, 607

Thymus. Cytotoxic T cells learn specificity for self H-2 during differentiation in the thymus (Zinkernagel R. M., Callahan G. N., Klein J. and Dennert G.) **271**, 251

Is serum thymic factor of thymic origin? (Kelemen N., Lasmoles F. and Milhaud G.) **272**, 65

Is there a circulating human thymic factor that induces cyclic AMP synthesis? (Sunshine G. H., Coffey R. G. and Hadden J. W.) **271**, 665

Is there a circulating human thymic factor that induces cyclic AMP synthesis?—Reply (Astaldi A., Astaldi G. C. B., Schellekens P. Th. A. and Eijsvoogel V. P.) **271**, 666

Is thymus-derived lymphocyte inhibitor a polyamine? (Rijke E. O. and Ballieux R. E.) **274**, 804

Transplantation tolerance induced in foetal mouse thymus *in vitro*, (Robinson J. H. and Owen J. J. T.) **271**, 758

H-2 restriction, the thymus and the immune response, *news and views*, (Howard J. C.) **272**, 11

Lyt markers on thymus cell migrants (Scollay R., Kochen M., Butcher E. and Weissman I.) **276**, 79

Thyroglobulin. Evidence for a 'mammalian' thyroglobulin in endostyle of the ascidian *Styela clava* (Thorndyke M.) **271**, 61

Thyroid hormone. Potentiation of human erythropoiesis *in vitro* by thyroid hormone (Dainiak N., Hoffman R., Maffei L. A.

and Forget B. G.) **272,** 260

Thyrotrapin receptor. Evidence that the TSH receptor acts as a mitogenic antigen in Graves' disease (Mäkinen T., Wägar G., Apter L., Willebrand E. von and Pekonen F.) **275,** 314

Thyrotropin. Hormonal influences on ocular refraction in the rat (Kok-van Alphen C. C. and Noach E. L.) **271,** 62

Tick. Attraction of the tick *Ixodes neitzi* to twigs marked by the klipspringer antelope (Rechav Y., Norval R. A. I., Tannock J. and Colborne J.) **275,** 310

Virus-like particles pathogenic to salivary glands of the tick *Boophilus microplus* (Megaw M. W. J.) **271,** 483

Tidal energy. Dissipation of tidal energy by Antarctic ice shelves (Doake C. S. M.) **275,** 304

Tiltmeter. A new geophysical tiltmeter (Horsfall J. A. C. and King G. C. P.) **274,** 675

Timbre. Improving the timbre and responsiveness of a bass trombone (Pratt, R. L., Bowsher J. M. and Smith R. A.) **271,** 146

Time. Time and Man (Elton L. R. B. and) *book review by* Whitrow G. J. **274,** 403

Tissue. Stable carbon isotopes in human tissues (Lyon T. D. B. and Baxter M. S.) **273,** 750

Tissue Interactions and Development (Wessells N. K., *editor*) *book review by* Downie J. R. **272,** 97

Toad. Deep croaks and fighting assessment in toads *Bufo bufo* (Davies N. B. and Halliday T. R.) **274,** 683

Toba. K–Ar age of the late Pleistocene eruption of Toba, north Sumatra (Ninkovich D., Shackleton N. J., Abdel-Monem A. A. Obradovich J.D. and Izett G.) **276,** 574

Tokamak. High-β tokamaks? *news and views,* (Wesson J.) **272,** 17

Measurement of magnetic fields in a tokamak using laser light scattering (Forrest M. J., Carolan P. G. and Peacock N. J.) **271,** 718

Tolerance. Evolution of sulphur dioxide tolerance in perennial ryegrass (Horsman D. C., Roberts T. M. and Bradshaw A. D.) **276,** 493

Tonicity. The relationship between tonicity and flagellar length (Solter K. M. and Gibor A.) **275,** 651

Tooth size. Canine tooth size in female primates (Harvey P. H., Kavanagh M. and Clutton-Brook T. H.) **276,** 818

Topography. Topography of random surfaces,—Reply *matters arising,* (Sayles R. S. and Thomas T. R.) **273,** 573

Surface topography as a nonstationary random process (Sayles R. S. and Thomas T. R.) **271,** 431

Topography of random surfaces, *matters arising,* (Berry M. V. and Hannay J. H.) **273,** 573

Torre Garcia. Io-U dating of the Ouljian stage from Torre Garcia (southern Spain) (Bernat M., Bousquet J.-C. and Dars R.) **275,** 302

Torture. Medical profession to investigate torture, *news and views,* **272,** 394

Torun University. Torun: local conditions provide new possibilities for research, *news,* **273,** 263

Toxicity test. Royal Society slams routine toxicity tests, *news,* **274,** 413

Toxin. Specificity and Action of Animal, Bacterial and Plant Toxins (Cuatrecasas P. *editor*) *book review by* Rogers H. J. **274,** 830

Transcription. A ρ-dependent termination site in the gene coding for tyrosine tRNA su3 of *Escherichia coli* (Küpper H., Sekiya T., Rosenberg M., Egan J. and Landy A.) **272,** 423

A mutation affecting the σ subunit of RNA polymerase changes transcriptional specificity (Travers A. A., Buckland R., Goman M., Le Grice S. S. G. and Scaife J. G.) **273,** 354

Chromatin transcription probe, *news and views,* (Gilmour R. S.) **271,** 710

DNA structure and transcription (Travers A.) **275,** 89

DRBinduced premature termination of late adenovirus transcription, Virus: Adenovirus (Fraser N. W., Sehgal P. B. and Darnell J. E.) **272,** 590

Identification of a single promoter in *E. coli* for *rplJ, rplL* and *rpoBC* (Linn T. and Scaife J.) **276,** 33

Possible transcriptional control of three polypeptides which accumulate in a temperature-sensitive mammalian cell line (Melero J. A. and Smith A. E.) **272,** 725

RNase H hydrolysis of the 5′ terminus of the avian sarcoma virus genome during reverse transcription (Collett M. S., Dierks P., Parsons J. T. and Faras A. J.) **272,** 181

Splicing of SV40 late mRNA is a post-transcriptional process (Horowitz M., Laub O., Bratosin S. and Aloni Y.) **275,** 558

Split gene transcription, *news and views,* (Williamson B.) **272,** 753

The relationship between function and DNA sequence in an intercistronic regulatory region in phage λ (Rosenberg M., Court D., Shimatake H. and Wulff D. L.) **272,** 414

Mammary tumour virus and casein gene transcription during mouse mammary development (Pauley R. J., Rosen J. M. and Socher S. H.) **275,** 455

Mechanism of transcription termination, *news and views,* (Travers A.) **272,** 398

Promoter specific inhibition of transcription by antibiotics which act on DNA gyrase (Smith C. L., Kubo M. and Imamoto F.) **275,** 420

Transcription of cloned *Xenopus* ribosomal genes visualised after injection into oocyte nuclei (Trendelenburg M. F. and Gurdon J. B.) **276,** 292

Transformation. A new tumour-derived transforming strain of Epstein-Barr virus (Pizzo P. A., Magrath I. T., Chattopadhyay S. K., Bigga R. J. and Gerber P.) **272,** 629

A vitamin A analogue inhibits radiation-induced oncogenic transformation (Harisiadis L., Miller R. C., Hall E. J. and Borek C.) **274,** 486

An inducible gene involved in commitment of lymphocytes to transform (Milner J.) **275,** 660

Is protein synthesis necessary for the commitment of lymphocyte transformation? (Milner J.) **272,** 628

Isolation method affects transformed cell line karyotype (Clark J. M. and Pateman J. A.) **272,** 262

Mycoplasma capping on lymphocyte (Stanbridge E. J. and Weiss R. L.) **276,** 583

Possible reversion of malignancy *in vivo* (Revilla M. C., Ginzalez M. T., Balderas M. Z. and Romero G.) **272,** 454

Transformation-specific antigen induced by oncogenic human adenovirus (Ledinko N.) **274,** 812

Transformed cell lines susceptible or resistant to *in vivo* surveillance against tumorigenesis (Patek P. Q., Collins J. L., and Cohn M.) **276,** 510

X-ray dose fractionation and oncogenic transformations in cultured mouse embryo cells, *matters arising,* (Peto R.) **274,** 926

X-ray dose fractionation and oncogenic transformations in cultured mouse embryo cells—Reply, *matters arising,* (Hall E. J. and Miller R.) **274,** 926

A virus-induced non-virion antigen specific for transformation at the surface of RSV-transformed fibroblasts (Comoglio P. M., Prat M. and Bertini M.) **273,** 381

Cellular transformation and the 'morphologic phenotype' of transformed cells, *review article,* (Pastan I. and Willingham M.) **274,** 645

Cytochalasin B inhibits lymphocyte transformation through its effects on glucose transport (Hume D. A., Hansen K., Weidemann M. J. and Ferber E.) **272,** 359

Malignant transformation of a mouse epithelial cell line with polycyclic aromatic hydrocarbons (Mondal S. and Sala M.) **274,** 370

Neoplastic transformation of human diploid cells *in vitro* after chemical carcinogen treatment (Milo G. E. Jr and DiPaolo J. A.) **275,** 130

Protease inhibitors suppress radiation-induced malignant transformation *in vitro* (Kennedy A. R. and Little J. B.) **276,** 825

Retinoids block phenotypic cell transformation produced by sarcoma growth factor (Todaro G. J., De Larco J. E. and Sporn M. B.) **276,** 272

3T3 variants lacking receptors for epidermal growth factor are susceptible to transformation by Kirsten sarcoma virus (Pruss R. M., Herschman H. R. and Klement V.) **274,** 272

Transformation of plasmid DNA into *Streptomyces* at high frequency (Bibb M. J., Ward J. M. and Hopwood D. A.) **274,** 398

Transformation of yeast by a replicating hybrid plasmid (Beggs J. D.) **275,** 104

Transformation: Neoplastic. Neoplastic transformation induced by a direct perturbation of DNA (Barrett J. C., Tsutsui T. and Ts'o P. O. P.) **274,** 229

Transformed cell. Butyric acid suppression in the *in vitro* neoplastic state of Syrian hamster cells (Leavitt J., Barrett J. C., Crawford B. D. and Ts'o P. O. P.) **271,** 262

Transition. Transitional field configurations and geomagnetic reversal (Hoffman K. A. and Fuller M.) **273,** 715

Translation. *In vitro* mutations in the initiation codon, *news and views,* (Hamlyn P.) **272,** 397

Transmembrane channel. Characterisation of a synthetic, voltage-dependent, cation-selective transmembrane channel (Urry D. W., Bradley R. J. and Ohnishi T.) **274,** 382

Transmission. Monolayer coupling in sphingomyelin bilayer systems (Schmidt C. F., Barenholz Y., Huang C. and Thompson T. E.) **271,** 775

Transmitter release. Is the quantum of transmitter release composed of subunits? (Miller D. C., Weinstock M. M. and Magleby K. L.) **274,** 388

Transplantation. Intact cerebral ventricle as a site for tissue transplantation (Rosenstein J. M. and Brightman M. W.) **276,** 83

Specific suppression of antigen-reactive cells in neonatal transplantation tolerance (Holáň V., Chutná J. and Hašek M.) **274,** 895

Transplantation antigens *per se* are poor immunogens within a species (Batchelor J. R., Welsh K. I. and Burgos H.) **273,** 54

Transplantation: Renal. High incidence of virus isolation from donor and recipient tissues associated with renal transplantation (Orsi E. V., Howard J. L., Baturay N., Ende N., Ribot S. and Eslami H.) **272,** 372

Transplantation tolerance. Transplantation tolerance induced in foetal mouse thymus *in vitro,* (Robinson J. H. and Owen J. J. T.) **271,** 758

Transport. Effect of abscisic acid on solute transport in epidermal tissue (Itai C. and Meidner H.) **271,** 653

Forecasting future transport, *news,* (Gershuny J. I.) **271,** 292

Inhibition of active chloride transport by piretanide (Zeuthen T., Ramos M. and Ellory J. C.) **273,** 678

Ouabain like activity in toad skin and its implications for endogenous regulation of ion transport (Flier J. S.) **274,** 285

Photosensitised electron transport across phospholid vesicle walls (Ford W. E., Otvos J. W. and Calvin M.) **274,** 507

A microtubule-independent component may be involved in granule transport in pigment cells (Schliwa M. and Euteneuer U.) **273,** 556

Membrane Transport in Red cells (Ellory J. C. and *editor*) *book review by* Lieb W. R. **273,** 254

Plasmid-determined tetracycline resistance involves new transport systems for tetracycline (Levy S. B. and McMurry L.) **276,** 90

Transport: Ion. Transient kinetics of sarcoplasmic reticulum Ca^{2+}+Mg^{2+} ATPase studied by fluorescence (Dupont Y. and Leigh J. B.) **273,** 396

Transport of Ions and Water in Animals (Gupta G. L., *editor*) *book review by* Coxon R. V. **274,** 725

Transport: Membrane. Membrane Transport Processes (Hoffman J. F., *editor*) *book review by* Baker P. F. **274,** 829

Transport protein. Transbilayer disposition of the phospholipid annulus surrounding a calcium transport protein (Bennett J. P., McGill K. A. and Warren G. B.) **274,** 823

Transport: Water. Transport of Ions and Water in Animals (Gupta G. L., *editor*) *book review by* Coxon R. V. **274,** 725

Transposon. High-frequency transfer of nodulating ability between strains and species of *Rhizobium* (Johnston A. W. B., Beynon J. L., Buchanan-Wollaston A. V., Setchell S. M., Hirsch P. R. and Beringer J. E.) **276,** 634

New transposons, *news and views,* (Saunders J. R.) **274,** 211

Nucleotide sequence at the insertion sites of a kanamycin transposon (Oka A., Nomura N., Sugimoto K., Sugisaki H. and Takanami M.) **276,** 845

Transfer of the drug-resistance transposon Tn5 to *Rhizobium* (Beringer J. E., Beynon J. L., Buchanan-Wollaston A. V. and Johnston A. W. B.) **276,** 633

Tree. ULF tree potentials and geomagnetic pulsations (Fraser-Smith A. C.) **271,** 641

Tree appreciation—guides and picture books Gibbs J. N. **276,** 641

Tree ring. Absolute radiocarbon dating by low-altitude European tree-ring calibration (Suess H. E.) **272,** 649

Chemical pretreatment and radial flow of ^{14}C in tree rings (Tans P. P., de Jong A. F. M. and Mook W. G.) **271,** 234

Climatic interpreation of $\delta^{18}O$ and δD in tree rings—Reply, *matters arising,* (Wilson A. T., Gray J., Thompson P., Libby L. M. and Pandolfi L. J.) **271,** 93

Climatic signals in British Isles tree-ring chronologies (Hughes M. K., Gray B., Pilcher J., Baillie M. and Leggett P.) **272,** 605

Tree-ring chronology, *news and views,* (Moore P. D.) **272,** 578

Tree-ring. Tree-ring evidence of past climatic variability (La Marche V. C. Jr) **276,** 334

Trichinella spiralis. Stage-specific antibody-dependent eosinophil-mediated destruction of *Trichinella spiralis* (Kazura J. W. and Grove D. I.) **274,** 588

Trichlorophenol. US producers fear ban on 2,4,5-trichlorophenol, *news,* **275,** 471

Triiodothyronine. Effect of L-triiodothyronine on (−)^{3}H-dihydroalprenolol binding and cyclic AMP response to (−)adrenaline in cultured heart cells (Tsai J. S. and Chen A.) **275,** 138

Trilobite. Cambrian trilobite diversity related to cratonic flooding (Burrett C. F. and Richardson R. G.) **272,** 717

Trinidad. Trinidad wants more autonomy for University fo the West Indies' campuses, *news,* (Morris P.) **273,** 4

Trinucleotide. Interferon, dsRNA and the pleiotypic effector, *news and views,* (Hunt T.) **273,** 97

Triple point. The controversial carbon solid-liquid-vapour triple point (Greenville Whittaker A.) **276,** 695

Triticale. Tolerance of *Triticale* wheat and rye to copper deficiency (Graham R. D.) **271,** 542

Tritonia diamedia. Central neuronal control of cilia in *Tritonia diamedia* (Audesirk G.) **272,** 541

Troodos. Constitution and significance of the Troodos sheeted complex (Desmet A., Lapierre H., Rocci G., Gagny Cl., Parrot J.-F. and Delaloye M.) **273,** 527

Trophic level. Energy flow and the number of trophic levels in ecological communities, *matters arising,* (DeAngelis D. L., Gardner R. H., Mankin J. B., Post W. M. and Carney J. H.) **273,** 406

On feeding on more than one trophic level (Pimm S. L. and Lawton J. H.) **275,** 542

Trophoblast. Marsupial trophoblast and mammalian evolution, *matters arising,* (Taylor J. M. and Padykula H. A.) **271,** 588

Tropical Diseases Research Fund. World Bank's new health commitment, *news,* (Collins P.) **271,** 603

Tropics. Rates of chemical denudation of silicate rocks in tropical catchments (Dunne T.) **274,** 244

Troponin I. Comparison of amino acid sequence of troponin I from different striated muscles (Wilkinson J. M. and Grand R. J. A.) **271,** 31

Troponin-C. Unfolding Troponin-C, *news and views,* (Seymour J.) **275,** 177

Troposphere. Continuous measurements of nitrous oxide in the troposphere (Pierotti D., Rasmussen R. A. and Chatfield R.) **274,** 574

Long-range transport of tropospheric ozone (Hov O., Hesstvedt E. and Isaksen I. S. A.) **273,** 341

The origin of ozone in the troposphere (Fishman J. and Crutzen P. J.) **274,** 855

Troposphere. Does the troposphere respond to day-to-day changes in solar magnetic field? (Williams R. G. and Gerety E. J.) **275,** 200

Trypanocide. Effective trypanocides, *correspondence,* (Cavill J. P.) **275,** 476

Trypanocides, *correspondence,* (Williamson J.) **276,** 10

Trypanosoma brucei. Antigenic heterogeneity of metacyclic forms of *Trypanosoma brucei* (Le Ray D., Barry J. D. and Vickerman K.) **273,** 300

Trypanosoma congolense. An extravascular site of development of *Trypanosoma congolense* (Luckins A. G. and Gray A. R.) **272,** 613

Characterisation of the surface coat of *Trypanosoma congolense* , (Rovis L., Barbet A. F. and Williams R. O.) **271,** 654

Trypanosoma cruzi. Isozymic heterogeneity of *Trypanosoma cruzi* in the first autochthonous patients with Chagas' disease in Amazonian Brazil (Miles M. A., Souza A., Povoa M., Shaw J. J., Lainson R. and Toye P. J.) **272,** 819

Trypanosome. Antigenic variation in trypanosomes, *review article,* (Vickerman K.) **273,** 613

Trypanosomiasis. Principles of the eradication or control of tsetse flies, *review article,* (Jordan A. M.) **273,** 607

Tryptophan residue. Proximity of two tryptophan residues in dihydrofolate reductase determined by ^{19}F NMR (Kimber B. J., Feeney J., Roberts G. C. K., Birdsall B., Griffiths D. V., Burgen A. S. V. and Sykes B. D.) **271,** 184

Tsetse fly. Larvicidal activity of diflubenzuron in tsetse fly (Trewern M. A.) **272,** 719

Tsinober, A. Refusnik challenges withholding on his degree, *news,* **272,** 6

T/t locus. Rescue of a lethal *T/t* locus genotype by chimaerism with normal embryos (Bennett D.) **272,** 539

Tuberculin. Coupling PPD to tumour cells enhances their antigenicity in BCG-primed mice (Lachmann P. J. and Sikora K.) **271,** 463

Tubulin. Rings, MAPs and microtubules, *news and views,* (Burns R.) **273,** 709

Tubulin microheterogeneity increases with rat brain maturation (Gozes I. and Littauer U. Z.) **276,** 411

Tumorigenesis. Transformed cell lines susceptible or resistant to *in vivo* surveillance against tumorigenesis (Patek P. Q., Collins J. L., and Cohn M.) **276,** 510

Tumorous head. *Tumorous head* is a maternal-effect homoeotic mutant of *Drosophila melanogaster* (Bournias-Vardiabasis N. and Bownes M.) **276,** 611

Tumour-. A new tumour-derived transforming strain of Epstein-Barr virus (Pizzo P. A., Magrath I. T., Chattopadhyay S. K., Bigga R. J. and Gerber P.) **272,** 629

Tumour. Cyclophosphamide delays 3-methylcholanthrene sarcoma induction in mice (Hellström I. and Hellström K. E.) **275,** 129

Ectopic hormone production by tumours, *news and views,* (Shields R.) **272,** 494

Epidermal Growth factors for tumours *news and views,* (Shields R.) **272,** 670

Tumour-specific phenylalanine tRNA contains two supernumerary methylated bases (Kuchino Y. and Borek E.) **271,** 126

Tumour antigen. Analysing tumour antigens, *news and views,* (Langman R.) **271,** 211

Tumour cell. A new erythroid cell line induced by Rauscher murine leukaemia virus (Both N. J. de, Vermey M., van't Hull E., Klootwijk-van Dijke E., van Griensver L. J. L. D., Mol J. N. M. and Stoof T. J.) **272,** 626

Activated macrophages kill tumour cells by releasing arginase (Currie G. A.) **273,** 758

Ascorbate enhanced cytotoxicity of misonidazole (Josephy P.

D., Palcic B. and Skarsgard L. D.) **271,** 370
Cell surface market for malignancy, *news and views,* (Yamada M.) **273,** 335
Coupling PPD to tumour cells enhances their antigenicity in BCG-primed mice (Lachmann P. J. and Sikora K.) **271,** 463
Gradients in tumour growth (Auerbach R., Morrissey L. W. and Sidky Y. A.) **274,** 697
H-2 Antigens on a murine lymphoma are associated with additional proteins (Callahan G. N. and Allison J. P.) **271,** 165
H-2 restriction and non-restriction of T-cell-mediated cytotoxicity against mouse mammary tumour targets (Stutman O. and Shen F.-W.) **276,** 181
Increased CTP synthetase activity in cancer cells (Williams J. C., Kizaki H., Weber G. and Morris H. P.) **271,** 71
Possible reversion of malignancy *in vivo* (Revilla M. C., Ginzalez M. T., Balderas M. Z. and Romero G.) **272,** 454
Selection and altered properties of brain-colonising metastatic melanoma (Brunson K. W., Beattie G. and Nicolson G. L.) **272,** 543
Transfer of the marker for morphologically transformed phenotype by isolated metaphase chromosomes in hamster cells (Spandios D. A. and Siminovitch L.) **271,** 259
X-ray dose fractionation and oncogenic transformationss in cultured mouse embryo cells (Miller R. and Hall E. J.) **272,** 58

Tumour cell. Actin-related gelation of Ehrlich tumour cell extracts is reversibly inhibited by low concentrations of Ca^{2+} (Mimura N. and Asano A.) **272,** 273
Differences in fluidity between bilayer halves of tumour cell plasma membranes (Schroeder F.) **276,** 528

Tumour immunology. Vulnerability of methylcholanthrein induced tumours to immunity aroused by syngeneic foetal cells (Medawar P. B. and Hunt R.) **271,** 164

Tumour induction. Effect of agrocin 84 on attachment of *Agrobacterium tumefaciens* to cultured tobacco cells (Smith V. A. and Hindley J.) **276,** 498
Tumour induction with DNA of oncogenic primate herpesviruses (Fleckenstein B., Daniel M. D., Hunt R. D., Werner J., Falk L. A. and Mulder C.) **274,** 57

Tumour: Plant. Highly conserved DNA of Ti plasmids overlaps T-DNA maintained in plant tumours (Chilton M.-D., Drummond M. H., Merlo D. J. and Sciaky D.) **275,** 147
Homologous DNA sequences in different Ti-plasmids are essential for oncogenicity (Depicker A., Van Montagu M. and Schell J.) **275,** 150

Tumour promoter. Retinoids as well as tumour promoters enhance deacylation of cellular lipids and prostaglandin production in MDCK cells (Levine L. and Ohuchi K.) **276,** 274
Persisting oncogenic herpesvirus induced by the tumour promoter TPA (zur Hausen H., O'Neill F. J., Freese U. K. and Hecker E.) **272,** 373
Stimulation of DNA synthesis by tumour promoter and pure mitogenic factors (Dicker P. and Rozengurt E.) **276,** 723

Tumour promoters. Opposing effects of tumour promoters on erythroid differentiation (Miao R. M., Fieldsteel A. H. and Fodge D. W.) **274,** 271

Tunguska. The 70-year-old mystery of Siberia's big bang, *news,* **274,** 207
Tungus expert discovers biofields, *news* **274,** 305

Tupaia. Activation of an endogenous retrovirus from *Tupaia* (tree shrew) (Flügel R. M., Zentgraf H., Munk K. and Darai G.) **271,** 543

Turbulence. Drag-reducing polymers and turbulent bursts (McComb W. D. and Rabie L. H.) **273,** 653

Twinning. Induction of monozygotic twinning in the mouse (Kaufman M. H. and O'Shea K. S.) **276,** 707

Typhoens typhoens. A horned beetle which fights (Palmer T. J.) **274,** 583

Tyrosine. Laser photo-CIDNP as a surface probe for proteins in solution (Kaptein R., Dijkstra K. and Nicolay K.) **274,** 293

Ubiquitin. Free ubiquitin is a non-histone protein of trout testis chromatin (Watson D. C., Levy B. W., and Dixon G. H.) **276,** 196

UK science. Britain's big science on the baseline, *news,* **271,** 498

UK science budget. UK science budget announced for 1978/9, *news,* **271,** 298

Ulmaceae. Nitrogen-fixing root nodules in Ulmaceae (Akkermans A. D. L., Abdulkadir S. and Trinick M. J.) **274,** 190

Ultradian rhythm. Experimental acceleration and slowing of REM sleep ultradian rhythm by cholinergic agonist and antagonist (Sitaram N., Moore A. M. and Gillin J. C.) **274,** 490
Ultradian rhythm of plasma noradrenaline in rhesus monkeys (Levin B. E., Goldstein A. and Natelson B. H.) **272,** 164

Ultraviolet light. Does ultraviolet light enhance postreplication repair in mammalian cells? (Painter R. B.) **275,** 243

Ultraviolet light detection. Ultraviolet light detection by the homing pigeon (Kreithen M. L. and Eisner T.) **272,** 347

Ultraviolet radiation. Ultraviolet radiation risk ignored: *news,* **276,** 9

Uman rights. Human rights in China, *leading article,* **276,** 655

UNCSTD. Commonwealth Science Council coordinates approach to UNCSTD, *news,* (Hay A.) **273,** 697
Putting science in its place, *news,* **274,** 204

Uniparental inheritance. Uniparental inheritance is promoted by delayed division of the zygote in *Chlamydomonas* (Van Winkle-Swift K. P.) **275,** 749

United National Environment Programme. UNEP scheme to bring power to Pakistan's villages, *news,* **272** 571

United Nations. Cinderella in the UN, *leading article,* **271,** 195
Developing countries to boost joint research, *news,* **275,** 169
Disarmament's month in New York, *leading article,* **273,** 175
Few surprises in UNCSTD draft plan of action, *news,* **276,** 201
Hazard export: a case for international concern, *leading article,* **273,** 415
Law of the Sea: five years of negotiations, *leading article,* **274,** 521
Lund looks at UNCSTD: *news,* **276,** 112
Science at the UN: coordination or chaos? *news,* (Collins P.) **275,** 84
Scientists prepare for UNCSTD, *news,* (Collins P.) **272,** 748
Sweden's view of development science, *news,* (Barnaby W.) **273,** 328
UNCSTD: a ray of hope despite delay in planning, *news,* (Collins P.) **274,** 631
UNCSTD: a survival exercise for the developed world? *leading article,* **273,** 327
UNCSTD prepares for action, *news,* (Collins P.) **272,** 113
UNCSTD—not just for bureaucrats, *leading article,* **271,** 1
US slashes funds to WHO and other UN agencies, *news,* **276,** 111

United States. A bad year for weather, a good one for climate, *news,* **273,** 88
Carter outlines future strategy for space science, *news,* **275,** 576
Counting the costs of US research, *news,* **272,** 572
Inflation–and Congress–kill growth in funds for basic science, *news,*

US widens the options on fusion research, *news,* **274,** 302

Universe. A consistent age for the Universe (Kazanas D., Schramm D. N. and Hainebach K.) **274,** 672
A larger and more turbulent Universe (Gudehus D. H.) **275,** 514
Baryon symmetric big bang cosmology, *review article,* (Stecker F. W.) **273,** 493
Concise cosmology (Robinson M.) *book review by* Silk J. **272,** 787
Electric Universe, *news and views,* (Davies P. C. W.) **273,** 268
Eternity is unstable (Barrow J. D. and Tipler F. J.) **276,** 453
Guide to the Universe Astronomy (Mitton S., *editor*) *book review by* Cruise A. M. **272,** 786
On falling through a black hole into another universe (Birrell N. D. and Davies P. C. W.) **272,** 35
Quasar luminosity, *news and views,* (Smith F. G.) **273,** 428
Quiescent cosmology (Barrow J. D.) **272,** 211
Rundown Universe? (Davies P.) *book review by* Rowan-Robinson M. **272,** 785
Accelerating Universe revisited (Tinsley B. M.) **273,** 208
Clumpy structure of the Universe and general field (Chincarini G.) **272,** 515

Universe: Early. Origin of pregalactic microwave background (Rees M. J.) **275,** 35

University. Greek universities, *correspondence,* (Mourkidas G. A.) **274,** 110
Little comfort for university teachers, *leading article,* **271,** 491

University application. Popular science **275,** 575

University: Harvard. Harvard scientists split on curriculum reform, *news,* **272,** 484

University research. Wiesner attacks increasing government regulation of US university research, *news,* **276,** 201

Upsilon particle physics. Upsi-desy, *news and views,* (Miller D. J.) **273,** 705

Upwelling. Guinea Current upwelling (Bakun A.) **271,** 147

Uracil. *In vivo* synthesis and properties of uracil-containing DNA (Warner H. R. and Duncan B. K.) **272,** 32
Incorporation of uracil into DNA, *news and views,* (O'Donovan G.) **272,** 582

Uranium. Conserving uranium, *correspondence,* (Ferguson A. T. G. and Blair I. M.) **271,** 300
Zr_3Al creeps in a petty pace, *news and views,* (Cahn R. W.) **275,** 176
Geologists warn of uranium shortage, *news,* **274,** 524

Uranium dating. Io-U dating of the Ouljian stage from Torre Garcia (southern Spain) (Bernat M., Bousquet J.-C. and Dars R.) **275,** 302
Uranium-series dating of insular phosphorite from Ebon atoll; Micronesia (Veeh H. H. and Burnett W. C.) **274,** 460

Uranus. Lifetime of an elliptical ring around Uranus, *matters arising,* (Farinella P., Paolicchi P., Milani A. and Nobili A. M.) **276,** 535
New surprises from Uranus, *news and views,* (Hunten D. M.) **276,** 16
On the origin of Uranus' rings (Ip W.-H.) **272,** 802
Resonance orbits and the rings of Uranus (Steigmann G. A.) **274,** 454
Atmospheres of Uranus and Neptune, *news and views,* (Hunt G. E.) **272,** 403
Uranus and the shape of elliptical rings (Lucke R. L.) **272,** 148

Urea complex. The crystal structure of a hydrated gramicidin S-urea complex (Hull S. E., Karlsson R., Main P., Woolfson M. M. and Dodson E. J.) **275,** 206

Uridine phosphorylation. Stimulation of uridine uptake in 3T3 cells is associated with increased ATP affinity of uridine-phosphorylating system (Goldenberg G. J. and Stein W. D.) **274,** 475

Urine-. Urine-induced reflex ovulation in anovulatory rats may be a vomeronasal effect (Johns M. A., Feder H. H., Komisaruk B. R. and Meyer A. D.) **272,** 446

US science budget. 1979 looks like a good year for US science, *news,* **271,** 294

US scientist. Less paper, more money for US scientists, *news,* **271,** 497

Vaccine. Effective subunit vaccines against an enveloped animal virus (Morein B., Helenius A., Simons K., Pettersson R., Kääriäinen L. and Schirrmacher V.) **276,** 715

Vaccine: Herpesvirus. Oncogenic potential of new viral vaccines, *news and views,* (Zuckerman A. J.) **272,** 579

Valence theory. Structures and Approximations for Electrons (Cook D. B.) *book review by* Richards G. **273,** 478

Value judgment. Discussing values and judgments, *correspondence,* (Forrester III R. C.) **276,** 208

Van de Graaff accelerator. Detection of ^{14}C using a small van de Graaff accelerator (Doucas G., Garman E. F., Hyder H. R. McK., Sinclair D., Hedges R. E. M. and White N. R.) **276,** 253

Vanadate. Vanadate-stimulated natriuresis (Balfour W. E., Grantham J. J. and Glynn I. M.) **275,** 768
Commercial ATP containing traces of vanadate alters the response of $(Na^+ + K^+)$ ATPase to external potassium (Beaugé L. A. and Glynn I. M.) **272,** 551
Positive inotropism of vanadate in cat papillary muscle (Hackbarth I., Schmitz W., Scholz H., Erdmann E., Krawietz W. and Philipp G.) **275,** 67
Vanadate inhibits the red cell (Na^+, K^+) ATPase from the cytoplasmic side (Cantley Jr L. C., Resh M. D. and Guidotti G.) **272,** 552

Vancomycin. Structure of vancomycin and its complex with acetyl-D-alanyl-D-alanine (Sheldrick G. M., Jones P. G. Kennard O., Williams D. H. and Smith G. A.) **271,** 223

Variant: 3T3. 3T3 variants lacking receptors for epidermal growth factor are susceptible to transformation by Kirsten sarcoma virus (Pruss R. M., Herschman H. R. and Klement V.) **274,** 272

Vasoactive intestinal polypeptide. Release of vasoactive intestinal polypeptide in mast cells by histamine liberators (Cutz E., Chan W., Track N. S., Goth A. and Said S. I.) **275,** 661

Vasopressin. Arginine vasopressin maintains ethanol tolerance (Hoffman P. L., Ritzmann R. F., Walter R. and Tabakoff B.) **276,** 614

Vector control. Principles of the eradication or control of tsetse flies, *review article,* (Jordan A. M.) **273,** 607

Vector wave. Young's double beam interference experiment with spinor and vector waves (Byrne J.) **275,** 188

Vegetation. Forest fires, *news and views,* (Moore P. D.) **272,** 754

Vela. Revised estimate of gravitational radiation from Crab and Vela pulsars (Zimmermann M.) **271,** 524

Venezuela. Venezuela: still out in the cold, *news,* **275,** 472

Venus. Britain's giant leap to Venus, *news,* **273,** 259
Exploration of Venus **276,** 661
Why send probes to Venus? *news,* (Hunter D.) **274,** 306

Venus. Does Venus have an intrinsic magnetic field? (Russell C. T.) **275,** 692
NASA plans a new Venus mission, *news,* **276,** 552

Venus'. Venus' rotation and atmospheric tides (Ingersoll A. P. and Dobrovolskis A. R.) **275,** 37

Verapamil. Increases in cyclic GMP levels may not mediate relaxant effects of sodium nitroprusside, verapamil and hydralazine in rat vas deferens (Diamond J. and Janis R. A.) **271,** 472

Vertebrate population. Analysis of Vertebrate populations (Caughley G., *editor*) *book review by* Southern H. N. **272,** 91

Vesicle. Photosensitised electron transport across phospholid vesicle walls (Ford W. E., Otvos J. W. and Calvin M.) **274,** 507

Victorian science. Science in Culture: The Early Victorian Period (Cannon S. F.) *book review by* Knight D. **276** 131

Vietnam. Science helps to rebuild Vietnam, *news,* (Hay A.) **271,** 101
Vietnam—an inexpensive form of help, *leading article,* **271,** 99
Vietnam's dioxin problem, *news,* (Hay A.) **271,** 597
Vietnam's scientists wait for books and equipment, *news,* (Hay A.) **276,** 203
Vietnam calls its scientists to arms, *news,* (Hay A.) **273,** 94
Vietnam extends scientific links, *news,* (Hay A.) **273,** 419
Vietnam still looking for foreign aid, *news,* (Hay A.) **275,** 6

Viking Lander. Chemical interpretation of Viking Lander 1 life detection experiment (Ballou E. V., Wood P. C., Wydeven T., Lehwalt M. E. and Mack R. E.) **271,** 644
Model of the fine-grain component of martian soil based on Viking lander data (Nussinov M. D., Chernyak Y. B. and Ettinger J. L.) **274,** 859

Viomycin. Resistance to viomycin conferred by RNA of either ribosomal subunit (Yamada T., Mizugichi Y., Nierhaus K. H. and Wittmann H. G.) **275,** 460

Viral development. Membrane leakiness after viral infection and a new approach to the development of antiviral agents (Carrasco L.) **272,** 694

Viral structure. Protein disk of tobacco mosaic virus at 2.8 Å resolution showing the interactions within and between subunits (Bloomer A. C., Champness J. N., Bricogne G., Staden R. and Klug A.) **276,** 362
Tomato bushy stunt virus at 2.9 A resolution (Harrison S. C., Olson A. J., Schutt C. E., Winkler F. K. and Bricogne G.) **276,** 368

Virgo galaxies. A larger and more turbulent Universe (Gudehus D. H.) **275,** 514

Viroid. Are viroids negative-strand viruses? *matters arising,* (Matthews R. E. F.) **276,** 850
Complete sequence and secondary structure of a viroid, *news and views,* (Hull R.) **273,** 187

(Viroid). Nucleotide sequence and secondary structure of potato spindle tuber viroid (Gross H. J., Domdey H., Lossow C., Jank P., Raba M., Alberty H. and Sänger H. L.) **273,** 203

Viroid: potato spinde tuber. Nucleotide sequence and secondary structure of potato spindle tuber viroid (Gross H. J., Domdey H., Lossow C., Jank P., Raba M., Alberty H. and Sänger H. L.) **273,** 203

Virus. Are viroids negative-strand viruses? *matters arising,* (Matthews R. E. F.) **276,** 850
Do viruses use calcium ions to shut off host cell functions?, *matters arising,* (Rubin H.) **271,** 186

Virus. UK investigates virus insecticides, *news,* (McClelland A. J. and Collins P.) **276,** 548

Virus: Adenovirus. Adenovirus up to date, *news and views,* **274,** 529
Role of DNA polymerase γ in adenovirus DNA replication (van der Vliet P. C. and Kwant M. M.) **276,** 532
Transformation-specific antigen induced by oncogenic human adenovirus (Ledinko N.) **274,** 812

Virus: Animal. Molecular Biology of Animal Viruses (Nayak D. P.) *book review by* Weiss R. **274,** 724

Virus: Avian erythroblastosis. Temperature-sensitive mutant of avian erythroblastosis virus suggests a block of differentiation as mechanism of leukaemogenesis (Graf T., Ade N. and Beug H.) **275,** 496

Virus: Avian leukosis. Nuclear conversion of microinjected avian leukosis virion RNA into an envelope-glycoprotein messenger (Stacey D. W. and Hanafusa H.) **273,** 779

Virus: Avian sarcoma. *In vitro* synthesis of a functional avian sarcoma virus transforming-gene product (Erikson E., Collett M. S. and Erikson R. L.) **274,** 919

Virus: Calicivirus. The structure and replication of calicivirus RNA (Black D. N., Burroughs J. N., Harris T. J. R. and Brown F.) **274,** 615

Virus: C-type. C-type viral antigen expression in human placenta (Sawyer M. H., Nachlas N. E. Jr and Panem S.) **275,** 62

Virus: Cytomegalovirus. Cytotoxic T lymphocyte response to murine cytomegalovirus infection (Quinnan G. V., Manischewitz J. E. and Ennis F. A.) **273,** 541
High incidence of virus isolation from donor and recipient tissues associated with renal transplantation (Orsi E. V., Howard J. L., Baturay N., Ende N., Ribot S. and Eslami H.) **272,** 372
Virus: Encephalomyocarditis. Evidence for a single locus controlling susceptibility to virus-induced diabetes mellitus (Onodera T., Yoon J.-W., Brown K. S. and Notkins A. L.) **274,** 693
Virus: Encephalomyocarditis. Initiation activity of EMC virus RNA, binding to initiation factor eIF-4B and shut-off of host cell protein synthesis (Baglioni C., Simili M. and Shafritz D. A.) **275,** 240
Virus: Epstein-Barr. A new tumour-derived transforming strain of Epstein-Barr virus (Pizzo P. A., Magrath I. T., Chattopadhyay S. K., Bigga R. J. and Gerber P.) **272,** 629
Virus: Epstein–Barr. Activation of latent Epstein–Barr virus by antibody to human IgM (Tovey M. G., Lenoir G. and Begon-Lours J.) **276,** 270
Virus: Epstein-Barr. Chloroquine enhances Epstein-Barr virus expression (Karmali R. A., Horrobin D. F., Menezes J., Patel P. and Musto J.) **275,** 444
Epidemiological evidence for causal relationship between Epstein-Barr virus and Burkitt's lymphoma for Ugandan prospective study (de-Thé G., Geser A., Day N. E., Tukei P. M., Williams E. H., Beri D. P., Smith P. G., Dean A. G., Bornkamm G. W., Feorino P. and Henle W.) **274,** 756
Epstein-Barr virus as the cause of a human cancer, *news and views*, (Epstein M. A.) **274,** 740
Virus: Feline leukaemia. Abrogation of lymphocyte blastogenesis by a feline leukaemia virus protein (Mathes L. E., Olsen R. G., Hebebrand L. C., Hoover E. A. and Schaller J. P.) **274,** 687
Seroepidemiologic assessment of feline leukaemia virus infection risk for man (Krakower J. M. and Aaronson S. A.) **273,** 463
Virus: Feline sarcoma. Characterisation of a tumour-specific antigen on the surface of feline lymphosarcoma cells (Snyder H. W. Jr., Hardy W. D. Jr., Zuckerman E. E. and Fleissner E.) **275,** 656
Virus: Friend leukaemia. Erythroid bursts produced by Friend leukaemia virus *in* (Hankins W. D., Kost T. A., Koury M. J. and Krantz S. B.) **276,** 506
Virus: Hepatitis. A new human hepatitis virus, *news and views*, (Zuckerman A. J.) **271,** 113
Virus: Hepatitis B. Inhibition of hepatitis B DNA polymerase by intercalating agents (Hirschman S. Z. and Garfinkel E.) **271,** 681
Virus: Herpes. High incidence of virus isolation from donor and recipient tissues associated with renal transplantation (Orsi E. V., Howard J. L., Baturay N., Ende N., Ribot S. and Eslami H.) **272,** 372
9-(2-Hydroxyethoxymethyl) guanine activity against viruses of the herpes group (Schaeffer H. J., Beauchamp L., Miranda P. de, Elion G. B., Bauer D. J. and Collins P.) **272,** 583
Persisting oncogenic herpesvirus induced by the tumour promoter TPA (zur Hausen H., O'Neill F. J., Freese U. K. and Hecker E.) **272,** 373
Virus: Herpes simplex. Enhanced survival of ultraviolet-irradiated herpes simplex virus in carcinogen-pretreated cells (Lytle C. D., Coppey J. and Taylor W. D.) **272,** 60
Virus: Herpes virus. Tumour induction with DNA of oncogenic primate herpesviruses (Fleckenstein B., Daniel M. D., Hunt R. D., Werner J., Falk L. A. and Mulder C.) **274,** 57
Virus: Influenza. Influenza A viruses of the H2N2 subtype are lymphocyte mitogens (Butchko G. M., Armstrong R. B., Martin W. J., and Ennis F. A.) **271,** 66
Transfer of specific cytotoxic T lymphocytes protects mice inoculated with influenza virus (Yap K. L., Ada G. L. and McKenzie I. F. C.) **273,** 238
Virus: Influenza A. Analysis of virion RNA segments and polypeptides of influenza A virus recombinants of defined virulence (Oxford J. S., McGeoch D. J., Schild G. C. and Beare A. S.) **273,** 778
Clones of cytotoxic lymphocytes can recognise uninfected cells in a primary response against influenza virus (Komatsu Y., Nawa Y., Bellemy A. R. and Marbrook J.) **274,** 802
Influenza A viruses: shaking out our shibboleths, *news and views*, (Ennis F. A.) **274,** 309
Recent human influenza A (H1N1) viruses are closely related genetically to strains isolated in 1950 (Nakajima K., Desselberger U. and Palese P.) **274,** 334
Virus: Kirsten sarcoma. 3T3 variants lacking receptors for epidermal growth factor are susceptible to transformation by Kirsten sarcoma virus (Pruss R. M., Herschman H. R. and Klement V.) **274,** 272
Virus: Mammary tumor. Mammary tumour virus and casein gene transcription during mouse mammary development (Pauley R. J., Rosen J. M. and Socher S. H.) **275,** 455
Virus: Measles. Absence of measles proviral DNA in systemic lupus erythematosus (Viola M. V., Gann K., Scott C. and Rothfield N.) **275,** 667
Differences between the intracellular polypeptides of measles and subacute sclerosing panencephalitis virus (Wechsler S. L. and Fields B. N.) **272,** 458
Membrane proteins of subacute sclerosing panencephalitis and measles viruses (Hall W. W., Kiessling W. and ter Meulen V.) **272,** 460
Virus: Monkeypox. The enigma of poxviruses, *news and views*, (Zuckerman A. and Rondle C.) **276,** 212
Virus: Mumps. Infection of human pancreatic beta cell cultures with mumps virus (Prince G. A., Jenson A. B., Billups L. C. and Notkins A. L.) **271,** 158
Virus: Murine leukaemia. Cytochalasin D induces the capping of both leukaemia viral proteins and actin in infected cells (Mousa G. Y., Trevithick J. R., Bechberger J. and Blair D. G.) **274,** 808
Mouse chromosome 5 codes for ecotropic murine leukaemia virus cell-surface receptor (Oie H. K., Gazdar A. F., Lalley P. A., Russell E. K., Minna J. D., DeLarco J., Todaro G. J. and Francke U.) **274,** 60
Virus: Oncovirus. *In vitro* synthesis and characterisation of full- and half-genome length complementary DNA from avian oncoviruses (Lai M. M. C. and Hu S. S. F.) **271,** 481
Virus: Papilloma. High incidence area of cattle cancer with a possible interaction between an environmental carcinogen and a papilloma virus, *review article*, (Jarrett W. F. H., McNeil P. E., Grimshaw W. T. R., Selman I. E. and McIntyre W. I. M.) **274,** 215
Virus: Papillomavirus. Viral sequences related to a human skin papillomavirus in genital warts (Orth G., Favre M., Jablonska S., Brylak K. and Croissant O.) **275,** 334
Virus: Picornavirus. 3'-Terminal nucleotide sequences in the genome RNA of picornaviruses (Porter A. G., Fellner P., Black D. N., Rowlands D. J., Harris T. J. R. and Brown F.) **276,** 298
Virus: Polyoma. Amino acid sequence homology between polyoma and SV40 tumour antigens deduced from nucleotide sequences (Friedmann T., Doolittle R. F. and Walter G.) **274,** 291
Sequence from the genome of a non-transforming mutant of polyoma virus (Soeda E. and Griffin B. E.) **276,** 294
Virus: Rauscher leukaemia. A new erythroid cell line induced by Rauscher murine leukaemia virus (Both N. J. de, Vermey M., van't Hull E., Klootwijk-van Dijke E., van Griensven L. J. L. D., Mol J. N. M. and Stoof T. J.) **272,** 626
Virus: Respiratory syncytial. Neutralisation of respiratory syncytial virus by cat serum (Pringle C. R. and Cross A.) **276,** 501
Virus: Retrovirus. A method for classification of 5′ termini of retroviruses (Haseltine W. A. and Kleid D. G.) **273,** 358
Virus: Rous sarcoma. A virus-induced non-virion antigen specific for transformation at the surface of RSV-transformed fibroblasts (Comoglio P. M., Prat M. and Bertini M.) **273,** 381
Virus: Sarcoma. RNase H hydrolysis of the 5′ terminus of the avian sarcoma virus genome during reverse transcription (Collett M. S., Dierks P., Parsons J. T. and Faras A. J.) **272,** 181
Virus: Semliki Forest. Effective subunit vaccines against an enveloped animal virus (Morein B., Helenius A., Simons K., Pettersson R., Kääriäinen L. and Schirrmacher V.) **276,** 715
Glycosylation is not necessary for membrane insertion and cleavage of Semliki Forest virus membrane proteins (Garoff H. and Schwarz R. T.) **274,** 487
Virus: Sendai. Active component of HVJ (Sendai virus) for interferon induction in mice (Ito Y., Nishiyama Y., Shimokata K., Takeyama H. and Kunii A.) **274,** 801
Fusion of Sendai virus with the target cell membrane is required for T cell cytotoxicity (Gething M.-J., Koszinowski U. and Waterfield M.) **274,** 689
Virus: Spleen focus-forming. Are spleen focus-forming virus sequences related to xenotropic viruses and expressed specifically in normal erythroid cells? (Pragnell I. B., McNab A., Harrison P. R. and Osterag W.) **272,** 456
Virus: Subacute sclerosing panencephalitis. Differences between the intracellular polypeptides of measles and subacute sclerosing panencephalitis virus (Wechsler S. L. and Fields B. N.) **272,** 458
Membrane proteins of subacute sclerosing panencephalitis and measles viruses (Hall W. W., Kiessling W. and ter Meulen V.) **272,** 460
Virus: SV40. Amino acid sequence homology between polyoma and SV40 tumour antigens deduced from nucleotide sequences (Friedmann T., Doolittle R. F. and Walter G.) **274,** 291
Complete nucleotide sequence of SV40 DNA (Fiers W., Contreras R., Haegeman G., Rogiers R., Voorde A. Van de, Heuverswyn H. Van., Heereweghe J. Van, Volckaertand G. and Ysebaer M.) **273,** 113
Evidence for 'splicing' of SV40 16S mRNA (Haegeman G. and Fiers W.) **273,** 70
Mapping of *H-2* genes associated with T cell-mediated cytotoxic responses to SV40-tumour-associated specific antigens (Pfizenmaier K., Trinchieri G., Solter D. and Knowles B. B.) **274,** 691
Parallel induction of sister chromatid exchanges and infectious virus from SV40-transformed cells by alkylating agents (Kaplan, J. C., Zamansky G. B., Black P. H. and Latt S. A.) **271,** 662
Simian virus 40 T antigen binds to host cell chromosomes (D'Alisa R. M. and Gershey E. L.) **274,** 164
Splicing of SV40 late mRNA is a post-transcriptional process (Horowitz M., Laub O., Bratosin S. and Aloni Y.) **275,** 558
T-T cell collaboration in rejection of a syngenic SV40-induced sarcoma in mice (Glaser M. and Law L. W.) **273,** 385
Virus: Tobacco mosaic. Leaky UAG termination codon in tobacco mosaic virus RNA (Pelham H. R. B.) **272,** 469
Protein disk of tobacco mosaic virus at 2.8 Å resolution showing the interactions within and between subunits (Bloomer A. C., Champness J. N., Bricogne G., Staden R. and Klug A.) **276,** 362
Unusual segmental flexibility in a region of tobacco mosaic virus coat protein (Jardetzky O., Akasaka K., Vogel D., Morris S. and Holmes K. C.) **273,** 564
Virus: Tomato bushy stunt. Tomato bushy stunt virus at 2.9 Å resolution (Harrison S. C., Olson A. J., Schutt C. E., Winkler F. K. and Bricogne G.) **276,** 368
Virus: Tumour. Cellular transformation and the 'morphologic phenotype' of transformed cells, *review article*, (Pastan I. and Willingham M.) **274,** 645
Isolation method affects transformed cell line karyotype (Clark J. M. and Pateman J. A.) **272,** 262
Virus: Turnip yellow mosaic. *In vivo* aminoacylation and 'processing' of turnip yellow mosaic virus RNA in *Xenopus laevis* oocytes (Joshi S., Haenni A. L., Hubert E., Huez G. and Marbaix G.) **275,** 339
Virus: Type C. Activation of an endogenous retrovirus from *Tupaia* (tree shrew) (Flügel R. M., Zentgraf H., Munk K. and Darai G.) **271,** 543
Immunoprevention of naturally occurring endogenous murine type-C RNA viruses (Kende M., Stephenson J. R., Kelloff G. J., Al-Ghazzouli I. K. and Dinowitz M.) **273,** 383
Virus: Whitepox. The enigma of poxviruses, *news and views*, (Zuckerman A. and Rondle C.) **276,** 212
Whitepox virus isolated from hamsters inoculated with monkeypox virus (Marennikova S. S. and Shelukhina E. M.) **276,** 291
Virus: Xenotropic. Are spleen focus-forming virus sequences related to xenotropic viruses and expressed specifically in normal erythroid cells? (Pragnell I. B., McNab A., Harrison P. R. and Osterag W.) **272,** 456
Virus-like particle. Virus-like particles pathogenic to salivary glands of the tick *Boophilus microplus* (Megaw M. W. J.) **271,** 483
Visa. ICSU investigates refused visas, *news*, **275,** 577
Vision. Cortical magnification factor predicts the photopic contrast sensitivity of peripheral vision (Näsänen R.) **271,** 54
Development of eye alignment in cats (Olson C. R. and Freeman R. D.) **271,** 446
Directed outgrowth of optic fibres regenerating *in vitro* (Johns P. R., Yoon M. G. and Agranoff B. W.) **271,** 360
Does colour provide an input to human motion perception? (Ramachandran V. S. and Gregory R. L.) **275,** 55
Evoked potential evidence of adaptation to spatial Fourier components in human vision (Smith A. T. and Jeffreys D. A.) **274,** 156
Gunning for reductionism (Granit R.) *book review by* Blakemore C. **272,** 772
Long-term retention of single and multistate prismatic adaptation by humans (McGonigle B. O. and Flook J.) **272,** 364
Movements of the Eyes (Carpenter R. H. S.) *book review by* Donaldson I. M. L. **274,** 516
Response properties of dipteran giant visual interneurones involved in control of optomotor behaviour (Eckert H. E.) **271,** 358
Spectral sensitivity of the red and yellow oil droplet fields of the pigeon (*Columba livia*) (Martin G. R. and Muntz W. R. A.) **274,** 620
Telephoto lens system of falconiform eyes (Snyder A. W. and Miller W. H.) **275,** 127
Texture discrimination and Fourier analysis in human vision (Mayhew J. E. W. and Frisby J. P.) **275,** 438
The Miracle of VisionThe Workings and Wonders of the Human Eye (Freese A. S.) *book review by* Ball G. **272,** 290
Transient tritanopia experiment in blue cone monochromacy (Hansen E., Seim T. and Olsen B. T.) **276,** 390
Ultraviolet light detection by the homing pigeon (Kreithen M. L. and Eisner T.) **272,** 347
Why do we not perceive photons? (Ross J. and Campbell F. W.) **275,** 541
Limit of single vision in stereopsis depends on contour sharpness (Kulikowski J. J.) **275,** 126
Vision: Stereoscopic. Stereoscopic visual processing, *news and views*, (Pettigrew J.) **273,** 9
Visual cortex. Cortical magnification factor predicts the photopic contrast sensitivity of peripheral vision (Näsänen R.) **271,** 54
Hypercomplexities in the visual cortex, *news and views*, (Movshon J. A.) **272,** 305
Local perfusion of noradrenaline maintains visual cortical plasticity (Pettigrew J. D. and Kasamatsu T.) **271,** 761
Ocular motility and recovery of orientational properties of visual cortical neurones in dark-reared kittens (Buisseret P., Gary-Bobo E. and Imbert M.) **272,** 817
Transient increase in muscarinic acetylcholine receptor and acetylcholinesterase in visual cortex on first exposure of dark-reared rats to light (Rose S. P. R. and Stewart M. G.) **271,** 169
Functional specialisation in the visual cortex of the rhesus monkey, *review article*, (Zeki S. M.) **274,** 423
Visual processing. Stereoscopic visual processing, *news and views*, (Pettigrew J.) **273,** 9
Visual space. The neural representation of visual space (Hughes A.) **276,** 422
The neural representation of visual space—Reply, *matters arising*, (Drasdo N.) **276,** 422
Visual system. Handbook of Sensory Physiology (Crescitelli F. *editor*) *book review by* Holden A. L. **275,** 257
Mechanism for the formation of synaptic projections in the arthropod visual system (Macagno E. R.) **275,** 318
Neuronal properties underlying processing of visual information in the barnacle (Stuart A. E. and Oertel D.) **275,** 287
Saccadic eye movements and visual stability (Lennie P. and Sidwell A.) **275,** 766
Saccadic eye movements and visual stability (Lennie P. and Sidwell A.) **275,** 766
Internal desynchronisation of bilaterally organised circadian oscillators in the visual system of insects (Koehler W. K. and Fleissner G.) **274,** 708
Visual tracking. Perceptual effect of pursuit eye movements in the absence of a target (Ward R. and Morgan M. J.) **274,** 158
Vitamin. Vitamin needs, *news and views*, (Jukes T. H.) **272,** 395
Vitamin A. Retinol induces density-dependent growth inhibition and changes in glycolipids and LETS (Patt L. M., Itaya K. and Hakomori S. I.) **273,** 379
A vitamin A analogue inhibits radiation-induced oncogenic transformation (Harisiadis L., Miller R. C., Hall E. J. and Borek C.) **274,** 486
Vitamin A transporting protein. Anti-idiotypic antibodies against anti- vitamin A transporting protein react with prealbumin (Sege K. and Peterson P. A.) **271,** 167
Vitamin D. Resurgence of vitamin D, *news and views*, (Hay A.) **273,** 426
24, 25-Dihydroxyvitamin D is a metabolite of vitamin D essential for bone formation (Ornoy A., Goodwin D., Noff D. and Edelstein S.) **276,** 517
Effect of growth hormone on vitamin D metabolism (Spanos E., Barrett D., MacIntyre I., Pike J. W., Safilian E. F. and Haussler M. R.) **273,** 246
Vitamin D_3. Site of $1,25(OH)_2$ vitamin D_3 synthesis in the kidney (Brunette M. G., Chan M., Ferriere C. and Roberts K. D.) **276,** 287
Vitellogenin. Translation of *Xenopus* vitellogenin mRNA during primary and secondary induction (Farmer S. R., Henshaw E. C., Berridge M. V. and Tata J. R.) **273,** 401
Vitrification. Fracture leads in vitrification of radiowastes, *news and views*, (Cahn R. W.) **274,** 743
Vitrinite. Pressure retardation of vitrinite diagenesis, offshore north-west Europe (McTavish R. A.) **271,** 648
Volcan Poas. Subaqueous sulphur lake in Volcan Poas (Bennett F. D. and Raccichini S. M.) **271,** 342
Volcanic. Volcanics from the Sierra Leone Rise (Hékinian R., Bonte P., Dudley W., Blanc P. L., Jehano C., Labeyrie L. and Duplessy J. C.) **275,** 536
Volcanic dust. Volcanic dust and changes in Northern Hemisphere temperature (Miles M. K. and Gildersleeves P. B.) **271,** 735
Volcanic dust influence on glacier mass balance at high latitudes (Bradley R. S. and England J.) **271,** 736
Volcanic eruption. An explosive volcanic eruption in the Southern Hemisphere in 1928 (Hoyt D. V.) **275,** 630
Volcanism. Off-ridge volcanism and seafloor spreading in the Shikoku Basin (Klein G. D., Kobayashi K., Chamley H., Curtis D. M., Dick H. J. B., Echols D. J., Fountain D. M., Kinoshita H., Marsh N. G., Mizuno A., Nisterenko G. V., Okada H., Sloan J. R., Waples D. M. and White S. M.) **273,**

746
Andesitic volcanism and crustal evolution (Eichelberger J. C.) **275,** 21
Early Cretaceous basalt volcanism and initial continental rifting in Benue Trough, Nigeria (Olade M. A.) **273,** 458
Why subduction volcanism varies, *news and views,* (Smith P. J.) **273,** 425
Volcano. Anomalous upper mantle structure beneath the Cretaceous Fogo seamounts indicated by P-wave reflection delays (Stewart I. C. F. and Keen C. E.) **274,** 788
Cl and Br degassing by volcanism along the Reykjanes Ridge and Iceland (Unni C. K. and Schilling J-G.) **272,** 19
K–Ar age of the late Pleistocene eruption of Toba, north Sumatra (Ninkovich D., Shackleton N. J., Abdel-Monem A. A. Obradovich J.D. and Izett G.) **276,** 574
Lateral magma flow within rifted Icelandic crust (Sigurdsson H. and Sparks S. R. J.) **274,** 126
Volume and extent of the Minoan tephra from Santorini Volcano: new evidence from deep-sea sediment cores (Watkins N. D., Sigurdsson H., Huang T. C., Federman A., Ninkovich D.) **271,** 122
What happened at Heimaey? *correspondence,* (Sigurdsson H. and Sparks S.) **271,** 108
Vomeronasal system. Urine-induced reflex ovulation in anovulatory rats may be a vomeronasal effect (Johns M. A., Feder H. H., Komisaruk B. R. and Meyer A. D.) **272,** 446
Voyager. Hydrogen Lβ and Lα emission lines observed from the interplanetary medium by the Voyager UV spectrometer (Sandel B. R., Shemansky D. E. and Broadfoot A. L.) **274,** 666
Voyager scientific platform jammed, *news,* **272,** 120
W particle High energy physics. Hunting the W, *news and views,* (Landshoff P.) **274,** 214
Wart: Genital. Viral sequences related to a human skin papillomavirus in genital warts (Orth G., Favre M., Jablonska S., Brylak K. and Croissant O.) **275,** 334
Warwick J. *obituary* (Warwick J.) **276,** 428
Water adsorption. Determination of water adsorption sites in wood by a hydrogen–deuterium exchange (Taniguchi T., Harada H. and Nakato K.) **272,** 230
Water Balance. Water Balance in Land Arthropods (Edney E. B.) *book review by* Beament J. **272,** 473
Water contamination. Mercury in fish and waters of the Irish Sea and other United Kingdom fishing grounds (Gardner D.) **272,** 49
Water pollution. UK wants collaboration on water pollution, *news,* **273,** 181
Water resource. Poland plans hydrological atlas, *news,* **272,** 570
Water Supply. Climate and Water Supply (US National Research Council) *book review by* Gribbin J. **272,** 740
Water vapour. Absorption by water vapour at 7.1 cm^{-1} and its temperature dependence (Llewellyn Jones D. T., Knight R. J. and Gebbie H. A.) **274,** 876
Waterlogging. Adaptations to waterlogged environments, *news and views,* (Moore P. D.) **271,** 209
Wave motion. Waves in narrow channels: faster capillary waves (Scott J. C. and Benjamin T. B.) **276,** 803
Wave power. Enthusiasm for UK wave power survives high costs, *news,* **276,** 433
Wave theory. Waves in Fluids (Lighthill J.) *book review by* Stewartson K. **274,** 930
Weather. A bad year for weather, a good one for climate, *news,* **273,** 88
Solar modulation of atmospheric electrification and possible implications for the Sun-weatherrelationship (Markson R.) **273,** 103
Analysis of a possible Sunweather correlation (Gerety E. J., Olson R. H. and Orr Roberts W.) **272,** 231
Solar terrestrial influences on weather and climate (Siscoe G. L.) **276,** 348
Three-dimensional storm motion detection by conventional weather radar (Rinehart R. E. and Garvey E. T.) **273,** 287
Weightlessness. Salyut-6 used for weightlessness experiments, *news,* **271,** 601
Welding. Interfacial noble-metal corrosion in metal to ceramic reaction welding (de Bruin H. J.) **272,** 712
Whale. Crisis for sperm whales, *news,* (Beddington J.) **276,** 656
Whale Manual '78 (Friends of the Earth) *book review by* Dunn M. **275,** 348
Whaling. Whaling: past, present and future, *news and views,* (May R. M.) **276,** 319
Wheat. Regulation of nitrate reduction by light, ATP and mitochondrial respiration in wheat leaves (Sawhney S. K., Naik M. S. and Nicholas D. J. D.) **272,** 647
Tolerance of *Triticale* wheat and rye to copper deficiency (Graham R. D.) **271,** 542
Wheat genetics, *news and views,* (Lupton F. G. H.) **272,** 497
Whisker. Removal of whiskers in young rats causes functional changes in cerebral cortex (Waite P. M. E. and Taylor P. K.) **274,** 600
Whistler-mode signal. Modulational instability of whistler-mode signals (Shukla P. K.) **274,** 874
Whistler-mode transmission. Micropulsations observed by whistler-mode transmissions (Rietveld M. T., Dowden R. L. and Amon L. E. S.) **276,** 165
White dwarf. Hard X-ray observations of white dwarf binary systems (Coe M. J., Engel A. R. and Quenby J. J.) **272,** 37
White hole. The present appearance of white holes (Lake K. and Roeder R. C.) **273,** 449
White holes (Lake K.) **272,** 599
Wildlife. The Shadow of Extinction (Mallinson J.) *book review by* Southern H. N. **273,** 690
Wilson R. W. and. A sensitive ear for the Big Bang, *news,* (Rowan-Robinson M.) **275,** 687
Wind. Equivalent circuit analysis of neutral wind effects on equatorial electrojet (Reddy C. A. and Devasia C. V.) **273,** 195
Wind shear. Observations of strong wind shear using pulse compression radar (Browning K. A., James P. K., Parkes D. M., Rowley C. and Whyman A. J.) **271,** 529
Wind shear in a monsoon depression (Raman C. R. V., Rao Y. P., Subramanian S. K. and Sheikh Z. E.) **276,** 51
Windscale. Democracy's day, *leading article,* **272,** 389
Explosion hazard at Windscale: *news,* **276,** 112
Low-level radiation, *correspondence,* (Fremlin J.) **272,** 204
Mr Justice Parker and technical fact, *news,* **272,** 300
Reprocessing plant still closed: *news,* **276,** 205
The nuclear debate is about values, *news,* (Pearce, D.) **274,** 200
Windscale: preparing MPs for an informed debate, *correspondence,* (Hooley F. M.P.) **272,** 576
After Windscale, what? *leading article,* **272,** 111
The Windscale error, *news,* (Forman N.) **273,** 332
The Windscale report, *news,* **272,** 298
Windscale go-ahead; waste committee set up, *news,* **273,** 179
windscale issues need more debate, *leading article,* **272,** 297
Windscale to be debated again, *news,* **272** 570
Wisconsin University. University fights secrecy ban on computer research, *news,* **273,** 417
Wobble hypothesis. Tilting at wobble, *news and views,* (Richards E. G.) **273,** 488
Women. Are women scientists getting a fair deal? *news,* (Brown J. W.) **272,** 658
Women scientists still lag in US, *news,* **276,** 434
Wood. Determination of water adsorption sites in wood by a hydrogen–deuterium exchange (Taniguchi T., Harada H. and Nakato K.) **272,** 230
World Atlas. Reproduction (Cohen J.) *book review by* Austin C. R. **272,** 382
World Bank. World Bank's new health commitment, *news,* (Collins P.) **271,** 603
World Climate Programme. The World Climate Programme (Mason B. J.) **276,** 327
World Health Organisation. US slashes funds to WHO and other UN agencies, *news,* **276,** 111
Wye. ARC unit closes, *news and views,* (Wain R. L.) **273,** 102
X chromosome. Both X chromosomes function before visible X-chromosome inactivation in female mouse embryos (Epstein C. J., Smith S., Travis B. and Tucker G.) **274,** 500
HGPRT activity changes in preimplantation mouse embryos (Kratzer P.G. and Gartler S. M.) **274,** 503
X ray. Hard X-ray observations of white dwarf binary systems (Coe M. J., Engel A. R. and Quenby J. J.) **272,** 37
X ray chopper. A fast interferometric chopper for neutrons and X rays (Hart M. and Siddons D. P.) **275,** 45
Xenolith. Multiple spinel-garnet peridotite transitions in upper mantle: evidence from a harzburgite xenolith (Dawson J. B., Smith J. V. and Delaney J. S.) **273,** 741
Xenopus. Pineal eye and behaviour in *Xenopus* tadpoles (Roberts A.) **273,** 774
Xenopus laevis. The use of *Xenopus* egg cells to assay the mRNA of single cells (van der Donk J. A., van Dam R. H. and Bazin H.) **271,** 479
Xeroderma pigmentosum. Deficient recovery from potentially lethal radiation damage in ataxia telangiectasia and xeroderma pigmentosum (Weichselbaum R. R., Nove J. and Little J. B.) **271,** 261
Oxygens in DNA as main targets for ethylnitrosourea in normal and xeroderma pigmentosum fibroblasts and fetal rat brain cells (Singer B., Bodell W. J., Cleaver J. E., Thomas G. H., Rajewsky M. E. and Thon W.) **276,** 85
X-ray apparatus. X-ray health and safety, *news,* (Blow D.) **272,** 196
X-ray burst. Dual character of the rapid burster and a classification of X-ray bursts (Hoffman J. A. Marshall H. L. and Lewin W. H. G.) **271,** 630
Interpretation of tails of X-ray bursts (Paradijs J. van and Lewin W. H. G.) **276,** 249
X-ray crystallography. The trouble with kinase crystals, *news and views,* (Blake C. C. F.) **271,** 707
X-ray diffraction. A direct method for determination of membrane electron density profiles on an absolute scale (Franks N. P., Arunachalam T. and Caspi E.) **276,** 530
X-ray dose. X-ray dose fractionation and oncogenic transformations in cultured mouse embryo cells, *matters arising,* (Peto R.) **274,** 926
X-ray dose fractionation and oncogenic transformations in cultured mouse embryo cells—Reply, *matters arising,* (Hall E. J. and Miller R.) **274,** 926
X-ray dose fractionation. X-ray dose fractionation and oncogenic transformations in cultured mouse embryo cells (Miller R. and Hall E. J.) **272,** 58
X-ray emission. Upper limits to X-ray emission from colliding stellar winds (Cooke B. A., Fabian A. C. and Pringle J. E.) **273,** 645
X-ray photoelectron spectroscopy. X-ray photoelectron spectroscopic evidence for trapped oxygen species in irradiated $NaClO_3$ (Copperthwaite R. G. and Lloyd J.) **271,** 141
X-ray reflection. Reflection of X rays by neutron star surfaces (Lenzen R. and Trumper J.) **271,** 216
X-ray source. A search for rapid optical periodicities from Cyg X-1 (Robinson E. L., Nather R. E., Africano J. and Smith B.) **271,** 40
An X-ray outburst from the RS CVn binary HR1099 (White N. E., Sandford P. W. and Weiler E. J.) **274,** 569
Average properties of X-ray burst sources (Paradijs J. van) **274,** 650
Contribution of intermediate luminosity X-ray galaxies to the background: Anon 0945−30 (Schnopper H. W., Davis M., Delvaille J. P., Geller M. J. and Huchra J. P.) **275,** 719
Discovery and optical identification of 2S0921 630 (Li F. K., van Paradijs J. A., Clark G. W., Jernigan J. G., Laustsen S. and Zuiderwijk E. J.) **276,** 799
Discovery of an X-ray QSO (Ricker G. R., Clarke G. W., Doxsey R. E., Dower R. J., Jernigan J. G., Delvaille J. P., MacAlpine G. M. and Hjellming R. M.) **271,** 35
Discovery of eclipsing nature of LMC X-4 (White N. E.) **271,** 38
Discovery of optical bursts from X-ray burst source MXB1735-44 (Grindlay J. E., McClintock J. E., Canizares C. R., Paradijs van J., Cominsky L., Li F. K. and Lewin W. H. G.) **274,** 567
Discovery of quiescent X-ray emission from HR 1099 and RS CVn (Walter F., Charles P. and Bowyer S.) **274,** 569
Discovery of 3.6-s X-ray pulsations from 4U0115+63 (Cominsky L., Clark G. W., Li F., Mayer W. and Rappaport S.) **273,** 367
Faint X-ray sources detected near COS B γ-ray positions (Julien P. F. and Helmken) **272,** 699
HEAO Observations of X-ray bursts from MXB1730 335 (Hoffman J. A., Wheaton W. A., Primini F. A., Campbell P., Dobson C. A., Howe, S. K. Tsiang E. Y., Scheepmaker A., Lewin W. H. G., Matteson J. L., Gruber D. E., Peterson L. E., Swank J. H., Boldt E. A., Holt S. S., Rothschild R. E. and Serlemitsos P.) **276,** 587
Holes in the microwave background? *news and views,* (Birkinshaw M. and Gull S. F.) **274,** 111
Is Fairall 9 an X-ray Seyfert galaxy? (Ricker G. R.) **271,** 334
IUE observations of X-ray sources: HD153919 (4U1 700-37), HDE226868 (Cyg X-1), HZ Her (Her X-1) (Dupree A. K., Davis R. J., Gursky H., Hartmann L. W., Raymond J. C., Boggess A., Holm A., Kondo Y., Wu C. C., Macchetto F., Sandford M. C. W., Willis A. J., Wilson R., Ciatti F., Hutchings J. B., Johnson H. M., Jugaku J., Morton D. C., Treves A. and Heuvel E. P. J. van den) **275,** 400
Long-term variability of galactic X-ray sources (Li F., Clark G. and Markert T.) **275,** 723
More on X-ray bursts, *news and views,* (Fabian A. C.) **276,** 561
N Galaxies—a new class of X-ray sources (Marshall F. E., Mushotzky R. F., Boldt E. A., Holt S. S., Rothschild R. E. and Serlemitsos P. J.) **275,** 624
Observation of X-ray eclipses from LMC X-4 (Li F., Rappaport S. and Epstein A.) **271,** 37
Positions and identifications for galactic X-ray sources 2A1822−371 and 2S1254 690 (Griffiths R. E., Gursky H., Schwartz D. A., Schwarz J., Bradt H., Doxsey R. E., Charles P. A. and Thorstensen J. R.) **276,** 247
Positions of galactic X-ray sources $320° < l^{II} < 340°$, (Apparao K. M. V., Bradt H. V., Dower R. G., Doxsey R. E. Jernigan J. G. and Li F.) **271,** 225
Positions of galactic X-ray sources: $20° < l^{II} < +6$, (Jernigan J. G., Apparao K. M. V., Bradt H. V., Doxsey R. E., Dower R. G. and McClintock J. E.) **272,** 701
Positions of galactic X-ray sources: $55° < l^{II} < 320°$ (Dower R. G., Apparao K. M. V., Bradt H. V., Doxsey R. E., Jernigan J. G. and Kulik J.) **273,** 364
Possible X-ray counterparts of γ-ray sources (Maraschi L., Markert T., Apparao K. M. V., Bradt H., Helmken H., Wheaton W., Baity W. A. and Peterson L. E.) **272,** 679
Search for X-ray emission from AO0235+164 (Dennison B., Delvaille J. P., Epstein A. and Schnopper H. W.) **276,** 375
Simultaneous radio and X-ray observations of MXB1837+05 (Ser X−1) (Ulmer M. P., Hjellming R. M., Lewin W. H. G., Hoffman J. A., Jernigan J. G., Wheaton W., Primimi F., Doty J. and Marshall H.) **276,** 799
Some recent results in X-ray astronomy, *news and views,* (Quenby J. J.) **273,** 338
SS Cygni as a hard X-ray source identified with the scanning modulation collimator on HEAO 1 (Fabbiano G., Gursky H., Schwartz D. A., Schwartz J., Brandt H. V. and Doxsey R. E.) **275,** 721
The nature of Aquila X-1 (Margon B., Katz J. I. and Petro L. D.) **271,** 633
Two X-ray periodicities from the vicinity of 4U1145−61 (White N. E., Parkes G. E., Sanford P. W., Mason K. O. and Murdin P. G.) **274,** 664
4U0241+61: a luminous low-redshift QSO (Apparao K. M. V., Bignami G. F., Maraschi L., Helmken H., Margon B., Hjellming R., Bradt H. V. and Dower R. G.) **273,** 450
X-ray active galaxies and QSOs, *news and views,* (Cooke B. A.) **274,** 16
X-ray emission from the companion to V861 Sco (Polidan R. S., Pollard G. S. G., Sanford P. W. and Locke M. C.) **275,** 296
X-ray lines and magnetic field of Her X-1 (Brecher K. and Ulmer M. P.) **271,** 135
An unusual emission-line star X-ray source radio star, possibly associated with an SNR (Clark D. H. and Murdin P.) **276,** 44
Location of pulsating binary X-ray source 4U1538-52 with the HEAO-1 scanning modulation collimator (Schwartz D. A., Gursky H., Schwarz J., Bradt H. and Doxsey R.) **275,** 517
X-ray sources. A new class of radio star (Ryle M., Caswell J. L., Hine G. and Shakeshaft J.) **276,** 571
X-Ray Spectroscopy. X-Ray Spectroscopy (Herglotz H. K. and *editor*) *book review by* Hall T. A. **274,** 298
X-ray spectrum. Determination of the $L\alpha_{1,2}$ and $L\beta$ X-ray emission spectrum of iron using a photoelectron spectrometer (Montague P. M. and Urch D. S.) **272,** 804
High energy X-ray spectrum of Her X-1 (Dennis B. R., Maurer G. S., Cutler E. P., Crannell C. J., Dolan J. F., Frost K. J. and Orwig L. E.) **275,** 195
Yawning. Cholinergic link in yawning, *matters arising,* (Cowan A.) **271,** 187
Cholinergic link in yawning Reply, *matters arising,* (Urba-Holmgren R. and Holmgren B.) **271,** 188
Yeast. Initiation of UV mutagenesis in *Saccharomyces cerevisiae* (Kilbey B. J., Brychcy T. and Nasim A.) **274,** 889
Novel cell cycle control of RNA synthesis in yeast (Fraser R. S. S. and Nurse P.) **271,** 726
Saccharomyces cerevisiae cell cycle mutant *cdc*9 is defective in DNA ligase (Johnston L. H. and Nasmyth K. A.) **274,** 891
Yeast has a true stringent response (Warner J. R. and Gorenstein C.) **275,** 338
Yeast. Efficiency of protein production from yeast grown in liquor derived from anaerobically fermented tropical pasture (Henry D. P., Greenfield P. F., Ouano E. A., Thomson R. H., Fleming G. and Minson D. J.) **274,** 619
Transformation of yeast by a replicating hybrid plasmid (Beggs J. D.) **275,** 104
Yeti. Sighting the Yeti's relatives, *news,* **271,** 603
Young's double beam interference experiment. Young's double beam interference experiment with spinor and vector waves (Byrne J.) **275,** 188
Young's modulus. Composition waves in iron-doped rutile and the relationship between Young's modulus minima and crystallographic shear orientations (Bursill L. A., Netherway D. J. and Grey I. E.) **272,** 405
Zeolite ZSM-5. Structure of synthetic zeolite ZSM-5 (Kokotailo G. T., Lawton S. L., Olson D. H. and Meier W. H.) **272,** 437
Zhabotinskii reaction. Chaos in the Zhabotinskii reaction (Rossler O. E. and Wegmann K.) **271,** 89
Zinc. Zinc in north-east Pacific water (Bruland K. W., Knauer G. A. and Martin J. H.) **271,** 741
Zinc in north-east Pacific water (Bruland K. W., Knauer G. A. and Martin J. H.) **271,** 741
Zolotov A. Tungus expert discovers biofields, *news,* **274,** 305
Zoological garden. The Last Great Wild Beast Show (Jordan B. and) *book review by* Wheater R. J. **274,** 625
Zoological Illustration. Zoological Illustration: An Essay Towards a History of Printed Zoological Pictures (Knight D.) *book review by* Rudwick M. **272,** 653
Zooplankton. Zooplankton fecal pellets and element residence times in the ocean (Cherry R. D., Higgo J. J. W. and Fowler S. W.) **274,** 246
Zygote. Uniparental inheritance is promoted by delayed division of the zygote in *Chlamydomonas* (Van Winkle-Swift K. P.) **275,** 749

SUBJECT INDEX

The following errata and corrigenda to articles which appeared in *Nature* before 1978

The attribution for the cover picture for *Nature* of 15 June 1978 (computer-generated space filling model of insulin) should read R.J. Feldmann and T.K. Porter, of The Division of Computer Research and Technology, NIH. *Corrigendum* **274**, 294, 1978.

"Birefringence signals and calcium transients in skeletal muscle" by G. Suarez-Kurtz & I. Parker. *Nature* **270**, 748, 1977; *Erratum* **271**, 585, 1978.

"Decision making in animals" by D.J. McFarland. **269**, 15, 1977; *Corrigendum* **275**, 162, 1978.

"Detection of casein messenger RNA in hormone-dependent mammary cancer by molecular hybridisation" by J. M. Rosen & S. H. Socher. *Nature* **269**, 83-86, 1977; *Corrigendum* **271**, 585, 1978.

"Evolution of dynamical systems with time-varying gravity" by A. Marchant and V. Mansfield. *Nature* **270**, 700, 1977; *Erratum* **272**, 472, 1978

"The neural representation of visual space" by N. Drasdo. *Nature* **266**, 554, 1977; *Corrigendum* **272**, 840, 1978

"Regeneration of endoderm by ectoderm isolated from mouse blastocytes" by R. Pederson. *Nature* **270**, 435, 1977; *Erratum* **272**, 286, 1978

Fascinating reading and an unusual gift

A high-quality, 40-page facsimile of the first issue of **Nature** is now available at the following prices:

UK	**75p**
Rest of World	**US $1.50** (Surface)
Rest of World	**US $2.00** (Air)

How Britain runs its science

This highly successful chart, which appeared in Nature 28 August 1975 (but is still much requested and much referred to), has now been completely revised and updated to include all major changes in the personnel and administration of British science.

Measuring approximately 2' x 3' and containing black-and-white illustrations of prominent figures, copies of this chart are now available at 75p (UK), US $1.50 (Rest of World).

Payment may be made in any currency at the prevailing exchange rate. Cheques should be made payable to Macmillan Journals Ltd. Prices include postage and packing.

To order please complete the coupon below, or write, enclosing the correct remittance.
